Patents Granted	118
Designs	263

November 2, 1948

Trade-Marks	44	No. 441,192 to No.	441,235, inclusive
T. M. (Act of 1946)	136	No. 503,573 to No.	503,708, inclusive
T. M. Renewals	62		
Plant Patent	1	No. 810	
Patents	574	No. 2,452,534 to No.	2,453,107, inclusive
Designs	92	No. 151,578 to No.	151,669, inclusive
Total	909		

Patents expiring: Patent Numbers 1,829,724 to 1,830,744, inclusive, issued November 3, 1931, expire November 3, 1948

Condition of Applications Under Examination at Close of Business Oct. 15, 1948

Total number of patent applications awaiting action, 154,650. Date of oldest new application, October 4, 1946; date of oldest amended application, April 16, 1946.

PATENT EXAMINING DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTION	Oldest new application and oldest action by applicant awaiting Office action: New	Amended	Applications awaiting action
1. GOLDBERG, A. J., Closure Operators; Fences; Gates; Planters; Plows; Harrows and Diggers; Plant Husbandry; Scattering Unloaders; Baths, Closets, Sinks, and Spittoons; Sewerage.	5-12-47	3-19-47	2828
2. HERRMANN, D., Fishing, Trapping and Vermin Destroying; Presses; Tobacco; Textile Wringers	1-31-47	9-10-46	2984
3. MARMELSTEIN, N., Metal Founding and Treatment; Metallurgy (Process and Apparatus)	1-13-48	1- 8-48	1381
4. BISHOP, WALTER C., Conveyors; Hoists; Handling Apparatus; Excavating; Elevators; Fire Escapes; Ladders; Scaffolds; Pneumatic Dispatch; Store Service; Mining, Quarrying, and Ice Harvesting.	3- 4-47	2- 3-47	4118
5. ROBINSON, C. W., Harvesters; Bee Culture; Dairy; Knotters; Animal Husbandry; Butchering	4-17-47	9-20-46	1769
6. SURLE, H., Carbon Chemistry (part)	10-30-47	10- 9-47	1794
7. HANLIN, GEORGE, Optics; Photographic Apparatus	1-34-48	10- 8-47	1640
8. LEWIS, R. O., (Acting), Furniture; Racks and Cabinets	1-11-47	10- 2-46	4409
9. BENSON, R. B., Pumps and Fans; Fluid and Fluid-Current Motors	6-30-47	2- 6-47	2268
10. ANDRUS, L. M., Radiant Energy (part, e. g., Portable Radio Sets, Radio Accessories, Detectors, Oscillation Generators, Wave Meters, Tuners); Music; Modulators; Piezo-electric Crystals.	2-13-48	12- 4-47	1630
11. BENHAM, E. V., Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whip Apparatus.	1- 8-48	1- 7-48	790
12. SPINTMAN, S., Machine Elements (part); Engine Starters; Motor Control with Clutch or Brake; Transmission with Clutch or Brake.	11-17-47	9-12-46	2239
13. BEALL, T. E., Gear Cutting, Milling, Planing, Metal Working (part); Needle and Pin Making; Turning	10- 4-46	10-16-46	2411
14. FREEHOF, H. B., Metal Working (Bending; Sheet-Metal; Wire; Misc. Processes); Wire Fabrics; Farriery	1-20-48	10-16-47	1348
15. HENKIN, B., Plastics; Plastic Block and Earthenware Apparatus; Glass	7-21-47	5-21-47	2133
16. LOVEWELL, N. N., Television; Telephony	1- 7-48	8- 1-47	1505
17. HABECKER, LEON B., Paper Manufactures; Typewriters; Printing; Type Casting and Setting; Sheet Material Associating or Folding; Sheet or Web Feeding.	4- 1-47	10-12-46	2069
18. KURZ, J. A., Motors, Expansible-Chamber Type; Power Plants; Speed Responsive Devices; Rotary Internal-Combustion Engines.	7-15-47	8- 2-46	1999
19. PATRICK, P. L., Liquid and Gaseous Fuel Burners; Stoves and Furnaces	9-18-47	2- 1-47	1888
20. BROWN, L. M., Miscellaneous Hardware; Closure Fasteners; Locks; Undertaking; Bread, Pastry, and Confection Making; Bank Protection; Safes; Tents, Canopies, Umbrellas and Canes.	4- 7-47	1-17-47	2036
21. MADER, R. O., Textiles	11-10-47	8-22-47	1255
22. CARPENTER, B. H., Aeronautics; Firearms; Ordnance	11-14-47	1- 3-47	1688
23. LEWIS, J. B., Cash Registers; Calculators and Counters; Education	10- 2-47	1-16-47	1183
24. LUSBY, CHARLES, Apparel; Apparel Apparatus; Package and Article Carriers; Sewing Machines	9-25-47	9- 9-47	2797
25. BLAKELY, C. F., Classifying Solids; Centrifugal-Bowl Separators; Mills; Threshing; Vegetable and Meat Cutters and Comminutors; Distillation.	11-25-47	2-17-47	1769
26. YOUNG, R. R., Electricity—Generation and Motive Power	1-21-48	1-13-47	1228
27. JAMES, S., Brushing, Scrubbing; Fluid Treatment of Textiles (Apparatus); Liquid Treatment of Solids; General Cleaning; Ironing; Brush, Broom and Mop Making.	7-11-47	12-27-46	3579
28. SOLYOM, H. L., Internal-Combustion Engines (part); Cylinders; Pistons; Spring, Weight and Horsepower Motors; Land Vehicles, Dumping, Wheel Substitutes; Railway Wheels and Axles.	9- 4-47	9- 3-47	963
29. SKLARIN, J. B., Baggage; Cloth, Leather, and Rubber Receptacles; Button Making; Woodworking; Tools	3-28-47	2-27-47	3192
30. BISHOFF, A., Automatic Temperature and Humidity Regulation; Thermostats and Humidostats; Heating and Heating Systems; Illuminating Burners; Ammunition and Explosive Devices.	1- 6-48	10- 3-47	1563
31. DUNCOMBE, O. S., Mineral Oils; Carbocyclic or Acyclic Carbon Compounds (part)—e. g., Ketones, Aldehydes, Ethers, Hydroxy Compounds, Hydrocarbons, Halogenated Hydrocarbons.	1-29-48	1-26-48	2174
32. LESH, KARL R., Gas and Liquid Contact Apparatus; Heat Exchange; Gas Separation; Agitating; Wells; Earth Boring.	3-31-47	11- 5-46	3228
33. KAUFFMAN, H. E., Bridges; Hydraulic and Earth Engineering; Building Structures; Roads and Pavements	2- 7-47	10-14-46	3565
34. SAPERSTEIN, S., Electricity—Transmission of Vehicles; Railways; Track Sanders; Signals and Indicators	3-15-47	10- 1-46	1509
35. BROMLEY, E. D., Card and Sign Exhibiting; Dispensing; Filling and Closing Portable Receptacles; Ammunition and Explosive Charge Making.	6- 2-47	11-15-46	3350
36. McFADYEN, A. D., Automatic Weighers; Measuring and Testing; Force Measuring	11- 4-46	10- 9-46	1990
37. WEAVER, M. E., Electricity, Circuit Makers and Breakers	1-27-48	3- 4-47	1365
38. ARNOLD, D., Coating Processes and Apparatus; Coating or Plastic Compositions (part); Rubber	8- 9-47	5-31-47	1747
39. WHITNEY, F. L., Fluid-Pressure Regulators; Valves; Water Distribution	4-19-47	9- 6-46	3014
40. DRUMMOND, E. J., Receptacles (part); Packages	12- 5-47	12-18-46	3276
41. HERTZ, M., Check-controlled Apparatus; Coin Handling; Article Dispensing Cabinets; Deposit Receptacles; Buckles, Buttons, Clasps.	1-16-48	10-17-46	2334
42. MARANS, H., Telegraphy (part); Electric Signaling; Electricity, Voltage Magnitude and Phase Control Systems; Variable Transformer and Reactor Structure.	1- 5-48	1- 9-48	1210
43. STONE, I. G., Medicines, Poisons and Cosmetics; Explosive Compositions; Sugar and Starch; Bleaching and Dyeing; Fluid Treatment of Textiles; Hides, Skins and Leathers.	1- 2-48	12- 3-47	1291
44. HARVEY, L. P., Refrigeration; Preserving	10- 5-46	9-27-46	1106
45. MANTER W. B., Shafting and Flexible Shaft Couplings; Wheels, Tires and Axles; Lubrication; Bearings and Guides; Belt and Sprocket Gearing; Spring Devices; Animal Draft Appliances; Vehicle Fenders.	3-18-47	10-12-46	2590
46. MUSHAKE, W. L., Concentrating Evaporators; Fluid Sprinkling, Spraying and Diffusing; Fire Extinguishers; Liquid Heaters and Vaporizers; Kitchen and Table Articles.	7-25-47	10-16-46	1837

Condition of Applications Under Examination—Continued

Total number of patent applications awaiting action, 154,650. Date of oldest new application, October 4, 1946; date of oldest amended application, April 16, 1946.

PATENT EXAMINING DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
47. KANOF, WM. J., Motor Vehicles; Land Vehicles (part); Fluid Pressure Brakes	12- 6-47	6-24-47	2204
48. BERNSTEIN, S., Electricity, General Applications; Electric Igniters	1-20-48	3-21-47	1529
49. SHEFFIELD, E. L., Drying and Gas or Vapor Contact with Solids; Ventilation; Liquid Separation or Purification.	10-17-47	8-30-47	1565
50. LEVIN, SAMUEL, Synthetic Resins	12-31-47	10-24-47	2270
51. FRIEDMAN, M. H., Radiant Energy (part, e. g., Radio Transmission and Reception, Transmitters, Receivers, Antennae); Radiant Energy Communications.	1-19-48	7-28-48	1784
52. KNOTTS, M. K., Supports; Chucks; Joint Packing; Pipe and Rod Joints or Couplings; Tool-Handle Fastenings; Pipes and Tubular Conduits.	10-13-47	1- 6-47	1876
53. BRINDISI, M. V., Label Pasting and Paper Hanging; Book Making; Manifolding; Printed Matter, Stationery; Paper Files and Binders; Cutlery; Closures, Partitions and Panels, Flexible and Portable.	5- 1-47	9-18-46	3589
54. STRACHAN, O. W., Electric Lamp and Discharge Devices, Systems, Structure, Manufacture and Repair; Light Sensitive Circuits; Ray Energy Applications.	1-21-48	7-18-47	1704
55. BOWEN, S. T., Artificial Body Members; Dentistry; Surgery; Toilet	10-16-47	10-17-47	1907
56. COCKERILL, S., Electrical and Wave Energy Chemistry; Paper Making; Heating and Illuminating Gas	12-16-47	11- 4-47	1062
57. MILLER, A. B., Cutting and Punching; Bolt, Nut, Rivet, Nail, Screw, Chain, and Horseshoe Making; Driven and Screw Fastenings; Nut and Bolt Locks; Jewelry; Toys	4-29-47	1-14-47	3572
58. DOWELL, E. F., Abrading; Food Apparatus; Bottles and Jars; Stone Working; Making Metal Tools and Implements.	12-31-46	1-20-47	2130
59. SHEPARD, P. W., Chemistry; Fertilizers; Gas, Heating and Illuminating; Heterocyclic Compounds (part)	8-25-47	4-18-47	2026
60. GLASS, R. L., Electricity—Heating; Welding; Furnaces; Battery Charging and Discharging; Consumable Electrode Lamp and Discharge Devices; Resistances and Rheostats; Prime Mover Dynamo Plants.	2-13-48	7- 9-47	1407
61. LANNAN, J., Winding and Reeling; Pushing and Pulling; Horology; Time-Controlling Apparatus; Railway Mail Delivery; Boats, Buoys, Ships and Marine Propulsion.	12- 3-46	6-17-46	3767
62. PUGH, E. C., Games; Tables; Amusement and Exercising Devices; Mechanical Guns and Projectors	6-14-47	9-17-46	1884
63. WINKELSTEIN, A. H., Fermentation; Foods and Beverages; Heterocyclic Compounds (part); Oils and Fats.	9-30-47	9-13-47	1372
64. NASH, P. M., Compositions—Coating or Plastic (part); Fuel and Miscellaneous	3-15-48	3-13-48	1589
65. McDERMOTT, F. P., Batteries; Electrical Conductors, Conduits, Insulators and Connectors; Illumination	1-16-48	6-28-47	2170
66. LISANN, L., Geometrical Instruments	6- 5-47	4-16-46	2079
67. KRAFFT, C. F., Laminated Fabrics; Photographic Processes and Products; Ornamentation	8- 1-47	4-30-47	1997
68. BERMAN, H., Brakes, Boring and Drilling; Clutches and Power Stop Control	2-26-48	8- 5-47	1483
69. GALVIN, D. J., Electricity—Wave Transmission, Repeaters and Relays (e. g., Amplifiers), Galvanometers and Meters; Acoustics, Sound Recording; Recorders.	7- 1-47	11- 1-46	1933
DESIGNS: BREHM, G. L.	2-28-47	2-11-48	7676

Total number of trade-mark applications awaiting action (including renewals and republications) 39,160. Date of oldest new application, Sept. 18, 1947; date of oldest amended application, Mar. 3, 1948.

TRADE-MARK EXAMINING DIVISIONS, EXAMINERS AND TRADE-MARK CLASSES UNDER EXAMINATION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
1. BARBOUR, H. E., Classes 1, 4, 5, 6 (part), 12, 31, 44	1-10-48	6-10-48	3024
2. KASCHUB, H. E., Classes 2, 15, 30, 33, 36, 46, 50	10- 4-47	3-20-48	5633
3. SUMMERS, G. S., Classes 13, 21, 23, 26	9-18-47	4-30-48	4901
4. BARR, E., Classes 3, 7, 39, 40, 41, 42, 43	10-20-47	3- 3-48	4407
5. RACKNOR, M., Classes 8, 17, 20, 24, 25, 32, 37, 38, 45, 47, 48, 49	10-10-47	3-11-48	3450
6. STERBA, J. R., Classes 6 (part), 9, 10, 11, 14, 22, 27, 28, 29, 34, 35	11-28-47	8- 3-48	3247
7. KEYS, O. M., Classes 16, 19, 55	11- 3-47	3-27-48	2176
8. GEDIMAN, H. W. {Renewals / Republications} All Classes	9-15-48	9-30-48	37
	11- 3-47	9-25-48	12285

LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

Accuracy Rig Tool Company, Houston, Tex. Soluble salt. Serial No. 546,812, Nov. 2. Class 6.

Aerovox Corporation, New Bedford, Mass. Electric condensers. Serial No. 544,645, Nov. 2. Class 21.

Alamo Manufacturing Co., Inc., New York, N. Y. Women's housedresses. Serial No. 531,176, Nov. 2. Class 39.

Allen, Mary L., Newark, N. J. Hair and scalp cream preparations. Serial No. 522,298, Nov. 2. Class 6.

Alside, Inc., Akron, Ohio. Metallic lap siding for buildings. Serial No. 549,103, Nov. 2. Class 12.

American Bitumuls Company, Wilmington, Del., and San Francisco, Calif. Periodical publications. Serial No. 554,461, Nov. 2. Class 38.

American Brake Shoe Company, New York, N. Y. Castings and forgings; welding rods; railroad frogs, etc. Serial No. 520,666, Nov. 2. Class 14.

American Buckle Company, The, West Haven, Conn. Suspender slides or buckles. Serial No. 552,203, Nov. 2. Class 40.

American Millwork Company, New Hyde Park, Long Island, N. Y. All-aluminum combination screen and window. Serial No. 548,226, Nov. 2. Class 12.

Amerskin, Inc.: *See*—
Zang, Perry N.

Amphac Laboratories, Inc., Everett, Wash. Medicinal preparation. 549,106, Nov. 2. Class 6.

Anchor Rubber Products, Inc., Cleveland, Ohio. Automobile floor mats. Serial No. 536,985, Nov. 2. Class 50.

Anheuser-Busch, Inc., St. Louis, Mo. Modified (i. e., oxidized or chlorinated) starch. Serial No. 549,042, Nov. 2. Class 6.

Armand Company, The, Des Moines, Iowa. Cologne. Serial No. 512,227, Nov. 2. Class 6.

Askin and Askin, Baltimore, Md. Men's, ladies', infants' and children's hosiery, underwear, handkerchiefs, etc. Serial No. 519,562, Nov. 2. Class 39.

Associated Merchandising Corporation, The, New York, N. Y. Electric refrigerators. Serial No. 547,504, Nov. 2. Class 31.

Associated Spring Corporation, Bristol, Conn. Periodical publication. Serial No. 551,431, Nov. 2. Class 38.

Atlas Fumigating and Exterminating Company: *See*—
Stover, William J.

Atlas Overhead Door Company, Quakertown, Pa. Doors of the overhead type. Serial No. 517,884, Nov. 2. Class 12.

Autographic Register Company, Hoboken, N. J. Strips, leaves, and sheets of plain, lithograph and printing paper. Serial No. 527,566, Nov. 2. Class 37.

Avilite, Inc., Burbank, Calif. Insecticides. Serial No. 520,605, Nov. 2. Class 6.

Baco Accessories Company, Hollywood, Calif. Photographic products. Serial Nos. 526,715–16, Nov. 2. Class 26.

Berger, Samuel, doing business as Montauk Shirt Company, New York, N. Y. Men's dress shirts, sportswear. Serial No. 504,316, Nov. 2. Class 39.

Bettencourt, A. T., Turlock and Huron, Calif. Fresh vegetables, fresh melons and fresh grapes. Serial No. 508,023, Nov. 2. Class 46.

Bobopen, Inc., Colorado Springs, Colo. Device for opening bobby pins. Serial No. 534,504, Nov. 2. Class 40.

Botany Mills, Inc., Passaic, N. J. Hand knitting yarns. Serial No. 531,765, Nov. 2. Class 43.

Boyle-Midway Inc., Jersey City, N. J. Crack filler. Serial No. 539,932, Nov. 2. Class 12.

Brown & Bigelow, St. Paul, Minn. Mechanical pencils. Serial No. 512,375, Nov. 2. Class 37.

Brown Shoe Company, Inc., St. Louis, Mo. Shoes. Serial No. 536,580, Nov. 2. Class 39.

Bunyan, Paul, Bait Company, The, Minneapolis, Minn. Fishing tackle, equipment, and supplies. Serial No. 540,380, Nov. 2. Class 22.

Burdick Corporation, The, Milton, Wis. Therapeutic appliances. Serial No. 514,752, Nov. 2. Class 44.

Burkhardt Company, The, Detroit, Mich. Display type loose-leaf portfolios. Serial No. 541,738, Nov. 2. Class 3.

Burkhardt Company, The, Detroit, Mich. Portfolios and loose leaf binder equipped portfolis. Serial No. 541,739, Nov. 2. Class 3.

Calva, J. B., and Company: *See*—
Calva, Jose B.

Calva, Jose B., doing business as J. B. Calva and Company, Minneapolis, Minn. Shampoo and hand and scalp creams. Serial No. 546,757, Nov. 2. Class 6.

Campus Jewelry Products, Inc., Providence, R. I. Jewelry. Serial No. 524,948, Nov. 2. Class 28.

Caron Corporation, New York, N. Y. Perfume, toilet water, and perfumed liquid bath preparation. Serial No. 547,698, Nov. 2. Class 6.

Central Scientific Company, Chicago, Ill. Reagents and volumetric solutions. Serial No. 528,077, Nov. 2. Class 6.

Chick Bed Company, Cedar Rapids, Iowa. Diatomaceous earth. Serial No. 533,442, Nov. 2. Class 1.

Clayton, Benjamin: *See*—
Vodol Company.

Cleveland Heater Company, The, Cleveland, Ohio. Metallic fittings and alloys. Serial No. 518,277, Nov. 2. Class 14.

Clover Farm Stores Corporation, Cleveland, Ohio. Wall paper cleaner, rug shampoo, dry cleaner, etc. Serial No. 554,093, Nov. 2. Class 4.

Colorado River Farms, Incorporated, Blythe, Calif. Fresh melons and fresh vegetables. Serial No. 516,890, Nov. 2. Class 46.

Condo, Henry J., Raritan, N. J. Concrete blocks and concrete cinder blocks. Serial No. 549,122, Nov. 2. Class 12.

Consolidated Cosmetics, assignor to Consolidated Cosmetics, Chicago, Ill. Perfume, cologne, deodorant, etc. Serial No. 542,536, Nov. 2. Class 6.

Continental Distilling Corporation, Philadelphia, Pa. Distilled potable alcoholic beverages. Serial No. 538,247, Nov. 2. Class 49.

Continental Elastic Corporation, The, New Bedford, Mass. Narrow elastic fabric. Serial Nos. 530,722–3, Nov. 2. Class 40.

Cooper, Lillian, Cosmetics, Ltd., New City, N. Y. Lipstick and cream rouge. Serial No. 549,514, Nov. 2. Class 6.

Corona Foothill Lemon Company, Corona, Calif. Fresh citrus fruits. Serial No. 535,816, Nov. 2. Class 46.

Cow, P. B., & Co. Limited, London, England. Douche devices, tubular rubber sleeves with conical projections, and hot bottles. Serial No. 535,820, Nov. 2. Class 44.

Craftest Foods, Inc., Sand Springs, Okla. Peanut butter, imitation fruit jellies and vinegar. Serial No. 533,849, Nov. 2. Class 46.

Crown Zellerbach Corporation, San Francisco, Calif. Toilet tissue. Serial No. 542,002, Nov. 2. Class 37.

Crown Zellerbach Corporation, doing business as The National Paper Products Co. and Nata Products Company, San Francisco, Calif. Paper towels and toilet tissue. Serial No. 542,013, Nov. 2. Class 37.

Darden, Chas. E., & Co., Dallas, Tex. Popcorn. Serial No. 500,957, Nov. 2. Class 46.

Day's Tailor-D Clothing, Inc., Tacoma, Wash. Men's and boys' corduroy slacks. Serial No. 514,806, Nov. 2. Class 39.

D'Azzo, Errol P., New York, N. Y. Galvanized bars. Serial No. 503,978, Nov. 2. Class 13.

Denis, David R., Winnetka, Ill. Display mounting for coins. Serial No. 522,074, Nov. 2. Class 32.

Diamond Alkali Company, Cleveland, Ohio. Inorganic detergent. Serial No. 561,891, Nov. 2. Class 4.

Diamond Alkali Company, Cleveland, Ohio. Inorganic detergent. Serial No. 561,893, Nov. 2. Class 4.

Diamond Alkali Company, Cleveland, Ohio. Inorganic detergent. Serial No. 561,902, Nov. 2. Class 4.

Dockson Corporation, Detroit, Mich. Welding shield. Serial No. 545,354, Nov. 2. Class 26.

Dominant, Incorporated, Attleboro, Mass. Watch attachments and bracelets. Serial No. 510,663, Nov. 2. Class 28.

Dresner, S., & Son, Inc., Chicago, Ill. Hand luggage. Serial No. 549,911, Nov. 2. Class 3.

"Dynamo" Tulle Importing Co., Inc., The, New York, N. Y. Tulles, muslins, crepes, etc. Serial No. 526,207, Nov. 2. Class 42.

Eberhard Faber Pencil Company, Brooklyn, N. Y. Crayons. Serial No. 539,944, Nov. 2. Class 37.

Economic Trend Line Studies: *See*—
Tripp, Chester D.

Electrical Publications, Inc., Chicago, Ill. Monthly magazine. Serial No. 537,996, Nov. 2. Class 38.

Electro Manufacturing Corporation, Chicago, Ill. Electric bed lamps. Serial No. 528,916, Nov. 2. Class 21.

Endicott Johnson Corporation, Endicott, N. Y. Golf balls. Serial No. 533,557, Nov. 2. Class 22.

Escalante, Jose, & Co., Chicago, Ill. Cigars. Serial No. 533,238, Nov. 2. Class 17.

Escalante, Jose, & Co., Chicago, Ill. Cigars. Serial No. 533,240, Nov. 2. Class 17.

Escalante, Jose, & Co., Chicago, Ill. Cigars. Serial Nos. 533,245–6, Nov. 2. Class 17.

Feature Ring Co., Inc., New York, N. Y. Mountings for jewelry. Serial No. 539,866, Nov. 2. Class 28.

Fisher Dairy & Cheese Company, doing business as Koneta Foods Company, Wapakoneta, Ohio. Cheese. Serial No. 536,883, Nov. 2. Class 46.

Fletcher Paper Company, Alpena, Mich. Printing paper. Serial No. 532,670, Nov. 2. Class 37.

Franklin County Coal Corporation, Chicago, Ill. Bituminous coal. Serial No. 529,001, Nov. 2. Class 1.

United Wallpaper, Inc.: *See*—
Burton, William.
Wendt, Robert H., Evanston, Ill. Pancake turner or similar article. 151,666, Nov. 2.
Willson Products, Inc., assignee: *See*—
Mackenzie, Donald M.
Wolfe, Chesley L., Richmond, Calif. Combined cabinet and douche tank. 151,667, Nov. 2.
Wriede, Philip P., New York, and H. Pike, Brooklyn, N. Y. Iron stand. 151,668, Nov. 2.
Youhouse, Joseph, Fairfield, Conn. Rotor plane. 151,669, Nov. 2.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 2D DAY OF NOVEMBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abbott Laboratories, assignee: *See*—
Fields, Mack R.
Abraham, Herbert, assignor to The Ruberoid Co., New York, N. Y. Interlocking strip-shingles. 2,452,708, Nov. 2.
Aiman, Rolland B., Pendleton, Ind. Lubricating system for adjustable multiple spindle drill head. 2,452,709, Nov. 2.
Aircraft-Marine Products Inc., assignee: *See*—
Johnson, James O.
Aktiengesellschaft Brown, Boveri & Cie, assignee: *See*—
Meyerhans, August.
Allard, Pierre J. T., Chantilly, assignor to Societe Francaise De Construction De Bennes Automatiques, Persan (Seine-et-Oise), France. Hoisting apparatus. 2,453,082, Nov. 2.
Allen, Elmo W., assignor to Stan-Wall Manufacturing Company, Fresno, Calif. Tongue stabilizer for vehicles. 2,452,710, Nov. 2.
Allison, John L.: *See*—
Busignies, Henri G., and Allison.
Alpers, Henry, Columbus, Nebr. Screw and toggle adjusted wrench and clamp. 2,452,625, Nov. 2.
Aluminum Company of America, assignee: *See*—
Kempf, Louis W., and Eastwood.
Aluminum Cooking Utensil Company, The, assignee: *See*—
Guild, Lurelle, and Towne.
Amber, Yervant, Los Angeles, Calif. Garment clamp. 2,452,891, Nov. 2.
American Can Company, assignee: *See*—
Jones, Lyman L.
Maher, William W.
Nordquist, Roland E. J.
American Cyanamid Company, assignee: *See*—
Carpenter, Erwin L.
Davis, Harold S., and Carpenter.
American Instrument Co., Inc., assignee: *See*—
Morris, Nathan.
Anderson, Ralph V., U. S. Navy. Apparatus for automatically controlling duration of electrical current. 2,452,537, Nov. 2.
Anderson & Sons, Inc., assignee: *See*—
Henry, George W.
Anthony, John C.: *See*—
Tomkins, Walter M., Larkin, Anthony, Ross, and Mero.
Apex Tool & Cutter Company, assignee: *See*—
Sheridan, Henry M.
Appleton, Robert A., Inyokern, Calif., C. N. Hickman, Jackson Heights, N. Y., and C. F. Bjork, Luke, Md., assignors to the United States of America as represented by the Secretary of War. Igniter for rockets. 2,452,892, Nov. 2.
Arenco Aktiebolog, assignee: *See*—
Ekström, Gunnar, and Öström.
Argus, Incorporated, assignee: *See*—
Meyer, Clarence H.
Armco Steel Corporation, assignee: *See*—
Feild, Alexander L.
Aronson, David, Greensburg, assignor to Elliott Company, Jeannette, Pa. Refrigerating apparatus. 2,452,711, Nov. 2.
Ashbaugh, Bernard D., Mount Gilead, Ohio, assignor to H-P-M Development Corporation, Wilmington, Del. Injection machine. 2,453,058, Nov. 2.
Ashton, Roy S., Brooklyn, N. Y. Extensible safety suspenders. 2,452,538, Nov. 2.
Associated Patentees, Inc., assignee: *See*—
Powers, Walter P.
Atlee, Zed J., Elmhurst, assignor to General Electric X-Ray Corporation, Chicago, Ill. Electron emitter. 2,452,626, Nov. 2.
Atwell, Harold V., Beacon, assignor to The Texas Company, New York, N. Y. Producing hydrocarbon and the like. 2,452,712, Nov. 2.
Bachelder, Albert J.: *See*—
Land, Edwin H., Bachelder, and Wolff.
Bachman, Charles H., Scotia, N. Y., assignor to General Electric Company. Electron lens assembly. 2,452,893, Nov. 2.
Backs, William H., Lockwood, Mo. Sack holder. 2,452,826, Nov. 2.
Bacon, Frederick E.: *See*—
Kroll, William J., and Bacon.
Baecher, Bernard J., New York, N. Y. Self-balancing potentiometer. 2,452,539, Nov. 2.
Bakelite Corporation, assignee: *See*—
Butler, William H.
Baker, J. T., Chemical Co., assignee: *See*—
Little, Kenneth B., and Burton.
Baldwin Locomotive Works, The, assignee: *See*—
Jones, Edgar J.
Ball, Charles J. P., London, A. C. Jessup, and E. F. Emley, Clifton Junction Works, near Manchester, and J. B. Wilson, Swinton, Manchester, assignors to Magnesium Elektron Limited, London, England. Producing magnesium-zirconium alloys. 2,452,894. Nov. 2.
Ballard, Seaver A.: *See*—
Williams, Paul H., and Ballard.
Bandy, Roy W., Aspen, Colo. Filler cap support. 2,452,713, Nov. 2.
Bannister, Walter L., Fort William, Ontario, assignor to L. W. Bennett, Port Arthur, Ontario, Canada. Stocking stretcher. 2,453,059, Nov. 2.
Barfod, Frederik, and E. O. Wirth, assignors to Bendix Aviation Corporation, South Bend, Ind. Fuel supply system. 2,452,627, Nov. 2.
Barnard, Harold, Houston, Tex., assignor to The Whitehead Bros. Rubber Company. Piston. 2,452,714, Nov. 2.
Barnard, Roy M., London, England, assignor to International Standard Electric Corporation, New York, N. Y. Electrical condenser. 2,452,540, Nov. 2.
Bartlett, Kenneth M., and E. G. Pekarek, assignors to Thompson Products, Inc., Cleveland, Ohio. Making hollow poppet valves. 2,452,628, Nov. 2.
Bauer, Robert F., and H. J. Matthews, assignors to Union Oil Company of California, Los Angeles, Calif. Process and apparatus for treating bituminous sands. 2,453,060, Nov. 2.
Bauer, William, assignor to The Tappan Stove Company, Mansfield, Ohio. Concealed venting means for stoves. 2,452,715, Nov. 2.
Bearden, Fred E., Spartanburg, S. C. Sharpening device for the cutting rollers of pencil sharpeners. 2,452,827, Nov. 2.
Beaver, John W. P.: *See*—
Pool, John E., and Beaver.
Bell, Nicholas, Dearborn, Mich. Boring head. 2,452,828, Nov. 2.
Bell Telephone Laboratories, Incorporated, assignee: *See*—
Hansen, Rolf K.
Harrison, Henry C.
Hecht, George, and Meacham.
Koenig, Walter, Jr.
Ramsden, Clayton W.
Rieke, John W.
Belmont Radio Corporation, assignee: *See*—
O'Brien, Edgar.
Beltz, John S., Columbus, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company. Belt tensioning mechanism for conveyors. 2,452,980, Nov. 2.
Bendix Aviation Corporation, assignee: *See*—
Barfod, Frederik, and Wirth.
Cautley, John R.
Frei, Jakob R.
Gagen, Charles V.
Streblinger, Richard R.
Tognola, Tullio, and Segall.
Benedek, Elek K., Chicago, Ill. Rotary hydraulic machine. 2,452,541, Nov. 2.
Bennett, Leonard W., assignee: *See*—
Bannister, Walter L.
Benning, Walter F., Toledo, Ohio, assignor to Mack Manufacturing Corporation, New York, N. Y. Combined throttle and brake pedal. 2,452,981, Nov. 2.
Bergquist, Carl H., Forest Hills, assignor to Elliott Company, Jeannette, Pa. Deaerating heater. 2,452,716, Nov. 2.
Bernas, Robert: *See*—
Yardeny, Michel N., and Bernas.
Bird, Byron M., Columbus, Ohio, assignor to The Jeffrey Company. Submerged reciprocating screen. 2,452,982, Nov. 2.
Birdseye, Clarence, assignor to Dehydration, Inc., Gloucester, Mass. Desiccating food products. 2,452,983, Nov. 2.
Bissout, Herbert A., Merchantville, N. J., and W. Y. Borresen, assignors to W. K. Mitchell & Company, Inc., Philadelphia, Pa. Electric resistance and filler metal butt welding. 2,453,061, Nov. 2.
Bjork, Carold F.: *See*—
Appleton, Robert A., Hickman, and Bjork.
Blau, Arthur H., assignor to Sterling Motor Truck Company, Inc., Milwaukee, Wis. Wheel brake adjusting mechanism. 2,452,717, Nov. 2.
Blaydes, Frederick T., Canton, Ill., assignor to International Harvester Company. Tractor attaching structure for implements. 2,452,829, Nov. 2.

Blom, Øyvind, Brooklyn, N. Y. Advance and retard injection mechanism for Diesel engines. 2,452,984, Nov. 2.

Bluestein, Ben A., Schenectady, N. Y., assignor to General Electric Company. Linear silmethylenesiloxane. 2,452,895, Nov. 2.

Blythe, James H., Denver, Colo. Cutting torch holder. 2,452,718, Nov. 2.

Boden, Ernest G., assignor to The Timken Roller Bearing Company, Canton, Ohio. Bearing lubrication. 2,452,719, Nov. 2.

Bodkin, John A., New York, N. Y. Railway car retarder. 2,452,720, Nov. 2.

Bold, Ralph E.: *See*—
Paul, William E., Timmerman, Jr., and Bold.

Bonekamp, Joseph J., Cincinnati, Ohio. Cake protecting device. 2,452,629, Nov. 2.

Bonney, Homer W. and M., Roseville, Calif. Cement mixer. 2,452,896, Nov. 2.

Bonney, Mahlon: *See*—
Bonney, Homer W. and M.

Booher, Ortis C., Fort Wayne, Ind., assignor, by mesne assignments, to Farnsworth Research Corporation. Automatic record changing apparatus. 2,452,721, Nov. 2.

Boothby, Walter M., and A. H. Bulbulian, Rochester, Minn., and W. R. Lovelace, II, Albuquerque, N. Mex. Clinical mask for breathing and rebreathing mixtures of gases. 2,452,722, Nov. 2.

Borresen, William Y.: *See*—
Bissout, Herbert A., and Borresen.

Bossard, Gisbert L., Cleveland, Ohio. Mounting for electric chime signal devices. 2,452,897, Nov. 2.

Bourdette, Earl C., Chickasaw, Ala. Internal heat intensifier. 2,452,898, Nov. 2.

Bourdette, Earl C., Chickasaw, Ala. Adjustable flange jig. 2,452,985, Nov. 2.

Bourne, Roland B., West Hartford, J. P. Tyskewicz, Hartford, and A. E. Chase, Elmwood, assignors to The Maxim Silencer Company, Hartford, Conn. Spark arrester silencer. 2,452,723, Nov. 2.

Bourque, Hercules N., Hudson, Mass. Toolholding attachment for machine tool turrets. 2,453,083, Nov. 2.

Bradshaw, George B., Wilmington, Del. Soapmaking process. 2,452,724, Nov. 2.

Bradshaw, George B., Wilmington, Del. Soapmaking process. 2,452,725, Nov. 2.

Bradshaw, William H., Wilmington, Del., and W. R. Schmitz, Jr., Richmond, Va., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Continuous making alkali cellulose. 2,452,542, Nov. 2.

Braun, Gustav F., Elizabeth, assignor to Thomas A. Edison, Incorporated, West Orange, N. J. Combination microphone and control means for dictating machines. 2,452,830, Nov. 2.

Breault, Delphis C., Lowell, Mass. Apparatus for burning liquid fuel in the presence of gas under pressure. 2,452,543, Nov. 2.

Brennen, Ronald F., Valley Stream, assignor to General Die-Stamping Tool Company, New York, N. Y., a partnership comprised of R. F. Matshak and D. M. Kasson. Collet and collet chuck therefor. 2,452,986, Nov. 2.

Brodie, Sidney S., New York, N. Y. Indexing device. 2,452,544, Nov. 2.

Broga, Wilson C., Westfield, Mass. Ammunition chest. 2,452,545, Nov. 2.

Broido, Daniel, Cockfosters, near Barnet, England. Calculating machine. 2,452,987, Nov. 2.

Brown, Alexander M., Ocean Grove, N. J., assignor of forty per cent to M. D. Pickens, New York, N. Y. Slide fastener. 2,452,809, Nov. 2.

Brown, Harry W., assignor to The National Acme Company, Cleveland, Ohio. Cam grinding machine. 2,452,989, Nov. 2.

Brown, Henry T., Dallas, Tex., assignor, by mesne assignments, to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Manufacture of bead-form catalyst. 2,453,084, Nov. 2.

Brown Instrument Company, assignee: *See*—
Wannamaker, William H., Jr.

Brown, John D., Enid, Okla. Work indexing attachment for lathes. 2,452,988, Nov. 2.

Buchet, Conrad R., assignor of one-half to M. H. Lees, Jr., Pasadena, Calif. Multirotor helicopter with tiltable rotors. 2,452,726, Nov. 2.

Buchmann, Abe, assignee, et al.: *See*—
Carter, Albert C.

Buffalo Electro-Chemical Company, Inc., assignee: *See*—
Hyatt, Harlow G., and Shanley.

Bulbulian, Arthur H.: *See*—
Boothby, Walter M., Bulbulian, and Lovelace.

Burkhart, Robert J., Nutley, N. J. Antiskid device. 2,452,831, Nov. 2.

Burkholder, John D., Jr., Harrisonburg, Va. Brooder. 2,452,900, Nov. 2.

Burlington Mills Corporation, assignee: *See*—
Cobert, Arthur J.

Burrell Technical Supply Company, assignee: *See*—
Carlson, George W.

Burritt, Walter L., Omaha, Nebr. Tubular fence post construction. 2,452,630, Nov. 2.

Burrowes, John B.: *See*—
Ganger, Karl M., and Burrowes.

Burton, George C., Washington, D. C. Tie rack. 2,452,727, Nov. 2.

Burton, John J.: *See*—
Little, Kenneth B., and Burton.

Bush, Homer H., Atlanta, Ga. Parachute release. 2,452,990, Nov. 2.

Busignies, Henri G., Forest Hills, and J. L. Allison, assignors to Federal Telephone and Radio Corporation, New York, N. Y. Direction finder. 2,452,546, Nov. 2.

Butcher, Alfred, assignor to Gulf Oil Corporation, Pittsburgh, Pa. Liquid clarifying apparatus. 2,452,991, Nov. 2.

Butler, William H., Bloomfield, N. J., assignor to Bakelite Corporation. Coating composition of fatty drying oils reacted with fatty acid modified polyhydric alcohol esters of cyclopentadiene maleic adduct. 2,452,992, Nov. 2.

Caesar, Philip D., Champaign, Ill., assignor to Socony-Vacuum Oil Company, Incorporated. Alkyl thiophene-aldehyde synthetic resins. 2,453,086, Nov. 2.

Caesar, Philip D., Champaign, Ill., and A. N. Sachanen, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated. Thiophene-aldehyde synthetic resins. 2,453,085, Nov. 2.

California Packing Corporation, assignee: *See*—
Newton, Robert J.

Calloway, Gaither D., Elkin, N. C. Screw pivot for shears. 2,452,993, Nov. 2.

Cameron, Colin M., assignor to Ransomes & Rapier Limited, Ipswich, England. Excavating machine. 2,452,632, Nov. 2.

Cameron, Curtice B., Laurel, Miss. Self-adjusting wood peeler. 2,452,631, Nov. 2.

Camilli, Guglielmo, Pittsfield, Mass., assignor to General Electric Company. Electromagnetic induction apparatus. 2,452,901, Nov. 2.

Cammack, Richard B., et al., assignee: *See*—
Carlin, Bernard.

Canfield, William B.: *See*—
Rust, John B., and Canfield.

Cantrell, Troy L.: *See*—
Smith, Herschel G., and Cantrell.

Carbide and Carbon Chemicals Corporation, assignee: *See*—
Staff, Charles E.

Carborundum Company, The, assignee: *See*—
Roble, Norman P.

Carlin, Bernard, Orange, assignor of forty-nine one-hundredths to W. O. Haizlip and R. B. Cammack, Nederland, and J. Ener, Jr., and L. De Cordova, Beaumont, Tex. Safety inner tube for pneumatic tires. 2,452,902, Nov. 2.

Carling, Edward C., Stoke Newington, London, England. Couplings for flexible hose. 2,452,728, Nov. 2.

Carlson, George W., Bridgeville, assignor to Burrell Technical Supply Company, Pittsburgh, Pa. Mercury leveling clamp. 2,452,729, Nov. 2.

Carpenter, Erwin L.: *See*—
Davis, Harold S., and Carpenter.

Carpenter, Erwin L., Stamford, Conn., assignor to American Cyanamid Company, New York, N. Y. Production of alkylene cyanohydrins. 2,453,062, Nov. 2.

Carter, Albert C., assignor of one-half to A. Buchmann, one-fourth to J. Mintz, and one-fourth to M. E. Levinson, Cincinnati, Ohio. Liquid filled dice agitator. 2,452,730, Nov. 2.

Carter, James C., Pasadena, Calif. Sealing unit and gasket. 2,452,832, Nov. 2.

Casco Products Corporation, assignee: *See*—
Youhouse, Joseph.

Cauley, Stephen P.: *See*—
Happel, John, and Cauley.

Cautley, John R., assignor to Bendix Aviation Corporation, South Bend, Ind. Means for causing prerotation of aircraft wheels. 2,452,633, Nov. 2.

Celanese Corporation of America, assignee: *See*—
Miller, Samuel A., and Groombridge.

Chase, Arthur E.: *See*—
Bourne, Roland B., and Tyskewicz, and Chase.

Chatterjea, Prafulla K., and C. T. Scully, assignors to Standard Telephones and Cables Limited, London, England. Pulse modulation systems of electric communication. 2,452,547, Nov. 2.

Chodak, Bernard, Brooklyn, N. Y. Shopping bag. 2,452,994, Nov. 2.

Christensen, Stig, Los Angeles, W. G. Rosenberg, Glendale, and J. D. Swift, San Fernando, assignors to Lockheed Aircraft Corporation, Burbank, Calif. Hardness testing device. 2,452,833, Nov. 2.

Cinamon, Lionel, New York, N. Y. Soldering, brazing and welding fluxes. 2,452,995, Nov. 2.

Cincinnati Milling Machine Co., The, assignee: *See*—
Nenninger, Lester F., and Hassman.

Clapper, Clyde E., Kansas City, Mo. Hot-air deflector for tractors. 2,452,834, Nov. 2.

Clark, Alfred, Bartlesville, Okla., assignor to Phillips Petroleum Company. Fischer-tropsch synthesis gas from oil shale. 2,452,634, Nov. 2.

Clark, Dudley B., Palm Springs, Calif. Electronic transformer control. 2,452,548, Nov. 2.

Clark, Robert H.: *See*—
Dersch, Fritz, and Clark.

Clayton Manufacturing Company, assignee: *See*—
Cline, Edwin L.

Cleeton, Claud E., Washington, D. C. Double pulse generator. 2,452,549, Nov. 2.

Clement, Ivan C., Greenwood, Wakefield, assignor, by mesne assignments, to Submarine Signal Company, Boston, Mass. Sound signaling apparatus. 2,452,571, Nov. 2.

Cline, Edwin L., Pasadena, assignor to Clayton Manufacturing Company, Alhambra, Calif. Hydraulic dynamometer. 2,452,550, Nov. 2.

Clutton, Sam W., Missoula, Mont. Hotbox cooler. 2,452,731, Nov. 2.

Cobert, Arthur J., Greensboro, N. C., assignor to Burlington Mills Corporation, New Castle County, Del. Knitted fabric and making same. 2,452,835, Nov. 2.

Cobert, Arthur J., Greensboro, N. C., assignor to Burlington Mills Corporation, New Castle County, Del. Knitted fabric and making same. 2,452,836, Nov. 2.

Coffey, Earl G., Sioux City, Iowa. Impression taking means. 2,452,903, Nov. 2.

Cohen, Frank A., Brooklyn, N. Y. Undergarment. 2,453,063, Nov. 2.

Colbert, Carl C., assignor to Nehi Corporation, Columbus, Ga. Vending apparatus. 2,452,837, Nov. 2.

Cole, Monroe C., Dallas, Tex. Brooder. 2,452,904, Nov. 2.

Coles, Leon M., Port Chester, N. Y. Hand cultivating tool. 2,452,732, Nov. 2.

Colgate-Palmolive-Peet Company, assignee: *See*—
Malkemus, John D., Ross, and Potter.

Collura, Francesco, New York, N. Y. Push-button type pencil. 2,452,905, Nov. 2.

Collura, Francesco, New York, N. Y. Mechanical pencil of the push-button type. 2,452,906, Nov. 2.

Collura, Francesco, New York, N. Y. Magazine pencil of the push-button type. 2,452,907, Nov. 2.

Colonial Radio Corporation, assignee: *See*—
Tittle, Hulburt C.

Come, Leonard P., White Plains, N. Y. Furniture. 2,452,838, Nov. 2.

Commercial Solvents Corporation, assignee: *See*—
Johnson, Harold G.
Morey, Glen H., and Taylor.

Conant, Harold B., Lincoln, Nebr. Rectifier type measuring instrument. 2,452,551, Nov. 2.

Conklin, Robert M., West Newbury, Mass., assignor to Western Electric Company, Incorporated, New York, N. Y. Winding machine. 2,452,733, Nov. 2.

Consolidated Engineering Corporation, assignee: *See*—
Young, William S.

Continental Can Company, Inc., assignee: *See*—
Coyle, John.
Tomkins, Walter M., Larkin, Anthony, Ross, and Mero.

Coons, Curtis C., assignor to The Hoover Company, North Canton, Ohio. Absorption refrigerating system. 2,452,635, Nov. 2.

Cornell Aeronautical Laboratory, Inc., assignee: *See*—
Levine, Max M.

Corning Glass Works, assignee: *See*—
Hyde, James F., and Johannson.

Corson, Michael G., New York, N. Y., assignor to The Linde Air Products Company. Refining copper and its alloys. 2,452,996, Nov. 2.

Costelow, John F., Kansas City, Mo. Insulation cutter. 2,452,734, Nov. 2.

Coward, William J., Lakeland, Fla. Rectal spray depurator. 2,452,997, Nov. 2.

Cowles, Irving, Chicago, Ill. Detachable hose coupling. 2,452,908, Nov. 2.

Cox, Arthur, assignor to Taylor, Taylor & Hobson Limited, Leicester, England. Three component telephoto type optical objective. 2,452,909, Nov. 2.

Coyle, John, Baltimore, Md., and J. F. Egenolf, assignors to Continental Can Company, Inc., New York, N. Y. Collar can collar structure. 2,452,839, Nov. 2.

Craig, Harold L., Hampton, Iowa. Fence post. 2,452,840, Nov. 2.

Cressaty, George M., New York, N. Y. Magnifying reading unit. 2,453,064, Nov. 2.

Creveling, John L., near Tucson, Ariz. Electric regulation. 2,453,065, Nov. 2.

Cunningham, John E., and R. A. Kempe, assignors to Thompson Products, Inc., Cleveland, Ohio. Making hollow valves. 2,452,636, Nov. 2.

Curtis, Osborn M., Jr., and T. M. Prudden, assignors to LobLure, Inc., Hingham, Mass. Fishing bait and preparing the same. 2,452,552, Nov. 2.

Curtis, Osborn M., Jr., and T. M. Prudden, assignors to LobLure, Inc., Hingham, Mass. Fishing bait. 2,452,553, Nov. 2.

Cuthbertson, George R., Detroit, Mich., assignor to United States Rubber Company, New York, N. Y. Pneumatic tire. 2,452,998, Nov. 2.

Dailey, William E., Chicago, Ill. Toy. 2,452,841, Nov. 2.

Daly, Lawrence E., Osceola, and J. F. Schott, Mishawaka, Ind., assignors to United States Rubber Company, New York, N. Y. Making cellular thermoplastic receptacles. 2,452,999, Nov. 2.

Dath, George E., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock absorber. 2,452,637, Nov. 2.

Daulton, Benjamin H., assignor to The Irwin Auger Bit Company, Wilmington, Ohio. Manufacturing auger bits. 2,453,000, Nov. 2.

Davidson, James, assignor to Toronto Carpet Manufacturing Co. Limited, Toronto, Ontario, Canada. Automatic knockoff device for ring twisting and spinning machines. 2,452,910, Nov. 2.

Davis, Harold S., Riverside, and E. L. Carpenter, Old Greenwich, Conn., assignors to American Cyanamid Company, New York, N. Y. Production of acrylonitrile. 2,452,554, Nov. 2.

Davis, Sydney B., assignor of twenty-five per cent to L. R. Kielmeyer, Nerstrand, Minn. Flag holder and displayer. 2,452,842, Nov. 2.

De Cordova, Lester, assignee, et al.: *See*—
Carlin, Bernard.

Dehydration, Inc., assignee: *See*—
Birdseye, Clarence.

De la Roza, Joaquin J., Sr., New York, N. Y. Friction nozzle. 2,452,555, Nov. 2.

Deming Company, The, assignee: *See*—
Shallenberg, Walter.

Den Hertog, Martinus: *See*—
Kruithof, Jacob, Kozma, and den Hertog.

Dersch, Fritz, and R. H. Clark, Binghamton, assignors to General Aniline & Film Corporation, New York, N. Y. Photographic developers containing tetrazolyl disulfides as antifogging agents. 2,453,087, Nov. 2.

De Stefano, John, Long Island City, N. Y. Combination dust cap and valve cap lock for tire valves. 2,453,001, Nov. 2.

Devine, John J., Middletown, Conn. Pencil with internal illuminating means. 2,452,735, Nov. 2.

Dickerman, Fred N., Nichols, assignor to United Aircraft Corporation, East Hartford, Conn. Arresting hook. 2,452,911, Nov. 2.

Dodson, William C.: *See*—
Drum, Harry S., Dodson, and Jaxheimer.

Dow Chemical Company, The, assignee: *See*—
Dulmage, Frederick E.
Haynes, James D.

Dow, Orville E., Port Jefferson, N. Y., assignor to Radio Corporation of America. Circuit for improving oscillator stability. 2,452,912, Nov. 2.

Doyle, Nancy, et al., assignee: *See*—
Sharman, Jagan N.

Drum, Harry S., and W. C. Dodson, Abington, and W. H. Jaxheimer, assignors to Smith, Drum & Company, Philadelphia, Pa. Package extractor. 2,452,638, Nov. 2.

Duffey, Dick, La Fontaine, Ind., assignor to the United States of America as represented by the United States Atomic Energy Commission. Producing calcium hydrides by distillation. 2,452,913, Nov. 2.

Dulmage, Frederick E., Saginaw, assignor to The Dow Chemical Company, Midland, Mich. Mixing torpedo for plastics extruders. 2,453,088, Nov. 2.

Dunbrook, Alexander J., Kitchener, Ontario, Canada, assignor to The B. F. Goodrich Company, New York, N. Y. Article of footwear and heel therefor. 2,453,002, Nov. 2.

Dunlop Tire & Rubber Corporation, assignee: *See*—
Illingworth, James W., and Pickup.

Du Pont, E. I., de Nemours & Company, assignee: *See*—
Bradshaw, William H., and Schmitz.
Kirk, Joseph S.
Mowery, Dwight F., Jr.
Raasch, Maynard S.
Siegel, Alfred.
Turnbull, Stockton G., Jr.
Van Etten, Howard A.

Eagle-Picher Company, The, assignee: *See*—
Turbett, Forrest L.

Eastern Specialty Company, The, assignee: *See*—
Fleischmann, Rudolf A. K.

Eastman Kodak Company, assignee: *See*—
Knott, Edward B., and Stevens.

Eastwood, La Verne W.: *See*—

Kempf, Louis W., Lakewood, and L. W. Eastwood, University Heights, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa. Mold for making castings. 2,452,855, Nov. 2.

Kenny, Charles R., Crestwood, N. Y., assignor to The Sperry Corporation. Automatic frequency control. 2,452,575, Nov. 2.

Kercheval, James E., San Gabriel, assignor to General Air Conditioning Corporation, Los Angeles, Calif. Car cooler. 2,453,018, Nov. 2.

Kerr, Theodore W., West Hollywood, assignor to E. E. Kotkin, doing business as Plastics Process Company, Los Angeles, Calif. Material handling device. 2,452,856, Nov. 2.

Kielmeyer, La Vern R., assignee: *See*—
Davis, Sydney B.

Killingsworth, Robert B., Douglaston, H. T. Van Horn, Kew Gardens, and W. E. Speishouse, Roslyn Heights, N. Y., assignors to Socony-Vacuum Oil Company, Incorporated. Oxidized asphalt product and making same. 2,453,094, Nov. 2.

Kindevater, William E., Paige, Idaho. Mucking machine for mine shafts. 2,452,763, Nov. 2.

King, Anthony B., Brooklyn, N. Y. Trigonometric calculator. 2,452,662, Nov. 2.

King, Barnwell R., Flushing, N. Y., assignor to The Linde Air Products Company. Metal surface conditioning process. 2,453,019, Nov. 2.

Kinney, Aldon M., and A. N. Jergens, Cincinnati, Ohio. Homogenizer. 2,452,661, Nov. 2.

Kirk, Joseph S., Seven Hills Village, Ohio, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Impregnating leather with sulfonated polymeric compositions. 2,452,536, Nov. 2.

Kirwan, John O., Bloomfield, assignor to Wallace & Tiernan Products, Inc., Belleville, N. J. Selectable contact transmitter means for sensitive instruments. 2,452,764, Nov. 2.

Kjellgren, Bengt R. F., University Heights, and H. Jaffe, Cleveland Heights, Ohio. Growing crystals. 2,452,576, Nov. 2.

Klein, Howard A.: *See*—
Paulus, Charles L., and Klein.

Knapp-Monarch Company, assignee: *See*—
Snyder, Leland H.

Knobloch, George H., Keyport, N. J. Adjustable baffle holding device. 2,452,936, Nov. 2.

Knott, Edward B., and G. W. W. Stevens, Harrow, England, assignors to Eastman Kodak Company, Rochester, N. Y. Multilayer photographic element having a mixed grain emulsion and process employing it. 2,452,765, Nov. 2.

Knowlton, Cutler D., Rockport, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Machine with resilient work holding clamp. 2,452,663, Nov. 2.

Koenig, Walter, Jr., Clifton, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Interpolating potential divider and computer. 2,452,664, Nov. 2.

Koett, Joseph B., assignor, by mesne assignments, to Koett Universal, Inc., Oneonta, N. Y. Lathe grinding device. 2,453,020, Nov. 2.

Koett Universal, Inc., assignee: *See*—
Koett, Joseph B.

Kolsky, Sam, Trenton, N. J. Device for framing ladies' handbags. 2,452,766, Nov. 2.

Koncisky, Anna, New York, N. Y. Handbag lock. 2,453,021, Nov. 2.

Kotkin, E. E., assignee: *See*—
Kerr, Theodore W.

Kotterman, Chester A., Livingston, N. J., assignor to Federal Telephone and Radio Corporation. Dry rectifier element and manufacture. 2,452,577, Nov. 2.

Kozma, Ladislas: *See*—
Kruithof, Jacob, Kozma, and den Hertog.

Kraft, Marie J., assignor to The Warren Featherbone Co., Three Oaks, Mich. Apron. 2,453,074, Nov. 2.

Krake, Foster, assignor to Sporting Specialties Company, Coloma, Mich. Boat-carrying trailer and the like. 2,452,937, Nov. 2.

Krake, Foster, assignor to Sporting Specialties Company, Coloma, Mich. Boat-carrying trailer. 2,452,938, Nov. 2.

Kraus, John D., Newton Center, Mass., assignor to the United States of America as represented by the Secretary of War. Broad-band antenna. 2,452,767, Nov. 2.

Kroll, William J., and F. E. Bacon, Niagara Falls, N. Y., assignors to Electro Metallurgical Company. Separation of metals. 2,452,665, Nov. 2.

Kruithof, Jacob, L. Kozma, and M. den Hertog, Antwerp, Belgium, assignors to International Standard Electric Corporation, New York, N. Y. Telephone system utilizing a register controller. 2,452,578, Nov. 2.

Kuster, Edward H., Del Ray Beach, Fla. Tire deflation operated switch. 2,452,768, Nov. 2.

Kuther, Max K., Monterey, and J. L. Smith, Pacific Grove, Calif. Fish canning machine. 2,452,666, Nov. 2.

La Forge, James L., Caruthersville, Mo. Roller toy. 2,452,939, Nov. 2.

Lambach, Fritz, Tenafly, N. J. Warp knitting machine. 2,452,579, Nov. 2.

Lambert, Arthur J., Wichita, Kans. Illuminated mail box and house number. 2,452,667, Nov. 2.

Land, Edwin H., Cambridge, A. J. Bachelder, Lexington, and O. E. Wolff, assignors to Polaroid Corporation, Cambridge, Mass. Stereo camera range finder system. 2,453,075, Nov. 2.

Lane, Noah F., Arkansas City, Kans. Railway car side bearing. 2,452,940, Nov. 2.

Lang, Karl A., Glenview, assignor to Lindberg Engineering Company, Chicago, Ill. Electric motor control system. 2,452,769, Nov. 2.

Lang, Louis, assignor to The National Sugar Refining Company, New York, N. Y. Cocoa-sugar composition. 2,452,770, Nov. 2.

Larkin, Albert C.: *See*—
Tomkins, Walter M., Larkin, Anthony, Ross, and Mero.

La Rocque Mfg. Co., Inc., The, assignee: *See*—
La Rocque, Samuel W.

La Rocque, Samuel W., assignor to The La Rocque Mfg. Co., Inc., Pawtucket, R. I. Picker spindle. 2,452,771, Nov. 2.

Lau Blower Company, The, assignee: *See*—
Ganger, Karl M., and Burrowes.

Laughlin, Henry, Derry, Pa. Filter. 2,452,772, Nov. 2.

Lawrie, James W.: *See*—
Uihlein, Erwin C., and Lawrie.

Leathers, Chester F.: *See*—
Johnson, Fred H., and Leathers.

Lee, Edwin C., assignor to Standard Telephones and Cables Limited, London, England. Termination for electric power cables. 2,452,580, Nov. 2.

Lee, George P., Stroudsburg, Pa. Toy gun. 2,452,668, Nov. 2.

Lees, Milton H., Jr., assignee: *See*—
Buchet, Conrad R.

Lehmann, Gerard J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Turbogenerator. 2,452,581, Nov. 2.

Leiserson, Lee, Chapel Hill, N. C., assignor to Virginia Smelting Company, West Norfolk, Va. Agents for reducing the surface tensions of liquids. 2,453,022, Nov. 2.

Le Munyon, G. Loren, assignee: *See*—
Trefry, Edgar C.

Le Tourneau, R. G., Inc., assignee: *See*—
Le Tourneau, Robert G.

Le Tourneau, Robert G., Peoria, Ill., assignor to R. G. Le Tourneau, Inc., Stockton, Calif. Adjustable push grader mount. 2,452,774, Nov. 2.

Levin, David, Brooklyn, N. Y. Cutting table. 2,452,773, Nov. 2.

Levine, Max M., Rochester, assignor, by mesne assignments, to Cornell Aeronautical Laboratory, Inc., Buffalo, N. Y. Copolymerization of polyesters and vinyl compounds. 2,452,669, Nov. 2.

Levinson, Max E., assignee, et al.: *See*—
Carter, Albert C.

L'Hermite, Robert, assignor to Fondation dite: Groupement Francais Pour Le Developpement des Recherches Aeronautiques, Clermont-Ferrand, France. Machine for testing materials constrained to alternate flexure. 2,453,023, Nov. 2.

Lilienthal, James R.: *See*—
Somers, Brock A., McCoy, and Lilienthal.

Lindberg Engineering Company, assignee: *See*—
Lang, Karl A.

Linde Air Products Company, The, assignee: *See*—
Corson, Michael G.
King, Barnwell R.

Lindsley, Lawrence B., Los Gatos, assignor, by mesne assignments, to Wooldridge Manufacturing Company, Sunnyvale, Calif. Multiple pneumatic clutch. 2,452,775, Nov. 2.

Line Material Company, assignee: *See*—
Schultz, William O.

Lion Manufacturing Corporation, assignee: *See*—
Umbdenstock, Walter.

Liquid Carbonic Corporation, The, assignee: *See*—
Kantor, James.

Littell, Nelson, assignee: *See*—
Jeffreys, George A.

Little, Howard W., near Canton, Ohio. Ventilator. 2,452,941, Nov. 2.

Little, Kenneth B., and J. J. Burton, Easton, Pa., assignors to J. T. Baker Chemical Co., Phillipsburg, N. J. Crystallization of DDT. 2,453,076. Nov. 2.

Litton, Charles V., Redwood City, Calif., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Lead connector for electronic discharge devices. 2,452,582, Nov. 2.

LobLaire, Inc., assignee: *See*—
Curtis, Osborn M., Jr., and Prudden.

Lockheed Aircraft Corporation, assignee: *See*—
Christensen, Stig, Rosenberg, and Swift.

Lomelino, George F., assignor of one-half to L. E. Ostrom, Olney, Ill. Coupling. 2,453,024, Nov. 2.

Lonergan Manufacturing Company, assignee: *See*—
Greer, Carl S., Jr.

Lord, Kenneth M., Canandaigua, and G. E. Warren, Honeoye Falls, N. Y., assignors to Protect-O-Farm Company, Kenosha, Wis. Temperature alarm system. 2,452,942, Nov. 2.

Lothrop, Marcus, United States Navy, Berkeley, Calif. Sleeve valve engine. 2,452,583, Nov. 2.

Loung, Pai Yen, New York, N. Y. Device for cutting non-circular holes. 2,453,025, Nov. 2.

Lovelace, William R., II: *See*—
Boothby, Walter M., Bulbulian, and Lovelace.

Luebkeman, George C., Cincinnati, Ohio, assignor of one-half to J. D. Luebkeman, Libertyville, Ill. Adhesive tape applying device. 2,452,584, Nov. 2.

Luebkeman, J. D., assignee: *See*—
Luebkeman, George C. and J. D.

Mack Manufacturing Corporation, assignee: *See*—
Benning, Walter F.

MacMahon, James D.: *See*—
Vincent, George P., MacMahon, and Synan.

MacMechan, Thomas S., assignor to Midgette Toy Company, Sharon, Mass. Toy moving picture projector. 2,452,776, Nov. 2.

Magnesium Elektron Limited, assignee: *See*—
Ball, Charles J. P., Jessup, Emley, and Wilson.
Emley, Edward F.

Maher, William W., San Francisco, Calif., assignor to American Can Company, New York, N. Y. Ratchet motor control mechanism. 2,452,585, Nov. 2.

Malkemus, John D., Allendale, J. Ross, Ramsay, and D. J. Potter, Ridgewood, assignors to Colgate-Palmolive-Peet Company, Jersey City, N. J. Catalyzed sulfamic acid sulfation. 2,452,943, Nov. 2.

Maney, Robert M., Oklahoma City, Okla. Cigarette extinguisher and ash tray. 2,453,026, Nov. 2.

Marinsky, Davis, assignee: *See*—
Morin, Louis H.

Marks, Arthur A., Portland, Oreg. Hinged back collapsible chair. 2,453,027, Nov. 2.

Martinez, Norberto, Somerville, Tex., assignor to H. Gonzales, Chicago, Ill. Power transmission. 2,452,777, Nov. 2.

Mason, Edwin W., Wyckoff, N. J. Tape dispenser. 2,453,028, Nov. 2.

Mason-Neilan Regulator Company, assignee: *See*—
Robins, John W.

Mathewson Ralph C., West Pittson, Pa. Universal swivel. 2,452,778, Nov. 2.

Mathieson Chemical Corporation, assignee: *See*—
Hampel, Clifford A.
Vincent, George P., MacMahon, and Synan.

Matshak, Richard F.: *See*—
Brennen, Ronald F.

Matthews, Harold J.: *See*—
Bauer, Robert F., and Matthews.

Matzinger, Kenneth: *See*—
McFarland, Joseph L., and Matzinger.

Maxim Silencer Company, The, assignee: *See*—
Bourne, Roland B., Tyskewicz, and Chase.

McBee, Earl T., West Lafayette, Ind., and W. E. Weesner, Richmond Heights, Mo., assignors to Purdue Research Foundation, West Lafayette, Ind. Fluorinated ethers. 2,452,944, Nov. 2.

McCabe, Ira E., Chicago, Ill. Sealed electric motor and transmission. 2,452,945, Nov. 2.

McCollum, Henry J. D., deceased, Chicago, Ill.; T. McCollum, executrix, assignor to Stewart-Warner Corporation, Chicago, Ill. Combustion heater having air preheating and carbureting means. 2,452,779, Nov. 2.

McCollum, Henry J. D., deceased, Chicago, Ill.; T. McCollum, executrix, assignor to Stewart-Warner Corporation, Chicago, Ill. Nonpulsating internal-combustion heater. 2,452,780, Nov. 2.

McCollum, Thelma, executrix: *See*—
McCollum, Henry J. D.

McConnell, Leslie F., Birmingham, Ala., assignor to McConnell Sales and Engineering Corporation. Direct fuel fired unit air heater. 2,452,946, Nov. 2.

McConnell Sales and Engineering Corporation, assignee: *See*—
McConnell, Leslie F.

McCoy, Rawley D.: *See*—
Somers, Brock A., McCoy, and Lilienthal.

McCoy, Rawley D., Bronxville, N. Y., assignor to The Sperry Corporation. Phase shift circuits. 2,452,586, Nov. 2.

McCoy, Rawley D., Bronxville, N. Y., assignor to The Sperry Corporation. Network measuring apparatus. 2,452,587, Nov. 2.

McFarland, Joseph L., Cairo, W. Va., and K. Matzinger, Detroit, Mich. Cable and cable connector fatigue testing machine. 2,452,588, Nov. 2.

McGrath, William L., Philadelphia, Pa., assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Plural stage refrigeration system and control therefor. 2,453,095, Nov. 2.

McKnight, Charles M., assignee: *See*—
Eickmeyer, Allen G.

McLean, Robert E., Fort Benning, Ga. Rotary type can opener. 2,452,781, Nov. 2.

McLeod, Roderick C., Cropston, and G. B. R. Feilden, Lutterworth, assignors to Power Jets (Research & Development) Limited, London, England. Construction of rotors for compressors and like machines. 2,452,782, Nov. 2.

McWhirter, Eric M. S., and H. J. Ward, assignors to Standard Telephones and Cables Limited, London, England. Electric remote control and indication system. 2,452,589, Nov. 2.

McWhirter, Eric M. S., and H. J. Ward, assignors to Standard Telephones and Cables Limited, London, England. Electric signaling system. 2,452,590, Nov. 2.
Meacham, Larned A.: *See*—
Hecht, George, and Meacham.
Measurements Corporation, assignee: *See*—
Van Beuren, John M.
Meidenbauer, Phillip E., Jr., assignor to Scott Aviation Corporation, Lancaster, N. Y. Breathing apparatus. 2,452,670, Nov. 2.
Merck & Co., Inc., assignee: *See*—
Engels, William H.
Mero, Ralph M.: *See*—
Tomkins, Walter M., Larkin, Anthony, Ross, and Mero.
Merrill, Lewis B., Baldwin, assignor to H. V. Tutton, Detroit, Mich. Track-laying tractor. 2,452,671, Nov. 2.
Mesaros, George, Linden, N. J. Piston ring tool. 2,452,857, Nov. 2.
Metzger, F. F., and Son, assignee: *See*—
Mostertz, Franz C.
Metzner, Albert W., assignor to The Standard Register Company, Dayton, Ohio. Pin-wheel feed. 2,452,591, Nov. 2.
Meyer, Clarence H., Ann Arbor, Mich., assignor to Argus, Incorporated. Telescopic sight. 2,452,592, Nov. 2.
Meyerhans, August, Rieden, near Baden, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Bushing for oil-filled electrical apparatus. 2,452,947, Nov. 2.
Midgette Toy Company, assignee: *See*—
MacMechan, Thomas S.
Miller, Edward H., Newark, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Wire looping machine. 2,452,593, Nov. 2.
Miller, John W., and B. D. Figg, assignors to Motor Wheel Corporation, Lansing, Mich. Draft regulator. 2,453,096, Nov. 2.
Miller Pottery Engineering Company, assignee: *See*—
Miller, William J.
Miller, Samuel A., and W. H. Groombridge, Spondon, near Derby, England, assignors, by mesne assignments, to Celanese Corporation of America. Manufacture of unsaturated organic compounds. 2,452,672, Nov. 2.
Miller, William J., assignor to Miller Pottery Engineering Company, Swissvale, Pa. Method of and apparatus for producing pottery ware. 2,452,858, Nov. 2.
Mills, Leon D., Tacoma, Wash. Open pot oil burner with unbalanced air supply. 2,453,029, Nov. 2.
Miner, W. H., Inc., assignee: *See*—
Dath, George E.
Olander, Roland J.
Minneapolis-Honeywell Regulator Company, assignee: *See*—
McGrath, William L.
Minnesota Mining & Manufacturing Company, assignee: *See*—
Smith, George B.
Mintz, Julius, assignee, et al.: *See*—
Carter, Albert C.
Mitchell, W. K., & Company, Inc., assignee: *See*—
Bissout, Herbert A., and Borresen.
Monsanto Chemical Company, assignee: *See*—
Zienty, Ferdinand B.
Montclair Research Corporation, assignee, et al.: *See*—
Rust, John B., and Canfield.
Moody, George D., assignor of one-third to R. E. Moody, Arkansas City, Kans. Deodorizing and steam condensing device. 2,452,859, Nov. 2.
Moody, Ralph E., assignee: *See*—
Moody, George D.
Morey, Glen H., and R. F. Taylor, assignors to Commercial Solvents Corporation, Terre Haute, Ind. Production of halogenated olefins. 2,453,089, Nov. 2.
Morey, Robert E.: *See*—
Taylor, Howard F., and Morey.
Morin, Louis H., assignor of one-half to D. Marinsky, Bronx, N. Y. Coaxial cable. 2,452,948, Nov. 2.
Morris, Nathan, Silver Spring, Md., assignor, by mesne assignments, to American Instrument Co., Inc. Refrigeration employing dry ice. 2,452,594, Nov. 2.
Morris, Rupert C., Berkeley, and E. C. Shokal, Oakland, assignors to Shell Development Company, San Francisco, Calif. Sulfolanyl sulfones. 2,452,949, Nov. 2.
Morrison, Hackley, assignor to Texfan Company, Houston, Tex. Window fan. 2,452,950, Nov. 2.
Moscove, Louis, Chicago, Ill. Question and answer rating device. 2,452,673, Nov. 2.
Mostertz, Franz C., assignor to F. F. Metzger and Son, Philadelphia, Pa. Extensometer or strain gauge. 2,452,860, Nov. 2.
Motor Wheel Corporation, assignee: *See*—
Miller, John W., and Figg.
Motorola, Inc., assignee: *See*—
Holthouse, Harry B.
Mowery, Dwight F., Jr., Springfield, Mass., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. N(ethyl mercury) para-toluene sulfonanilide and making same. 2,452,595, Nov. 2.
Mulder, Johannes G. W., Eindhoven, Netherlands, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. Current converting tube 2,452,861, Nov. 2.
National Acme Company, The, assignee: *See*—
Brown, Harry W.
National Blank Book Company, assignee: *See*—
Schade, Frank S.
National Sugar Refining Company, The, assignee: *See*—
Lang, Louis.
Nebesar, Robert J., assignor to Universal Moulded Products Corporation, Bristol, Va. Shockproof aerial delivery contrivance. 2,452,783, Nov. 2.
Neff, Joseph J., South Euclid, assignor, by mesne assignments, to Jack & Heintz Precision Industries, Inc., Cleveland, Ohio. Electric gauging head. 2,452,862, Nov. 2.
Nelson, Hilding E.: *See*—
White, Ira M., and Nelson.
Nenninger, Lester F., and F. A. Hassman, assignors to The Cincinnati Milling Machine Co., Cincinnati, Ohio. Knee actuating mechanism for milling machines. 2,452,674, Nov. 2.
Newitt, John H., Maplewood, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Direction finding system. 2,452,675, Nov. 2.
Newman, Irving I., Leominster, Mass., assignor to Reliance Molded Plastics, Inc., Providence, R. I. Rack for poker chips and the like. 2,453,030, Nov. 2.
Newton, Robert J., Honolulu, Territory of Hawaii, assignor to California Packing Corporation, San Francisco, Calif. Can dumping machine. 2,453,077, Nov. 2.
Nicholas Equipment Company, assignee: *See*—
Nicholas, Herbert T.
Nicholas, Herbert T., Huron, Ohio, assignor to Nicholas Equipment Company. Polishing machine. 2,452,863, Nov. 2.
Nietsche, Hans E., Detroit, Mich. Motor mechanism. 2,452,864, Nov. 2.
Nietsche, Hans E., Detroit, Mich. Toy. 2,452,865, Nov. 2.
Noodleman, Samuel, Dayton, Ohio, assignor, by mesne assignments, to the United States of America as represented by the Secretary of War. Electrical motor control system. 2,452,784, Nov. 2.
Nordquist, Ronald E. J., Maplewood, N. J., assignor to American Can Company, New York, N. Y. Seaming roller mounting. 2,452,596, Nov. 2.
Norgaard, Donald E., Scotia, N. Y., assignor to General Electric Company. Crystal oscillator circuits. 2,452,951, Nov. 2.
North American Aviation, Inc., assignee: *See*—
Patch, Arthur C.
North American Research Corporation, assignee: *See*—
Hammann, Carl F.
O'Brien, Edgar, assignor, by mesne assignments, to Belmont Radio Corporation, Chicago, Ill. Adjustable inductor. 2,452,676, Nov. 2.
Oertel, Carl H., Baltimore, Md. Colloid dental tray. 2,452,866, Nov. 2.
Ohio-Kentucky Manufacturing Company, assignee: *See*—
Sonnett, William J., and Stobbe.
Olander, Roland J., assignor to W. H. Miner, Inc., Chicago, Ill. Door fastener. 2,452,677, Nov. 2.
Olds, Earl M., Jr., Van Nuys, assignor to Technicolor Motion Picture Corporation, Hollywood, Calif. Cinematographic apparatus. 2,453,031, Nov. 2.
Olin, John F.: *See*—
Robinson, Correl N., Jr., and Olin.
Olney, William H., Youngstown, Ohio. Trailer hitch. 2,452,785, Nov. 2.
Olsen, Robert I., U. S. Navy. Low-temperature engine starting aid. 2,452,597, Nov. 2.
O'Neill, Harry T., Taunton, Mass., assignor to the United States of America as represented by the Secretary of War. Cathode structure. 2,452,786, Nov. 2.
Orinik, Michael T., Binghamton, assignor to General Aniline & Film Corporation, New York, N. Y. Solution consisting of a polymeric N-vinyl pyrrole compound and chloroform. 2,453,097, Nov. 2.
Örström, Gustaf: *See*—
Ekström, Gunnar, and Örström.
Ostrom, Lawrence E., assignee: *See*—
Lomelino, George F.
Padgett, Willie P.: *See*—
Harris, Leonard O. D., and Padgett.
Page, Robert M., Washington, D. C. Multiple range indicator. 2,452,598, Nov. 2.
Palazzo, Anthony B. C.: *See*—
Whipple, Jack V., and Palazzo.
Palmer, F. R., Inc., assignee: *See*—
Palmer, Frank D.
Palmer, Frank D., assignor to F. D. Palmer, Inc., Chicago, Ill. Carton. 2,452,952, Nov. 2.
Palumbo, Joseph, Bronx, N. Y. Emergency telephone call and circuit therefor. 2,453,032, Nov. 2.
Parker Appliance Company, The, assignee: *See*—
Wolfram, John N.
Patch, Arthur C., Van Nuys, Calif., assignor to North American Aviation, Inc. Landing gear system. 2,452,787, Nov. 2.
Patterson, Velt C., assignor to York Corporation, York, Pa. Vacuum drying apparatus using a refrigerant system for heating and cooling. 2,453,033, Nov. 2.
Paul, William E., Schenectady, N. Y., and J. W. Timmerman, Jr., Springfield, and R. E. Bold, Drexel Hill, Pa., assignors to General Electric Company. Circuit interrupting apparatus. 2,452,953, Nov. 2.

Paulus, Charles L., Dayton, Ohio, and H. A. Klein, Oakdale, Pa. Control system for target aircraft. 2,452,599, Nov. 2.
Pekarek, Edward G.: *See*—
Bartlett, Kenneth M., and Pekarek.
Pelton Water Wheel Company, The, assignee: *See*—
White, Ira M., and Nelson.
Peters, John H., Toledo, Ohio. Telescopic fishing rod. 2,452,788, Nov. 2.
Peterson, Harold A., Madison, Wis., assignor to General Electric Company. Network analyzer apparatus. 2,453,954, Nov. 2.
Philco Corporation, assignee: *See*—
Rudoy, William.
Smith, David B.
Phillips Petroleum Company, assignee: *See*—
Clark, Alfred.
Fleming, Harold W.
Schribner, Allison K., and Wilder.
Photoswitch Incorporated, assignee: *See*—
Thomson, E. Craig.
Pickens, Madison D., assignee: *See*—
Brown, Alexander M.
Pickup, Leslie F.: *See*—
Illingworth, James W., and Pickup.
Pike, Albert F., Houston, Tex. Trailer. 2,452,789, Nov. 2.
Pittsburgh Annealing Box Company, assignee: *See*—
Jacob, Morris L.
Pizzarelli, Ernest, New York, N. Y. Fastening means. 2,453,034, Nov. 2.
Plastics Process Company, assignee: *See*—
Kerr, Theodore W.
Plax Corporation, assignee: *See*—
Jeslonowski, Raymond S.
Pledger, William A., San Francisco, Calif. Pressure cooker. 2,452,790, Nov. 2.
Polaroid Corporation, assignee: *See*—
Fairbank, Murry N.
Land, Edwin H., Bachelder, and Wolff.
Ponsy, Louis E., Clichy, assignor to "Silto S. A.," Paris, France. Multiple function switch. 2,453,035, Nov. 2.
Pool, John E., Washington, D. C., and J. W. P. Beaver, Alexandria, Va. Clip loading machine. 2,452,600, Nov. 2.
Poole, Arthur B., Harwinton, Conn. Electromagnetic audible-signal device. 2,452,678, Nov. 2.
Posthumus, Klaas, Eindhoven, Netherlands, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. Device for wave length transformation of very short waves. 2,453,078, Nov. 2.
Potter, Dwight J.: *See*—
Malkemus, John D., Ross, and Potter.
Power Jets (Research & Development) Limited, assignee: *See*—
McLeod, Roderick C., and Feilden.
Powers, Walter P., Spring Lake, assignor to Associated Patentees, Inc., Ampere, N. J. System for transmitting motion from a movable measuring element to a movable informing element. 2,453,098, Nov. 2.
Pressley, Felix H., Piedmont, S. C. Check for picker stick of looms. 2,452,955, Nov. 2.
Presstite Engineering Company, The, assignee: *See*—
Sussenbach, Paul.
Price, Harold C., and B. V. Elliott, assignors, by mesne assignments, to H. C. Price Co., Bartlesville, Okla. Hydraulic internal line-up clamp. 2,452,867, Nov. 2.
Progressive Welder Company, assignee: *See*—
Johnson, Fred H., and Leathers.
Protect-O-Farm Company, assignee: *See*—
Lord, Kenneth M., and Warren.
Purdue Research Foundation, assignee: *See*—
McBee, Earl T., and Weesner.
Pye Limited, assignee: *See*—
Edwards, Baden J.
Jackson, Donald.
Quinlan, Joseph A., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Directional control means for highway crossing signals. 2,452,868, Nov. 2.
Quisling, Sverre, assignee: *See*—
Karow, John.
Raasch, Maynard S., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Fluorohydracrylic acids and their esters. 2,452,791, Nov. 2.
Radio Corporation of America, assignee: *See*—
Dow, Orville E.
Szikiai, George C.
Usselman, George L.
Weimer, Paul K.
Wood, Lawrence A., Jr.
Raffold Process Corporation, assignee: *See*—
Rafton, Harold R.
Rafton, Harold R., Andover, Mass., assignor to Raffold Process Corporation. Treatment of calcium sulfite. 2,453,099, Nov. 2.
Ramsden, Clayton W., Elizabeth, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Radio-frequency transformer. 2,452,679, Nov. 2.
Ranger, Richard H., U. S. Army, Newark, N. J. Frequency control means. 2,452,601, Nov. 2.
Ransomes & Rapier Limited, assignee: *See*—
Cameron, Colin M.

Rapids-Standard Company, The, assignee: *See*—
Wooldring, Bert.
Ratcliffe, Robert E., Dallas, Tex. Curtain and shade support. 2,452,680, Nov. 2.
Rehberger, Edward A., South Orange, N. J. Heavy-duty trailer. 2,452,681, Nov. 2.
Reitsma, Henry, Hackensack, assignor of one-half to J. G. Hunter, Ridgewood, N. J. Grip measuring ball for bowlers. 2,453,036, Nov. 2.
Reliance Molded Plastics, Inc., assignee: *See*—
Newman, Irving I.
Remy, Walter W., Angola, Ind. Reflector drift indicator apparatus for boats and aircraft. 2,452,682, Nov. 2.
Renfrew, Edgar E., Jr., Phillipsburg, N. J., assignor to General Aniline & Film Corporation, New York, N. Y. Carbalkoxy aminoanthraquinone sulfonamides. 2,453,100, Nov. 2.
Reynolds, Carl W., Barboursville, W. Va. Nail puller. 2,453,037, Nov. 2.
Richards, Donald L., Portland, Oreg. Hobbyhorse. 2,452,869, Nov. 2.
Rieke, John W., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sweep circuit. 2,452,683, Nov. 2.
Roberts, Charles H., Cheyenne, Wyo. Collapsible stand. 2,452,792, Nov. 2.
Robie, Norman P., Lewiston, assignor to The Carborundum Company, Niagara Falls, N. Y. Abrasive products. 2,452,793, Nov. 2.
Robins, John W., Westwood, assignor to Mason-Neilan Regulator Company, Boston, Mass. Valve. 2,452,956, Nov. 2.
Robinson, Correl N., Jr., Trenton, and J. F. Olin, Grosse Ile, Mich., assignors to Sharples Chemicals Inc., Philadelphia, Pa. Manufacture of aliphatic polyamines. 2,452,602, Nov. 2.
Robinson, Vernon C., Phoenix, Ariz. Portable hod stand. 2,452,684, Nov. 2.
Rockford Machine Tool Company, assignee: *See*—
Herrstrum, Rudolph E.
Rosenberg, William G.: *See*—
Christensen, Stig, Rosenberg, and Swift.
Ross, John: *See*—
Malkemus, John D., Ross, and Potter.
Ross, Oakland K.: *See*—
Tomkins, Walter M., Larkin, Anthony, Ross, and Mero.
Rossmann, Peter F., Morristown, N. J. One-piece sucker rod. 2,453,038, Nov. 2.
Rossmann, Peter F., Morristown, N. J. Prestressed sucker rod. 2,453,079, Nov. 2.
Rowe Manufacturing Co., Inc., The, assignee: *See*—
Gabrielsen, Christian.
Ruberoid Co., The, assignee: *See*—
Abraham, Herbert.
Rudoy, William, assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa. Humidity control apparatus. 2,452,685, Nov. 2.
Rust, John B., West Orange, and W. B. Canfield, Montclair, N. J., assignors of one-half to Montclair Research Corporation and one-half to Ellis-Foster Company. Reaction product of rosin and copolymer of vinyl acetate and an alpha-unsaturated carboxylic acid ester and making same. 2,452,870, Nov. 2.
Saachy, Thomas, New York, N. Y. Bubble making machine. 2,452,794, Nov. 2.
Sabin, Archie R., Alexandria, Va. Moisture control device. 2,452,957, Nov. 2.
Sachanen, Alexander N.: *See*—
Caesar, Philip D., and Sachanen.
Sampson, Frederick W., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Ice tray. 2,452,686, Nov. 2.
Sasiaw, Otto, Lyndhurst, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Metal contact rectifier. 2,452,603, Nov. 2.
Savage Arms Corporation, assignee: *See*—
Hussey, Chester L.
Savoie, Mark E., Cleveland, Ohio. Eraser holding mechanism. 2,452,795, Nov. 2.
Scarborough, William B., assignee, as trustee: *See*—
Fairchild, Sherman M.
Schade, Frank S., assignor to National Blank Book Company, Holyoke, Mass. Visible index. 2,452,687, Nov. 2.
Schild, Otto, La Chaux-de-Fonds, Switzerland. Synchronous electric motor with automatic starter. 2,452,958, Nov. 2.
Schlett, Otto, Woodside, N. Y. Combination emergency wheel and antiskid device. 2,452,688, Nov. 2.
Schlitz, Jos., Brewing Company, assignee: *See*—
Uihlein, Erwin C., and Lawrie.
Schmitz, William R., Jr.: *See*—
Bradshaw, William H., and Schmitz.
Schnepel, Frederick V., Middle River, Md. Ash tray. 2,452,871, Nov. 2.
Schott, John F., et al.: *See*—
Daly, Lawrence E., and Schott.
Schultz, William O., South Milwaukee, assignor to Line Material Company, Milwaukee, Wis. Combined fuse and demand meter. 2,452,872, Nov. 2.

Schulz, Fred R., Scotch Plains, assignor to Essell Corporation, Newark, N. J.; B. Verney, trustee in bankruptcy of said Essell Corporation. Miniature permanent magnet motor. 2,453,101, Nov. 2.

Scott Aviation Corporation, assignee: *See*—
Meidenbauer, Phillip E., Jr.

Scribner, Allison K., and F. W. Wilder, Portsmouth, Va., assignors, by mesne assignments, to Phillips Petroleum Company. Manufacture of resins from sulfur dioxide and unsaturated organic compounds. 2,453,039, Nov. 2.

Scully, Charles T.: *See*—
Chatterjea, Prafulla K., and Scully.

Seawright, Johnnie J., Goldville, S. C. Automatic builder motion knockoff for roving frames. 2,452,873, Nov. 2.

Segall, Louis H.: *See*—
Tognola, Tullio, and Segall.

Selsmeyer, Edward L., Green Bay, Wis. Method of and apparatus for inclosing a folded parachute pack. 2,452,604, Nov. 2.

Shafer, Henry M.: *See*—
Wolthuis, Enno, and Shafer.

Shallenberg, Walter, assignor to The Deming Company, Salem, Ohio. Pumping system. 2,452,874, Nov. 2.

Shanley, Edward S.: *See*—
Hyatt, Harlow G., and Shanley.

Shannon, Robert B., Akron, Ohio. Convection type electrical heating device. 2,452,875, Nov. 2.

Shanton, Leon R., Cherryvale, Kans. Lubricated crank structure. 2,452,605, Nov. 2.

Sharma, Jagan N., Los Angeles, Calif., assignor of nine one-hundredths to W. H. Wilson, nine one-hundredths to A. E. Wilson, nine one-hundredths to N. Doyle, nine one-hundredths to W. H. Wilson, Jr., nine one-hundredths to R. M. Wilson, five one-hundredths to A. H. Wilson. Treating leafy vegetables. 2,453,040, Nov. 2.

Sharp, William A., National City, assignor to Solar Aircraft Company, San Diego, Calif. Self-locking pliers with crossed handles. 2,453,041, Nov. 2.

Sharples Chemicals Inc., assignee: *See*—
Robinson, Correl N., Jr., and Olin.

Shaw, Henry, Bessacarr, Doncaster, England. Welding rod and electrode holder. 2,452,876, Nov. 2.

Shell Development Company, assignee: *See*—
Gilbert, Walton E.
Morris, Rupert C., and Shokal.
Wachter, Aaron.
Williams, Paul H., and Ballard.

Sheppard, William F., Chicago, Ill. Foldaway shoe tree. 2,452,689, Nov. 2.

Sheridan, Henry M., Erie, Pa., assignor to Apex Tool & Cutter Company, Shelton, Conn. Tool bit and holder therefor. 2,452,877, Nov. 2.

Shimp, William A., Minneapolis, Minn. Liquid measuring and dispensing apparatus. 2,453,080, Nov. 2.

Shivell, Homer J., Kingsport, Tenn. Check strap. 2,452,690, Nov. 2.

Shoemaker, Bernard H., Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill. Isomerization of paraffinic hydrocarbons. 2,452,691, Nov. 2.

Shokal, Edward C.: *See*—
Morris, Rupert C., and Shokal.

Shore, William F., Freeport, N. Y. Gauge for measuring and indicating the hardness of various substances. 2,453,042, Nov. 2.

Sidebotham, Melvin H., Newton, Mass. Machine for thermoplastically treating materials. 2,452,959, Nov. 2.

Siegel, Alfred, Roselle, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Phthalocyanine pigments and process for producing same. 2,452,606, Nov. 2.

"Silto, S. A.," assignee: *See*—
Ponsy, Louis E.

Singer Manufacturing Company, The, assignee: *See*—
Johnson, Ralph E.

Skibsted, Ole M., Wolford, N. Dak. Self-releasing rope hitch. 2,452,796, Nov. 2.

Slaughter, Charles E., New Canaan, assignor to Extruded Plastics, Inc., Norwalk, Conn. Methods of packaging. 2,452,607, Nov. 2.

Sleep, Herbert A., Yreka, Calif. Duck strap. 2,452,692, Nov. 2.

Smith, A. O., Corporation, assignee: *See*—
Gruetjen, Frederick A.

Smith, David B., Flourtown, assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa. Method and apparatus for indicating frequency coincidence between alternating currents or voltages. 2,452,960, Nov. 2.

Smith, Drum & Company, assignee: *See*—
Drum, Harry S., Dodson, and Jaxheimer.

Smith, George B., Evanston, Ill., assignor to Minnesota Mining & Manufacturing Company, St. Paul, Minn. Iron oxide pigments and producing the same. 2,452,608, Nov. 2.

Smith, Henry B., Baltimore, Md., assignor, by mesne assignments, to U. S. Industrial Chemicals, Inc. Stripping of acetaldehyde from alcol by hydrocarbon vapors. 2,452,797, Nov. 2.

Smith, Herschel G., Wallingford, and T. L. Cantrell, Lansdowne, assignors to Gulf Oil Corporation, Pittsburgh, Pa. Mineral oil compositions resistant to foaming. 2,452,693, Nov. 2.

Smith, James L.: *See*—
Kuther, Max K., and Smith.

Smith, Sidney R., Jr., Pittsfield, Mass., assignor to General Electric Company. Protective switch. 2,452,961, Nov. 2.

Snethen, George E., Oklahoma City, Okla. Line marking tool. 2,452,962, Nov. 2.

Snyder, Leland H., Chicago, Ill., assignor, by mesne assignments, to Knapp-Monarch Company, St. Louis, Mo. Massaging device. 2,452,798, Nov. 2.

Societe Francaise de Construction de Bennes Automatiques, assignee: *See*—
Allard, Pierre J. T.

Socony-Vacuum Oil Company, Incorporated, assignee: *See*—
Brown, Henry T.
Caesar, Philip D.
Caesar, Philip D., and Sachanen.
Happel, John, and Cauley.
Killingsworth, Robert B., Van Horn, and Spelshouse.

Sofia, Aurelius, Mamaroneck, N. Y. Anchor fastening. 2,452,694, Nov. 2.

Solar Aircraft Company, assignee: *See*—
Sharp, William A.

Solomon, Nathan L., Englewood, N. J. Hair net. 2,453,043, Nov. 2.

Somers, Brock A., Garden City, R. D. McCoy, Bronxville, and J. R. Lilienthal, Brooklyn, N. Y., assignors to The Sperry Corporation. Antihunt follow-up system. 2,452,609, Nov. 2.

Sommer, Emile A., North Hollywood, Calif. Seed planter. 2,452,963, Nov. 2.

Sonnenfeld, Hugo, Bradford, assignor to Standard Telephones and Cables Limited, London, England. Extrusion machine for producing power cables. 2,452,610, Nov. 2.

Sonnett, William J., and B. B. Stobbe, assignors to Ohio-Kentucky Manufacturing Company, Ada, Ohio. Baseball mitt. 2,452,695, Nov. 2.

Speaker, David M., East Orange, N. J., and J. B. Hersh, Flushing, N. Y. Apparatus for and method of measuring or indicating limb or digital volume changes resulting from arterial pulsations. 2,452,799, Nov. 2.

Spelshouse, Wallace E.: *See*—
Killingsworth, Robert B., Van Horn, and Spelshouse.

Sperry Corporation, The, assignee: *See*—
Hansen, William W., and Woodyard.
Kenny, Charles R.
McCoy, Rawley D.

Spiadis Société pour l'Application d'Inventions Scientifiques, assignee: *See*—
Esnault-Pelterie, Robert.

Sporting Specialties Company, assignee: *See*—
Krake, Foster.

Stabler, Robinson R., Greensboro, N. C. Dressing and repointing hypodermic needles. 2,452,696, Nov. 2.

Stabler, Robinson R., Greensboro, N. C. Device for sharpening hypodermic needles. 2,452,697, Nov. 2.

Staff, Charles E., Charleston, W. Va., assignor to Carbide and Carbon Chemicals Corporation. Producing cyclopentadiene and its homologues. 2,453,044, Nov. 2.

Stahell, Paul, Arvida, Quebec, Canada. Foot scraper. 2,452,800, Nov. 2.

Standard Oil Company, assignee: *See*—
Shoemaker, Bernard H.

Standard Register Company, The, assignee: *See*—
Metzner, Albert W.

Standard Telephones and Cables Limited, assignee: *See*—
Chatterjea, Prafulla K., and Scully.
Fremlin, John H.
Gibson, William T.
Glover, William F.
Lee, Edwin C.
McWhirter, Eric M. S., and Ward.
Sonnenfeld, Hugo.

Stan-Wall Manufacturing Company, assignee: *See*—
Allen, Elmo W.

Stapling Machines Co., assignee: *See*—
Woodbury, Glen P.

Sterling Motor Truck Company, Inc., assignee: *See*—
Blau, Arthur H.

Stevens, Guy W. W.: *See*—
Knott, Edward B., and Stevens.

Stewart-Warner Corporation, assignee: *See*—
McCollum, Henry J. D.

Stobbe, Benjamin B.: *See*—
Sonnett, William J., and Stobbe.

Stone, Eugene R., Washington, D. C. Violin peg. 2,452,964, Nov. 2.

Stratton, Jerry L., Schenectady, N. Y., assignor to General Electric Company. Electric regulator. 2,452,611, Nov. 2.

Strebinger, Richard R., assignor to Bendix Aviation Corporation, South Bend, Ind. Carburetor. 2,452,698, Nov. 2.

Strickland, Thomas B., Animas, N. Mex. Counterbalancing attachment for pumps. 2,452,802, Nov. 2.

Strom, Herbert F., West Allis, Wis., assignor to Sunbeam Corporation. Apparatus for high-frequency induction heating. 2,452,801, Nov. 2.

Studebaker Corporation, The, assignee: *See*—
Greenlee, Harry R.

Submarine Signal Company, assignee: *See*—
Clement, Ivan C.
Hubbard, Beverly R.

Sudiah, Esther, and R. Sudiah, deceased; Brooklyn, N. Y., by E. Sudiah, legal representative. Self-adjustable shoe upper. 2,452,803, Nov. 2.

Sudiah, Rachel, deceased: *See*—
Sudiah, Esther and R.

Sulprizio, Deuta, Oakland, Calif. Machine construction. 2,452,804, Nov. 2.

Sulprizio, Deuta, Oakland, Calif. Bearing for spindles and the like. 2,452,965, Nov. 2.

Sunbeam Corporation, assignee: *See*—
Strom, Herbert F.

Sundstrand Machine Tool Co., assignee: *See*—
Wahlmark, Gunnar A.

Sussenbach, Paul, assignor to The Presstite Engineering Company, St. Louis, Mo. Composition of matter for sealing spot-welded joints. 2,452,805, Nov. 2.

Sutherland, Ernest E., Mansfield, Ohio, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Electric terminal receptacle. 2,453,045, Nov. 2.

Sutton, Otis B., Canton, assignor to The Hoover Company, North Canton, Ohio. Refrigeration. 2,452,699, Nov. 2.

Sutton, Willard J., Gary, Ind. Welding jig for broken drills. 2,453,046, Nov. 2.

Swenberg, Walter A., Long Beach, Calif. Relief valve assembly for ventilation system. 2,452,612, Nov. 2.

Swift, Jay D.: *See*—
Christensen, Stig, Rosenberg, and Swift.

Synan, John F.: *See*—
Vincent, George P., MacMahon, and Synan.

Sziklai, George C., Princeton, N. J., assignor to Radio Corporation of America. Wide band amplifier. 2,453,081, Nov. 2.

Tabb, Braxton H., Jr.: *See*—
Gillette, John C., and Tabb.

Tappan Stove Company, The, assignee: *See*—
Bauer, William.

Tawney, Pliny O., Passaic, N. J., assignor to United States Rubber Company, New York, N. Y. Copolymers of 2,5-dimethyl-1,5-hexadiene and acrylic esters. 2,452,700, Nov. 2.

Taylor, Howard F., Washington, D. C., and R. E. Morey, Forest Heights, Md. Determining effect of mold conditions on metal castings. 2,452,613, Nov. 2.

Taylor, John A., Elmhurst, assignor to Heinz Art Service, New York, N. Y. Sheet material display device. 2,453,047, Nov. 2.

Taylor, Robert F.: *See*—
Morey, Glen H., and Taylor.

Taylor, Taylor & Hobson Limited, assignee: *See*—
Cox, Arthur.

Technicolor Motion Picture Corporation, assignee: *See*—
Olds, Earl M., Jr.

Teetsell, Roy J., Red Bank, N. J., assignor to the United States of America as represented by the Secretary of War. Electrical test circuit. 2,452,614, Nov. 2.

Tetziaff, Benjamin A., deceased, Riverside, Ill.; L. B., R. W., and C. C. Tetziaff, executors. 2,453,806, Nov. 2.

Tetziaff, Clarence C., et al., executors: *See*—
Tetziaff, Benjamin A.

Tetziaff, Lillian B., et al., executors: *See*—
Tetziaff, Benjamin A.

Atwell, Harold V.

Texaco Development Corporation, assignee: *See*—
Hayes, Everett P., and Garrison.

Texfan Company, assignee: *See*—
Morrison, Hackley.

Thew Shovel Company, The, assignee: *See*—
Gillespie, Alex J.

Thomas, Charles A., Fort Wayne, Ind., assignor to General Electric Company. Dynamoelectric machine. 2,452,966, Nov. 2.

Thomas, Orrin H., Williamsport, Pa. Connector plug. 2,452,967, Nov. 2.

Thompson, Harry E., Sidney, Ohio. Sealed refrigeration unit. 2,452,807, Nov. 2.

Thompson Products, Inc., assignee: *See*—
Bartlett, Kenneth M., and Pekerek.
Cunningham, John E., and Kempe.

Thomson, E. Craig, Boston, assignor to Photoswitch Incorporated, Cambridge, Mass. Electric supervisory apparatus. 2,452,615, Nov. 2.

Timken Roller Bearing Company, The, assignee: *See*—
Boden, Ernest G.

Timmerman, Julius W., Jr.: *See*—
Paul, William E., Timmerman, and Bold.

Titanium Alloy Manufacturing Company, The, assignee: *See*—
Wainer, Eugene, and Van Mater.

Tittle, Hulburt C., Cheektowaga, assignor to Colonial Radio Corporation, Buffalo, N. Y. Automatic tuning control circuit. 2,452,878, Nov. 2.

Tognola, Tullio, and L. H. Segall, Sidney, assignor to Bendix Aviation Corporation, New York, N. Y. Spark plug and making the same. 2,453,048, Nov. 2.

Tomkins, Walter M., and A. C. Larkin, Pointe St. Charles, Montreal, J. C. Anthony and O. K. Ross, St. Laurent, Quebec, Canada, and R. M. Mero, Chicago, Ill., assignors to Continental Can Company, Inc., New York, N. Y. Apparatus for immersing edge portions of blank plate in successive treating baths. 2,452,879, Nov. 2.

Toronto Carpet Manufacturing Co. Limited, assignee: *See*—
Davidson, James.

Towne, Carlton G.: *See*—
Guild, Lurelle, and Towne.

Trefry, Edgar C., assignor of one-half to G. L. Le Munyon, Los Angeles County, Calif. Implement mounting. 2,452,701, Nov. 2.

Triller, David P., Indianapolis, Ind. Door-sag correcting mechanism. 2,453,049, Nov. 2.

Tucker, Morris, assignor to R. Tucker, Brooklyn, N. Y. Bed slat. 2,452,808, Nov. 2.

Tucker, Robert, assignee: *See*—
Tucker, Morris.

Turbett, Forrest L., Joplin, Mo., assignor to The Eagle-Picher Company, Cincinnati, Ohio. Smelting titaniferous ore. 2,453,050, Nov. 2.

Turnbull, Stockton G., Jr., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. 3,4-dihydroxythiophene-2,5-dicarboxylic acid production. 2,453,102, Nov. 2.

Turnbull, Stockton G., Jr., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Decarboxylation of 3,4-dihydroxy-2,5-dicarboxythiophene. 2,453,103, Nov. 2.

Tutton, Harry V., assignee: *See*—
Merrill, Lewis B.

Tyskewicz, John P.: *See*—
Bourne, Roland B., Tyskewicz, and Chase.

Tyson, Archie M., Dallas, Tex. Resonator for musical instruments. 2,452,809, Nov. 2.

Uglow, Lenaard V., Minatare, Nebr. Seed potato cutting machine. 2,452,810, Nov. 2.

Ulilein, Erwin C., Grafton, and J. W. Lawrie, assignors to Jos. Schlitz Brewing Company, Milwaukee, Wis. Stabilizing beer against radiation deterioration. 2,452,968, Nov. 2.

Umbdenstock, Walter, assignor to Lion Manufacturing Corporation, Chicago, Ill. Drill grinding machine. 2,452,702, Nov. 2.

Umbdenstock, Walter, assignor to Lion Manufacturing Corporation, Chicago, Ill. Drill grinding machine. 2,452,703, Nov. 2.

Union Oil Company of California, assignee: *See*—
Bauer, Robert F., and Matthews.

Union Switch & Signal Company, The, assignee: *See*—
Quinlan, Joseph A.

United Aircraft Corporation, assignee: *See*—
Dickerman, Fred N.
Jarvis, Harold T.

United Shoe Machinery Corporation, assignee: *See*—
Knowlton, Cutler D.

United States Atomic Energy Commission, the United States of America as represented by the, assignee: *See*—
Duffey, Dick.

U. S. Industrial Chemicals, Inc., assignee: *See*—
Smith, Henry B.

United States Rubber Company, assignee: *See*—
Cuthbertson, George R.
Daly, Lawrence E., and Schott.
Tawney, Pliny O.

Universal Moulded Products Corporation, assignee: *See*—
Nebesar, Robert J.

Usselman, George L., Port Jefferson, N. Y., assignor to Radio Corporation of America. Frequency divider. 2,452,811, Nov. 2.

Vacca, Umberto, Brooklyn, N. Y. Bathing trunks. 2,453,051, Nov. 2.

Van Beuren, John M., Morristown, assignor to Measurements Corporation, Boonton, N. J. Electronic voltmeter. 2,452,880, Nov. 2.

Van Etten, Howard A., Newburgh, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Stain resistant plasticized polyvinyl chloride resin coatings. 2,453,052, Nov. 2.

Van Horn, Harry T.: *See*—
Killingsworth, Robert B., Van Horn, and Spelshouse.

Van Mater, Henry L.: *See*—
Wainer, Eugene, and Van Mater.

Weir, Chester I., Buffalo, N. Y. Bilge water pumping apparatus. 2,452,973, Nov. 2.
Weissenbach, Joseph, Los Angeles, Calif. Flight operation indicator. 2,452,621, Nov. 2.
Welford, Stanley F. W., assignor to Ilford Limited, Ilford, England. Package of photographic light-sensitive papers. 2,452,705, Nov. 2.
Werner, R. D., Co., Inc., assignee: *See*— Werner, Richard D.
Werner, Richard D., assignor to R. D. Werner Co., Inc., New York, N. Y. Method and device for molding. 2,452,884, Nov. 2.
Western Electric Company, Incorporated, assignee: *See*— Conklin, Robert M. Wright, Robert L., II.
Westin, Axel: *See*— Westin, Sven and A. W.
Westin, Sven, West Allis, and A. Westin, Milwaukee, Wis., assignors, by mesne assignments, to Federal Machine & Welder Co., Warren, Ohio. Electric upsetting and forming. 2,452,974, Nov. 2.
Westinghouse Electric Corporation, assignee: *See*— Graybill, Howard W. Sutherland, Ernest E.
Whalley, William B., Liverpool, England, assignor to Imperial Chemical Industries Limited. Production of organic fluorine compounds. 2,452,975, Nov. 2.
Whiffen, Richard E., Hammonton, N. J. Combination brake pedal and throttle. 2,453,054, Nov. 2.
Whipple, Jack V., and A. B. C. Palazzo, New York, N. Y. Toy bombing game. 2,452,817, Nov. 2.
Whitcomb, Forrest R., Worcester, Mass. Roll adjusting mechanism. 2,452,976, Nov. 2.
White, Elvin E., Tempe, Ariz. Rock shearing machine. 2,452,706, Nov. 2.
White, Ira M., Walnut Creek, and H. E. Nelson, assignors to The Pelton Water Wheel Company, San Francisco, Calif. Turbine seal. 2,453,055, Nov. 2.
White Sewing Machine Corporation, assignee: *See*— Hohmann, Richard K.
Whitehead Bros. Rubber Company, The, assignee: *See*— Barnard, Harold.
Wiederrich, John R., assignee: *See*— Wade, Stanley M.
Wilder, Frank W.: *See*— Scribner, Allison K., and Wilder.
Willard, Louis E., New York, N. Y. Hydraulic shock absorber. 2,452,885, Nov. 2.
Williams, Alan W., Westwood, Los Angeles, Calif. Machine for removing putty. 2,452,818, Nov. 2.
Williams, Paul H., Berkeley, and S. A. Ballard, Oakland, assignors to Shell Development Company, San Francisco, Calif. Production of cyclic ethers. 2,452,977, Nov. 2.
Wilson, A. H., et al., assignee: *See*— Sharma, Jagan N.
Wilson, Annetta E., et al., assignee: *See*— Sharma, Jagan N.
Wilson, Ezekiel J., Slingerlands, assignor to F. C. Huyck & Sons, Rensselaer, N. Y. Warp yarn compressing spooler. 2,452,819, Nov. 2.
Wilson, Joseph B.: *See*— Ball, Charles J. P., Jessup, Emley, and Wilson.
Wilson, Robert M., et al., assignee: *See*— Sharma, Jagan N.
Wilson, William H., et al., assignee: *See*— Sharma, Jagan N.
Wilson, William H., Jr., et al., assignee: *See*— Sharma, Jagan N.
Winther, Martin P., as trustee and assignee: *See*— Winther, Martin P.
Winther, Martin P., assignor to M. P. Winther, as trustee, Waukegan, Ill. Eddy-current coupling. 2,452,820, Nov. 2.
Wirth, Emil O.: *See*— Barfod, Fredrik, and Wirth.
Wirtz, Emery F., assignor to Zwicker Knitting Mills, Appleton, Wis. Ornamented knitted article manufacture. 2,452,707, Nov. 2.
Woldring, Bert, assignor to The Rapids-Standard Company, Grand Rapids, Mich. Dolly structure for conveyers. 2,452,978, Nov. 2.
Wolf, James M., Boston, Mass., assignor, by mesne assignments, to the United States of America as represented by the Secretary of War. Reflector. 2,452,822, Nov. 2.
Wolff, Otto E.: *See*— Land, Edwin H., Bachelder, and Wolff.
Wolfram, John N., assignor to The Parker Appliance Company, Cleveland, Ohio. Flexible coupling. 2,452,889, Nov. 2.
Wolfram, John N., assignor to The Parker Appliance Company, Cleveland, Ohio. Coupling for tubes. 2,452,890, Nov. 2.
Wolthuis, Enno, Cranford, and H. M. Shafer, Westfield, N. J., assignors to General Aniline & Film Corporation, New York, N. Y. Preparation of hydroxy aromatic carboxylic acids. 2,453,105, Nov. 2.
Wood, Frank E., Sturgis, S. Dak. Wheel chair. 2,452,886, Nov. 2.
Wood, Lawrence A., Jr., Indianapolis, Ind., assignor to Radio Corporation of America. Making phonograph records. 2,452,821, Nov. 2.
Woodbury, Glen P., Mountain Lakes, N. J., assignor to Stapling Machines Co. Machine for making wirebound boxes. 2,452,887, Nov. 2.
Woodward, Ernest M., McDonald, Ohio. Toy railway bridge. 2,452,888, Nov. 2.
Woodyard, John R.: *See*— Hansen, William W., and Woodyard.
Wooldridge Manufacturing Company, assignee: *See*— Lindsley, Lawrence B.
Wright, Robert L., II, Dundalk, Md., assignor to Western Electric Company, Incorporated, New York, N. Y. Cable splice. 2,452,823, Nov. 2.
Yardeny, Michel N., and R. Bernas, New York, N. Y., said Bernas assignor to said Yardeny. Remote-control apparatus with adjustable gap. 2,453,106, Nov. 2.
Yates, Herbert, Kingsbury, London, England. Work holder. 2,452,824, Nov. 2.
York Corporation, assignee: *See*— Patterson, Veit C.
Youhouse, Joseph, Fairfield, assignor to Casco Products Corporation, Bridgeport, Conn. Heating pad. 2,452,622, Nov. 2.
Young, Charles A., Springfield, Ohio. Single trigger action for double-barrel shotguns. 2,452,825, Nov. 2.
Young, William S., Philadelphia, Pa., assignor to Consolidated Engineering Corporation, Pasadena, Calif. Apparatus for transfer of light liquid. 2,452,623, Nov. 2.
Zack, William E., Berwyn, Ill. Surgical anastomosis apparatus and method. 2,453,056, Nov. 2.
Zienty, Ferdinand B., assignor to Monsanto Chemical Company, St. Louis, Mo. M-monoformyl-N,N'-di-substituted ethylenediamines. 2,453,057, Nov. 2.
Zimmerman, Karl H., Nutley, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Apparatus for testing insulation of electrical cables. 2,452,624, Nov. 2.
Zuckerman, Emil, Stamford, Conn. Extension table. 2,452,979, Nov. 2.
Zwicker Knitting Mills, assignee: *See*— Wirtz, Emery F.

LIST OF PLANT INVENTIONS

Rose plant. L. A. Tuttle. 810. Nov. 2.

LIST OF DESIGN INVENTIONS

Airplane. D. A. Beck. 151,583, Nov. 2.
Analysis machine, Photographic color-transparency. I. Eachus and N. Macbeth, Jr. 151,615, Nov. 2.
Bit, Bridle. P. M. Kelly. 151,625, Nov. 2.
Bracelet. E. Demmler. 151,603, Nov. 2.
Brassière, Adjustable. J. Cohn. 151,598, Nov. 2.
Button or similar article. W. Dreil. 151,606–13, Nov. 2.
Cab, Motor vehicle. C. S. Ash. 151,580, Nov. 2.
Cabinet and bench, Combined storage. F. F. Smead. 151,662, Nov. 2.
Cabinet and douche tank, Combined. C. L. Wolfe. 151,667, Nov. 2.
Cabinet for greeting cards, Display. H. J. Loosley. 151,637, Nov. 2.
Cabinet, Kitchen. N. Lewis. 151,636, Nov. 2.
Cabinet, Music. S. F. Grabowski and J. M. Sawaya. 151,620, Nov 2.
Cabinet, Utility. R. C. Ingersoll. 151,624, Nov. 2.
Call light, Hospital patient's. G. H. Kress. 151,626, Nov. 2.
Cart, Child's. J. H. Bates. 151,582, Nov. 2.
Casing and minute glass unit, Thermometer. M. Graboi. 151,633, Nov. 2.
Casing for a piano or similar article. J. Barofsky. 151,581, Nov. 2.
Chair or the like. R. Feraud. 151,617, Nov. 2.
Chest for storing and displaying surgical instruments. A. Haller. 151,622, Nov. 2.
Clip for mirrors or glass panels. E. W. Clark. 151,597, Nov. 2.
Clock dial or similar article. J. Hanna. 151,634, Nov. 2.
Clock, radio, and lamp, Combination. A. I. Shapiro. 151,660, Nov. 2.
Coupler for towing vehicles. A. Denney. 151,604, Nov. 2.
Dispenser, Beverage. A. Naiden. 151,650, Nov. 2.
Dresser. A. J. Buckner. 151,589, Nov. 2.
Duster, Household. D. Heller. 151,623, Nov. 2.
Fishing lure. O. C. Schaefer. 151,659, Nov. 2.
Game board. C. V. De Mattio. 151,602, Nov. 2.
Game board. W. R. Mabry. 151,641, Nov. 2.
Grille guard for automobile radiators. H. Phillips. 151,652–4, Nov. 2.
Guard, Automobile radiator. L. Bustin. 151,596, Nov. 2.
Handbag. F. H. Rath. 151,656, Nov. 2.
Head for a portable sewing machine. S. R. Bell. 151,584, Nov. 2.
Heel, Shoe. R. D. Bunn and B. L. Hayes. 151,591, Nov. 2.
Holder or similar article, Perfume bottle. L. Cotnareanu. 151,601, Nov. 2.
House. G. M. Marrow. 151,646–8, Nov. 2.
Lamp. C. B. Stevens. 151,663, Nov. 2.
Lamp, Desk. T. Dolan. 151,605, Nov. 2.
Lamppost. E. Lamb and C. D. Freeman. 151,628, Nov. 2.
Lamppost and lamp, Combined. E. Lamb and C. D. Freeman. 151,629, Nov. 2.
Lever of a drum snare tensioning mechanism. W. F. Ludwig. 151,639, Nov. 2.
Lighting unit, Fluorescent. G. Gomberg. 151,632, Nov. 2.
Lighting unit, Multiple fluorescent. G. Gomberg. 151,631, Nov. 2.
Lug for drums, Drumhead tensioning. W. F. Ludwig. 151,638, Nov. 2.
Lug for drums, Twin drumhead tensioning. W. F. Ludwig. 151,640, Nov. 2.
Nutcracker and tray, Combined. I. W. Green. 151,621, Nov. 2.
Peg, Clothes. D. Nield. 151,651, Nov. 2.
Pen or similar article, Fountain. W. D. Teague and R. J. Harper. 151,664–5, Nov. 2.
Pencil, Calendar. J. M. Sherrer. 151,661, Nov. 2.
Pencil, Mechanical. H. W. Sams. 151,658, Nov. 2.
Piano. L. Bromberg. 151,585, Nov. 2.
Pilot and buzzer station, Combined. G. H. Kress. 151,627, Nov. 2.
Pin or similar article. A. Elkonin. 151,616, Nov. 2.
Plane, Rotor. J. Youhouse. 151,669, Nov. 2.
Puzzle or similar article. A. M. Renault. 151,657, Nov. 2.
Reel, Film. J. M. Goldmann. 151,619, Nov. 2.
Seat, Adjustable fishing reel. C. H. Matson. 151,649, Nov. 2.
Shoe. R. Maling. 151,644–5, Nov. 2.
Sofa. A. J. Buckner. 151,587, Nov. 2.
Spray attachment for a container, Atomizer. S. Gimelli, 151,618, Nov. 2.
Stand, Iron. P. P. Wriede and H. Pike. 151,668, Nov. 2.
Support for treating lenses, Handling. D. M. Mackenzie. 151,643, Nov. 2.
Table. A. J. Buckner. 151,586, Nov. 2.
Table, Dressing. A. J. Buckner. 151,590, Nov. 2.
Table, Night. A. J. Buckner. 151,588, Nov. 2.
Table, Occasional. L. and N. Appell. 151,578–9, Nov. 2.
Telephone, Hand. H. Dreyfuss. 151,614, Nov. 2.
Tone arm, Phonograph. C. A. Geib. 151,630, Nov. 2.
Toy clown. G. Lehmann. 151,635, Nov. 2.
Toy rattle or similar article. J. Colm. 151,599–600, Nov. 2.
Trailer, Vehicle. W. B. MacDonald, Jr. 151,642, Nov. 2.
Turner or similar article, Pancake. R. H. Wendt. 151,666, Nov. 2.
Umbrella. C. M. Preaus. 151,655, Nov. 2.
Wallpaper or the like. W. Burton. 151,592–5, Nov. 2.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 2D DAY OF NOVEMBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrasive products. N. P. Roble. 2,452,793, Nov. 2.
Acetaldehyde from aldol by hydrocarbon vapors, Stripping of. H. B. Smith. 2,452,797, Nov. 2.
Acrylonitrile, Production of. H. S. Davis and E. L. Carpenter. 2,452,554, Nov. 2.
Adjustable eccentric. R. E. Johnson. 2,453,072, Nov. 2.
Adjusting mechanism, Wheel brake. A. H. Blau. 2,452,717, Nov. 2.
Aerial delivery contrivance, Shockproof. R. J. Nebesar. 2,452,783, Nov. 2.
Agents for reducing the surface tensions of liquids. L. Leiserson. 2,453,022, Nov. 2.
Alarm system, Temperature. K. M. Lord and G. E. Warren. 2,452,942, Nov. 2.
Aliphatic polyamines, Manufacture of. C. N. Robinson, Jr., and J. F. Olin. 2,452,602, Nov. 2.
Alkali cellulose, Continuous making. W. H. Bradshaw and W. R. Schmitz, Jr. 2,452,542, Nov. 2.
Alkyl thiophene-aldehyde synthetic resins. P. D. Caesar. 2,453,086, Nov. 2.
Alkylene cyanohydrins, Production of. E. L. Carpenter. 2,453,062, Nov. 2.
Aminoanthraquinone sulfonamides. C. G. Vogt. 2,453,104, Nov. 2.
Amplifier, Wide band. G. C. Szikiai. 2,453,081, Nov. 2.
Analyzer apparatus, Network. H. A. Peterson. 2,452,954, Nov. 2.
Analyzing apparatus. W. H. Wannamaker, Jr. 2,453,053, Nov. 2.
Anchor fastening. A. Sofia. 2,452,694, Nov. 2.
Angle indicator. J. C. Ivey. 2,452,930, Nov. 2.
Annealing box. M. L. Jacob. 2,452,931, Nov. 2.
Antenna, Broad-band. J. D. Kraus. 2,452,767, Nov. 2.
Antiskid device. R. J. Burkhart. 2,452,831, Nov. 2.
Apparatus for and method of measuring or indicating limb or digital volume changes resulting from arterial pulsations. D. M. Speaker and J. B. Hersh. 2,452,799, Nov. 2.
Apparatus for automatically controlling duration of electrical current. R. V. Anderson. 2,452,537, Nov. 2.
Apparatus for burning liquid fuel in the presence of gas under pressure. D. C. Breault. 2,452,543, Nov. 2.
Apparatus for depositing material in well holes. J. D. Haynes. 2,453,068, Nov. 2.
Apparatus for high-frequency induction heating. H. F. Strom. 2,452,801, Nov. 2.
Apparatus for immersing edge portions of black plate in successive treating baths. W. M. Tomkins, A. C. Larkin, J. C. Anthony, O. K. Ross, and R. M. Mero. 2,452,879, Nov. 2.
Apparatus for intravenous administration of liquids. M. R. Fields. 2,452,644, Nov. 2.
Apparatus for receiving and dumping refuse. W. D. Hardy. 2,452,751, Nov. 2.
Apparatus for testing insulation of electrical cables. K. H. Zimmerman. 2,452,624, Nov. 2.
Apparatus for transfer of light liquid. W. S. Young. 2,452,623, Nov. 2.
Apparatus for treating seeds with chemical dust and bagging the seeds. H. J. Kemp. 2,452,935, Nov. 2.
Apparatus for welding, utilizing energy storage apparatus, Direct-current. F. H. Johnson and C. F. Leathers. 2,452,573, Nov. 2.
Appliance, Jaw-supporting. V. M. Wagner. 2,452,816, Nov. 2.
Apron. M. J. Kraft. 2,453,074, Nov. 2.
Arresting hook. F. N. Dickerman. 2,452,911, Nov. 2.
Article of footwear and heel therefor. A. J. Dunbrook. 2,453,002, Nov. 2.
Article of furniture. L. Guild and C. G. Towne. 2,453,090, 2,453,090, Nov. 2.
Ash tray. F. V. Schnepel. 2,452,871, Nov. 2.
Attachment for moving picture projectors, Still picture. H. Getter. 2,452,745, Nov. 2.
Attachment for pumps, Counterbalancing. T. B. Strickland. 2,452,802, Nov. 2.
Audible-signal device, Electromagnetic. A. B. Poole. 2,452,678, Nov. 2.
Auger bits, Manufacturing. B. H. Daulton. 2,453,000, Nov. 2.
Automatic builder motion knockoff for roving frames. J. J. Seawright. 2,452,873, Nov. 2.
Automatic knockoff device for ring twisting and spinning machines. J. Davidson. 2,452,910, Nov. 2.
Automatic tuning control circuit. H. C. Tittle. 2,452,878, Nov. 2.
Baffle holding device, Adjustable. G. H. Knobloch. 2,452,936, Nov. 2.
Bag: *See*—
  Shopping bag.
Bait, Fishing. O. M. Curtis, Jr., and T. M. Prudden. 2,452,553, Nov. 2.
Bait, Fishing, and preparing the same. O. M. Curtis, Jr., and T. M. Prudden. 2,452,552, Nov. 2.
Ball for bowlers, Grip measuring. H. Reitsma. 2,453,036, Nov. 2.
Baseball mitt. W. J. Sonnett and B. B. Stobbe. 2,452,695, Nov. 2.
Batch feed hopper for garbage grinders. O. J. Feight. 2,453,006, Nov. 2.
Bathing trunks. U. Vacca. 2,453,051, Nov. 2.
Bearing: *See*—
  Railway car side bearing.
Bearing for spindles and the like. D. Sulprizio. 2,452,965, Nov. 2.
Bearing lubrication. E. G. Boden. 2,452,719, Nov. 2.
Bed slat. M. Tucker. 2,452,808, Nov. 2.
Bed spring support. M. S. Firsel. 2,452,645, Nov. 2.
Belt tensioning mechanism for conveyers. J. S. Beltz, 2,452,980, Nov. 2.
Bilge water pumping apparatus. C. I. Weir. 2,452,973, Nov. 2.
Biochemically processed liquid base material, Production of, for food products. G. A. Jeffreys. 2,452,534, Nov. 2.
Boring head. N. Bell. 2,452,828, Nov. 2.
Bottle handling apparatus. R. F. Hammen. 2,452,927, Nov. 2.
Bracket for armchair accessory seats. W. O. Flatt. 2,453,007, Nov. 2.
Brake pedal and throttle, Combination. R. E. Whiffen. 2,453,054, Nov. 2.
Breathing apparatus. P. E. Meidenbauer, Jr. 2,452,670, Nov. 2.
Brooder. J. D. Burkholder, Jr. 2,452,900, Nov. 2.
Brooder. M. C. Cole. 2,452,904, Nov. 2.
Box: *See*—
  Annealing box.
Bubble making machine. T. Saachy. 2,452,794, Nov. 2.
Burning solid fuel, Process and apparatus for. R. Esnault-Pelterie. 2,452,844, Nov. 2.
Bushing for oil-filled electrical apparatus. A. Meyerhans. 2,452,947, Nov. 2.
Cable: *See*—
  Coaxial cable.
Cable and cable connector fatigue testing machine. J. L. McFarland and K. Matzinger. 2,452,588, Nov. 2.
Cable splice. R. L. Wright, II. 2,452,823, Nov. 2.
Cake protecting device. J. J. Bonekamp. 2,452,629, Nov. 2.
Calcium hydrides by distillation, Producing. D. Duffey. 2,453,913, Nov. 2.
Calcium sulfite, Treatment of. H. R. Rafton. 2,453,099, Nov. 2.
Calculating machine. D. Broido. 2,452,987, Nov. 2.
Can dumping machine. R. J. Newton. 2,453,077, Nov. 2.
Canning machine, Fish. M. K. Kuther and J. L. Smith. 2,452,666, Nov. 2.
Car cooler. J. E. Kercheval. 2,453,018, Nov. 2.
Carbalkoxy aminoanthraquinone sulfonamides. E. E. Renfrew, Jr. 2,453,100, Nov. 2.
Carburetor. R. R. Strebinger. 2,452,698, Nov. 2.
Carton. F. D. Palmer. 2,452,952, Nov. 2.
Catalyst, Manufacture of bead-form. H. T. Brown. 2,453,084, Nov. 2.
Catalyzed sulfamic acid sulfation. J. D. Malkemus, J. Ross, and D. J. Potter. 2,452,943, Nov. 2.
Cathode-ray oscilloscope circuit. G. Hecht and L. A. Meacham. 2,452,655, Nov. 2.
Cathode-ray tube. P. K. Weimer. 2,452,619, Nov. 2.
Cathode structure. H. T. O'Neill. 2,452,786, Nov. 2.
Cellular thermoplastic receptacles, Making. L. E. Daly and J. F. Schott. 2,452,999, Nov. 2.
Cement mixer. H. W. and M. Bonney. 2,452,896, Nov. 2.
Chains, Making elastic. W. Hartranft. 2,452,752, Nov. 2.
Chair: *See*—
  Hinged back collapsible Wheel chair.
  chair.
Changeable key cylinder lock. C. Gabrielsen. 2,453,066, Nov. 2.
Check for picker stick of looms. F. H. Pressley. 2,452,955, Nov. 2.
Chest, Ammunition. W. C. Broga. 2,452,545, Nov. 2.
Cigarette extinguisher and ash tray. R. M. Maney. 2,453,026, Nov. 2.
Cinematographic apparatus. E. M. Olds, Jr. 2,453,031, Nov. 2.

Circuit: *See*—
  Automatic tuning control circuit.
  Cathode-ray oscilloscope circuit.
  Electrical test circuit.
  Sweep circuit.
Circuit and method, Ultra high frequency. W. W. Hansen and J. R. Woodyard. 2,452,566, Nov. 2.
Circuit for improving oscillator stability. O. E. Dow. 2,452,912, Nov. 2.
Circuit interrupting apparatus. W. E. Paul; J. W. Timmerman, Jr., and R. E. Bold. 2,452,953, Nov. 2.
Circuits, Crystal oscillator. D. E. Norgaard. 2,452,951, Nov. 2.
Circuits for repeating square shaped wave forms. W. F. Glover. 2,452,563, Nov. 2.
Clamp: *See*—
  Garment clamp.
  Hair clamp.
  Hydraulic internal line-up clamp.
  Machine with resilient work holding clamp.
  Mercury leveling clamp.
  Multiple pneumatic clamp.
Clamp. B. A., L. B., R. W., and C. C. Tetzlaff. 2,452,806, Nov. 2.
Cleaning machine, Floor. J. W. Gardner. 2,452,744, Nov. 2.
Clinical mask for breathing and rebreathing mixtures of gases. W. M. Boothby, A. H. Bulbulian, and W. R. Lovelace, II. 2,452,722, Nov. 2.
Clutch regulation of fan and pump for cooling systems, Speed. H. R. Greenlee. 2,452,650, Nov. 2.
Coating composition of fatty drying oils reacted with fatty acid modified polyhydric alcohol esters of cyclopentadiene maelic adduct. W. H. Butler. 2,452,992, Nov. 2.
Coaxial cable. L. H. Morlin. 2,452,948, Nov. 2.
Cocoa-sugar composition. L. Lang. 2,452,770, Nov. 2.
Coffee maker, Safety valve. L. W. Vezie. 2,452,881, Nov. 2.
Collapsible stand. C. H. Roberts. 2,452,792, Nov. 2.
Collar can collar structure. J. Coyle and J. F. Egenolf. 2,452,839, Nov. 2.
Collet and collet chuck therefor. R. F. Brennen. 2,452,986, Nov. 2.
Colloid dental tray. C. H. Oertel. 2,452,866, Nov. 2.
Combination microphone and control means for dictating machines. G. F. Braun. 2,452,830, Nov. 2.
Combustion apparatus for solid combustibles in fragments. R. Esnault-Pelterie. 2,452,843, Nov. 2.
Combustion heater having air preheating and carbureting means. H. J. D. McCollum. 2,452,779, Nov. 2.
Commutator for dynamoelectric machines. R. F. Franklin. 2,452,918, Nov. 2.
Comparator gauge. C. M. Hathaway. 2,452,753, Nov. 2.
Composition of matter for sealing spot-welded joints. P. Sussenbach. 2,452,805, Nov. 2.
Condenser: *See*—
  Electrical condenser.
Cone bearing adjustment for gear-driven coaster brake. C. L. Hussey. 2,452,660, Nov. 2.
Connecting means and radio shielding means therefor, Electrical. J. R. Frei. 2,452,847, Nov. 2.
Connector: *See*—
  Electrical connector.
Connector for electronic discharge devices, Lead. C. V. Litton. 2,452,582, Nov. 2.
Connector plug. O. H. Thomas. 2,452,967, Nov. 2.
Contact transmitter means for sensitive instruments, Selectable. J. O. Kirwan. 2,452,764, Nov. 2.
Containers, Pie. E. G. Victor. 2,452,969, Nov. 2.
Control apparatus, Humidity. W. Rudoy. 2,452,685, Nov. 2.
Control device, Moisture. A. R. Sabin. 2,452,957, Nov. 2.
Control for stopping looms. J. M. Godreau. 2,452,648, Nov. 2.
Control means for highway crossing signals, Directional. J. A. Quinlan. 2,452,868, Nov. 2.
Control means, Frequency. R. H. Ranger. 2,452,601, Nov. 2.
Control system for target aircraft. C. L. Paulus and H. A. Klein. 2,452,599, Nov. 2.
Control valve. C. V. Gagen. 2,452,647, Nov. 2.
Cooker, Pressure. W. A. Pledger. 2,452,790, Nov. 2.
Cooler: *See*—
  Car cooler.
  Hotbox cooler.
Copolymers of 2,5-dimethyl-1,5-hexadiene and acrylic esters. P. O. Tawney. 2,452,700, Nov. 2.
Corrosion in hydrogen fluoride catalytic organic reactions, Prevention of. A. Wachter. 2,452,812, Nov. 2.
Coupling: *See*—
  Detachable hose coupling.
  Eddy-current coupling.
  Flexible coupling.
  Flexible rotary coupling.
Coupling. G. F. Lomelino. 2,453,024, Nov. 2.
Coupling for tubes. J. N. Wolfram. 2,452,890, Nov. 2.
Couplings for flexible hose. E. C. Carling. 2,452,728, Nov. 2.
Cover for radio jacks and the like, Waterproof. R. R. and F. R. Gonsett. 2,452,922, Nov. 2.
Crank device. R. D. Franzene. 2,452,742, Nov. 2.
Crank structure, Lubricated. L. R. Shanton. 2,452,605, Nov. 2.
Crystallization of DDT. K. B. Little and J. J. Burton. 2,453,076, Nov 2.
Crystals, Growing. B. R. F. Kjellgren and H. Jaffe. 2,452,576, Nov. 2.
Current converting tube. J. G. W. Mulder. 2,452,861, Nov. 2.
Curtain and shade support. R. E. Ratcliffe. 2,452,680, Nov. 2.
Cutter: *See*—
  Insulation cutter.
Cutting machine, Seed potato. L. V. Uglow. 2,452,810, Nov. 2.
Cutting table. D. Levin. 2,452,773, Nov. 2.
Cutting torch holder. J. H. Blythe. 2,452,718, Nov. 2.
Cyclic ethers, Production of. P. H. Williams and S. A. Ballard. 2,452,977, Nov. 2.
Cyclopentadiene and its homologues, Producing. C. E. Staff. 2,453,044, Nov. 2.
Davenport, Folding arm. A. L. Ewing. 2,452,642, Nov. 2.
Deaerating heater. C. H. Bergquist. 2,452,716, Nov. 2.
Decarboxylation of 3,4-dihydroxy-2,5-dicarboxythiophene. S. G. Turnbull, Jr. 2,453,103, Nov. 2.
Deflector for tractors, Hot-air. C. E. Clapper. 2,452,834, Nov. 2.
Delay line. J. L. Jago. 2,452,572, Nov. 2.
Deodorizing and steam condensing device. G. D. Moody. 2,452,859, Nov. 2.
Depurator, Rectal spray. W. J. Coward. 2,452,997, Nov. 2.
Desiccating food products. C. Birdseye. 2,452,983, Nov. 2.
Detachable hose coupling. I. Cowles. 2,452,908, Nov. 2.
Device for cutting noncircular holes. P. Loung. 2,453,025, Nov. 2.
Device for framing ladies' handbags. S. Kolsky. 2,452,766, Nov. 2.
Device for sharpening hypodermic needles. R. R. Stabler. 2,452,697, Nov. 2.
Device for wave length transformation of very short waves. K. Posthumus. 2,453,078, Nov. 2.
Dibasic acids, Production of. H. W. Fleming. 2,452,741, Nov. 2.
Dice agitator, Liquid filled. A. C. Carter. 2,452,730, Nov. 2.
Direct fuel fired unit air heater. L. F. McConnell. 2,452,946, Nov. 2.
Direction finder. H. G. Busignies and J. L. Allison. 2,452,546, Nov. 2.
Direction finder. M. K. Goldstein. 2,452,564, Nov. 2.
Direction finding system. J. H. Newitt. 2,452,675, Nov. 2.
Discharge apparatus using velocity modulated beams, Electron. W. T. Gibson. 2,452,561, Nov. 2.
Dispenser: *See*—
  Tape dispenser.
Display device, Sheet material. J. A. Taylor. 2,453,047, Nov. 2.
Divider and computer, Interpolating potential. W. Koenig, Jr. 2,452,664, Nov. 2.
Dog collar. J. T. Graffin. 2,453,010, Nov. 2.
Dolly structure for conveyers. B. Woldring. 2,452,978, Nov. 2.
Door fastener. R. J. Olander. 2,452,677, Nov. 2.
Door-sag correcting mechanism. D. P. Trillier. 2,453,049, Nov. 2.
Double pulse generator. C. E. Cleeton. 2,452,549, Nov. 2.
Draft regulator. J. W. Miller and B. D. Figg. 2,453,096, Nov. 2.
Dressing and repointing hypodermic needles. R. R. Stabler. 2,452,696, Nov. 2.
Dry rectifier element and manufacture. C. A. Kotterman. 2,452,577, Nov. 2.
Dump body for trucks. C. Guidry. 2,452,850, Nov. 2.
Dust cap and valve cap lock for tire valves, Combination. J. De Stefano. 2,453,001, Nov. 2.
Dynamoelectric machine. C. A. Thomas. 2,452,966, Nov. 2.
Dynamometer, Hydraulic. E. L. Cline. 2,452,550, Nov. 2.
Eddy-current coupling. M. P. Winther. 2,452,820, Nov. 2.
Electric regulation. J. L. Creveling. 2,453,065, Nov. 2.
Electric regulator. J. L. Stratton. 2,452,611, Nov. 2.
Electric resistance and filler metal butt welding. H. A. Bissout and W. Y. Borreson. 2,453,061, Nov. 2.
Electric terminal receptacle. E. E. Sutherland. 2,453,045, Nov. 2.
Electric upsetting and forming. S. and A. Westin. 2,452,974, Nov. 2.
Electrical condenser. R. M. Barnard. 2,452,540, Nov. 2.
Electrical connector. J. O. Johnson. 2,452,932, Nov. 2.
Electrical test circuit. R. J. Teetsell. 2,452,614, Nov. 2.
Electrode contact. E. W. Forstrom. 2,452,917, Nov. 2.
Electrode support in television tubes. P. K. Weimer. 2,452,620, Nov. 2.
Electron emitter. Z. J. Atlee. 2,452,626, Nov. 2.
Electron optical system. D. Gabor. 2,452,919, Nov. 2.
Electrotherapeutical apparatus. H. W. Joy. 2,452,854, Nov. 2.
Emergency telephone call and circuit therefor. J. Palumbo. 2,453,032, Nov. 2.
Emergency wheel and antiskid device, Combination. O. Schlett. 2,452,688, Nov. 2.
Engine: *See*—
  Sleeve valve engine.
Eraser holding mechanism. M. E. Savoie. 2,452,795, Nov. 2.
Excavating machine. C. M. Cameron. 2,452,632, Nov. 2.
Extension table. E. Zuckerman. 2,452,979, Nov. 2.
Extensometer or strain gauge. F. C. Mostertz. 2,452,860, Nov. 2.
Extractor: *See*—
  Package extractor.
Extrusion machine for producing power cables. H. Sonnenfeld. 2,452,610, Nov. 2.

Fastener: *See*—
Door fastener. Slide fastener.
Fastening means. E. Pizzarelli. 2,453,034, Nov. 2.
Feed, Pin-wheel. A. W. Metzner. 2,452,591, Nov. 2.
Filler cap support. R. W. Bandy. 2,452,713, Nov. 2.
Filter. H. Laughlin. 2,452,772, Nov. 2.
Fischer-tropsch synthesis gas from oil shale. A. Clark. 2,452,634, Nov. 2.
Flag holder and displayer. S. B. Davis. 2,452,842, Nov. 2.
Flexible coupling. J. N. Wolfram. 2,452,889, Nov. 2.
Flexible rotary coupling. J. C. Hickman. 2,453,012, Nov. 2.
Flight operation indicator. J. Weissenbach. 2,452,621, Nov. 2.
Fluorinated ethers. E. T. McBee and W. E. Weesner. 2,452,944, Nov. 2.
Fluorohydracrylic acids and their esters. M. S. Raasch. 2,452,791, Nov. 2.
Fluxes, Soldering, brazing and welding. L. Cinamon. 2,452,995, Nov. 2.
Fly front for garments, Closed edge. F. Ippoliti. 2,452,853, Nov. 2.
Follow-up system, Antihunt. B. A. Somers, R. D. McCoy, and J. R. Lilienthal. 2,452,609, Nov. 2.
Forming hollow laminated structures. S. M. Fairchild. 2,452,739, Nov. 2.
Frequency control, Automatic. C. R. Kenny. 2,452,575, Nov. 2.
Frequency divider. G. L. Usselman. 2,452,811, Nov. 2.
Fuel and ignition control. H. T. Jarvis. 2,453,093, Nov. 2.
Fuel supply system. F. Barfod and E. O. Wirth. 2,452,627, Nov. 2.
Furniture. L. P. Come. 2,452,838, Nov. 2.
Fuse. C. C. Fawcett and J. J. Hart. 2,452,558, Nov. 2.
Fuse. J. C. Gillette and B. H. Tabb, Jr. 2,452,562, Nov. 2.
Fuse. J. C. Gillette and B. H. Tabb, Jr. 2,453,107, Nov. 2.
Fuse and demand meter, Combined. W. O. Schultz. 2,452,872, Nov. 2.
Garment clamp. Y. Amber. 2,452,891, Nov. 2.
Gauge: *See*—
Comparator gauge.
Extensometer or strain gauge.
Gauge for measuring and indicating the hardness of various substances. W. F. Shore. 2,453,042, Nov. 2.
Gauging head, Electric. J. J. Neff. 2,452,862, Nov. 2.
Generator: *See*—
Double pulse generator.
Glass sealing method and machine. R. K. Hansen. 2,452,652, Nov. 2.
Golf cart, Folding. H. F. Holcomb. 2,452,929, Nov. 2.
Grain elevator and treating apparatus. E. T. and A. E. Johnson. 2,453,016, Nov. 2.
Graveling wells. E. P. Hayes and A. D. Garrison. 2,452,654, Nov. 2.
Grinding device, Lathe. J. B. Koett. 2,453,020, Nov. 2.
Grinding machine, Cam. H. W. Brown. 2,452,989, Nov. 2.
Grinding machine, Drill. W. Umbdenstock. 2,452,702–3, Nov. 2.
Grinding propeller shanks. F. A. Gruetjen. 2,452,926, Nov. 2.
Hair clamp. I. G. Wagle. 2,452,814, Nov. 2.
Hair net. N. L. Solomon. 2,453,043, Nov. 2.
Halogenated olefins, Production of. G. H. Morey and D. F. Taylor. 2,453,089, Nov. 10.
Handbag lock. A. Konelsky. 2,453,021, Nov. 2.
Hand cultivating tool. L. M. Coles. 2,452,732, Nov. 2.
Hardness testing device. S. Christensen, W. G. Rosenberg, and J. D. Swift. 2,452,833, Nov. 2.
Heat reclamation attachment for heating furnaces. J. A. Hilkene. 2,452,852, Nov. 2.
Heater: *See*—
Deaerating heater. Nonpulsating internal-combustion heater.
Direct fuel fired unit air heater. Portable liquid heater.
Heating device, Convection type electrical. R. B. Shannon. 2,452,875, Nov. 2.
Heel, Antisplash. C. O. Walper. 2,452,883, Nov. 2.
Helicopter with tiltable rotors, Multirotor. C. R. Buchet. 2,452,726, Nov. 2.
High-pressure contact switch. H. W. Graybill. 2,453,011, Nov. 2.
Hinge. G. W. Henry. 2,452,851, Nov. 2.
Hinged back collapsible chair. A. A. Marks. 2,453,027, Nov. 2.
Hitch, Self-releasing rope. O. E. Skibsted. 2,452,796, Nov. 2.
Hobbyhorse. D. L. Richards. 2,452,869, Nov. 2.
Hoisting apparatus. P. J.-M. T. Allard. 2,453,082, Nov. 2.
Holder: *See*—
Cutter torch holder. Sack holder.
Nursing bottle holder. Work holder.
Hollow poppet valves, Making. K. M. Bartlett and E. G. Pekarek. 2,452,628, Nov. 2.
Hollow valves, Making. J. E. Cunningham and R. A. Kempe. 2,452,636, Nov. 2.
Homogenizer. A. M. Kinney and A. N. Jergens. 2,452,661, Nov. 2.
Hook: *See*—
Arresting hook.
Hook mechanism, Sewing-machine. R. K. Hohmann. 2,452,756, Nov. 2.
Hotbox cooler. S. W. Clutton. 2,452,731, Nov. 2.
Housing for film projectors, Lamp. L. Frankel. 2,452,646, Nov. 2.
Hydraulic internal line-up clamp. H. C. Price and B. V. Elliott. 2,452,867, Nov. 2.
Hydraulic machine, Rotary. E. K. Benedek. 2,452,541, Nov. 2.
Hydraulic transmission and control. G. A. Wahlmark. 2,452,704, Nov. 2.
Hydrocarbon and the like, Producing. H. V. Atwell. 2,452,712, Nov. 2.
Hydrocarbons in presence of hot contact masses, Treating. E. J. Houdry. 2,452,569, Nov. 2.
Hydrocarbons, Isomerization of paraffinic. B. H. Shoemaker. 2,452,691, Nov. 2.
Hydroxy aromatic carboxylic acids, Preparation of. E. Wolthuis and H. M. Shafer. 2,453,105, Nov. 2.
Ice air cooling apparatus having anti-splash means. H. J. Kaufman. 2,453,017, Nov. 2.
Igniter for rockets. R. A. Appleton, C. N. Hickman, and C. F. Bjork. 2,452,892, Nov. 2.
Implement mounting. E. C. Trefry. 2,452,701, Nov. 2.
Impregnating leather with sulfonated polymeric compositions. J. S. Kirk. 2,452,536, Nov. 2.
Impression taking means. E. G. Coffey. 2,452,903, Nov. 2.
Index, Visible. F. S. Schade. 2,452,687, Nov. 2.
Indexing device. S. S. Brodie. 2,452,544, Nov. 2.
Indicating frequency coincidence between alternating currents or voltages, Method and apparatus for. D. B. Smith. 2,452,960, Nov. 2.
Indicator: *See*—
Angle indicator. Multiple range indicator.
Flight operation indicator.
Induction apparatus, Electromagnetic. G. Camilli. 2,452,901, Nov. 2.
Inductor, Adjustable. E. O'Brien. 2,452,676, Nov. 2.
Injection machine. B. D. Ashbaugh. 2,453,058, Nov. 2.
Injection mechanism for Diesel engines, Advance and retard. O. Blom. 2,452,984, Nov. 2.
Inner tube for pneumatic tires, Safety. B. Carlin. 2,452,902, Nov. 2.
Insecticide containing methylated naphthalene and 4,4'-dichloro-diphenyl-trichloroethane. J. Hyman. 2,452,759, Nov. 2.
Insulation cutter. J. F. Costelow. 2,452,734, Nov. 2.
Internal heat intensifier. E. C. Bourdette. 2,452,898, Nov. 2.
Jig, Adjustable flange. E. C. Bourdette. 2,452,985, Nov. 2.
Jig for broken drills, Welding. W. J. Sutton. 2,453,046, Nov. 2.
Joint: *See*—
Vehicle frame joint.
Knitted fabric and making same. A. J. Cobert. 2,452,835–36, Nov. 2.
Knitting machine, Warp. F. Lambach. 2,452,579, Nov. 2.
Landing gear system. A. C. Patch. 2,452,787, Nov. 2.
Lens assembly. C. H. Bachman. 2,452,893, Nov. 2.
Line marking tool. G. E. Snethen. 2,452,962, Nov. 2.
Linear silmethylenesiloxane. B. A. Bluestein. 2,452,895, Nov. 2.
Liquid clarifying apparatus. A. Butcher. 2,452,991, Nov. 2.
Loading machine, Clip. J. E. Pool and J. W. P. Beaver. 2,452,600, Nov. 2.
Lock: *See*—
Changeable key cylinder lock. Handbag lock.
Looping machine, Wire. E. H. Miller. 2,452,593, Nov. 2.
Lubricating system for adjustable multiple spindle drill head. R. B. Aiman. 2,452,709, Nov. 2.
Machine construction. D. Sulprizio. 2,452,804, Nov. 2.
Machine for applying plastic material. C. F. Hammann. 2,452,565, Nov. 2.
Machine for making wirebound boxes. G. P. Woodbury. 2,452,887, Nov. 2.
Machine for mine shafts, Mucking. W. E. Kindsvater. 2,452,763, Nov. 2.
Machine for producing a vent in cartridge cases. G. Ekström and G. Örström. 2,452,639, Nov. 2.
Machine for removing putty. A. W. Williams. 2,452,818, Nov. 2.
Machine for testing materials constrained to alternate flexure. R. L'Hermite. 2,453,023, Nov. 2.
Machine for thermoplastically treating materials. M. H. Sidebotham. 2,452,959, Nov. 2.
Machine roll, Compressed laminated. P. R. Heygel. 2,452,755, Nov. 2.
Machine with resilient work holding clamp. C. D. Knowlton. 2,452,663, Nov. 2.
Magazine pencil of the push-button type. F. Collura. 2,452,907, Nov. 2.
Magnesium-zirconium alloys, Process and composition for producing. E. F. Emley. 2,452,914, Nov. 2.
Magnesium-zirconium alloys, Producing. C. J. P. Ball, A. C. Jessup, E. F. Emley, and J. B. Wilson. 2,452,894, Nov. 2.
Mail box and house number, Illuminated. A. J. Lambert. 2,452,667, Nov. 2.
Marking device, Electric. C. M. Elstad. 2,452,738, Nov. 2.
Mask, Driller's. J. Fisher. 2,452,845, Nov. 2.
Massaging device. L. H. Snyder. 2,452,798, Nov. 2.

Match book, Folding. A. Visco. 2,452,882, Nov. 2.
Material handling device. T. W. Kerr. 2,452,856, Nov. 2.
Material reducing apparatus particularly adapted to reduce metal turnings. J. T. Fowler. 2,453,008, Nov. 2.
Measuring and dispensing apparatus, Liquid. W. A. Shimp. 2,453,080, Nov. 2.
Measuring apparatus, Network. R. D. McCoy. 2,452,587, Nov. 2.
Measuring instrument, Rectifier type. H. B. Conant. 2,452,551, Nov. 2.
Mechanical stirrer. M. M. Graff. 2,452,923, Nov. 2.
Mechanism for applying plastic crowns to containers. J. Kantor. 2,452,934, Nov. 2.
Mechanism for milling machines, Knee actuating. L. F. Nenninger and F. A. Hassman. 2,452,674, Nov. 2.
Mercury leveling clamp. G. W. Carlson. 2,452,729, Nov. 2.
Metal surface conditioning process. B. R. King. 2,453,019, Nov. 2.
Metals, The separation of. W. J. Kroll and F. E. Bacon, 2,452,665, Nov. 2.
Method and apparatus for drilling and producing wells. W. E. Gilbert. 2,452,920, Nov. 2.
Mineral oil compositions resistant to foaming. H. G. Smith and T. L. Cantrell. 2,452,693, Nov. 2.
Miniature permanent magnet motor. F. R. Schulz. 2,453,101, Nov. 2.
Mining machine. R. K. Jeffrey. 2,452,760, Nov. 2.
Mixer: *See*—
Cement mixer.
Mixing and dispensing apparatus, Liquid. O. L. Engstrom. 2,453,004, Nov. 2.
Mixing and dispensing device, Beverage. M. A. Joppich and W. Joure. 2,452,933, Nov. 2.
Mixing torpedo for plastics extruders. F. E. Dulmage. 2,453,088, Nov. 2.
Mold conditions on metal castings, Determining effect of. H. F. Taylor and R. E. Morey. 2,452,613, Nov. 2.
Mold for forming porro prisms. M. N. Fairbank. 2,453,005, Nov. 2.
Mold for making castings. L. W. Kempf and L. W. Eastwood. 2,452,855, Nov. 2.
Molded structure. S. M. Fairchild. 2,452,740, Nov. 2.
Molding, Method and device for. R. D. Werner. 2,452,884, Nov. 2.
Motor: *See*—
Miniature permanent magnet motor.
Motor and transmission, Sealed electric. I. E. McCabe. 2,452,945, Nov. 2.
Motor control mechanism, Ratchet. W. W. Maher. 2,452,585, Nov. 2.
Motor control system; Electric. K. A. Lang. 2,452,769, Nov. 2.
Motor control system, Electrical. S. Noodleman. 2,452,784, Nov. 2.
Motor mechanism. H. E. Nietsche. 2,452,864, Nov. 2.
Mount, Adjustable push grader. R. G. Le Tourneau. 2,452,774, Nov. 2.
Mounting: *See*—
Implement mounting. Seaming roller mounting.
Mounting for electric chime signal devices. G. L. Bossard. 2,452,897, Nov. 2.
Muffler. K. von Rodenstein. 2,452,972, Nov. 2.
Multiple function switch. L. E. Ponsy. 2,453,035, Nov. 2.
Multiple pneumatic clutch. L. B. Lindsley. 2,452,775, Nov. 2.
Multiple range indicator. R. M. Page. 2,452,598, Nov. 2.
Multiple switch. C. F. Gomez. 2,452,747, Nov. 2.
Music instruction device for use with the piano. D. Grosch. 2,452,748, Nov. 2.
Musical instrument. H. Horne. 2,452,658, Nov. 2.
N(ethyl mercury) para-toluene sulfonanilide and making same. D. F. Mowery, Jr. 2,452,595, Nov. 2.
N-monoformyl-N,N'-di-substituted ethylenediamines. F. B. Zienty. 2,453,057, Nov. 2.
Nail puller. C. W. Reynolds. 2,453,037, Nov. 2.
Nitriding process. A. L. Feild. 2,452,915, Nov. 2.
Nonpulsating internal-combustion heater. H. J. De N. McCollum. 2,452,780, Nov. 2.
Nozzle, Friction. J. J. de la Roza, Sr. 2,452,555, Nov. 2.
Nursing bottle holder. N. W. Guden. 2,452,749, Nov. 2.
Oil burner with unbalanced air supply, Open pot. L. D. Mills. 2,453,029, Nov. 2.
One-piece sucker rod. P. F. Rossmann. 2,453,038, Nov. 2.
Optical objective, Three-component telephoto type. A. Cox. 2,452,909, Nov. 2.
Organic compounds, Manufacture of unsaturated. S. A. Miller and W. H. Groombridge. 2,452,672, Nov. 2.
Organic fluorine compounds, Production of. W. B. Whalley, 2,452,975, Nov. 2.
Organic peroxide composition. H. G. Hyatt and E. S. Shanley. 2,453,070, Nov. 2.
Organic peroxides, Desensitization of solid. H. G. Hyatt and E. S. Shanley. 2,453,071, Nov. 2.
Organic plastic material, Forming slabs of. R. S. Jesionowski. 2,452,761, Nov. 2.
Ornamented knitted article manufacture. E. F. Wirtz. 2,452,707, Nov. 2.
Oscillator, Ultra short wave. J. H. Fremlin. 2,452,559, Nov. 2.
Oxidized asphalt product and making same. R. B. Killingsworth, H. T. Van Horn, and W. E. Spelshouse. 2,453,094, Nov. 2.
Package extractor. H. S. Drum, W. C. Dodson, and W. H. Jaxheimer. 2,452,638, Nov. 2.
Package of photographic light-sensitive papers. S. F. W. Welford. 2,452,705, Nov. 2.
Packaging, Methods of. C. E. Slaughter. 2,452,607, Nov. 2.
Pad, Heating. J. Youhouse. 2,542,622, Nov. 2.
Parachute pack, Method of and apparatus for inclosing a folded. E. L. Selsmeyer. 2,452,604, Nov. 2.
Parachute release. H. H. Bush. 2,452,990, Nov. 2.
Pencil of the push-button type, Mechanical. F. Collura. 2,452,906, Nov. 2.
Pencil, Push-button type. F. Collura. 2,452,905, Nov. 2.
Pencil with internal illuminating means. J. J. Devine. 2,452,735, Nov. 2.
Phonograph records, Making. L. A. Wood, Jr. 2,452,821, Nov. 2.
Photographic developers containing tetrazolyl disulfides as antifogging agents. F. Dersch and R. H. Clark. 2,453,087, Nov. 2.
Photographic element having a mixed grain emulsion and process employing it, Multilayer. E. B. Knott and G. W. W. Stevens. 2,452,765, Nov. 2.
Piano action, Electric. J. F. Goodwin. 2,452,848, Nov. 2.
Pigments and producing same, Phthalocyanine. A. Siegel 2,452,606, Nov. 2.
Pigments and producing the same, Iron oxide. G. B. Smith. 2,452,608, Nov. 2.
Piston. H. Barnard. 2,452,714, Nov. 2.
Piston ring tool. G. Mesaros. 2,452,857, Nov. 2.
Pivot for shears, Screw. G. D. Calloway. 2,452,993, Nov. 2.
Planter, Seed. E. A. Sommer. 2,462,963, Nov. 2.
Pliers with crossed handles, Self-locking. W. A. Sharp. 2,453,041, Nov. 2.
Plug: *See*—
Connector plug.
Polishing machine. H. T. Nicholas. 2,452,863, Nov. 2.
Polyesters and vinyl compounds, Copolymerization of. M. M. Levine. 2,452,669, Nov. 2.
Polymerizing organosiloxanes. J. F. Hyde and O. K. Johannson. 2,453,092, Nov. 2.
Portable hod stand. V. C. Robinson. 2,452,684, Nov. 2.
Portable liquid heater. H. B. Holthouse. 2,452,656, Nov. 2.
Post construction, Tubular fence. W. L. Burritt. 2,452,630, Nov. 2.
Post, Fence. H. L. Craig. 2,452,840, Nov. 2.
Pot burner and flame ring, Elongated. C. S. Greer, Jr. 2,452,925, Nov. 2.
Pot burner having segmental air directing means. C. S. Greer, Jr. 2,452,924, Nov. 2.
Potentiometer, Self-balancing. B. J. Baecher. 2,452,539, Nov. 2.
Pottery ware, Method of and apparatus for producing. W. J. Miller. 2,452,858, Nov. 2.
Power plant and transmission arrangement for agriculture tractors. H. Hutchings. 2,453,069, Nov. 2.
Power transmission. N. Martinez. 2,452,777, Nov. 2.
Power transmission, Variable. R. E. Herrstrum. 2,452,754, Nov. 2.
Prerotation of aircraft wheels, causing. J. R. Cautley. 2,452,633, Nov. 2.
Pressure boosting means for braking systems, Hydraulic. R. R. Gunderson. 2,452,651, Nov. 2.
Prestressed sucker rod. P. F. Rossmann. 2,453,079, Nov. 2.
Processing apparatus, Food. H. A. Hooper. 2,452,657, Nov. 2.
Projector, Toy moving picture. T. S. MacMechan. 2,452,776, Nov. 2.
Protective switch. S. R. Smith, Jr. 2,452,961, Nov. 2.
Puller: *See*—
Nail puller.
Pulse modulation systems of electric communication. P. K. Chatterjea and C. T. Scully. 2,452,547, Nov. 2.
Pumping system. W. Shallenberg. 2,452,874, Nov. 2.
Question and answer rating device. L. Moscove. 2,452,673, Nov. 2.
Rack: *See*—
Tie rack.
Rack for poker chips and the like. I. I. Newman. 2,453,030, Nov. 2.
Radiator structure for air heating furnaces. F. W. Eichholtz. 2,452,556, Nov. 2.
Radii attachment, Lathe. W. B. Holdridge. 2,452,757, Nov. 2.
Railway car side bearing. N. F. Lane. 2,452,940, Nov. 2.
Reaction product of rosin and copolymer of vinyl acetate and an alpha-unsaturated carboxylic acid ester and process of making same. J. B. Rust and W. B. Canfield, 2,452,870, Nov. 2.
Reading unit, Magnifying. G. M. Cressaty. 2,453,064, Nov. 2.
Receptacle: *See*—
Electric terminal receptacle.
Record changing apparatus, Automatic. O. C. Booher. 2,452,721, Nov. 2.
Rectifier, Metal contact. O. Saslaw. 2,452,603, Nov. 2.
Reducing the mercaptan sulfur content of hydrocarbon oils. J. Happel and S. P. Cauley. 2,453,067, Nov. 2.
Refining copper and its alloys. M. G. Corson. 2,452,996, Nov. 2.

Reflector. J. M. Wolf. 2,452,822, Nov. 2.
Reflector drift indicator apparatus for boats and aircraft. W. W. Remy. 2,452,682, Nov. 2.
Refrigerating apparatus. D. Aronson. 2,452,711, Nov. 2.
Refrigerating system, Absorption. C. C. Coons. 2,452,635, Nov. 2.
Refrigeration. O. B. Sutton. 2,452,699, Nov. 2.
Refrigeration employing Dry Ice. N. Morris. 2,452,594, Nov. 2.
Refrigeration system and control therefor, Plural stage. W. L. McGrath. 2,453,095, Nov. 2.
Refrigeration unit, Sealed. H. E. Thompson. 2,452,807, Nov. 2.
Regulator: *See*—
Draft regulator. Electrical regulator.
Remote control and indication system, Electric. E. M. S. McWhirter and H. J. Ward. 2,452,589, Nov. 2.
Remote-control apparatus with adjustable gap. M. N. Yardeny and R. Bernas. 2,453,106, Nov. 2.
Resins from sulfur dioxide and unsaturated organic compounds, Manufacture of. A. K. Scribner and F. W. Wilder. 2,453,039, Nov. 2.
Resistor. A. S. Eisenstein and K. J. Germeshausen. 2,452,737, Nov. 2.
Resonator for musical instruments. A. M. Tyson. 2,452,809, Nov. 2.
Retarder, Railway car. J. A. Bodkin. 2,452,720, Nov. 2.
Rod: *See*—
One-piece sucker rod. Telescopic fishing rod.
Prestressed sucker rod.
Roll adjusting mechanism. F. R. Whitcomb. 2,452,976, Nov. 2.
Roof and wall structure. A. Elmendorf. 2,452,640, Nov. 2.
Rotary tap switch. R. A. K. Fleischmann. 2,452,916, Nov. 2.
Rotary type can opener. R. E. McLean. 2,452,781, Nov. 2.
Rotors for compressors and like machines, Construction of. R. C. McLeod and G. B. R. Felliden. 2,452,782, Nov. 2.
Sack holder. W. H. Backs. 2,452,826, Nov. 2.
Safety suspenders, Extensible. R. S. Ashton. 2,452,538, Nov. 2.
Salt composition, Iodized. W. H. Engels. 2,452,641, Nov. 2.
Scraper, Foot. P. Stahell. 2,452,800, Nov. 2.
Screen: *See*—
Submerged reciprocating screen.
Sealing unit and gasket. J. C. Carter. 2,452,832, Nov. 2.
Seam-portions of electrically conducting articles, Welding. L. L. Jones. 2,452,574, Nov. 2.
Seaming roller mounting. R. E. J. Nordquist. 2,452,596, Nov. 2.
Sharpening device for the cutting rollers of pencil sharpeners. F. E. Bearden. 2,452,827, Nov. 2.
Shearing machine, Rock. E. E. White. 2,452,706, Nov. 2.
Shift circuits, Phase. R. D. McCoy. 2,452,586, Nov. 2.
Shock absorber, Friction. G. E. Dath. 2,452,637, Nov. 2.
Shock absorber, Hydraulic. L. E. Willard. 2,452,885, Nov. 2.
Shoe, Tread. A. J. Gillespie. 2,452,921, Nov. 2.
Shoe tree, Foldaway. W. F. Sheppard. 2,452,689, Nov. 2.
Shoe upper, Self-adjustable. E. and R. Sudiah. 2,452,803, Nov. 2.
Shopping bag. B. Chodak. 2,452,994, Nov. 2.
Shoulder weapon, Gas operated. J. W Wechsler. 2,452,617, Nov. 2.
Sight, Telescopic. C. H. Meyer. 2,452,592, Nov. 2.
Signal device, Stop light. J. Karow. 2,452,762, Nov. 2.
Signaling apparatus, Sound. I. C. Clement. 2,452,571, Nov. 2.
Signaling system, Electric. E. M. S. McWhirter and H. J. Ward. 2,452,590, Nov. 2.
Silencer, Spark arrester. R. B. Bourne, J. P. Tyskewicz, and A. E. Chase. 2,452,723, Nov. 2.
Sleeve valve engine. M. Lothrop. 2,452,583, Nov. 2.
Slide fastener. A. M. Brown. 2,452,899, Nov. 2.
Slipper. C. H. Graves. 2,452,649, Nov. 2.
Slip-ring structure. E. J. Jones. 2,453,073, Nov. 2.
Snubbing device for catapults. D. L. Weeks. 2,452,618, Nov. 2.
Soapmaking process. G. B. Bradshaw. 2,452,724–5, Nov. 2.
Sockets primarily for radio tubes and the like. D. Jackson. 2,453,014, Nov. 2.
Sockets primarily for radio valves and the like. D. Jackson. 2,453,015, Nov. 2.
Solution consisting of a polymeric N-vinyl pyrrole compound and chloroform. M. T. Orinik. 2,453,097, Nov. 2.
Spark plug and making the same. T. Tognola and L. H. Segall. 2,453,048, Nov. 2.
Spindle, Picker. S. W. La Rocque. 2,452,771, Nov. 2.
Spirit level. F. M. and W. P. Holloway. 2,453,091, Nov. 2.
Stabilizing beer against radiation deterioration. E. C. Uihlein and J. W. Lawrie. 2,452,968, Nov. 2.
Stain resistant plasticized polyvinyl chloride resin coatings. H. A. Van Etten. 2,453,052, Nov. 2.
Stand: *See*—
Collapsible stand. Portable hod stand.
Starting aid, Low-temperature engine. R. I. Olsen. 2,452,597, Nov. 2.
Stereo camera range finder system. E. H. Land, A. J. Bachelder, and O. E. Wolff. 2,453,075, Nov. 2.
Stocking stretcher. W. L. Bannister. 2,453,059, Nov. 2.
Strap, Check. H. J. Shivell. 2,452,690, Nov. 2.
Strap, Duck. H. A. Sleep. 2,452,692, Nov. 2.
Strip-shingles, Interlocking. H. Abraham. 2,452,708, Nov. 2.
Submerged reciprocating screen. B. M. Bird. 2,452,982, Nov. 2.
Sulfolanyl sulfones. R. C. Morris and E. C. Shokal. 2,452,949, Nov. 2.
Supervisory apparatus, Electric. E. C. Thomson. 2,452,615, Nov. 2.
Support: *See*—
Bed spring support. Filler cap support.
Curtain and shade support.
Surgical anastomosis apparatus and method. W. E. Zack. 2,453,056, Nov. 2.
Sweep circuit. J. W. Rieke. 2,452,683, Nov. 2.
Switch: *See*—
High-pressure contact switch. Protective switch.
Multiple function switch. Rotary tap switch.
Multiple switch. Tire deflation operated switch.
Switching device. H. C. Harrison. 2,452,568, Nov. 2.
Swivel, Universal. R. C. Mathewson. 2,452,778, Nov. 2.
Symphonic instrument. A. Fuschi. 2,452,743, Nov. 2.
Synchronous electric motor with automatic starter. O. Schild. 2,452,958, Nov. 2.
System for transmitting motion from a movable measuring element to a movable informing element. W. P. Powers. 2,453,098, Nov. 2.
Table: *See*—
Cutting table. Extension table.
Tape applying device, Adhesive. G. C. Luebkeman. 2,452,584, Nov. 2.
Tape dispenser. E. W. Mason. 2,453,028, Nov. 2.
Telephone system utilizing a register controller. J. Kruithof, L. Kozma, and M. den Hertog. 2,452,578, Nov. 2.
Telescopic fishing rod. J. H. Peters. 2,452,788, Nov. 2.
Television projection tube. B. J. Edwards. 2,453,003, Nov. 2.
Termination for electric power cables. E. C. Lee. 2,452,580, Nov. 2.
Therapeutic agent. S. M. Wade. 2,452,813, Nov. 2.
Therapeutic food, Supplemental. T. W. Halliday and G. H. Joseph. 2,452,750, Nov. 2.
Thiophene-aldehyde synthetic resins. P. D. Caesar and A. N. Sachanen. 2,453,085, Nov. 2.
3,4-dihydroxythiophene-2,5-dicarboxylic acid production. S. G. Turnbull, Jr. 2,453,102, Nov. 2.
Throttle and brake pedal, Combined. W. F. Benning. 2,452,981, Nov. 2.
Tie rack. G. C. Burton. 2,452,727, Nov. 2.
Tire deflation operated switch. E. H. Kuster. 2,452,768, Nov. 2.
Tire, Pneumatic. G. R. Cuthbertson. 2,452,998, Nov. 2.
Titaniferous ore, Smelting. F. L. Turbett. 2,453,050, Nov. 2.
Tongue stabilizer for vehicles. E. W. Allen. 2,452,710, Nov. 2.
Tool: *See*—
Hand cultivating tool. Piston ring tool.
Line marking tool.
Tool bit and holder therefor. H. M. Sheridan. 2,452,877, Nov. 2.
Toolholding attachment for machine tool turrets. H. N. Bourque. 2,453,083, Nov. 2.
Toy. W. E. Dailey. 2,452,841, Nov. 2.
Toy. H. E. Nietsche. 2,452,865, Nov. 2.
Toy, Aerial. E. J. Giara. 2,452,746, Nov. 2.
Toy bombing game. J. V. H. Whipple and A. B. C. Palazzo. 2,452,817, Nov. 2.
Toy gun. G. P. Lee. 2,452,668, Nov. 2.
Toy railway bridge. E. M. Woodward. 2,452,888, Nov. 2.
Toy, Roller. J. L. La Forge. 2,452,939, Nov. 2.
Tractor attaching structure for implements. F. T. Blaydes. 2,452,829, Nov. 2.
Tractor, Track-laying. L. B. Merrill. 2,452,671, Nov. 2.
Trailer. A. F. Pike. 2,452,780, Nov. 2.
Trailer and the like, Boat-carrying. F. Krake. 2,452,937, Nov. 2.
Trailer, Boat-carrying. F. Krake. 2,452,938, Nov. 2.
Trailer, Heavy-duty. E. A. Rehberger. 2,452,681, Nov. 2.
Trailer hitch. W. H. Olney. 2,452,785, Nov. 2.
Transformer, Band-pass. J. B. Gainer. 2,462,560, Nov. 2.
Transformer control, Electronic. D. B. Clark. 2,452,548, Nov. 2.
Transformer, Radio-frequency. C. W. Ramsden. 2,452,679, Nov. 2.
Tray, Ice. F. W. Sampson. 2,452,686, Nov. 2.
Tray, Ice cube. C. A. Flynn. 2,452,846, Nov. 2.
Treating bituminous sands, Process and apparatus for. R. F. Bauer and H. J. Matthews. 2,453,060, Nov. 2.
Treating leafy vegetables. J. N. Sharma. 2,453,040, Nov. 2.
Treating oil wells. A. G. Eickmeyer. 2,452,736, Nov. 2.
Treatment of water. C. A. Hampel. 2,452,928, Nov. 2.
Treatment of water. G. P. Vincent, J. D. MacMahon, and J. F. Synan. 2,452,970–1, Nov. 2.
Trigger action for double-barrel shotguns, Single. C. A. Young. 2,452,825, Nov. 2.

Trigonometric calculator. A. B. King. 2,452,662, Nov. 2.
Tube: *See*—
Cathode-ray tube. Television projection tube.
Current converting tube.
Tube and method, Protected. S. A. Eller. 2,462,557, Nov. 2.
Turbine seal. I. M. White and H. E. Nelson. 2,453,055, Nov. 2.
Turbogenerator. G. J. Lehmann. 2,452,581, Nov. 2.
2-alkylidene-3-keto-4-acylamido-tetrahydrothiophene. S. A. Harris and K. Folkers. 2,452,653, Nov. 2.
2-amino-2-alkyl-N,N'-diaryl-1,3 propane diamines and making. H. G. Johnson. 2,452,535, Nov. 2.
Undergarment. F. A. Cohen. 2,453,063, Nov. 2.
Vacuum drying apparatus using a refrigerant system for heating and cooling. V. C. Patterson. 2,453,033, Nov. 2.
Valve: *See*—
Control valve.
Valve. J. W. Robins. 2,452,956, Nov. 2.
Valve assembly for ventilation system, Relief. W. A. Swenberg. 2,452,612, Nov. 2.
Vegetable cutter on a horizontal axis with a follower feed, Rotary. L. O. D. Harris and W. P. Padgett. 2,452,567, Nov. 2.
Vehicle frame joint. H. A. Hutchins. 2,452,758, Nov. 2.
Vending apparatus. C. C. Colbert. 2,452,837, Nov. 2.
Venoclysis set, Disposable. M. R. Fields. 2,452,643, Nov. 2.
Ventilating device. K. M. Ganger and J. B. Burrowes. 2,453,009, Nov. 2.
Ventilator. H. W. Little. 2,452,941, Nov. 2.
Venting means for stoves, Concealed. W. Bauer. 2,452,715, Nov. 2.
Violin peg. E. R. Stone. 2,452,964, Nov. 2.
Voltmeter, Electronic. J. M. van Beuren. 2,452,880, Nov. 2.
Wave transmitting and receiving device, Compressional. B. R. Hubbard. 2,452,570, Nov. 2.
Welding rod and electrode holder. H. Shaw. 2,452,876, Nov. 2.
Wheel assembly, Car. K. A. Huldt. 2,452,659, Nov. 2.
Wheel chair. F. E. Wood. 2,452,886, Nov. 2.
Winding machine. R. M. Conklin. 2,452,733, Nov. 2.
Window construction. C. J. Wagner. 2,452,815, Nov. 2,
Window fan. H. Morrison. 2,452,950, Nov. 2.
Wood peeler, Self-adjusting. C. B. Cameron. 2,452,631, Nov. 2.
Work holder. H. Yates. 2,452,824, Nov. 2.
Work indexing attachment for lathes. J. D. Brown. 2,452,988, Nov. 2.
Wrench and clamp, Screw and toggle adjusted. H. Alpers. 2,452,625, Nov. 2.
Wrench with spring closed jaws and handle and pawl feed. O. M. Gross. 2,452,849, Nov. 2.
Yarn compressing spooler, Warp. E. J. Wilson. 2,452,819, Nov. 2.
Yarns or cords comprising cellulose filaments, Treatment of. J. W. Illingworth and L. F. Pickup. 2,453,013, Nov. 2.
Zirconium lakes and making same. E. Walner and H. L. Van Mater. 2,452,616, Nov. 2.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 2, 1948

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number = class, second number = subclass, third number = patent number

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

MANCHESTER (HOME & EXPORT) LIMITED
v.
THE PRINTZ BIEDERMAN COMPANY

No. 5467. Decided June 14, 1948

[168 F.2d 758; 76 USPQ 149]

1. TRADE-MARKS—OPPOSITION—DISCLAIMER.
Held that a disclaimer is not a cancellation.

2. SAME—SAME.
Held that in an opposition proceeding, the registered trade-mark upon which the opposition is based must be held valid, since its validity can be tested only by a cancellation proceeding.

3. SAME — SAME — "FAIRY PRINCESS" AND "PRINTZESS KNOCKABOUT."
Held "Fairy Princess" and "Printzess Knockabout" are confusingly similar when used upon goods of the same descriptive properties.

APPEAL from the Patent Office. Opposition No. 23,391.

AFFIRMED.

Harry C. Bierman for Manchester.

A. W. Murray for Printz Biederman.

GARRETT, *P. J.*:

This is an appeal from the decision of the Commissioner of Patents, acting through the First Assistant Commissioner, affirming the decision of the Acting Examiner of Interferences in a trade-mark opposition proceeding.

On December 11, 1943, appellant filed an application in the Patent Office to have "FAIRY PRINCESS" registered for use as a trade-mark for children's coats. Appellant, according to its application, is a company under the laws of Great Britain located at Manchester in the County of Lancaster, England.* In its application the allegation was made that the mark had been registered in England February 20, 1942, and specimens showing the mark as actually used were filed with the application. The specimen reproduced in the record consists of the notation "FAIRY PRINCESS" printed in bold-faced type, the letters being capitals.

On June 3, 1944, appellee filed notice of opposition to the application, alleging:

Since a date long prior to 1942, the date of first use claimed by said applicant [appellant] the opposer [appellee] has continuously used and opposer [appellee] is now using and owns the trade-marks "PRINTZESS," "YANKEE PRINTZESS," "PRINTZESS PETITE," "PRINTZESS TOURISTER," "PRINTZESS KNOCKABOUT," "PRINTZESS DEB," "PRINTZESS—DISTINCTION IN DRESS," and other trade-marks of which "PRINTZESS" is a part, as applied to women's, misses', juniors', teens', and children's outer wearing apparel, including coats, suits, skirts, dresses, jackets, scarfs, in Class 39, Clothing, and on textile fabrics in Class 42, Knitted, Netted, and Textile Fabrics.

Also, it alleged registration of several of the marks, filing copies of such registrations with the notice for consideration under Patent Office rule 154(*c*).

It was further alleged that Fairy Princess "so nearly resembles" the quoted marks owned and used by appellee that its use by appellant would be likely "to cause confusion and mistake in the mind of the public and mislead purchasers," as to origin of the goods, children's coats (the goods of appellant) and the articles of wearing apparel made by appellee being alleged to be merchandise of the same descriptive properties.

On December 11, 1945, the Examiner of Interferences rendered his decision. He deemed appellee's registered mark "PRINTZESS KNOCKABOUT," as applied to women's wearing apparel—namely jackets, coats, capes, suits, skirts, and waists—to be the most pertinent of the marks pleaded in the opposition. It was pointed out that the word "KNOCKABOUT" was disclaimed as descriptive. In substance, he held "PRINTZESS" to be the dominant part of appellee's mark, since "KNOCKABOUT" was disclaimed, and held "PRINCESS" to be "at least a very prominent portion of applicant's [appellant's] mark," if not the dominant feature thereof.

In a decision rendered December 27, 1945, on a request for reconsideration, the Examiner of Interferences said inter alia:

> It seems to the Examiner that the [his original] decision * * * clearly holds that the mark "FAIRY PRINCESS," considered as a whole, is so similar to the mark Printzess "KNOCKABOUT," also considered as a whole, as to be likely to lead to confusion in trade. Likewise, it is not deemed necessary that the Examiner find as a fact that any portion of the applicant's [appellant's] mark be considered as the dominant portion. It is sufficient if it be found that mark considered in its entirety is confusingly similar to the opposer's [appellee's] mark, as has been done.

The appeal to the Commissioner of Patents having been taken, appellant filed its brief seemingly on

* As such it is, by reason of treaty agreement, entitled to all the rights and privileges of the Trade-Mark Registration Act of February 20, 1905.

Vol. 616 • No. 1 Tuesday, November 2, 1948 Price $16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $19.50; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 25 cents each; copies of TRADE-MARKS and DESIGNS at 10 cents each. Address orders to the Commissioner of Patents, Washington 25, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or TRADE-MARKS will be sent without cost on request to the Commissioner of Patents, Washington 25, D. C.

October 11, 1946, and filed therewith a proposed disclaimer of the word "Princess." In the course of his decision the First Assistant Commissioner stated:

> Concurrently with its brief on appeal, applicant [appellant] filed a disclaimer of the word "Princess" in its application, "apart from the other features of the mark;" and now rests its case primarily upon the premise that this word is "in the public domain" because descriptive. According to applicant [appellant] "there is absolute proof that from 1876 and down to date, the word 'Princess' has been used universally to designate or describe a certain style of women's garments."
>
> Applicant [appellant] disavows any intention to question the validity of opposer's [appellee's] registration, but that is necessarily the purport of its argument. The word "Knockabout" is clearly descriptive of opposer's [appellee's] goods; and if "Princess" is likewise descriptive, so also is "Printzess," for these two words are "substantially identical in all respects."

He pointed out that he had to assume the validity of appellee's registration, since the validity of a registered mark may be attacked only in a cancellation proceeding, and being of the view that "Princess," although disclaimed, "remains at least a prominent part of applicant's [appellant's] mark," held, in effect, that confusion would be likely to result from the concurrent use of "Printzess Knockabout" and "Fairy Princess" upon goods of the same descriptive properties.

Before us it is contended on behalf of appellant that "Princess" is a term descriptive of merchandise such as that to which appellant applies it and that to which appellee applies it. It is argued, in effect, that, therefore, the term "Princess" has no trade-mark significance and that it should be disregarded. It is urged on behalf of appellant, however, that the word "Printzess" in appellee's mark is in a different category. In the brief for appellant it is said:

> The appellee herein did not use the same word "Princess" as appellant used but had a special form and design of a word "Printzess," which is a coined word derived from the corporate name of appellee, Printz, with the suffix "ess." Also, the word "Printzess" is written in distinctive Gothic letters. Therefore, • • • the comparison between the two words should have been made not in a broad sense but specifically comparing the spelling and the appearance of the two words. When one does so and bears in mind that the common word "Princess" has no trade-mark significance, one readily concludes that there can be no confusion between the words "Princess" and "Printzess."

In other words, it is argued on behalf of appellant that the word "Princess" in its mark has no trade-mark significance because it is descriptive, but that "Printzess" in the mark of appellee should be regarded differently.

It is somewhat difficult to understand why if appellant was of opinion that "Princess" had no trade-mark significance it included the word in its application, or why, if in the progress of the case it concluded that the word had no trade-mark significance, it did not cancel it rather than disclaim it.

A disclaimer is not a cancellation.

There is retained in appellant's mark as a part thereof the word "Princess" which clearly conflicts with the word "Printzess," included in appellee's mark. In this opposition proceeding, as was held by the First Assistant Commissioner, registration of the mark "Printzess Knockabout," must be held valid. Its validity can be tested only by a cancellation proceeding.

The decision appealed from is affirmed.

AFFIRMED.

By reason of illness, O'CONNELL, *J.*, was not present at the argument of this case and did not participate in the decision.

NOTICES

Extension of Time for Renewing Trade-Mark Registrations: Austria

By the President of the United States of America

A PROCLAMATION

WHEREAS by the Act of Congress approved July 17, 1946, 60 Stat. 568, the President is authorized, under the conditions prescribed in that act, to grant an extension of time for the fulfillment of the conditions and formalities for the renewal of trade-mark registrations prescribed by section 12 of the act authorizing the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same, approved February 20, 1905, as amended (15 U. S. C. 92), by nationals of countries which accord substantially equal treatment in this respect to citizens of the United States of America:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, under and by virtue of the authority vested in me by the aforesaid act of July 17, 1946, do find and proclaim that with respect to trade-marks of nationals of Austria registered in the United States Patent Office which have been subject to renewal on or after September 3, 1939, there has existed during several years since that date, because of conditions growing out of World War II, such disruption or suspension of facilities essential to compliance with the conditions and formalities prescribed with respect to renewal of such registrations by section 12 of the aforesaid act of February 20, 1905, as amended, as to bring such registrations within the terms of the aforesaid act of July 17, 1946; that Austria accords substantially equal treatment in this respect to trade-mark proprietors who are citizens of the United States; and that accordingly the time within which compliance with conditions and formalities prescribed with respect to renewal of registrations under section 12 of the aforesaid act of February 20, 1905, as amended, may take place is hereby extended with respect to such registrations which expired after September 3, 1939, and before June 30, 1947, until and including February 28, 1949.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington, this 9th day of October, in the year of our Lord nineteen hundred and forty-eight and of the Independence of the United States of America the one hundred and seventy-third.

[SEAL] HARRY S. TRUMAN.

By the President:
ROBERT A. LOVETT,
Acting Secretary of State.

Proclamation 2816, October 11, 1948.

Adjudicated Patents

(C. C. A. Pa.) Palmer patent, No. 1,603,095, for a pneumatic tire carrier for automobile trucks, claim 1 *Held* invalid. *Galion Metallic Vault Co.* v. *Edward O. Budd Mfg. Co.*, 169 F.2d 72; 78 USPQ 135.

(C. C. A. Minn.) Hall patent, No. 2,035,652, for washing and cleansing, claim 10 *Held* invalid. *Hall Laboratories* v. *Economics Laboratory*, 169 F.2d 65; 78 USPQ 171.

(C. C. A. Pa.) Bizzantz patent, No. 2,146,107, for a vehicle, claim 1 *Held* invalid. *Galion Metallic Vault Co.* v. *Edward O. Budd Mfg. Co.*, 169 F.2d 72; 78 USPQ 135.

(C. C. A. Minn.) Hall reissue patent, No. 19,719, for water softening and washing, claim 28 *Held* invalid. *Hall Laboratories* v. *Economics Laboratory*, 169 F.2d 65; 78 USPQ 171.

Adverse Decisions in Interferences

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed.

Pat. 2,315,355, S. A. Scherbatskoy, Well surveying method and apparatus, decided July 28, 1948, claims 1, 3, and 4.

Pat. 2,418,268, D. I. Lawson, Pulse modulation signalling system, decided Oct. 7, 1948, claims 1 and 9.

Pat. 2,406,494, D. K. Ferris, Domestic appliance, decided Oct. 8, 1948, claim 4.

Pat. 2,365,938, E. W. Cook and W. D. Thomas, Jr., Wax substituted diaryl dithiophosphoric acids and salts thereof, decided Oct. 8, 1948, claims 1, 2, 3, 6, 7, and 8.

Pat. 2,419,408, W. A. Lightowler, Crankshaft, decided Oct. 11, 1948, claims 1 and 2.

Disclaimers

2,259,600.—*Robert Alkan*, Paris, France. AUTOMATIC STABILIZING ARRANGEMENT FOR AIRCRAFT. Patent dated Oct. 21, 1941. Disclaimer filed Oct. 6, 1948, by the inventor.

Hereby enters this disclaimer of claims 27, 30, 60, 62, and 63 of said patent.

2,329,463.—*Gustave H. Froelich*, Torrington, Conn. SASH BALANCE. Patent dated Sept. 14, 1943. Disclaimer filed Oct. 5, 1948, by the assignee, *The Turner & Seymour Manufacturing Co.*

Hereby enters this disclaimer to the particular combinations as set forth in claims 3, 10, 11, and 12 of said patent.

Cancellation Notices

Refrigeration Corporation of Maryland, its assigns or legal representatives, take notice:

A petition for cancellation having been filed in this Office by Refrigeration Engineering, Inc., 7250 E. Slauson Ave., Los Angeles, Calif., to effect the cancellation of trade-mark registration of Refrigeration Corporation of Maryland, Garrison Blvd. at Western Maryland R. R., Baltimore, Md., No. 285,095, dated July 14, 1931, and the notice of such proceeding sent by registered mail to the said Refrigeration Corporation of Maryland at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Refrigeration Corporation of Maryland, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order, the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JOE E. DANIELS,
Oct. 7, 1948. *Assistant Commissioner of Patents.*

Robert H. Sommers, his assigns or legal representatives, take notice:

A petition for cancellation having been filed in this Office by Nopco Chemical Company, First and Essex Sts., Harrison, N. J., to effect the cancellation of trade-mark registration of Robert H. Sommers, 600 Diversey Blvd., Rienzi Hotel, Chicago, Ill., No. 262,738, dated October 22, 1929, and the notice of such proceeding sent by registered mail to the said Robert H. Sommers at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Robert H. Sommers, his assigns or legal representatives shall enter an appearance therein within thirty days from the first publication of this order, the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JOE E. DANIELS,
Oct. 7, 1948. *Assistant Commissioner of Patents.*

REGISTER OF PATENTS AVAILABLE FOR LICENSING OR SALE

(The "Groups" appearing after the patent abstracts are based on the Standard Industrial Classification Manual, Vol. I, Manufacturing Industries, Executive Office of the President, Bureau of the Budget)

General Aniline & Film Corporation has placed more than 3,000 patents on the Register of Patents as being available for licensing. The patents are grouped in five sections. The following patents (Reg. Nos. 10,264 through 11,190) are in Section 1, relating to Dyestuffs and Intermediates, Group 28—22—82—89. Inquiries concerning these patents should be addressed to the Patent Department, General Aniline & Film Corporation, 247 Park Avenue, New York 17, N. Y.

SECTION 1

Pat. 1,840,321. Quantitative Separation of a Mixture of 2-Halogen-3-Chloro- and 2-Halogen-5-Chloro-4-Amino-1-Methylbenzenes. Jan. 12, 1932.

Pat. 1,840,322. New Sulphur Dyestuffs and Process of Making. Jan. 12, 1932.

Pat. 1,840,383. Vat Dyestuffs of the Anthraquinone Acridone Series. Jan. 12, 1932.

Pat. 1,840,385. Acid Wool Azodyestuffs. Jan. 12, 1932.

Pat. 1,840,398. Chromiferous Azo Dyestuffs. Jan. 12, 1932.

Pat. 1,840,420. New Wool Dyestuffs of the Anthraquinone Series. Jan. 12, 1932.

Pat. 1,841,440. Process of Preparing 2:4-Di-Nitro-Phenyl-6-Hydroxytriazine-1:3:5. Jan. 19, 1932.

Pat. 1,841,441. 4'-Methyl-6-Halogen Thioindigos and Their 6'-Halogen Derivatives. Jan. 19, 1932.

Pat. 1,841,442. Mordant Dyestuffs of the Thiazine Series. Jan. 19, 1932.

Pat. 1,841,445. Production of Naphthalene Derivatives. Jan. 19, 1932.

Pat. 1,841,817. Sulphur Dyes of the Anthraquinone Series and Process of Making. Jan. 19, 1932.

Pat. 1,841,961. Manufacture of Vat Dyestuffs. Jan. 19, 1932.

Pat. 1,841,962. Production of Vat Dyestuffs. Jan. 19, 1932.

Pat. 1,841,963. Production of Vat Dyestuffs. Jan. 19, 1932.

Pat. 1,841,964. Production of Vat Dyestuffs. Jan. 19, 1932.

Pat. 1,841,965. Production of Vat Dyestuffs. Jan. 19, 1932.

Pat. 1,841,966. Production of Vat Dyestuffs. Jan. 19, 1932.

Pat. 1,841,997. 1-Aminoanthraquinone-2-Sulphonic Acid. Jan. 19, 1932.

Pat. 1,842,535. Production of Hydrated Chromic Chloride. Jan. 26, 1932.

Pat. 1,843,308. Acid Wool Dyestuffs of the Anthraquinone Series. Feb. 2, 1932.

Pat. 1,843,313. Hydroxyalkylamino-Anthraquinones and Their O-Sulphonic Acids. Feb. 2, 1932.

Pat. 1,843,376. Process for Preparing Chromium Compounds of Azo Dyestuffs. Feb. 2, 1932.

Pat. 1,843,670. Manufacture of Coloring Matters and Dyeings Therewith. Feb. 2, 1932.

Pat. 1,844,012. Dyestuff of the Anthraquinone Series and Process of Making Same. Feb. 9, 1932.

Pat. 1,844,016. Production of New Vat Dyestuffs of the Anthraquinone Acridine Series. Feb. 9, 1932.

Pat. 1,844,031. Valuable Acid Wool Azodyestuffs. Feb. 9, 1932.

Pat. 1,844,039. New Stable Reduction Compounds of the 6.6'-Dialkoxy-Thioindigos. Feb. 9, 1932.

Pat. 1,844,163. Derivatives of the Benzanthrone Series and Process of Preparing Them. Feb. 9, 1932.

Pat. 1,844,396. Manufacture of Dyestuffs Containing Chromium. Feb. 9, 1932.

Pat. 1,844,397. Manufacture of Dyestuffs Containing Chromium. Feb. 9, 1932.

Pat. 1,844,398. Manufacture of Dyestuffs Containing Chromium. Feb. 9, 1932.

Pat. 1,845,158. Production of Colored Rubber Goods. Feb. 16, 1932.

Pat. 1,845,390. Sulphur Vat Dyestuffs. Feb. 16, 1932.

Pat. 1,845,426. Azo Dyestuffs. Feb. 16, 1932.

Pat. 1,845,452. Production of Printing Pastes and Prints Therefrom. Feb. 16, 1932.

Pat. 1,845,469. Vat Dyestuffs of the Acridine Series. Feb. 16, 1932.

Pat. 1,846,073. Azodyestuffs Insoluble in Water and Process of Making Same. Feb. 23, 1932.

Pat. 1,846,074. Azodyestuffs Insoluble in Water and Process of Making Same. Feb. 23, 1932.

Pat. 1,846,121. Bromo-N-Benzanthronepyrazolanthrones. Feb. 23, 1932.

Pat. 1,846,122. Halogenated N-Benzanthronepyrazolanthrones. Feb. 23, 1932.

Pat. 1,846,126. Para Chloro Ortho Cresol Carboxylic Acid. Feb. 23, 1932.

Pat. 1,846,127. Ortho Chloro Para Cresol Carboxylic Acid. Feb. 23, 1932.

Pat. 1,846,139. Vat Dyestuff of the Pyrazolanthrone Series. Feb. 23, 1932.

Pat. 1,846,150. Solid Diazoazocompounds. Feb. 23, 1932.

Pat. 1,846,151. New Solid Diazoazosalts. Feb. 23, 1932.

Pat. 1,846,264. Producing Vat Dyestuffs. Feb. 23, 1932.

Pat. 1,846,644. Azo Dyestuffs. Feb. 23, 1932.

Pat. 1,847,513. Process for Preparing Diazonium Fluoro-Sulphonates. Mar. 1, 1932.

Pat. 1,847,514. 2-Mercapto-Arylene-Thiazole Compounds and Process of Making Same. Mar. 1, 1932.

Pat. 1,847,518. O-Amino-p-Cresol-Carboxylic-Acid and Process of Making Same. Mar. 1, 1932.

Pat. 1,847,561. Compound of the Imidazole Benzanthraquinone Series. Mar. 1, 1932.

Pat. 1,847,650. Production of Azo Dyestuffs and Color Lakes Thereof. Mar. 1, 1932.

Pat. 1,848,072. Production of Chloroanthraquinoneacridone. Mar. 1, 1932.

Pat. 1,848,073. Halogenated Anthraquinonebenzacridone. Mar. 1, 1932.

Pat. 1,848,074. Halogenated Anthraquinonebenzacridone. Mar. 1, 1932.

Pat. 1,848,506. Thiophenol Tanning and Mordanting Agents. Mar. 8, 1932.

Pat. 1,848,509. Dyestuffs of the Anthraquinone Series. Mar. 8, 1932.

Pat. 1,848,510. New Acid Wool Dyestuffs of the Anthraquinone Series. Mar. 8, 1932.

Pat. 1,849,426. Process for Manufacturing Chlorinated Derivatives of Anthanthrone. Mar. 15, 1932.

Pat. 1,849,444. Preparation of Ortho-Amino-Carboxylic Acid Esters of the Anthraquinone Series. Mar. 15, 1932.

Pat. 1,850,155. Producing Dischargeable Dyeings on Acetate Silk. Mar. 22, 1932.

Pat. 1,850,482. Production of New Vat Dyestuffs of the Anthraquinone Acridone Series and the Products. Mar. 22, 1932.

Pat. 1,850,526. Process for Manufacturing 2.3-Aminonaphthol Compounds. Mar. 22, 1932.

Pat. 1,850,547. Process of Preparing Azodyestuffs. Mar. 22, 1932.

Pat. 1,850,555. Poly Aryl Derivatives of Urea and Process of Making Same. Mar. 22, 1932.

Pat. 1,850,562. Vat Dyestuffs of the Anthraquinoneacridone Series and Process of Making Same. Mar. 22, 1932.

Pat. 1,851,082. Vat Dyestuffs of the Anthraquinone Acridone Series. Mar. 29, 1932.

Pat. 1,851,085. Halogen Anthraquinone Acridones. Mar. 29, 1932.

Pat. 1,851,097. New Azo Dyestuffs. Mar. 29, 1932.

Pat. 1,851,102. New Sulfoderivatives of Higher Fatty Acids and Process of Making Same. Mar. 29, 1932.

Pat. 1,851,114. New Vat Dyestuffs of the N-Di-Hydro-1.2-2'.1'-Anthraquinone Azine Series. Mar. 29, 1932.

Pat. 1,851,120. Azo Dyestuffs. Mar. 29, 1932.

Pat. 1,851,121. Substantive Azo Dyestuffs. Mar. 29, 1932.

Pat. 1,851,391. Process for Producing Amino Derivatives of Hexahydrodiphenyl. Mar. 29, 1932.

Pat. 1,851,511. Composition of Matter Suitable for Dyeing. Mar. 29, 1932.

Pat. 1,851,969. Monodiazo Compounds of 1.4-Di-amino-2-Halogen- or 2.3-Halogen-Anthraquinones and a Process of Preparing Them. Apr. 5, 1932.

Pat. 1,852,032. Trisazo Dyestuffs. Apr. 5, 1932.

Pat. 1,853,362. Coloring Matter and Process of Making Same. Apr. 12, 1932.

Pat. 1,853,418. Dyeing of Viscose. Apr. 12, 1932.

Pat. 1,853,435. Substituted Sulphur Dyestuff. Apr. 12, 1932.

Pat. 1,853,501. Uniform Dyeing of Viscose. Apr. 12, 1932.

Pat. 1,854,045. Dyestuffs of the Phenazine Series and Process of Preparing Them. Apr. 12, 1932.

Pat. 1,854,258. Production of Aromatic Amines. Apr. 19, 1932.

Pat. 1,855,278. Process of Dyeing Acetate Silk. Apr. 26, 1932.

Pat. 1,855,293. Halogen-Dibenzpyrenequinones and Process of Making Same. Apr. 26, 1932.

Pat. 1,855,295. Nitrogenous Vat Dyestuffs. Apr. 26, 1932.

Pat. 1,855,306. Production of Brown Vat Dyestuffs of the Diazine Benzanthrone Series. Apr. 26, 1932.

Pat. 1,855,318. Process of Splitting off Sulpho Groups from Anthraquinone Sulphonic Acid Derivatives. Apr. 26, 1932.

Pat. 1,855,319. Condensation Products of the Anthraquinone Series Containing the Radical of Formaldehyde in a Stable Linkage. Apr. 26, 1932.

Pat. 1,855,328. Azo Dyestuffs. Apr. 26, 1932.

Pat. 1,855,963. Uniform Dyeing of Viscose. Apr. 26, 1932.

Pat. 1,856,203. Production of Vat Dyestuffs. May 3, 1932.

Pat. 1,856,207. Anthrimido-Carbazoles. May 3, 1932.

Pat. 1,856,210. Manufacture of New Isatines. May 3, 1932.

Pat. 1,856,211. New Secondary Trisazodyestuffs. May 3, 1932.

Pat. 1,856,212. Process of Preparing 1.4-Diaminoanthraquinone. May 3, 1932.

Pat. 1,856,215. Process of Making Vat Dyestuffs of the Anthanthrone Series. May 3, 1932.

Pat. 1,856,217. Wool Azo Dyestuffs and Process of Making Same. May 3, 1932.

Pat. 1,856,434. Printing Pastes from Dyestuffs and Process of Preparing Them. May 3, 1932.

Pat. 1,856,710. Process of Preparing Vat Dyestuffs. May 3, 1932.

Pat. 1,856,711. Benzanthrone-Derivatives and Process of Preparing Them. May 3, 1932.

Pat. 1,857,230. Process of Producing Fast Printings. May 10, 1932.

Pat. 1,857,232. New Vat Dyestuffs of the Anthraquinone Series. May 10, 1932.

Pat. 1,857,244. New Monoazodyestuffs. May 10, 1932.

Pat. 1,857,250. Vat Dyestuffs of the Thionaphthene-Indolindigo Series. May 10, 1932.

Pat. 1,857,264. New Dyestuff of the Thionaphthene-Indigo Series. May 10, 1932.

Pat. 1,857,541. Arylated Aminonaphthalene Derivatives. May 10, 1932.

Pat. 1,857,542. Amino Arylated Amino Naphthalene Derivatives. May 10, 1932.

Pat. 1,857,553. Anthraquinonyl-Amino Derivatives of Benzanthronepyrazol-anthrone. May 10, 1932.

Pat. 1,857,555. Arylides of Naphthalene Dicarboxylic Acids and Process of Making Same. May 10, 1932.

Pat. 1,858,623. Diazo-Amino Compounds. May 17, 1932.

Pat. 1,858,625. 3.5-Dihalogen-1-Methyl-Benzene-2-Carboxylic Acids and Process of Preparing the Same. May 17, 1932.

Pat. 1,858,628. Water Insoluble Azodyestuffs and Process of Making Same. May 17, 1932.

Pat. 1,858,629. Water Insoluble Azodyestuffs. May 17, 1932.

Pat. 1,858,632. Stable Preparations of Vat Dyestuffs and Process for Making Same. May 17, 1932.

Pat. 1,858,828. Manufacture of Pigment Colors. May 17, 1932.

Pat. 1,859,705. Compounds Having an Affinity for Cotton. May 24, 1932.

Pat. 1,859,706. Manufacture of Azo-Dyes. May 24, 1932.

Pat. 1,859,742. Production of Nitrogenous Dyestuffs. May 24, 1932.

Pat. 1,859,868. Process of Preparing Pigments Fast to Light. May 24, 1932.

Pat. 1,860,036. Pigment Dyes. May 24, 1932.

Pat. 1,860,472. Vat Dyestuffs of the Anthraquinone Acridone Series. May 31, 1932.

Pat. 1,860,478. Dyestuffs of the Tartrazine Series. May 31, 1932.

Pat. 1,860,487. Water Soluble Condensation Products of Sulphonated Aromatic Hydrocarbons or Hydroxy Derivatives Thereof with Aralkyl Halides. May 31, 1932.

Pat. 1,861,890. Separation of Mixtures of Primary Aromatic Amines. June 7, 1932.

Pat. 1,861,917. Azodyestuffs Containing Copper. June 7, 1932.

Pat. 1,861,921. Brown Vat Dyestuffs of the Benzanthrone Acridine Series and Process of Making Same. June 7, 1932.

Pat. 1,861,926. New Water Insoluble Azodyestuffs. June 7, 1932.

Pat. 1,862,241. Solid Preparations of Aryldiazonium Fluoborates, Yielding Concentrated Diazo-solutions and Process of Making Same. June 7, 1932.

Pat. 1,862,594. Process for Manufacturing Halogen Aryl-Thioglycollic Acids. June 14, 1932.

Pat. 1,862,596. Polyhalogenated Fatty Acids and Process of Making Same. June 14, 1932.

Pat. 1,863,662. Derivatives of Monoaminodibenzopyrenequinone. June 21, 1932.

Pat. 1,863,668. Vat Dyestuffs. June 21, 1932.

Pat. 1,863,679. Polymethine Dyestuffs. June 21, 1932.

Pat. 1,863,792. Poly-Azo Dyestuffs. June 21, 1932.

Pat. 1,863,987. Substitution Products of Pyranthrone. June 21, 1932.

Pat. 1,865,062. Azo Dyestuff and Acetate Silk Dyed Therewith. June 28, 1932.

Pat. 1,865,096. Manufacture of Alkoxybenzophenone Di- or Tricarboxylic Acids. June 28, 1932.

Pat. 1,866,956. Phenyl-Indol-Sulphonic Acids. July 12, 1932.

Pat. 1,867,057. Process of Preparing Monobenzoyldiamino-Anthraquinone. July 12, 1932.

Pat. 1,867,058. Process of Preparing Monobenzoyldiamino-Anthraquinones. July 12, 1932.

Pat. 1,867,069. Manufacture of 1-Hydroxy- or 1-Alkoxy-Anthraquinone-3-Carboxylic Acids. July 12, 1932.

Pat. 1,867,083. Production of Complex Metal Compounds of O-Hydroxyazo Dyestuffs. July 12, 1932.

Pat. 1,867,088. New Water Soluble Diazo Amino Compounds. July 12, 1932.

Pat. 1,867,090. Method for the Production of Vat Dyestuffs and the Product Thereof. July 12, 1932.

Pat. 1,867,091. Hydroxy-1'.8'-Naphthoylene-Naphthimidazoles. July 12, 1932.

Pat. 1,867,097. Compounds of the Thiazolanthrone Sulphone Series and Process of Making Same, July 12, 1932.

Pat. 1,867,105. New Process for Preparing P-Nitroso-Amine Compounds of the Aromatic Series and the Compounds Obtainable Thereby. July 12, 1932.

Pat. 1,867,106. Hydroxy-Benzocarbazole-Carboxylic Acids. July 12, 1932.

Pat. 1,867,459. Aralkylbenzanthrones and Process of Preparing Them. July 12, 1932.

Pat. 1,867,766. Halogen-Terephthalic-Hexahalides and Process of Preparing Same. July 19, 1932.

Pat. 1,867,858. Process for Producing an Anthraquinone Dye. July 19, 1932.

Pat. 1,867,863. Indophenol Azine Compounds. July 19, 1932.

Pat. 1,867,864. Carbazole-2.7-Disulphonic Acid. July 19, 1932.

Pat. 1,868,593. Aluminum Lakes of 1.4-Dihydroxy and 1-Amino - 4 - Hydroxy - Anthraquinone - Disulphonic Acids. July 26, 1932.

Pat. 1,868,608. Halogenated Dibenzanthrone. July 26, 1932.

Pat. 1,868,612. Arylamides of 3-Hydroxy-Phenyl-Aryl-Amine-Carboxylic Acids and Process of Making Same. July 26, 1932.

Pat. 1,870,498. Concentrated Solutions for Dyeing Purposes. Aug. 9, 1932.

Pat. 1,870,516. Printing on Textile Fabrics. Aug. 9, 1932.

Pat. 1,871,821. Dyestuffs of the Anthraquinone Series. Aug. 16, 1932.

Pat. 1,871,850. New Diazo-Amino Compounds. Aug. 16, 1932.

Pat. 1,871,852. Wool Dyestuffs and Process of Making Same. Aug. 16, 1932.

Pat. 1,871,990. Process of Preparing 2.3-Aminonaphthoic Acid. Aug. 16, 1932.

Pat. 1,871,991. New Azo Dyestuffs. Aug. 16, 1932.

Pat. 1,872,756. Manufacture of MS-Anthradianthrones. Aug. 23, 1932.

Pat. 1,873,402. Process of Producing Methylamines Substituted in the Methyl Group by a Cyclic Radical. Aug. 23, 1932.

Pat. 1,873,443. N-Hydroxyethylated Derivatives of 1-Amino- or 2-Amino-5-Hydroxynaphthalene-7-Sulphonic Acid. Aug. 23, 1932.

Pat. 1,873,514. Sulphur Dye. Aug. 23, 1932.

Pat. 1,873,606. Secondary Disazo Dyes. Aug. 23, 1932.

Pat. 1,873,628. Monoazo Dye. Aug. 23, 1932.

Pat. 1,873,925. Benzanthrone Derivatives of Pyrazolanthrone and Process of Preparing Them. Aug. 23, 1932.

Pat. 1,873,938. Naphthophenazine Dye. Aug. 23, 1932.

Pat. 1,873,946. Manufacture of Substituted Sulphur Dyestuffs in Substance or on the Fiber. Aug. 23, 1932.

Pat. 1,873,947. Manufacture of Substituted Sulphur Dyestuffs in Substance or on the Fiber. Aug. 23, 1932.

Pat. 1,873,948. Process of Dyeing with Substituted Sulphur Dyestuffs. Aug. 23, 1932.

Pat. 1,874,474. Yellow Azo Dyestuff. Aug. 30, 1932.

Pat. 1,874,524. Diazo-Amino Compounds. Aug. 30, 1932.

Pat. 1,874,547. Cycloketones, Polycycloketones, and Quinones, and Process of Preparing Them. Aug. 30, 1932.

Pat. 1,874,580. Process of Preparing Diphthaloyl-Naphthalene Compounds and a New Product Obtainable Thereby. Aug. 30, 1932.

Pat. 1,874,581. Aromatic Monoaroyl Diamines. Aug. 30, 1932.

Pat. 1,874,584. Production of New Vat Dyestuffs. Aug. 30, 1932.

Pat. 1,875,191. New Acid Dyestuffs of the Anthraquinone Series. Aug. 30, 1932.

Pat. 1,875,602. Production of Fast Printings on the Vegetable Fiber. Sept. 6, 1932.

Pat. 1,876,641. Dyeing Preparation for Coloring Chrome Leather and Process of Making the Same. Sept. 13, 1932.

Pat. 1,876,842. New Dyestuffs of the Diamino-Triphenylmethane Series. Sept. 13, 1932.

Pat. 1,876,880. Improving the Stability of Diazo Solutions in the Presence of Iron. Sept. 13, 1932.

Pat. 1,876,884. Yellow Pyrazolone Mono Azo Dyestuffs. Sept. 13, 1932.

Pat. 1,876,928. Process for Manufacturing Aryl-Ortho-Carboxyamido-Mercaptans. Sept. 13, 1932.

Pat. 1,876,929. Process for Producing 2-Mercapto-Arylene-Thiazole Compounds and the Products. Sept. 13, 1932.

Pat. 1,876,930. Hydroxy-Thionaphthenes Containing a Pyrazole Ring. Sept. 13, 1932.

Pat. 1,876,955. Process for Manufacturing Amino-Aldehyde Compounds. Sept. 13, 1932.

Pat. 1,876,957. Process of Sulphonating Higher Paraffin Hydrocarbons. Sept. 13, 1932.

Pat. 1,876,966. Nitrogen-Containing Derivatives of Dibenzpyrenquinones and Process of Preparing Them. Sept. 13, 1932.

Pat. 1,876,972. Production of Monoaminoanthanthrones and Derivatives Thereof. Sept. 13, 1932.

Pat. 1,876,973. Substitution Products of Anthanthrones. Sept. 13, 1932.

Pat. 1,876,974. Halogen Derivatives of Anthanthrones. Sept. 13, 1932.

Pat. 1,876,975. Production of Highly Halogenated Derivatives of Pyranthrone. Sept. 13, 1932.

Pat. 1,877,020. The Process of Improving Halogen Derivatives of N-Dihydro-1.2.2'.1'-Anthraquinoneazine. Sept. 13, 1932.

Pat. 1,877,057. Process for Manufacturing Mono-Halogenated Naphthostyril Compounds. Sept. 13, 1932.

Pat. 1,877,092. Yellow Mono-Azo Dyestuff. Sept. 13, 1932.

Pat. 1,877,114. Process for Manufacturing Mono-Halogen Derivatives of Naphthostyril and Substitution Products Thereof. Sept. 13, 1932.

Pat. 1,877,116. Process for Treating Water-Insoluble Azo Dyestuffs. Sept. 13, 1932.

Pat. 1,877,146. Process for Preparing Dyestuffs of the N.N-Dihydro-1.2.2'.1'-Anthraquinone Azine Series and Products Obtainable Thereby. Sept. 13, 1932.

Pat. 1,877,178. Vat Dyestuffs of the Benzanthrone Series and Process of Making Same. Sept. 13, 1932.

Pat. 1,877,315. Brominated Vat Dyestuffs of the Anthanthrone Series and Process of Making Same. Sept. 13, 1932.

Pat. 1,877,316. New Indigoid Dyestuffs. Sept. 13, 1932.

Pat. 1,877,318. Process of Producing Azo Dyestuffs on the Fiber. Sept. 13, 1932.

Pat. 1,877,741. Production of Nitrogenous Isodibenzanthrones. Sept. 13, 1932.

Pat. 1,877,790. Ketones of the Anthraquinone Series and Process of Making Same. Sept. 20, 1932.

Pat. 1,877,791. Vat Dyestuffs of the Anthraquinone Series. Sept. 20, 1932.

Pat. 1,877,866. Process of Halogenating Anthanthrone. Sept. 20, 1932.

Pat. 1,877,870. New Dyestuff of the Thioindigo Series. Sept. 20, 1932.

Pat. 1,877,884. Dyestuffs of Pyrazolanthrone Series and Process of Making Same. Sept. 20, 1932.

Pat. 1,877,899. Vat Dyestuffs of the Dibenzpyrenequinone Series. Sept. 20, 1932.

Pat. 1,877,900. New Acid Dyestuffs and a Process of Preparing Them. Sept. 20, 1932.

Pat. 1,877,906. Meta-Hydroxy-Diarylamine-Carboxylic Acid. Sept. 20, 1932.

Pat. 1,877,945. Dyeing with Vat Dyestuffs Sensitive to Calcium Compounds. Sept. 20, 1932.

Pat. 1,877,946. Halogen Derivatives of the Anthraquinoneazine Series and Process of Making Same. Sept. 20, 1932.

Pat. 1,877,947. Process for Producing Vat Dyestuffs of the Anthraquinone Acridine Series. Sept. 20, 1932.

Pat. 1,877,948. Vat Dyestuffs of the N-Dihydro 1.2.2'.1'-Anthraquinoneazine Series and Process of Making Same. Sept. 20, 1932.

Pat. 1,877,972. New Condensation Product of the Anthraquinone Series and a Process of Making Same. Sept. 20, 1932.

Pat. 1,877,973. New Indigoid Dyestuffs of the Anthraquinone Series. Sept. 20, 1932.

Pat. 1,878,050. Vat Dyestuffs of the Benzanthrone-Pyrazolanthrone Series. Sept. 20, 1932.

Pat. 1,878,056. Vat Dyestuffs. Sept. 20, 1932.

Pat. 1,878,058. Process for Manufacturing Vat Dyestuffs of the Anthanthrone Series. Sept. 20, 1932.

Pat. 1,878,137. Complex Inner Organo-Iron Compounds and Process of Preparing the Same. Sept. 20, 1932.

Pat. 1,878,168. 1-Amino Carbazole. Sept. 20, 1932.

Pat. 1,878,243. Process for Manufacturing Azodyestuffs. Sept. 20, 1932.

Pat. 1,878,471. Azo Dyestuff. Sept. 20, 1932.

Pat. 1,878,531. Dyestuffs of the Safranine Series and the Process of Making Them. Sept. 20, 1932.

Pat. 1,878,543. Monoaroyldiamines of the Benzene Series. Sept. 20, 1932.

Pat. 1,878,548. Fast Blue Dyeings on the Fiber. Sept. 20, 1932.

Pat. 1,878,557. Asymmetric Polymethine Dyestuffs. Sept. 20, 1932.

Pat. 1,878,666. Halogen Substitution Product of Dinaphthylene-Dioxide. Sept. 20, 1932.

Pat. 1,878,698. Pigment Dyestuffs. Sept. 20, 1932.

Pat. 1,878,700. Monoazodyestuffs. Sept. 20, 1932.

Pat. 1,878,965. Vat Dyestuff of the Anthraquinone Acridone Series. Sept. 20, 1932.

Pat. 1,878,966. Wool-Dyestuff of the Dianthraquinonylamine Series. Sept. 20, 1932.

Pat. 1,878,986. Vat Dyestuffs of the Polynuclear Aromatic Imidazole Series and the Process of Preparing Them. Sept. 20, 1932.

Pat. 1,878,987. Manufacture of 1.4.4'-Trihydroxy-2.2'-Dianthraquinonyl-3.1'-Oxide. Sept. 20, 1932.

Pat. 1,879,132. Arylsulphamino-Alpha-Naphthol Sulfonic Acids. Sept. [illegible], 1932.

Pat. 1,879,209. [illegible]ocess of Preparing Nitriles. Sept. 27, 1932.

Pat. 1,879,223. New Azodyestuffs. Sept. 27, 1932.

Pat. 1,879,240. Azo Dyestuffs. Sept. 27, 1932.

Pat. 1,879,261. Monoazo Dyestuffs. Sept. 27, 1932.

Pat. 1,879,390. Process of Preparing Quinizarine Sulfonic Acids. Sept. 27, 1932.

Pat. 1,879,424. Watersoluble Diazo Compound. Sept. 27, 1932.

Pat. 1,879,425. Hydroxycarbazole-Sulfonic Acid. Sept. 27, 1932.

Pat. 1,879,535. New Vat Dyestuffs of the Anthraquinone Series. Sept. 27, 1932.

Pat. 1,880,440. New Vat Dyestuffs of the Anthanthrone Series. Oct. 4, 1932.

Pat. 1,880,441. Phenanthridone and Process of Making Same. Oct. 4, 1932.

Pat. 1,880,490. Vat Dyestuffs of the Anthraquinone Series. Oct. 4, 1932.

Pat. 1,880,522. Preparation of Diazo Baths Suitable for the Production of Azo Dyestuffs on the Fiber. Oct. 4, 1932.

Pat. 1,880,593. Aminocarbazole-Sulfonic Acid. Oct. 4, 1932.

Pat. 1,880,594. Process of Preparing 2.2'-Diamino-Diphenyl-4.4'-Disulfonic Acid. Oct. 4, 1932.

Pat. 1,880,761. Color Lake. Oct. 4, 1932.

Pat. 1,880,959. Process for Producing Nitroso Diazo Solutions. Oct. 4, 1932.

Pat. 1,880,970. New Acid Wool Dyestuffs of the Anthraquinone Series and Process of Making Same. Oct. 4, 1932.

Pat. 1,881,697. Manufacture of Vat Dyestuffs of the Anthraquinone Series. Oct. 11, 1932.

Pat. 1,882,263. Sulphur Containing Vat Dyestuffs and Process of Making Them. Oct. 11, 1932.

Pat. 1,882,285. Bromination Product of the Dibenzanthrone Series. Oct. 11, 1932.

Pat. 1,882,286. Arylamides of Meta-Hydroxy-Diarylamine-Carboxylic Acids and Process of Making Same. Oct. 11, 1932.

Pat. 1,882,556. Process of Preparing Azo Dyestuffs. Oct. 11, 1932.

Pat. 1,882,560. Manufacture of Water-Insoluble Azo Dyestuffs. Oct. 11, 1932.

Pat. 1,882,561. Dyeing Preparation. Oct. 11, 1932.

Pat. 1,882,562. Water Soluble Diazo-Amino Compound. Oct. 11, 1932.

Pat. 1,883,525. Chloro-Anthraquinone-Acridones and Process of Making Same. Oct. 18, 1932.

Pat. 1,885,037. Leucoindophenols of the Carbazole Type. Oct. 25, 1932.

Pat. 1,885,172. New Derivatives of 1.2.7.8-Diphthaloylcarbazole. Nov. 1, 1932.

Pat. 1,886,017. 1-Hydroxy-4-Halogen-Anthraquinone-2-Sulfonic-Acid and Process of Making Same. Nov. 1, 1932.

Pat. 1,886,365. New Sulphur-Dyestuffs and a Process of Preparing Them. Nov. 8, 1932.

Pat. 1,886,797. Naphthalimide Dyestuffs and Process of Preparing Them. Nov. 8, 1932.

Pat. 1,886,809. Arylated Safranines and Process of Preparing Them. Nov. 8, 1932.

Pat. 1,887,396. Aromatic Halogen-Methyl Compound and a Process of Preparing It. Nov. 8, 1932.

Pat. 1,887,812. Vat Dyestuff. Nov. 15, 1932.

Pat. 1,888,624. Preparation of Vat Dyestuff Isomers of the 1.4.5.8 Naphthoylene Dibenzimidazol Series and the Product. Nov. 22, 1932.

Pat. 1,888,625. New Vat Dyestuff Isomers. Nov. 22, 1932.

Pat. 1,888,626. Separation of New Vat Dyestuff Isomers. Nov. 22, 1932.

Pat. 1,888,631. Production of Nitrogenous Vat Dyestuffs of the Azine Series and the Products. Nov. 22, 1932.

Pat. 1,889,154. Discharging Preparation. Nov. 29, 1932.

Pat. 1,889,279. Vat Dyestuffs and Process of Preparing Them. Nov. 29, 1932.

Pat. 1,889,298. Solid Diazoazometal Halide Double Salt. Nov. 29, 1932.

Pat. 1,889,371. Process of Producing Aniline-2.5-Disulphonic Acid. Nov. 29, 1932.

Pat. 1,889,732. Copper Containing Disazodyestuffs. Nov. 29, 1932.

Pat. 1,890,040. Production of Anthraquinone and Derivatives Thereof. Dec. 6, 1932.

Pat. 1,890,711. Process for the Manufacture of 6-Bromo-2-Hydroxy-Naphthalene and Its Substitution Products. Dec. 13, 1932.

Pat. 1,890,718. Vat Dyestuff of the Thionaphthene-Indigoid Series. Dec. 13, 1932.

Pat. 1,890,866. Making Anthraquinone-Sulphonic Acids. Dec. 13, 1932.

Pat. 1,891,148. Halogenation Product of the Ketimides of Acenaphth-Peri-Indanione and Its Derivatives. Dec. 13, 1932.

Pat. 1,891,168. Production of Derivatives of Napthalene. Dec. 13, 1932.

Pat. 1,891,677. New Substituted Phenol-Carboxylic Acids and Process of Making Same. Dec. 20, 1932.

Pat. 1,891,684. Vat Dyestuffs of the Diphthaloylcarbazole Series. Dec. 20, 1932.

Pat. 1,892,055. Azo Dyestuffs. Dec. 27, 1932.

Pat. 1,892,229. Dyestuffs of the Dibenzanthrone Series. Dec. 27, 1932.

Pat. 1,892,241. Benzanthrone Derivatives and Process of Preparing Them. Dec. 27, 1932.

Pat. 1,892,242. Substitution Products of Dibenzopyrenequinones. Dec. 27, 1932.

Pat. 1,892,280. Production of Colored Compositions. Dec. 27, 1932.

Pat. 1,892,310. Derivatives of Naphthazarine and Process of Preparing Them. Dec. 27, 1932.

Pat. 1,892,577. Derivatives of Amino-Naphthol Sulphonic Acids. Dec. 27, 1932.

Pat. 1,892,730. Process of Preparing Derivatives of the Naphthazarine Series. Jan. 3, 1933.

Pat. 1,893,091. Derivatives of the Diphenylamine Series and Process of Making Same. Jan. 3, 1933.

Pat. 1,893,556. Azo Dyestuffs and Material Dyed With Them. Jan. 10, 1933.

Pat. 1,893,557. Metal Compounds of an o-Hydroxyazo Dyestuff. Jan. 10, 1933.

Pat. 1,893,646. Azo Dyestuffs and Complex Metal Compounds Thereof. Jan. 10, 1933.

Pat. 1,893,656. Amides of 2.3-Amino-Naphthoic Acid and a Process of Preparing Them. Jan. 10, 1933.

Pat. 1,893,761. Manufacture of Chromium Oxide and Chromium Hydroxide. Jan. 10, 1933.

Pat. 1,893,991. Azo Dyestuffs on the Fiber and New Compositions of Matter. Jan. 10, 1933.

Pat. 1,894,191. Dyestuff of the Anthraquinone Series. Jan. 10, 1933.

Pat. 1,894,365. Binaphthylenedioxide Compound. Jan. 17, 1933.

Pat. 1,894,491. Derivative of Polymerized Cyanoanthraquinone Compounds. Jan. 17, 1933.

Pat. 1,895,099. Solid Preparation Yielding Nitroso Diazo Solutions of the Diphenylamine Series and Process of Making Same. Jan. 24, 1933.

Pat. 1,895,100. Ortho-Halogen Anthraquinonecarboxylic Acid and Process of Preparing It. Jan. 24, 1933.

Pat. 1,895,101. Vat Dyestuff of the Anthraquinone Series. Jan. 24, 1933.

Pat. 1,895,203. Production of Anthraquinone Azines. Jan. 24, 1933.

Pat. 1,895,713. β-Naphthyl-Aminoaryl-Hydroxy Fatty Acids. Jan. 31, 1933.

Pat. 1,896,435. Vat Dyestuffs of the Anthraquinone Series. Feb. 7, 1933.

Pat. 1,896,450. Disazo Dyes. Feb. 7, 1933.

Pat. 1,896,457. 2.7-Dihydroxynaphthalene-3.6-Dicarboxylic Acid. Feb. 7, 1933.

Pat. 1,896,461. Indophenols and Leucoindophenols of the Azine Series. Feb. 7, 1933.

Pat. 1,896,710. Azo Dyes. Feb. 7, 1933.

Pat. 1,897,129. Production of Colored Rubber Articles. Feb. 14, 1933.

Pat. 1,897,410. Diazo Sulfonates of the Diarylamine Series. Feb. 14, 1933.

Pat. 1,897,427. Vat Dyestuffs of the Anthanthrone Series and Process of Preparing the Same. Feb. 14, 1933.

Pat. 1,897,428. Vat Dyestuffs of the Anthraquinone Cyanuric Series. Feb. 14, 1933.

Pat. 1,897,430. New Vat Dyestuff of the Anthraquinone Series. Feb. 14, 1933.

Pat. 1,897,439. Production of Vat Dyestuffs of the Quinoline-Anthraquinone Series and the Products. Feb. 14, 1933.

Pat. 1,897,516. Process for Manufacturing Phenylthio Glycollic Acids, Containing Halogen and Alkyl Groups in Their Molecule. Feb. 14, 1933.

Pat. 1,898,125. Process for Manufacturing Piece-Dyed Woolen Fabrics Containing Effects of Silk. Feb. 21, 1933.

Pat. 1,898,138. Production of Colored Resisting Effects. Feb. 21, 1933.

Pat. 1,898,399. New Condensation Products of Formaldehyde and 1-Amino-Anthraquinone Compounds being Substituted in the 4-Position. Feb. 21, 1933.

Pat. 1,898,445. Indophenols of the Benzocarbazole Series and Process of Making Same. Feb. 21, 1933.

Pat. 1,898,446. New Dyestuffs Containing Sulphur. Feb. 21, 1933.

Pat. 1,898,452. Production of Vat Dyestuffs of the Dibenzanthrone Series. Feb. 21, 1933.

Pat. 1,898,457. Indophenol Sulphur Dyestuffs. Feb. 21, 1933.

Pat. 1,898,458. (Re. 19,437. Jan. 22, 1935). Vat Dyestuffs of the Acridone and Thioxanthone Series and the Process of Making Them. Feb. 21, 1933.

Pat. 1,898,523. Triarylmethane Dyes. Feb. 21, 1933.

Pat. 1,898,570. Process of Preparing Reserves under Dyestuffs Obtainable by Oxidation on the Fiber. Feb. 21, 1933.

Pat. 1,899,304. Dichloro-Methyl-Anthraquinones and Process of Making Same. Feb. 28, 1933.

Pat. 1,899,348. Purification of Vat Dyestuffs of the Anthraquinoneazine Series. Feb. 28, 1933.

Pat. 1,899,377. New Acid Dyestuffs of the Anthraquinone Series. Feb. 28, 1933.

Pat. 1,899,579. Process for Making Dibenzanthrone from the Corresponding BZ1.BZ1' Dibenzanthronyls. Feb. 28, 1933.

Pat. 1,900,350. Vat Dyestuffs of the Anthracene Series. Mar. 7, 1933.

Pat. 1,900,351. New Azodyestuffs. Mar. 7, 1933.

Pat. 1,900,365. Condensation Product from Aliphatic Aldehydes and Bases of the Naphthalene Series. Mar. 7, 1933.

Pat. 1,900,426. Substituted Amino-Diphenylamine. Mar. 7, 1933.

Pat. 1,900,454. Dyeing Furs, Hairs, Feathers, and Similar Articles. Mar. 7, 1933.

Pat. 1,900,972. Purifying Benzanthrone. Mar. 14, 1933.

Pat. 1,901,307. Halogenated Vat Dyestuffs of the 3.4.8.9- and 4.5.8.9-Dibenzpyrenequinone Series and a Process of Preparing Them. Mar. 14, 1933.

Pat. 1,901,308. Vat Dyestuffs of the Isodibenzanthrone Series and Method of Making Them. Mar. 14, 1933.

Pat. 1,901,321. Process for Rendering Harmless the Precipitates Formed by Hard Water. Mar. 14, 1933.

Pat. 1,901,322. Monoacylated 2.5-Diaminohydroquinone-ethers. Mar. 14, 1933.

Pat. 1,901,387. Azodyestuffs. Mar. 14, 1933.

Pat. 1,901,390. Black Azodyestuffs and Process of Making Same. Mar. 14, 1933.

Pat. 1,901,393. Polyazodyestuffs. Mar. 14, 1933.

Pat. 1,901,515. Diarylsulphone-Azodyestuffs. Mar. 14, 1933.

Pat. 1,902,083. Condensation Products of the Anthraquinone Series. Mar. 21, 1933.

Pat. 1,902,084. Acid Dyestuffs of the Anthraquinone Series. Mar. 21, 1933.

Pat. 1,902,450. Reserving of Animal Fibers. Mar. 21, 1933.

Pat. 1,902,867. Allo-MS-Naphthodianthrones. Mar. 28, 1933.

Pat. 1,902,883. Production of Vat Dyestuffs of the Dibenzanthrone Series. Mar. 28, 1933.

Pat. 1,902,929. Condensation Product of Isatin-α-Anilide and Substituted Anthrones and Process of Producing Same. Mar. 28, 1933.

Pat. 1,903,175. Dyeing Animal Fibers. Mar. 28, 1933.

Pat. 1,903,181. Process of Making Nitrogenous Vat Dyestuffs of the Acridine Series. Mar. 28, 1933.

Pat. 1,903,599. Monoazodyestuffs. Apr. 11, 1933.

Pat. 1,903,600. Azo Dyestuffs. Apr. 11, 1933.

Pat. 1,903,857. Vat Dyestuffs of the Anthrapyridone and the Anthrapyrimidone Series. Apr. 18, 1933.

Pat. 1,903,871. Process for Dyeing and Printing Textile Fibers. Apr. 18, 1933.

Pat. 1,903,880. Esters of 2.3-Amino-Naphthoic Acid and a Process of Preparing Them. Apr. 18, 1933.

Pat. 1,903,891. Halogenated Anthraquinoneacridones and the Process of Making Same. Apr. 18, 1933.

Pat. 1,903,899. Carboxylic Acid Arylides of the Benzene Series and Process of Making Same. Apr. 18, 1933.

Pat. 1,904,145. Halogenation of Aromatic Compounds. Apr. 18, 1933.

Pat. 1,905,285. Process of Brominating Anthanthrone. Apr. 25, 1933.

Pat. 1,905,286. Process for Chlorinating Anthanthrone. Apr. 25, 1933.

Pat. 1,905,287. Process for Manufacturing Nuclear Halogenated Derivatives of Arylaminothiazole Compounds. Apr. 25, 1933.

Pat. 1,905,294. Azo Dyestuffs and Process of Making Same. Apr. 25, 1933.

Pat. 1,906,221. Hydroxy-Diphenylindoles. May 2, 1933.

Pat. 1,906,226. Azo Dyestuffs Insoluble in Water. May 2, 1933.

Pat. 1,906,229. New Condensation Products and Process of Making Same. May 2, 1933.

Pat. 1,906,230. Aminoderivatives of Hexahydrodiphenyl and Process of Making Same. May 2, 1933.

Pat. 1,906,231. Vat Dyestuffs of the Pyranthrone Series. May 2, 1933.

Pat. 1,906,232. Halogen Substitution Products of 2-Hydroxynaphthalene-3-Carboxylic Acid and Process of Preparing Them. May 2, 1933.

Pat. 1,906,894. 6-Arylamino-2-Hydroxy-Naphthalenes and Process of Making Same. May 2, 1933.

Pat. 1,907,156. Colored Rubber Composition. May 2, 1933.

Pat. 1,907,281. New Valuable Indigoid Vat Dyestuffs. May 2, 1933.

Pat. 1,907,879. Production of Color Lakes. May 9, 1933.

Pat. 1,908,369. Derivatives of Dibenzanthrones. May 9, 1933.

Pat. 1,908,904. New Vat Dyestuffs of the Dibenzanthrone Series. May 16, 1933.

Pat. 1,908,993. Process for Dyeing Cellulose Acetate Silk. May 16, 1933.

Pat. 1,909,221. Printing Colors and Process of Preparing Them. May 16, 1933.

Pat. 1,909,684. Vat Dyestuffs of the Azole Series and Process of Making Them. May 16, 1933.

Pat. 1,909,688. Manufacture of 1.2.5.6-Dibenzophenazine and Its Derivatives. May 16, 1933.

Pat. 1,909,690. Vat Dyestuffs. May 16, 1933.

Pat. 1,909,691. Vat Dyestuffs. May 16, 1933.

Pat. 1,909,692. Production of New Vat Dyestuffs of the Anthraquinone Series. May 16, 1933.

Pat. 1,909,693. Vat Dyestuffs of the Dibenzanthrone Series. May 16, 1933.

Pat. 1,909,694. Vat Dyestuffs of the Dibenzanthrone Series. May 16, 1933.

Pat. 1,909,695. Vat Dyestuffs of the Dibenzanthrone Series. May 16, 1933.

Pat. 1,909,738. Production of Benzanthrone Derivatives. May 16, 1933.

Pat. 1,909,833. Manufacture of Aldehydes. May 16, 1933.

Pat. 1,909,851. Diazo-Sulphonates. May 16, 1933.

Pat. 1,910,010. Chrome Yellow Coloring Matter. May 23, 1933.

Pat. 1,910,462. ω-Halogen-Methyl Derivatives of Aromatic Hydrocarbons and Process of Preparing the Same. May 23, 1933.

Pat. 1,910,464. Tanning Agent and Process of Making Same. May 23, 1933.

Pat. 1,910,465. Naphthoylene-Aryl-Imidazol-Peri-Dicarboxylic Acid, a Process of Preparing It and Intermediate Product Obtained During This Process. May 23, 1933.

Pat. 1,910,470. Halogen-Naphthalene-Ketones and Process of Preparing Them. May 23, 1933.

Pat. 1,910,475. Process of Manufacturing 1'-Chloro-1-Methylnaphthalene. May 23, 1933.

Pat. 1,910,478. Polymethine Dyestuff. May 23, 1933.

Pat. 1,910,479. Polymethine Dyestuff. May 23, 1933.

Pat. 1,911,689. Triazine Derivatives and the Process of Making Them. May 30, 1933.

Pat. 1,911,699. New Hydroxybenzocarbazoles and a Process of Preparing Them. May 30, 1933.

Pat. 1,911,714. Vat Dyestuffs of the Anthraquinone Series. May 30, 1933.

Pat. 1,911,719. Aromatic Amino Sulphochlorides. May 30, 1933.

Pat. 1,912,296. Tin-Containing Thiophenols. May 30, 1933.

Pat. 1,912,878. Production of Color Lakes. June 6, 1933.

Pat. 1,913,484. New Hydroxy-Thionaphthene Compounds. June 13, 1933.

Pat. 1,913,491. 1-Hydroxy-Anthracene-Carboxylic Acid and a Process of Making It. June 13, 1933.

Pat. 1,913,798. Cyclic Ketones of the Acenaphthene Series and Process of Preparing Them. June 13, 1933.

Pat. 1,914,406. Fire-Preventing and Fire-Extinguishing Agent. June 20, 1933.

Pat. 1,914,427. Orange to Reddish-Orange Water Insoluble Azo Dyestuffs. June 20, 1933.

Pat. 1,914,433. 4-Chloro-1-Aminoanthraquinone-2-Sulphonic Acid and Process of Preparing the Same. June 20, 1933.

Pat. 1,914,441. Azodyestuffs Insoluble in Water and Fiber Dyed Therewith. June 20, 1933.

Pat. 1,914,445. Vat Dyestuffs of the Di-thionaphthenylene-quinone Series and a Process of Preparing Them. June 20, 1933.

Pat. 1,914,450. Dyestuff of the Anthraquinone Series. June 20, 1933.

Pat. 1,915,429. Para-Hydroxy-Diarylamine-Carboxylic Acids and Process of Making Same. June 27, 1933.

Pat. 1,915,430. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. June 27, 1933.

Pat. 1,915,438. Azo Dyestuff. June 27, 1933.

Pat. 1,915,461. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. June 27, 1933.

Pat. 1,915,734. Preparation Useful for the Production of Dyestuffs and Process of Making Same. June 27, 1933.

Pat. 1,916,312. Process for Manufacturing Orange Vat Dyestuffs. July 4, 1933.

Pat. 1,916,314. Isocyanates. July 4, 1933.

Pat. 1,916,621. Azo Dyestuff and Fiber Dyed Therewith. July 4, 1933.

Pat. 1,916,627. Process of Preparing 1.7-Dihydroxynaphthalene. July 4, 1933.

Pat. 1,916,778. Water-Insoluble Azo-Dyestuff and Fiber Dyed Therewith. July 4, 1933.

Pat. 1,917,414. Process of Preparing Diphthaloylnaphthalene Compounds and New Compounds Obtainable Thereby. July 11, 1933.

Pat. 1,917,421. New Anthraquinone Compounds. July 11, 1933.

Pat. 1,917,432. Water-Insoluble Monoazo Dyestuff. July 11, 1933.

Pat. 1,917,441. New Ortho-Aniline-Sulfonic Acid. July 11, 1933.

Pat. 1,917,442. Water-Insoluble Azo Dyestuff and Fiber Dyed Therewith. July 11, 1933.

Pat. 1,917,443. Azodyestuff. July 11, 1933.

Pat. 1,917,475. Process of Preparing Basic Dyestuffs Derived from Indoline Bases. July 11, 1933.

Pat. 1,917,801. 9.10 Diamino Anthracene and Its N-Substitution Products. July 11, 1933.

Pat. 1,918,461. Dyestuff Derived from 1-8-Naphthalic Acid Anhydride. July 18, 1933.

Pat. 1,919,563. Process of Preparing 1-Amino-10-Anthrones and the Products Obtainable Thereby. July 25, 1933.

Pat. 1,919,573. Azodyestuff. July 25, 1933.

Pat. 1,919,580. New 1.4-Dialkoxy-Benzene Compounds. July 25, 1933.

Pat. 1,919,589. Azo Dyestuff Insoluble in Water. July 25, 1933.

Pat. 1,919,590. Blue to Violet-Blue Water-Insoluble Azo-Dyestuffs. July 25, 1933.

Pat. 1,920,166. Vat and Sulphur Dyestuff Preparation. Aug. 1, 1933.

Pat. 1,920,406. Process of Preparing Derivatives of Naphthalene-1.4.5.8-Tetracarboxylic Acid. Aug. 1, 1933.

Pat. 1,920,407. Yellow Azo Dyestuff. Aug. 1, 1933.

Pat. 1,920,426. Vat Dyestuffs of the Pyrazolanthrone Series and Process of Making Them. Aug. 1, 1933.

Pat. 1,920,542. New Dyeing Preparation and Its Conversion to Dyestuffs. Aug. 1, 1933.

Pat. 1,920,585. Condensation Product of Alkali Metal Bisulphites with Octadecadiene-9, 11-Acid-1 or Its Amide. Aug. 1, 1933.

Pat. 1,921,334. Triarylmethane Dyestuff. Aug. 8, 1933.

Pat. 1,921,336. Copper-Containing Azodyestuff. Aug. 8, 1933.

Pat. 1,921,337. Copper-Containing Azodyestuff. Aug. 8, 1933.

Pat. 1,921,338. Azodyestuff. Aug. 8, 1933.

Pat. 1,921,360. Mixtures of New Isomeric Dyestuffs and Process of Preparing Them. Aug. 8, 1933.

Pat. 1,921,361. Water Insoluble Azodyestuff and Fiber Dyed Therewith. Aug. 8, 1933.

Pat. 1,921,362. Water Insoluble Azodyestuff. Aug. 8, 1933.

Pat. 1,921,857. Color Lakes. Aug. 8, 1933.

Pat. 1,921,947. Resist Paste. Aug. 8, 1933.

Pat. 1,922,467. Sulphurized Phenol. Aug. 15, 1933.

Pat. 1,922,480. Manufacture of Amino-Hydroxy-Anthraquinones. Aug. 15, 1933.

Pat. 1,922,481. Production of Halogen Derivatives of Dibenzopyrene Quinones. Aug. 15, 1933.

Pat. 1,922,482. Halogendibenzopyrenequinones. Aug. 15, 1933.

Pat. 1,922,978. Process of Producing Vat Dyestuff Prints and Closely Adjacent Thereto Aniline Black Prints on the Same Fabric. Aug. 15, 1933.

Pat. 1,922,903. New Reserving Preparation and Reserve Dyeing Process. Aug. 15, 1933.

Pat. 1,923,202. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Aug. 22, 1933.

Pat. 1,923,216. Metal Compound of O-Hydroxyazo Dyestuffs. Aug. 22, 1933.

Pat. 1,923,226. Process for the Purification of Blue Vat Dyestuffs. Aug. 22, 1933.

Pat. 1,923,227. Dyestuffs of the Anthraquinone Series. Aug. 22, 1933.

Pat. 1,923,243. Production of Coloring Preparations and Their Application. Aug. 22, 1933.

Pat. 1,923,248. Process for Making 6-Bromo-2-Hydroxy-Naphthalene-3-Carboxylic Acid. Aug. 22, 1933.

Pat. 1,924,090. Mono-Molecular Condensation Product of 1.4.5.8-Naphthalene-Tetracarboxylic Acid and a Process of Preparing It. Aug. 29, 1933.

Pat. 1,924,434. Water-Insoluble Azo-Dyestuffs. Aug. 29, 1933.

Pat. 1,924,441. Process for Preparing Cyclohexyl-Amines. Aug. 29, 1933.

Pat. 1,924,442. Dyestuff of the Anthraquinone Series. Aug. 29, 1933.

Pat. 1,924,443. Halogenation of Cyclic Compounds. Aug. 29, 1933.

Pat. 1,924,444. Vat Dyestuff and Method for Its Production. Aug. 29, 1933.

Pat. 1,924,445. Halogen Anthraquinone Benzacridone. Aug. 29, 1933.

Pat. 1,924,446. Halogenated Anthraquinone Acridone and the Process of Preparing It. Aug. 29, 1933.

Pat. 1,924,698. Alkylated Acidyl Polyalkylene Polyamines. Aug. 29, 1933.

Pat. 1,925,191. Oxidation Products of Sulphur Containing Derivatives of High Paraffin Hydrocarbons and Process of Making Same. Sept. 5, 1933.

Pat. 1,925,208. Spirit Varnishes. Sept. 5, 1933.

Pat. 1,925,217. Thionaphthene-Indole Condensation Vat Dyestuffs. Sept. 5, 1933.

Pat. 1,925,434. Azo Dyestuffs Containing Chromium. Sept. 5, 1933.

Pat. 1,925,526. Coloring Paper and the Like. Sept. 5, 1933.

Pat. 1,926,050. Vat Dyestuffs of the Dibenzanthrone Series. Sept. 12, 1933.

Pat. 1,926,155. Iodo Derivatives of Aromatic Compounds. Sept. 12, 1933.

Pat. 1,926,555. Vat Dyestuffs of the Dibenzanthrone Series. Sept. 12, 1933.

Pat. 1,926,556. Dyeing Wool. Sept. 12, 1933.

Pat. 1,927,103. Azodyestuff. Sept. 19, 1933.

Pat. 1,927,114. Halogenation Product of Acenaphthindandion-Diketimides and a Process of Preparing It. Sept. 19, 1933.

Pat. 1,927,115. Water-Insoluble Mono-Azodyestuff and Fiber Dyed Therewith. Sept. 19, 1933.

Pat. 1,927,121. Water-Insoluble Azo Dyestuffs and Fiber Dyed Therewith. Sept. 19, 1933.

Pat. 1,927,125. Acid Wool-Dyestuff of the Anthraquinone Series and Process of Making Same. Sept. 19, 1933.

Pat. 1,927,127. Halogen Derivatives of the Anthraquinone-Acridone Series and Process of Making Them. Sept. 19, 1933.

Pat. 1,927,129. Hydrogenation of Homologues of Aniline. Sept. 19, 1933.

Pat. 1,927,130. Catalytic Hydrogenation of Monoamines of the Benzene Series. Sept. 19, 1933.

Pat. 1,927,928. Separation of Vat Dyestuff Isomers of the Naphthoylene Diarylimidazole Series and the Product Obtainable Thereby. Sept. 26, 1933.

Pat. 1,927,936. Derivatives of 3-Nitro-4-Hydroxy-Benzamide. Sept. 26, 1933.

Pat. 1,927,965. Vat Dyestuffs of the Anthraquinone Series. Sept. 26, 1933.

Pat. 1,928,719. Vat Dyestuffs of the 1.4.5.8-Naphthoylene-Diaryl-Imidazol Series and a Process of Preparing Them. Oct. 3, 1933.

Pat. 1,928,725. Wool Dyestuffs of the Anthraquinone Series and Process of Making Same. Oct. 3, 1933.

Pat. 1,928,733. Process for Manufacturing Orthoaryl-carboxyamidothioglycollic Acids. Oct. 3, 1933.

Pat. 1,928,996. Sizing Agent for Cellulose Acetate Silk. Oct. 3, 1933.

Pat. 1,929,328. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Oct. 3, 1933.

Pat. 1,929,847. Production of Condensation Products of 1.5-Dihalogen Anthraquinones. Oct. 10, 1933.

Pat. 1,929,853. Azo Dyestuff. Oct. 10, 1933.

Pat. 1,929,863. Process of Preparing Ortho-Amino-Carboxylic Acid Esters of the Anthraquinone Series. Oct. 10, 1933.

Pat. 1,930,351. Process of Preparing 1.4-Diaminoanthraquinone. Oct. 10, 1933.

Pat. 1,930,352. Process of Preparing 1.4-Aminohydroxyanthraquinone. Oct. 10, 1933.

Pat. 1,930,858. Manufacture of Tertiary Alkylolarylamines. Oct. 17, 1933.

Pat. 1,930,876. Nitrogen Containing Compounds and Process of Preparing Them. Oct. 17, 1933.

Pat. 1,931,192. Nitrogen Containing Cyclic Ketone and a Process of Preparing It. Oct. 17, 1933.

Pat. 1,931,196. Vat Dyestuffs. Oct. 17, 1933.

Pat. 1,931,821. Dyestuff of the Anthanthrone Series. Oct. 24, 1933.

Pat. 1,931,826. Compound of the Carbazole-3.6-Disulphonic Acids Series. Oct. 24, 1933.

Pat. 1,931,836. Water Soluble Azodyestuffs. Oct. 24, 1933.

Pat. 1,931,962. Sulphuric Acid Esters of Alcohols and Derivatives Thereof. Oct. 24, 1933.

Pat. 1,932,152. Hydrazine Sulphonates of the Diarylamine Series. Oct. 24, 1933.

Pat. 1,932,577. Water-Insoluble Disazo-Dyestuffs. Oct. 31, 1933.

Pat. 1,932,591. Compounds of the Dibenzpyrenequinone Series. Oct. 31, 1933.

Pat. 1,932,594. Condensation Products of the Anthraquinone Series. Oct. 31, 1933.

Pat. 1,932,901. Process for Dyeing Furs, Hairs, or Feathers. Oct. 31, 1933.

Pat. 1,933,068. Dyeing Fibrous Material. Oct. 31, 1933.

Pat. 1,933,431. Water-Insoluble Azo-Dyestuff and Fiber Dyed Therewith. Oct. 31, 1933.

Pat. 1,933,985. Sulfamic Acids of Secondary Bases, Processes of Preparing the Same, and Pure Secondary Bases Derived Therefrom. Nov. 7, 1933.

Pat. 1,933,987. Process for Making 1.6-Dibromo-2-Hydroxy-Naphthalene-3-Carboxylic Acid. Nov. 7, 1933.

Pat. 1,934,009. Azodyestuff. Nov. 7, 1933.

Pat. 1,934,771. Vat Dyestuffs of the Anthraquinone Series and a Process of Preparing Them. Nov. 14, 1933.

Pat. 1,934,773. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Nov. 14, 1933.

Pat. 1,934,807. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Nov. 14, 1933.

Pat. 1,935,217. Washing and Cleansing Textile Fibers. Nov. 14, 1933.

Pat. 1,935,712. Ketone Hydrazones, and Process of Making the Same. Nov. 21, 1933.

Pat. 1,935,720. Halogenated 4.5.8.9-Dibenzpyrene-3.10-Quinones and Process of Preparing Them. Nov. 21, 1933.

Pat. 1,935,721. Manufacture of Nitrogenous Compounds Derived from Perylenequinone. Nov. 21, 1933.

Pat. 1,935,724. Production of Vat Dyestuffs of the Anthraquinone Acridine Series and the Products Thereof. Nov. 21, 1933.

Pat. 1,935,928. Alpha-Hydroxyanthrone Derivatives and Process of Preparing Them. Nov. 21, 1933.

Pat. 1,935,929. Acid Dyestuff of the Anthraquinone Series. Nov. 21, 1933.

Pat. 1,935,930. Derivatives of 2.3-Hydroxynaphthoic Acid Arylides. Nov. 21, 1933.

Pat. 1,935,945. Vat Dyestuffs and Process of Preparing Them. Nov. 21, 1933.

Pat. 1,935,949. Oxidation of Aromatic Compounds. Nov. 21, 1933.

Pat. 1,936,716. Nitrogenous Vat Dyestuffs. Nov. 28, 1933.

Pat. 1,936,721. Manufacture of Ortho-Nitrophenyl-Sulphones. Nov. 28, 1933.

Pat. 1,936,722. Arylamino-2-Hydroxy-Naphthalene-3-Carboxylic Acids. Nov. 28, 1933.

Pat. 1,936,926. Hydroxycarboxylic Acid Arylides. Nov. 28, 1933.

Pat. 1,936,944. Acid Dyestuffs of the Anthraquinone Series and a Process of Preparing the Same. Nov. 28, 1933.

Pat. 1,936,948. Condensation Products of the Anthraquinone Series. Nov. 28, 1933.

Pat. 1,936,949. Vat Dyestuffs of the Anthraquinone Series. Nov. 28, 1933.

Pat. 1,936,979. Azo Dyestuffs. Nov. 28, 1933.

Pat. 1,937,154. Halogenated Pyridinoanthraquinones. Nov. 28, 1933.

Pat. 1,937,181. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Nov. 28, 1933.

Pat. 1,938,012. Azo Dyestuffs. Dec. 5, 1933.

Pat. 1,938,014. Green Dyestuffs of the Diphenyl-Naphthylmethane Series. Dec. 5, 1933.

Pat. 1,938,029. Manufacture of Aminoanthraquinone-Nitriles. Dec. 5, 1933.

Pat. 1,938,031. Meta-Hydroxyl-Phenyl-Arylamino Carboxylic Acids. Dec. 5, 1933.

Pat. 1,938,043. Condensation Products of the Anthraquinone Series and Process of Making Same. Dec. 5, 1933.

Pat. 1,938,053. Hydroxy-Thionaphthene Compound. Dec. 5, 1933.

Pat. 1,938,054. Indigoid Dyestuff. Dec. 5, 1933.

Pat. 1,938,055. Isatine Compounds. Dec. 5, 1933.

Pat. 1,938,059. Derivatives of the Benzanthronepyrazolanthrone Series and a Process of Preparing Them. Dec. 5, 1933.

Pat. 1,938,993. Vat Dyestuffs of the Anthraquinone Series. Dec. 12, 1933.

Pat. 1,939,005. Production of Aldehydes. Dec. 12, 1933.

Pat. 1,939,008. Fast Blue Sulphur Dyestuffs. Dec. 12, 1933.

Pat. 1,939,011. Derivative of the Acridone Series. Dec. 12, 1933.

Pat. 1,939,416. Ortho-Aminoaryl-Alkylsulfones and Ortho-Aminoaryl-Aralkylsulfones. Dec. 12, 1933.

Pat. 1,940,053. Yellow and Orange Colored Vulcanizate. Dec. 19, 1933.

Pat. 1,940,059. Waterinsoluble Azodyestuff. Dec. 19, 1933.

Pat. 1,940,066. Copper Containing Azodyestuff. Dec. 19, 1933.

Pat. 1,940,068. Azo Dyestuff Insoluble in Water. Dec. 19, 1933.

Pat. 1,940,662. Waterinsoluble Disazodyestuffs. Dec. 26, 1933.

Pat. 1,940,757. Process for Dyeing Furs, Hairs and Feathers. Dec. 26, 1933.

Pat. 1,941,035. Azodyestuffs Insoluble in Water and Process of Making Same. Dec. 26, 1933.

Pat. 1,941,057. Azo Dyestuffs and Fiber Dyed Therewith. Dec. 26, 1933.

Pat. 1,941,058. Spirit Varnish. Dec. 26, 1933.

Pat. 1,941,063. Dyestuff of the Anthraquinone Series. Dec. 26, 1933.

Pat. 1,942,108. Hydroxy-Benzo-Quinoline-Carboxylic Acids. Jan. 2, 1934.

Pat. 1,942,761. Halogen Derivatives of Isodibenzopyrenequinones. Jan. 9, 1934.

Pat. 1,942,865. Azodyestuff Containing a Nitrosogroup. Jan. 9, 1934.

Pat. 1,943,710. Compound of the Benzanthronepyrazolanthrone Series and a Process of Preparing It. Jan. 16, 1934.

Pat. 1,943,727. Azo-Dyestuff. Jan. 16, 1934.

Pat. 1,943,872. Arylamino-1-Hydroxy-Naphthalene-2-Carboxylic Acids. Jan. 16, 1934.

Pat. 1,943,876. Production of Anthraquinone Derivatives. Jan. 16, 1934.

Pat. 1,944,514. Acylated Cyclohexyl-Phenyl-Amines and Process of Preparing Them. Jan. 23, 1934.

Pat. 1,944,539. Azo Dyestuffs and Fiber Dyed Therewith. Jan. 23, 1934.

Pat. 1,944,986. Vat Dyestuffs of the Anthraquinone-Acridone Series and a Process of Preparing Them. Jan. 20, 1934.

Pat. 1,945,221. Printing of Textile Fibers. Jan. 30, 1934.

Pat. 1,945,484. Dyestuff Preparations. Jan. 30, 1934.

Pat. 1,945,923. 4.5-Dimethyl-7-Chloro-Oxythionaphthene and Its Indigoid Derivatives. Feb. 6, 1934.

Pat. 1,946,430. Process for Preparing Water-Soluble Condensation Products. Feb. 6, 1934.

Pat. 1,946,829. Benzanthrone-1-Aldehyde and Process of Making Same. Feb. 13, 1934.

Pat. 1,947,650. Derivatives of Higher Fatty Acids Containing Nitrogen and Process of Making Same. Feb. 20, 1934.

Pat. 1,947,819. Alkoxy-2-Hydroxynaphthalene-3-Carboxylic Acids. Feb. 20, 1934.

Pat. 1,947,837. New Aniline-Sulphonic Acids. Feb. 20, 1934.

Pat. 1,947,855. Dyeing Acetate Silk. Feb. 20, 1934.

Pat. 1,947,943. Process of Preparing Condensation Products of the Benzanthrone Series and New Products Obtainable Thereby. Feb. 20, 1934.

Pat. 1,947,945. Azo Dyes. Feb. 20, 1934.

Pat. 1,947,946. Azodyestuffs Insoluble in Water and Process of Making Same. Feb. 20, 1934.

Pat. 1,947,951. Acidyl Polyalkylene Polyamines. Feb. 20, 1934.

Pat. 1,948,178. Vat Dyestuffs of the Dipyrazol-Anthronyl Series. Feb. 20, 1934.

Pat. 1,948,183. Production of Anthraquinone Derivatives. Feb. 20, 1934.

Pat. 1,948,923. Substituted Benzo-Carbazole-Carboxylic Acid and Process of Preparing It. Feb. 27, 1934.

Pat. 1,948,924. Nitrogen Containing Conversion Products of Higher Aliphatic Hydrocarbon and Process of Preparing the Same. Feb. 27, 1934.

Pat. 1,948,926. Condensation Product of the Pyrenquinone Series and Process of Preparing It. Feb. 27, 1934.

Pat. 1,949,202. Process of Preparing 1.4.5.8-Naphthalene-Tetra-Carboxylic Acid and Substitution Products Thereof. Feb. 27, 1934.

Pat. 1,949,209. Bromination Products of the Dibenzanthrone Series. Feb. 27, 1934.

Pat. 1,949,228. Azo Dyestuff. Feb. 27, 1934.

Pat. 1,949,837. Sulphoderivatives of Higher Fatty Acids. Mar. 6, 1934.

Pat. 1,949,838. Oxidation Product of Sulphur-Containing Derivatives of Higher Fatty Acids and Process of Making Same. Mar. 6, 1934.

Pat. 1,950,421. Dyestuffs Derived from Cyano Acetic Acid. Mar. 13, 1934.

Pat. 1,950,850. New Derivatives of Higher Aliphatic Hydrocarbons Containing Sulphur and Process of Making Same. Mar. 13, 1934.

Pat. 1,951,298. Azo Dyestuff and Color Lakes Made Therefrom. Mar. 13, 1934.

Pat. 1,951,571. Process of Preparing Dyeings and Printings. Mar. 20, 1934.

Pat. 1,951,686. New Process of Preparing Arylacetic Acids and New Products Obtainable Thereby. Mar. 20, 1934.

Pat. 1,951,815. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Mar. 20, 1934.

Pat. 1,951,830. Chromium Compound of Azo Dyestuffs. Mar. 20, 1934.

Pat. 1,951,832. Alkyl-2-Hydroxynaphthalene-3-Carboxylic Acids. Mar. 20, 1934.

Pat. 1,952,029. Process for Manufacturing Sulphur Dyestuffs. Mar. 20, 1934.

Pat. 1,952,661. Process of Separating the Mixtures of Isomeric 1.4.5.8-Naphthoylene-Diarylimidazoles and New Dyestuff Obtained Thereby. Mar. 27, 1934.

Pat. 1,952,677. Vat Dyestuffs of the Dibenzopyrenequinone Series. Mar. 27, 1934.

Pat. 1,952,678. Condensation Products of the Anthraquinone Series. Mar. 27, 1934.

Pat. 1,953,415. Chlorinated Dibenzanthrones. Apr. 3, 1934.

Pat. 1,953,438. Process for Coloring Organic Products. Apr. 3, 1934.

Pat. 1,953,512. Disazo Dyestuffs. Apr. 3, 1934.

Pat. 1,955,135. Halogen-Benzanthrone and Process of Making Same. Apr. 17, 1934.

Pat. 1,955,887. Process of Preparing M-Acylaminosulphochlorides of the Benzene Series. Apr. 24, 1934.

Pat. 1,955,998. Hydrogenation Product from 2.2'-Dihydroxy- and 2.2'-Di-O-Acyl-1.1'-Dinaphthyl. Apr. 24, 1934.

Pat. 1,956,030. Production of Coloring Matters Containing Nitrogen. Apr. 24, 1934.

Pat. 1,956,921. Color Lakes and Process of Preparing the Same. May 1, 1934.

Pat. 1,957,084. Anthraquinone Derivative. May 1, 1934.

Pat. 1,957,572. Water-Insoluble Azo Dyestuffs and Fiber Dyed Therewith. May 8, 1934.

Pat. 1,957,580. Process of Preparing Azo Dyestuffs Containing Copper. May 8, 1934.

Pat. 1,957,593. Manufacture of Phthaloylphenanthridones. May 8, 1934.

Pat. 1,957,599. Dyestuff of the Anthraquinone Series and Process of Making Same. May 8, 1934.

Pat. 1,957,858. Anthraquinone Dyestuffs. May 8, 1934.

Pat. 1,957,892. Vat Dyestuffs of the Dibenzopyrenequinone Series. May 8, 1934.

Pat. 1,958,758. Azo Dyestuffs. May 15, 1934.

Pat. 1,959,455. Diaminotriarylmethane Dyes. May 22, 1934.

Pat. 1,959,461. Symmetrically Substituted Azobenzene Compounds. May 22, 1934.

Pat. 1,959,474. Indigoid Dyestuffs. May 22, 1934.

Pat. 1,959,478. Derivative of Higher Fatty Acids and Process of Making Same. May 22, 1934.

Pat. 1,959,679. Vat Dyestuffs of the Dibenzopyrenequinone Series. May 22, 1934.

Pat. 1,959,733. Disazo Dyestuffs. May 22, 1934.

Pat. 1,959,995. Dyeing Preparations and Their Conversion into Dyestuffs. May 22, 1934.

Pat. 1,960,351. Manufacture of Dyes of the Azine Series. May 29, 1934.

Pat. 1,960,375. Anthracene Derivative. May 29, 1934.

Pat. 1,960,540. Halogenated Dibenzanthrones. May 29, 1934.

Pat. 1,960,564. Compound of the Anthraquinone Series. May 29, 1934.

Pat. 1,960,644. 2-Methylaminobenzene-1-Carboxylic Acid-4-Sulphonic Acid. May 29, 1934.

Pat. 1,961,519. Water-Insoluble Mono-Azo-Dyestuffs and Fiber Dyed Therewith. June 5, 1934.

Pat. 1,961,628. New Indigoid Vat Dyestuffs. June 5, 1934.

Pat. 1,962,083. Intermediates and Dyestuffs of the Anthraquinone Series. June 5, 1934.

Pat. 1,962,084. Intermediates and Dyestuffs of the Anthraquinone Series. June 5, 1934.

Pat. 1,962,511. Coloring Rubber. June 12, 1934.

Pat. 1,963,967. Vat Dyestuff Preparations. June 26, 1934.

Pat. 1,964,309. Sulphur Dyestuff Preparation. June 26, 1934.

Pat. 1,964,376. Manufacture of Benzanthrene. June 26, 1934.

Pat. 1,964,971. Alkyl Ethers of Amino-Beta-Hydroxyanthraquinones. July 3, 1934.

Pat. 1,964,979. Colored Rubber Product. July 3, 1934.

Pat. 1,964,980. Colored Rubber Product. July 3, 1934.

Pat. 1,965,537. Mixture of Vat Dyestuffs. July 3, 1934.

Pat. 1,966,125. Production of Amino-Acylamino-Anthraquinones. July 10, 1934.

Pat. 1,966,126. Halogen-Benzophenone-Dicarboxylic Acids and Halogen-Anthraquinone Carboxylic Acids and a Process of Preparing Them. July 10, 1934.

Pat. 1,966,635. Manufacture of Monoalkyl Ethers of Aromatic Polyhydroxy Compounds. July 17, 1934.

Pat. 1,967,345. Azo Coloring Material. July 24, 1934.

Pat. 1,967,360. Lakes from Basic Dyestuffs. July 24, 1934.

Pat. 1,967,363. Production of Nitrogenous Vat Dyestuffs. July 24, 1934.

Pat. 1,967,364. Halogenanthraquinone-Benzacridones. July 24, 1934.

Pat. 1,967,370. Water Insoluble Azodyestuff Derived from 2.3-Hydroxynaphthoic Acid Arylides. July 24, 1934.

Pat. 1,967,373. Azo Dyestuff. July 24, 1934.

Pat. 1,968,151. New Hydroxylated Derivatives of Paraffins. July 31, 1934.

Pat. 1,968,178. Acid Wool Dyestuff of the Anthraquinone Series and Process of Making Same. July 31, 1934.

Pat. 1,968,923. Dyeing Preparation and Its Conversion to Dyestuffs. Aug. 7, 1934.

Pat. 1,968,926. Vat and Sulphur Dyestuff Preparation. Aug. 7, 1934.

Pat. 1,968,964. Normal Ferrous Salt of 2-Nitronaphthalene-4.8-Disulphonic Acid. Aug. 7, 1934.

Pat. 1,969,098. Metal-Containing Nondyeing Thio-Derivative from Phenols and Process of Preparing the Same. Aug. 7, 1934.

Pat. 1,969,463. Azo Dyestuff. Aug. 7, 1934.

Pat. 1,969,464. Dyeing and Printing of Acetate Silk. Aug. 7, 1934.

Pat. 1,969,850. Condensation Product from Hydroaromatic Ring Ketones. Aug. 14, 1934.

Pat. 1,970,070. Dyeing Preparation and Its Conversion to Dyestuffs. Aug. 14, 1934.

Pat. 1,970,643. Anthraquinone-1-Aldehydes and Process of Making Same. Aug. 21, 1934.

Pat. 1,970,644. Printing Textile Fibers. Aug. 21, 1934.

Pat. 1,970,651. Process of Preparing 1.4.5.8-Naphthalene-Tetra-Carboxylic Acid and Derivative Thereof. Aug. 21, 1934.

Pat. 1,970,661. Azodyestuff and Process of Making Same. Aug. 21, 1934.

Pat. 1,970,662. Azo Dyestuff Insoluble in Water and Fiber Dyed Therewith Aug. 21, 1934.

Pat. 1,970,669. Anthraquinone Dyestuff. Aug. 21, 1934.

Pat. 1,971,409. Aroylene-Bis-Acetic Acid-Arylides. Aug. 28, 1934.

Pat. 1,971,415. Sulphonation Product of Nitrogen Containing Conversion Products of Higher Aliphatic Hydrocarbons. Aug. 28, 1934.

Pat. 1,972,177. Dyestuff of the Thioindigo Series. Sept. 4, 1934.

Pat. 1,972,219. Aromatic Cyano-Acetyl Compound and Process of Preparing It. Sept. 4, 1934.

Pat. 1,973,001. Amino-Anthraquinone Sulpho-Chlorides and a Process of Preparing Them. Sept. 11, 1934.

Pat. 1,973,003. Dehalogenation of Cyclic Halogen Compounds. Sept. 11, 1934.

Pat. 1,973,012. Substitution Products of the Carbazole Sulphonic Acids. Sept. 11, 1934.

Pat. 1,973,013. Waterinsoluble Azodyestuffs. Sept. 11, 1934.

Pat. 1,973,625. Acid Wool Dyestuff of the Anthraquinone Series. Sept. 11, 1934.

Pat. 1,973,787. Vat Dyestuffs of the Benzanthrone Acridine Series and the Process of Making Them. Sept. 18, 1934.

Pat. 1,974,510. Production of Color Lakes. Sept. 25, 1934.

Pat. 1,974,518. Alkoxy-Amino- and Alkoxy-Nitro-Carbazoles. Sept. 25, 1934.

Pat. 1,975,383. 2-(3'-Hydroxynaphthyl-2')-4-Hydroxy-6.7-Benzo-Pseudoaziminobenzenes. Oct. 2, 1934.

Pat. 1,975,386. Process of Preparing 1.4-Diaminoanthraquinone-2.3-Disulphonic Acid. Oct. 2, 1934.

Pat. 1,975,402. Azodyestuffs. Oct. 2, 1934.

Pat. 1,975,409. Solid Stable Diazoazo Salts and Process of Preparing Them. Oct. 2, 1934.

Pat. 1,975,411. Azodyestuff. Oct. 2, 1934.

Pat. 1,976,145. 2-Hydroxyanthracene-3-Carboxylic Acid and a Process of Preparing It. Oct. 9, 1934.

Pat. 1,976,185. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Oct. 9, 1934.

Pat. 1,976,186. Azo Coloring Materials. Oct. 9, 1934.

Pat. 1,976,187. Water-Insoluble Azo Dyestuff. Oct. 9, 1934.

Pat. 1,977,768. Process for Manufacturing Perylene. Oct. 23, 1934.

Pat. 1,977,936. Water-Insoluble Disazo-Dyestuffs. Oct. 23, 1934.

Pat. 1,978,062. Condensation Product of the Anthracene Series and Process of Making Same. Oct. 23, 1934.

Pat. 1,978,540. Mono and Dipyridino Quinone Compounds and Their Production. Oct. 30, 1934.

Pat. 1,978,755. Manufacturing Readily Soluble Basic Dyes. Oct. 30, 1934.

Pat. 1,978,763. Water-Insoluble Azo Dyes. Oct. 30, 1934.

Pat. 1,978,777. Sulphone-Morpholine Compounds of the Amino-Anthraquinone Series. Oct. 30, 1934.

Pat. 1,978,880. Production of Complex Metal Compounds of Ortho-Hydroxyazo Dyestuffs. Oct. 30, 1934.

Pat. 1,979,055. Water-Insoluble Azodyestuffs and Fiber Dyed Therewith. Oct. 30, 1934.

Pat. 1,979,061. Acid Ortho-Hydroxy Azo Dyestuffs Capable of Being Chromed. Oct. 30, 1934.

Pat. 1,979,600. Water-Insoluble Azodyestuffs. Nov. 6, 1934.

Pat. 1,979,628. Mono Alkyl Ethers of 1.4-Dihydroxy Anthracene. Nov. 6, 1934.

Pat. 1,979,667. Dyestuffs of the Diazine Series. Nov. 6, 1934.

Pat. 1,980,025. Anthraquinone Dyestuffs and Process of Obtaining Same. Nov. 6, 1934.

Pat. 1,980,162. Pure 1-Amino-2.3-Dimethylanthraquinone and Process of Making Same. Nov. 13, 1934.

Pat. 1,980,515. Acid Wool Azo Dyestuffs. Nov. 13, 1934.

Pat. 1,980,536. Manufacture of Di-(Hydroxyethyl)-Aminonitrobenzenes. Nov. 13, 1934.

Pat. 1,980,537. Manufacture of 2-Nitrodiphenyl. Nov. 13, 1934.

Pat. 1,980,538. β.γ-Hydroxypropyloxyalkylamino Benzenes and the γ-Alkylesters Thereof. Nov. 13, 1934.

Pat. 1,980,539. Azo Dye. Nov. 13, 1934.

Pat. 1,980,549. C-Substituted Pyrimidines of the Anthraquinone Series. Nov. 13, 1934.

Pat. 1,981,108. Composition for Softening Textile Goods. Nov. 20, 1934.

Pat. 1,981,242. Dyestuff Mixture. Nov. 20, 1934.

Pat. 1,981,295. Anthraquinone Derivative. Nov. 20, 1934.

Pat. 1,981,301. Compounds of the Carbazole Series. Nov. 20, 1934.

Pat. 1,982,149. Aluminum Lakes of Sulphonated Compounds of the Anthraquinone Series. Nov. 27, 1934.

Pat. 1,982,159. Azo-Dyestuffs of the Stilbene Series and Process of Making Same. Nov. 27, 1934.

Pat. 1,982,163. Sulphamino-Phenyl-Methyl-Pyrazolones. Nov. 27, 1934.

Pat. 1,982,311. Production of Valuable Compounds of the Anthracene Series. Nov. 27, 1934.

Pat. 1,982,312. Halogenated Dibenzanthrone. Nov. 27, 1934.

Pat. 1,982,313. Halogenated Dibenzanthrone. Nov. 27, 1934.

Pat. 1,982,332. Azodyestuffs. Nov. 27, 1934.

Pat. 1,982,977. Azo Dyestuffs Containing a Pyrene Nucleus. Dec. 4, 1934.

Pat. 1,983,888. New Indigoid Vat Dyestuffs. Dec. 11, 1934.

Pat. 1,984,715. Dyestuffs of the Anthraquinone Series. Dec. 18, 1934.

Pat. 1,984,722. Azo Dyestuff Containing a Chrysene Nucleus. Dec. 18, 1934.

Pat. 1,984,941. Dyestuffs of the Benzanthraquinone Acridine Series and Method of Making Them. Dec. 18, 1934.

Pat. 1,985,556. New Intermediate Product for Azodyestuffs. Dec. 25, 1934.

Pat. 1,985,747. Ether-Like Constituted Compound Having Wetting, Dispersing, Emulsifying and Washing Properties. Dec. 25, 1934.

Pat. 1,987,266. 2-Alkylaminobenzene-1-Carboxylic Acid-4-Sulphonic Acids. Jan. 8, 1935.

Pat. 1,987,583. Sulphur Dyestuff Preparation. Jan. 8, 1935.

Pat. 1,987,747. Dyestuffs of the Anthraquinone Series. Jan. 15, 1935.

Pat. 1,988,205. Vat Dyestuffs of the Dibenzopyrenequinone Series. Jan. 15, 1935.

Pat. 1,989,042. Nitrogenous Polymerization Product. Jan. 22, 1935.

Pat. 1,989,472. Azo Dyestuff. Jan. 29, 1935.

Pat. 1,989,493. Vat Dyestuff of the 1.2-Benzanthraquinone Series. Jan. 29, 1935.

Pat. 1,989,784. Vat and Sulphur Dyestuff Preparations for Textile Printing. Feb. 5, 1935.

Pat. 1,990,018. Hydroxy Fluoranthenes. Feb. 5, 1935.

Pat. 1,990,841. Condensation Product and Process of Making Same. Feb. 12, 1935.

Pat. 1,990,842. Condensation Product of the Anthraquinone Series and Process of Making Same. Feb. 12, 1935.

Pat. 1,990,852. Process of Producing Prints or Discharges on Wool and Other Animal Fibers. Feb. 12, 1935.

Pat. 1,990,854. Vat and Sulphur Dyestuff Preparation. Feb. 12, 1935.

Pat. 1,990,864. Process and Agent for Delustering Textile Materials. Feb. 12, 1935.

Pat. 1,991,808. Complex Metal Compounds of Azo Dyestuffs. Feb. 19, 1935.

Pat. 1,992,461. Waterinsoluble Azodyestuffs. Feb. 26, 1935.

Pat. 1,992,489. Process for Producing Nitrogenous Products of the Aliphatic Series. Feb. 26, 1935.

Pat. 1,992,917. Water-Insoluble Azo-Dyestuff. Feb. 26, 1935.

Pat. 1,994,025. Production of Vat Dyestuffs of the Benzanthrone Series. Mar. 12, 1935.

Pat. 1,994,033. Vat Dyestuff of the Anthraquinone Acridone Series. Mar. 12, 1935.

Pat. 1,994,136. Dyestuffs of the Dibenzanthrone Series. Mar. 12, 1935.

Pat. 1,994,602. Process of Preparing Vat Dyestuffs of the Anthraquinone Triazine Series. Mar. 19, 1935.

Pat. 1,994,622. Process of Preparing High Molecular Anthraquinone Derivatives. Mar. 19, 1935.

Pat. 1,994,709. Dyestuff Salt Containing Heavy Metals in Complex Combination in the Acid Component. Mar. 19, 1935.

Pat. 1,995,553. Process of Preparing Azodyestuffs. Mar. 26, 1935.

Pat. 1,995,564. Watersoluble Azodyestuffs. Mar. 26, 1935.

Pat. 1,995,902. Disazo Dyestuffs and Their Production. Mar. 26, 1935.

Pat. 1,995,928. Azo Dyestuff and Its Production. Mar. 26, 1935.

Pat. 1,995,929. Chloro- and Bromo-Derivatives of 2-Aminonaphthalene-1-Sulphonic Acid and Process of Preparing Them. Mar. 26, 1935.

Pat. 1,995,932. Water-Insoluble Mono-Azo-Dyestuffs and Fiber Dyed Therewith. Mar. 26, 1935.

Pat. 1,995,933. Water-Insoluble Mono-Azo-Dyestuffs and Fiber Dyed Therewith. Mar. 26, 1935.

Pat. 1,996,867. Dyestuffs of Thiazine Series. Apr. 9, 1935.

Pat. 1,997,160. Halogenated Dyestuffs of the Indigo Series. Apr. 9, 1935.

Pat. 1,997,226. Chlorination of Aromatic Compounds. Apr. 9, 1935.

Pat. 1,997,744. Hydroxydiphenylene Compound. Apr. 16, 1935.

Pat. 1,998,546. Acid Dyestuff of the Anthraquinone Series and Process of Preparing It. Apr. 23, 1935.

Pat. 1,998,563. Sulphonic Acid of the Benzene Series. Apr. 23, 1935.

Pat. 1,999,341. Hydroxycarbazole Compounds. Apr. 30, 1935.

Pat. 1,999,610. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Apr. 30, 1935.

Pat. 1,999,611. Anthraquinono-2'.1'.1.2.-Anthraquinones and a Process of Preparing Them. Apr. 30, 1935.

Pat. 1,999,614. New Process of Preparing Aminoalkylsulphonic Acids. Apr. 30, 1935.

Pat. 2,000,313. Water-Insoluble Azo Dyestuffs and Fiber Dyed Therewith. May 7, 1935.

Pat. 2,000,348. Vat Dyestuff of the Anthraquinone Series. May 7, 1935.

Pat. 2,001,010. Ortho-Hydroxyazo Dyes. May 14, 1935.

Pat. 2,001,044. Nitrogen Containing Anthraquinone Derivatives. May 14, 1935.

Pat. 2,001,221. Production of 1.4-Diamino-2-Aryloxyanthraquinone-3-Sulphonic Acid. May 14, 1935.

Pat. 2,001,975. Dyestuffs of the Naphthophenazine Series. May 21, 1935.

Pat. 2,001,992. Dyeing Animal Fibers. May 21, 1935.

Pat. 2,002,174. Colored Rubber Product and Process of Preparing It. May 21, 1935.

Pat. 2,002,612. N-Substituted Derivative of Sulphoanilines. May 28, 1935.

Pat. 2,002,613. Reaction Product of an Organic Acid Amide and an Alkylene Oxide. May 28, 1935.

Pat. 2,003,407. Dyestuffs of the Triarylmethane Series. June 4, 1935.

Pat. 2,003,421. Indol Compound. June 4, 1935.

Pat. 2,003,444. Process of Producing Amino-Aryl-Thiazole Compounds. June 4, 1935.

Pat. 2,003,596. Producing Azanthracene Derivatives. June 4, 1935.

Pat. 2,003,641. Printing of Textile Fabrics with Vat Dyestuffs. June 4, 1935.

Pat. 2,004,250. Azo Dyestuffs and Process of Making Same. June 11, 1935.

Pat. 2,004,383. Azo Dyestuff and Fiber Dyed Therewith. June 11, 1935.

Pat. 2,004,458. Vat and Sulphur Dyestuff Preparation for Printing Cotton. June 11, 1935.

Pat. 2,005,041. 6-Methoxy-6'-Ethoxythioindigo. June 18, 1935.

Pat. 2,005,317. Product of 2-Acetylamino-3-Chloranthraquinone. June 18, 1935.

Pat. 2,005,321. Dyestuffs of the Anthraquinoneacridone Series. June 18, 1935.

Pat. 2,005,848. Water Inseluble Azo Dyestuff Containing a Benzanthrone Nucleus. June 25, 1935.

Pat. 2,006,017. 4-Amino-1.8-Naphthalene-Dicarboxylic Acid Imides and 4-Alkylamino-1.8-Naphthalene-Dicarboxylic Acid Alkylimides and a Process of Preparing Them. June 25, 1935.

Pat. 2,006,022. Dyestuff of the Quinophthalone Series of Good Fastness to Light. June 25, 1935.

Pat. 2,006,211. Colored Rubber Products and Process of Producing Them. June 25, 1935.

Pat. 2,006,514. Sulphurized Indophenols. July 2, 1935.

Pat. 2,006,735. Nitro-Aryl Amino-Aryl Amines. July 2, 1935.

Pat. 2,006,740. Azo Dyestuffs. July 2, 1935.

Pat. 2,007,322. Preparation of Aliphatic Chlorides. July 9, 1935.

Pat. 2,008,056. Process of Preparing 1.4-Diaminoanthraquinone-2,3,X-Trisulphonic Acids. July 16, 1935.

Pat. 2,009,058. Water-Insoluble Azo Dyestuff and Fiber Dyed Therewith. July 23, 1935.

Pat. 2,009,063. Water Insoluble Azo Dyestuff and Fiber Dyed Therewith. July 23, 1935.

Pat. 2,009,064. Process of Preparing Amino Derivatives of Polycyclic Organic Compounds. July 23, 1935.

Pat. 2,009,596. Process of Preparing Naphthalene-1.4.5.8-Tetracarboxylic Acids and New Derivatives of Such Acids. July 30, 1935.

Pat. 2,009,611. Yellow Azo-Dyestuff Capable of Being Chromed. July 30, 1935.

Pat. 2,009,612. Composition for Oiling Textile Fibers. July 30, 1935.

Pat. 2,010,176. Wetting Assistant for Mercerizing Cotton. Aug. 6, 1935.

Pat. 2,010,921. Acid Dye. Aug. 13, 1935.

Pat. 2,011,292. Preparations Containing Aluminum Acetate and Aluminum Formate. Aug. 13, 1935.

Pat. 2,011,789. Condensation Product of the Benzanthrene Series. Aug. 20, 1935.

Pat. 2,011,805. Process of Preparing 1.4.5.8-Naphthalene-Tetra-Carboxylic Acid and Substitution Product Thereof. Aug. 20, 1935.

Pat. 2,011,806. Anthracene Derivative and a Process of Preparing It. Aug. 20, 1935.

Pat. 2,011,807. Process for Separating Mixtures of Isomeric Vat Dyestuffs of the 1.4.5.8-Naphthoylene Diarylimidazole Series into Their Components and the Dyestuffs Obtained Thereby. Aug. 20, 1935.

Pat. 2,012,387. Trisazodyestuffs. Aug. 27, 1935.

Pat. 2,012,553. Dyeing of Cellulose Esters and Ethers. Aug. 27, 1935.

Pat. 2,012,558. Vat Dyestuffs of the Dibenzanthrone Series. Aug. 27, 1935.

Pat. 2,012,569. Aminodiphenyl Derivatives and a Process of Preparing Them. Aug. 27, 1935.

Pat. 2,013,069. Dyestuffs of the Oxazine Series. Sept. 3, 1935.

Pat. 2,013,180. Process of Preparing Diazonium Compounds from 4-Aminodiarylamines. Sept. 3, 1935.

Pat. 2,013,181. Sulphonic Acid and Carboxylic Acid Derivatives of 1.1'-Diaryl-3.3'-Arylene-5.5'-bis-Pyrazolones. Sept. 3, 1935.

Pat. 2,013,182. Arylamino-Hydroxybenzene and Process of Preparing It. Sept. 3, 1935.

Pat. 2,013,659. Compound of the Azabenzanthrone Series. Sept. 10, 1935.

Pat. 2,013,873. Production of Aromatic Amines of the Benzene Series. Sept. 10, 1935.

Pat. 2,014,484. Azo Dyestuffs. Sept. 17, 1935.

Pat. 2,014,487. Azodyestuffs Insoluble in Water and Fibers Dyed Therewith. Sept. 17, 1935.

Pat. 2,014,568. Vat Dyestuffs of the Anthraquinone-acridine Series and Their Production. Sept. 17, 1935.

Pat. 2,015,161. Azo Dyestuff. Sept. 24, 1935.

Pat. 2,015,204. Water-Insoluble Azo-Dyestuff and Fiber Dyed Therewith. Sept. 24, 1935.

Pat. 2,015,225. Azo Dyestuffs. Sept. 24, 1935.

Pat. 2,015,226. Complex Metal Compound of Ortho Hydroxyazo Dyestuffs. Sept. 24, 1935.

Pat. 2,015,429. Azo Dyestuffs. Sept. 24, 1935.

Pat. 2,016,013. Dyestuffs of the Oxazine Series and Their Production. Oct. 1, 1935.

Pat. 2,016,495. Water-Insoluble Azo-Dyestuffs. Oct. 8, 1935.

Pat. 2,016,504. Dyestuffs of the Oxazine Series and a Process of Preparing Them. Oct. 8, 1935.

Pat. 2,016,521. Condensation Product of the Cyanuric Series and a Process of Preparing It. Oct. 8, 1935.

Pat. 2,016,944. Water-Insoluble Azo Dyes and Process of Making Them. Oct. 8, 1935.

Pat. 2,017,936. Aroylamino Anthraquinone Acridone Derivative. Oct. 22, 1935.

Pat. 2,018,095. Process of Preparing Solid Diazonium Salts. Oct. 22, 1935.

Pat. 2,018,103. Hydrazine Sulphonate. Oct. 22, 1935.

Pat. 2,018,137. Condensation Products from Phloroglucine and Process of Preparing Them. Oct. 22, 1935.

Pat. 2,018,350. Production of Aldehydes from Dicarboxylic Acids. Oct. 22, 1935.

Pat. 2,018,775. Process of Preparing Diphenyl-Methane Derivatives. Oct. 29, 1935.

Pat. 2,018,801. Azo Dyestuffs. Oct. 29, 1935.

Pat. 2,018,813. Mu-Arylene-Thiazole and Arylene Oxazole Sulphonic Acid. Oct. 29, 1935.

Pat. 2,018,935. Poly-Halogen-Derivatives of Pyrene and a Process of Preparing Them. Oct. 29, 1935.

Pat. 2,019,830. Soluble Ortho-Hydroxyazo Dye and Its Production. Nov. 5, 1935.

Pat. 2,019,840. Process of Preparing 1.4-Dihalogen-Anthraquinone-2-Carboxylic Acids. Nov. 5, 1935.

Pat. 2,019,844. Azodyestuff. Nov. 5, 1935.

Pat. 2,019,914. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Nov. 5, 1935.

Pat. 2,019,915. Complex Metal Compounds of Azo Dyestuffs and Their Production. Nov. 5, 1935.

Pat. 2,020,622. Arylisothiazolones and Process of Making Same. Nov. 12, 1935.

Pat. 2,020,651. Condensation Product of the Oxazine Series. Nov. 12, 1935.

Pat. 2,021,267. Indigoid Vat Dyestuffs. Nov. 19, 1935.

Pat. 2,022,240. Halogenated Vat Dyestuff of the Benzanthronylaminoanthraquinone Series and Process of Making Same. Nov. 26, 1935.

Pat. 2,022,243. Azo Dye. Nov. 26, 1935.

Pat. 2,022,245. Mono-N-Alkanol Derivative of Aromatic Di-Amines and Poly-Amines. Nov. 26, 1935.

Pat. 2,022,923. Diazonium Compounds. Dec. 3, 1935.

Pat. 2,022,935. Asymmetrical Ureas and Their Production. Dec. 3, 1935.

Pat. 2,023,176. Disazo Dyestuffs. Dec. 3, 1935.

Pat. 2,023,479. Condensation Products of the Azabenzanthrone-Acridine Series and Their Production. Dec. 10, 1935.

Pat. 2,023,769. Fatty Mixture Capable of Being Emulsified. Dec. 10, 1935.

Pat. 2,023,773. Waterinsoluble Azodyestuffs. Dec. 10, 1935.

Pat. 2,023,926. Process of Preparing Vat Dyestuffs of the Pyranthrone Series and New Vat Dyestuffs Prepared Thereby. Dec. 10, 1935.

Pat. 2,023,928. Chrome Yellow Color. Dec. 10, 1935.

Pat. 2,023,953. Yellow Mono-Azodyestuffs Capable of Being Chromed. Dec. 10, 1935.

Pat. 2,024,502. Dyestuff Printing Paste. Dec. 17, 1935.

Pat. 2,024,525. Dioxazine Compounds and Process of Making Same. Dec. 17, 1935.

Pat. 2,024,534. Monoalkyl Ether of Aromatic Polyhydroxy Compounds. Dec. 17, 1935.

Pat. 2,025,169. 2-Aminoanthraquinone-Sulphonic Acids and a Process of Preparing Them. Dec. 24, 1935.

Pat. 2,025,170. 2-Amino-3-Bromo-Anthraquinone-Sulphonic Acid and the Alkali Metal Salts Thereof and a Process of Preparing Them. Dec. 24, 1935.

Pat. 2,025,370. Amino-Halogenanthraquinone Sulphonic Acids. Dec. 24, 1935.

Pat. 2,025,546. Vat Dyestuffs of the Anthraquinone Series and Process of Producing Same. Dec. 24, 1935.

Pat. 2,025,582. Water-Insoluble Azo Dyestuffs. Dec. 24, 1935.

Pat. 2,025,587. Arylides of 4-Hydroxy-Diphenyl-3-Carboxylic Acid. Dec. 24, 1935.

Pat. 2,025,921. Anthrapyridone Sulphonic Acid and Process of Making the Same. Dec. 31, 1935.

Pat. 2,025,991. Azo Dyestuffs and Their Production. Dec. 31, 1935.

Pat. 2,026,026. Arylamino Substituted 1.4.5.8-Naphthoylene-Di-(Arylimidazole) Condensation Products. Dec. 31, 1935.

Pat. 2,026,092. Dyestuffs of the Oxazine Series and Process of Preparing Them. Dec. 31, 1935.

Pat. 2,026,093. Dyestuffs of the Dioxazine Series and a Process of Preparing the Same. Dec. 31, 1935.

Pat. 2,026,861. Pyrazolone Azo Dyes and Their Production. Jan. 7, 1936.

Pat. 2,026,908. Waterinsoluble Azodyestuffs. Jan. 7, 1936.

Pat. 2,026,920. Azodyestuffs. Jan. 7, 1936.

Pat. 2,027,066. Solid Mineral Acid Diazonium Salts and a Process of Preparing Them. Jan. 7, 1936.

Pat. 2,027,658. Dyestuffs of the Anthraquinone Series. Jan. 14, 1936.

Pat. 2,028,271. Manufacture of Para-Cyclohexyl-Phenols. Jan. 21, 1936.

Pat. 2,028,373. Manufacture of 4-Aminodiphenylamine Derivatives and Intermediates Obtained Thereby. Jan. 21, 1936.

Pat. 2,028,384. Vat Dyestuffs of the Anthracene Series. Jan. 21, 1936.

Pat. 2,028,439. Disazodyestuffs. Jan. 21, 1936.

Pat. 2,028,469. Waterinsoluble Azodyestuffs Derived from Benzocarbazoles. Jan. 21, 1936.

Pat. 2,028,480. Waterinsoluble Azodyestuffs. Jan. 21, 1936.

Pat. 2,028,981. Production of Azo Dyestuffs. Jan. 28, 1936.

Pat. 2,029,007. Anthrapyridone Sulphonic Acids and the Process of Making Them. Jan. 28, 1936.

Pat. 2,029,237. Producing Vat Dyestuffs of the Dibenzanthrone Series. Jan. 28, 1936.

Pat. 2,029,239. Anthraquinone Derivatives. Jan. 28, 1936.

Pat. 2,029,258. Acid Dyestuffs of the Anthraquinone Series and a Process of Preparing Them. Jan. 28, 1936.

Pat. 2,029,555. Azodyestuffs. Feb. 4, 1936.

Pat. 2,029,591. Azodyestuffs. Feb. 4, 1936.

Pat. 2,029,647. Ethylene Azo Dyestuffs and Their Manufacture. Feb. 4, 1936.

Pat. 2,029,714. Thioindigo Dyestuff Preparations and a Process of Preparing Them. Feb. 4, 1936.

Pat. 2,029,727. Symmetrical Di-(Arylamino)-Hydroxybenzenes and a Process of Preparing Them. Feb. 4, 1936.

Pat. 2,030,327. Waterinsoluble Azodyestuffs. Feb. 11, 1936.

Pat. 2,030,355. Azodyestuffs and Their Production. Feb. 11, 1936.

Pat. 2,030,823. Nitroanthraquinone-Azoles. Feb. 11, 1936.

Pat. 2,030,824. 1-Amino-2-Anthraquinonyl-Anthraquinone-Azoles. Feb. 11, 1936.

Pat. 2,030,859. Textile Assistants. Feb. 18, 1936.

Pat. 2,031,143. Ortho-(Aminoaroyl)-Benzoic Acids and Inner Anhydrides Thereof and Process of Preparing Them. Feb. 18, 1936.

Pat. 2,031,406. Vat Dyestuffs of the Anthraquinone-2.1 (N) Benzacridone Series. Feb. 18, 1936.

Pat. 2,031,426. Disazo Dyestuff. Feb. 18, 1936.

NOTICE

E. I. du Pont de Nemours and Company has placed more than 4,000 of its patents on the Register of Patents as being available for license only. The following schedules show the groupings of the patents. Abstracts will be published beginning November 9, 1948. Communications concerning specific abstracts should be addressed to Patent Division, E. I. du Pont de Nemours and Company, Wilmington 98, Del. Complete lists are available for inspection in the Patent Office, Washington 25, D. C., but are not available for distribution at this time. Group 28.

Schedule 1

407 patents relating to ammonia synthesis, apparatus for high pressure exothermic reactions, ammonia cracking, catalysts; hydrogen manufacture; alcohol synthesis; fertilizers; urea synthesis; urea-formaldehyde; equipment; gas analysis apparatus; hydroxyacetic acid process; hydrogenation; reaction of CO with water or alcohols, acid and ester syntheses, BF_3 processes; acetals; 1,3-dioxolanes; antifreeze, hydraulic fluids, automotive chemicals, denaturants; acrylic compounds and resins therefrom; and sundry nitrogen compounds, catalytic oxidations, dimethyl ether manufacture, manufacture of HCN, etc.

Schedule 2

587 patents relating to ceramics; chlorohydrocarbons; cyanides and electroplating; cyclohexane-cyclohexene; formaldehyde; foramide; hydrocyanic acid; peroxide; sodium; sodium hydride; sodium-naphthalene and derivatives; vinyl products; and miscellaneous.

Schedule 3

302 patents relating to blasting explosives; acids and salts; initiators, rivets and miscellaneous uses of explosives; miscellaneous explosives; and organic compounds and miscellaneous subjects.

Schedule 4

514 patents relating to cellulose derivative manufacture (particularly nitro-cellulose) and methods for reducing viscosity characteristic; adhesives-shoe cements activators and processes related thereto; pigments (including metallic powders) and dispersion processes therefor; apparatus and process for manufacturing and using organic coatings including coated fabrics; coated fabrics (cellulose derivative coatings) and compositions therefor, including products manufactured therefrom; coated fabrics (non-cellulosic coatings) and compositions therefor, including products manufactured therefrom; impregnated paper and similar sheet material; finishes for metal and glass—including automobiles, refrigerators, etc.; finishes for flexible substrates—including paper, leather, fabrics, etc. (except fully coated fabrics); finishes for wood surfaces—including furniture; organic coatings for general use including intermediates therefor; solvents and plasticizers—manufacture and use; hand creams, insect repellants and finger nail polishes; synthetic resins and their intermediates; and compositions for treatment of automotive cooling systems.

Schedule 5

334 patents relating to ammonium phosphate and sulfate; chlorosulfonates and chlorine; electroplating products; hydrochloric acid and salt cake; inhibitors and metal pickling compositions; insecticides, fungicides and bactericides; iron sulfate; lactic acid; lithium salts; nitric acid; pigments; plant regulants and herbicides; refractories; resins and polymers; shipping packages; sodium phosphates; sodium and potassium silicates; sulfamic acid and sulfamates; sulfuric acid; tanning agents; water repellents; zinc and zinc dust; zinc salts and ammonium chloride; and miscellaneous—not specifically classified.

Schedule 6

676 patents relating to the preparation of cellulose acetate and intermediates; esters, ethers, mixed esters and other cellulose derivatives; the spinning of cellulose acetate yarn; processing and treatment of cellulose acetate yarns; the preparation of miscellaneous resins and polymers; uses and treatments for regenerated cellulose films; casting machines for the manufacture of regenerated cellulose film; methods and apparatus for the manufacture of plain transparent regenerated cellulose film; casting processes for regenerated cellulose film; softeners and sizes for regenerated cellulose film; methods and compositions for use in the production of coated moistureproof films; the anchorage of moistureproofing coatings on regenerated cellulose film; plasticizers for moistureproofing coatings used on regenerated cellulose film; slip agents for moistureproofing coatings used on regenerated cellulose film; slitting machines and other mechanical equipment useful in the manufacture of thin films; transparentized papers, laminations and special property films and coatings; the manufacture of cellulose acetate, rubber hydrochloride and polyvinyl alcohol or acetal films; the manufacture and use of regenerated cellulose caps, bands and tubing; the manufacture of regenerated cellulose sponges; the use of viscose rayon yarns; the manufacture of chemical cellulose; the manufacture of viscose, including viscose additive compositions; spinnerets for use in the spinning of artificial filaments; the spinning of viscose yarns; methods and equipment for the purification of viscose rayon yarns; processing and treating of viscose rayon yarns; the production of novelty yarns; protein fibers; and deacetylated chitin.

Schedule 7

74 patents relating to color photography; photographic sensitizing dyes; photographic emulsion additions, modifications, etc.; non-gelatin, light-sensitive elements; new light sensitive compounds; film base compositions; treatments for improving film base; films with non-halation or day-light loading backings; film processing, chemicals, solutions, etc.; packages, containers, etc., for photographic materials; and apparatus, equipment, etc., for manufacturing or processing photographic materials.

Schedule 8

74 patents relating to colored pigments; zinc sulfide white pigments; and miscellaneous.

Schedule 9

212 patents relating to acrylic polymers; manufacture of plastic articles; cellulose derivative plastics; extrusion of safety glass interlayer sheeting; miscellaneous plasticizers; miscellaneous plastics; polytetrafluoroethylene; and vinyl polymers.

Schedule 10

1080 patents relating to anthraquinone dyes; azo dyes; miscellaneous dyes; dyeing and printing chemicals and processes; chemicals for treatment of textiles, paper and leather; petroleum chemicals; elastomers and elastomer chemicals; fine chemicals; miscellaneous organic compounds; miscellaneous inorganic compounds; and miscellaneous, mechanical.

TRADE-MARKS

OFFICIAL GAZETTE, NOVEMBER 2, 1948

[VOL. 616. No. 1]

ACT OF 1905

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication. As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Marks published for opposition under the act of 1946 follow the 1905 publications.

CLASS 2

RECEPTACLES

Ser. No. 515,833. HAMMOND IRON WORKS, Warren, Pa. Filed Jan. 16, 1947.

HAMONDTANK

The word "Tank" and the representation of a tank, and the outline representation of the label are disclaimed apart from the mark.

FOR METAL TANKS AND COMBINATION METAL AND CONCRETE TANKS AND THE PARTICULAR USE BEING FOR OIL, WATER, GAS AND GASOLINE STORAGE.

Claims use since Mar. 1, 1916.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Ser. No. 482,892. G. BYRON REESE, doing business as Progressive Chemical Co., Minneapolis, Minn. Filed May 2, 1945.

Pro·kem

The term "kem" is disclaimed apart from the mark.

FOR LIQUID CHEMICAL BOILER SCALE REMOVER, LIQUID BRINE-SOLVENT FOR CLEANING CREAMERY TANKS, ETC., AND METAL CLEANING PASTE FOR SOLVENT FOR THE REMOVAL OF SURFACE FILM.

Claims use since Mar. 29, 1945.

Ser. No. 484,181. REGENT LABORATORIES, INC., New York, N. Y. Filed June 5, 1945.

Swagger

FOR AFTER SHAVE LOTION.

Claims use since Apr. 16, 1945.

Ser. No. 492,788. PUROCAINE, INC., Philadelphia, Pa. Filed Dec. 6, 1945.

PUROCAINE, Inc.

The word "Inc" is disclaimed apart from the mark.

FOR LIQUID AND SOLID CHEMICAL COMPOUNDS AND COMPOSITIONS USEFUL AS PHARMACEUTICALS AND AS RAW MATERIALS AND INTERMEDIATES IN THE MANUFACTURE THEREOF—NAMELY, PROCAINE HYDROCHLORIDE, PROCAINE BASE, BUTYL-P-AMINOBENZOATE, ISOBUTYL-P-AMINOBENZOATE, EPINEPHRINE, DESOXYEPHEDRINE HYDROCHLORIDE, MENADIONE (VITAMIN K-3) AND BISMUTH-SODIUM-TARTRATE.

Claims use since Mar. 29, 1943.

Ser. No. 502,676. PERRY N. ZANG, Freeport, N. Y., assignor to Amorskin, Inc., Freeport, N. Y., a corporation of New York. Filed May 23, 1946.

VIVIDERM

FOR EXTRACT OBTAINED FROM CERTAIN ANIMAL TISSUE COMBINED WITH EXTRACTS OF SKIN TISSUE OBTAINED FROM CERTAIN SPECIES OF REPTILES, AS TURTLES, TORTOISES, AND IGUANAS, USED IN COMPOUNDING TOILET GOODS ITEMS.

Claims use since December 1925.

Ser. No. 511,183. PHYSIOLOGICAL CHEMICALS COMPANY, INC., New York, N. Y. Filed Oct. 19, 1946.

CO-AMINO

The word "Amino" is disclaimed apart from the mark as shown.

FOR MEDICINAL PREPARATIONS CONTAINING AMINO ACIDS AND VITAMIN B COMPLEX FACTORS FOR USE AS A NUTRITIONAL SUPPLEMENT.

Claims use since May 12, 1945.

Ser. No. 512,227. THE ARMAND COMPANY, Des Moines, Iowa. Filed Nov. 8, 1946.

Too Lovely for Words

FOR COLOGNE.

Claims use since June 28, 1946.

Ser. No. 513,168. EVAN WILLIAMS COMPANY LIMITED, London, England. Filed Nov. 25, 1946.

Evan Williams

The trade-mark consists of the signature of the founder of the applicant's business.

FOR TOILET PREPARATIONS—NAMELY, HENNA SHAMPOO POWDERS, HAIR LOTIONS, AND HENNA BRILLIANTINE.

Claims use since 1917.

Ser. No. 513,859. VODOL COMPANY, Chicago, Ill., now by change of name Vodine Company, a corporation of Illinois, assignor to Benjamin Clayton, San Marino, Calif. Filed Dec. 6, 1946.

Vodine

FOR SOLIDIFIED IODINE OINTMENT.

Claims use since Sept. 19, 1946.

Ser. No. 515,631. PARAMOUNT PEST CONTROL SERVICE, Oakland, Calif. Filed Jan. 11, 1947.

FOR INSECTICIDES, RODENTICIDES, AND FUNGICIDES.

Claims use since November 1938.

Ser. No. 520,605. AVILITE, INC., Burbank, Calif. Filed Apr. 14, 1947.

INSECT-O-LITE

The word "Insect" and the representation of the device are disclaimed apart from the mark.

FOR INSECTICIDES.

Claims use since Feb. 6, 1947.

Ser. No. 521,139. LOUISE SHERRITT TIBBETTS, doing business as Lamoraga Specialties, Moraga, Calif. Filed Apr. 22, 1947.

Lamoraga

FOR FACE CREAMS, ASTRINGENTS, SKIN FRESHENERS, AND SHAMPOOS.

Claims use since July 1, 1946.

Ser. No. 522,298. MARY L. ALLEN, Newark, N. J. Filed May 12, 1947.

The illustration of the head of the woman shown on the drawing is fanciful.

FOR HAIR AND SCALP CREAM PREPARATIONS FOR RELIEVING ITCHING SCALP.

Claims use since Sept. 30, 1946.

Ser. No. 523,077. CENTRAL SCIENTIFIC COMPANY, Chicago, Ill. Filed May 26, 1947.

CENCO

FOR REAGENTS AND VOLUMETRIC SOLUTIONS FOR USE IN CHEMICAL, CLINICAL AND BIOLOGICAL LABORATORIES FOR TESTING PURPOSES INCLUDING: ACID, ACETIC; ACID, ALCOHOL; ACID, AMINONAPHTHOLSULFONIC; ACID, CHLOROPLATINIC; ACID, DICHROMATE; ACID, DIGESTION MIXTURE; ACID, HYDROCHLORIC; ACID, OXALIC; ACID, PHOSPHOMOLYBDIC; ACID, PICRIC; ACID, SULFURIC; ACID, TRICHLOROACETIC; ALBERT'S STAIN; ALBUMEN FIXATIVE; ALCOHOLIC POTASSIUM HYDROXIDE; ALIZARIN RED S; ALIZARIN SODIUM MONOSULFONATE; ALKALINE COPPER; ALKALINE FERRICYANIDE; ALKALINE POTASSIUM IODIDE; AMMONIUM OXALATE; AMMONIUM SULFAMATE; AMMONIUM SULFATE; AMMONIUM SULPHOCYANIDE (THIOCYANATE); ANDRADE'S INDICATOR; ANILINE GENTIAN VIOLET; ANTIFORMIN; ARSENOUS TRIOXIDE; AZOLITMIN; BARIUM CHLORIDE; BENEDICT'S REAGENTS; BENZIDINE HYDROCHLORIDE; BILIRUBIN, ARTIFICIAL; BISMARCK BROWN; BOAS REAGENT; BOGEN'S INDICATOR; BRILLIANT CRESYL BLUE; BROMCRESOL GREEN; BROMCRESOL PURPLE; BROMINE WATER; BROMTHYMOL BLUE; BUFFER ACETATE MIXTURE; BUFFER MIXTURES; BUFFER, SODIUM PYROPHOSPHATE; BUFFER SUBSTRATE; BUFFER, WRIGHT'S STAIN; CARBOL-FUCHSIN; CARBOL-GENTIAN VIOLET; CHLORINE WATER; CHLORPHENOL RED; CHOLESTEROL; COLLOIDAL GOLD; CONGO RED; CREATININE; CRESOL PHTHALEIN; CRESOL RED; CUPROUS CHLORIDE; DAMAR IN XYLOL; DIMETHYLAMINOAZOBENZENE (TOEPFER); DIMETHYGLOXIME; DIMETHYL-A-NAPHTHYLAMINE; DOCTOR'S SOLUTION; EHRLICH'S DIAZO REAGENTS; EOSIN; ESBACH'S REAGENT; EXTON'S REAGENT; FEHLING'S SOLUTIONS; FERRIC AMMONIUM SULPHATE; FERRIC CHLORIDE; FERRIC IRON GUM GHATTI; FERRIC NITRATE; FISCHER, KARL, REAGENTS; FLUORESCEIN; FUCHSIN; GABBETT'S STAIN; GENTIAN VIOLET; GIEMSA'S STAIN; GLUCOSE STANDARD; GOWER'S REAGENT; GRAM'S STAINS; GUM GHATTI; HAINE'S SOLUTION; HASTINGS BLOOD; HAYEM'S REAGENT; HEMATOXYLIN; HYDROGEN SULPHIDE; ICTERIC INDEX STANDARD; INDIGO; INVERTASE; IODINE; ISOTONIC SOLUTION; LEAD ACETATE; LITMUS; LOGWOOD; MALACHITE GREEN; MALLORY'S ANILINE BLUE; MANGANOUS SULPHATE; MERCUROCHROME; METHYL ORANGE; METHYL RED; METHYL VIOLET; METHYLENE BLUE; MILLON'S REAGENT; MOLISCH'S REAGENT; N-(1-NAPHTHYL) ETHYLENEDIAMINE DIHYDROCHLORIDE; NEISSER'S STAIN; NESSLER'S REAGENTS; NEUTRAL RED; NITROGEN STANDARDS; NYLANDER'S REAGENT; OBERMAYER'S REAGENT; OCCULT BLOOD REAGENT; ORTHO-TOLIDIN; PANCREATIN; PARLODION; PEPSIN; PHENOLPHTHELEIN; PHENOL REAGENT; PHENOL RED; PHLOROGLUCINOL; PHOSPHATE STANDARDS; PHYSIOLOGICAL SALT; PLATINUM CHLORIDE; POTASSIUM CHROMATE; POTASSIUM DICHROMATE; POTASSIUM HYDROXIDE; POTASSIUM PERMANGANATE; POTASSIUM PYROGALLATE; POTASSIUM SULPHOCYANIDE (THIOCYANATE); RICE'S REAGENT; ROBERT REAGENT; SAFRANIN; SAPONIN; SCHIFF'S REAGENT; SILVER NITRATE; SOAP STANDARDS; SODIUM CARBONATE; SODIUM CHLORIDE; SODIUM CYANIDE; SODIUM HYDROXIDE; SODIUM HYPOBROMITE; SODIUM HYPOCHLORITE; SODIUM MOLYBDATE; SODIUM NITRITE; SODIUM NITROPRUSSIDE; SODIUM OXALATE; SODIUM SILICATE; SODIUM THIOSULPHATE; SODIUM TUNGSTATE; STARCH; SUDAN III; SULFADIAZINE; SULFAGUANIDINE; SULFAMERAZINE; SULFANILAMIDE; SULFAPYRIDINE; SULFATHIAZOLE; TETRACHROME BLOOD STAIN; THYMOL BLUE; THYMOL PHTHALEIN; TOLLEN REAGENT; TURBIDITY STANDARDS; TUMERIC; UREA CYANIDE; UREA STANDARDS; UREASE; URIC ACID REAGENTS; WRIGHT'S BLOOD STAIN; ACETAMIDE; ACETANILIDE; ACETIC ANHYDRIDE; ACETONE; ACETOPHENONE; ACETYL BROMIDE; ACETYL CHLORIDE; ACETIC ACID; ACETYLSALICYLIC ACID; ANTHRANILIC ACID; ARSENIC ACID; ARSENOUS ACID; BENZOIC ACID; BORIC ACID; BROMACETIC ACID; BROMIC ACID; BUTYRIC ACID; CAMPHORIC ACID; CARBOLIC ACID; CHLORACETIC ACID; CHLORIC ACID; CHROMIC ACID; CINNAMIC ACID; CITRIC ACID; FORMIC ACID; GALLIC ACID; HIPPURIC ACID; HYDROBROMIC ACID; HYDROCHLORIC ACID; HYDROCYANIC ACID; HYDROFLUORIC ACID; HYDROFLUOSILICIC ACID; HYDROIODIC ACID; IODIC ACID; LACTIC ACID; MALEIC ACID; MALIC ACID; MOLYBDIC ACID; NITRIC ACID; OLEIC ACID; OSMIC ACID; OXALIC ACID; PALMITIC ACID; PERCHLORIC ACID; PHOSPHOMOLYBDIC ACID; PHOSPHORIC ACID; PHOSPHOROUS ACID; PHOSPHOTUNGSTIC ACID; PHTHALIC ACID; PICRAMIC ACID; PICRIC ACID; PROPIONIC ACID; PYROGALLIC ACID; PYROLIGNEOUS ACID; ZINC STEARATE; ZINC SULPHATE; ZINC SULPHIDE; ZINC TARTRATE.

Claims use since 1909.

Ser. No. 523,693. M. D. LABORATORY, Muskogee, Okla. Filed June 6, 1947.

SULFASOL

FOR COMPOSITION FOR THE TREATMENT OF THE SCALP.
Claims use since March 1946.

Ser. No. 523,979. GEORGE L. NICHOLAS, doing business as The Medicine Chest, Indianapolis, Ind. Filed June 11, 1947.

VELVA-LAX

The word "Lax" is disclaimed apart from the mark shown.
FOR LAXATIVES.
Claims use since June 2, 1946.

Ser. No. 524,730. THE SHERWIN-WILLIAMS COMPANY, Cleveland, Ohio. Filed June 24, 1947. Under section 5b of the act of 1905 as amended in 1920.

SHERWIN-WILLIAMS

FOR INSECTICIDES, FUNGICIDES, HERBICIDES, GERMICIDES, DISINFECTANTS, PESTICIDES, INTERMEDIATES, FOR USE IN ORGANIC SYNTHESIS IN THE PRODUCTION OF PHARMACEUTICALS, DYES, DYESTUFFS AND OTHER ARTIFICIAL PRODUCTS; CASTOR OIL AND DEHYDRATED CASTOR OIL; DYES AND DYESTUFFS FOR GENERAL USE IN THE INDUSTRIAL ARTS; AND SOAPS FOR USE (OTHER THAN AS DETERGENTS) IN THE CHEMICAL AND OTHER INDUSTRIAL ARTS AS DISPERSING AGENTS, WETTING AGENTS, FLOCCULATING AGENTS AND EXTENDERS AND SUBSTRATA FOR PIGMENTS AND DYESTUFFS.
Claims use since 1902.

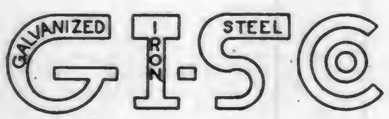
CLASS 12

CONSTRUCTION MATERIALS

Ser. No. 517,884. ATLAS OVERHEAD DOOR COMPANY, Quakertown, Pa. Filed Feb. 21, 1947.

The words "Overhead Doors" are disclaimed apart from the mark.
FOR DOORS OF THE OVERHEAD TYPE, EITHER MANUALLY OR AUTOMATICALLY OPERATED.
Claims use since Jan. 17, 1946.

CLASS 13



HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Ser. No. 486,012. U. S. AUTOMATIC CORPORATION, Amherst, Ohio. Filed July 19, 1945.

The word "Automatic" is disclaimed apart from the mark. The drawing is lined to indicate the colors red and blue.
FOR SCREW MACHINE PRODUCTS—NAMELY, SCREW DRIVER TYPE TIRE VALVE BLADES, HOSE COUPLING BODIES, COUPLER BODIES FOR HOSE AND PIPE, STANDARD PIPE UNION BODIES, BOLTS, TANK BOSSES, STANDARD PIPE REDUCER BUSHINGS, TIRE INFLATING DEVICE CAPS, VALVE CASINGS, ELBOWS FOR USE AS FLUID AND GAS CONDUITS, SPRING GUIDES, CAP NUTS, CASTLE NUTS, ELASTIC STOP LOCKING NUTS, GLAND NUTS, SLOTTED NUTS, TIRE VALVE PARTS, PINS, DOOR HINGE PINS, VALVE INSERT PINS, WINDOW SASH LATCH HANDLE PIVOT PINS, BOSS COVER PLATES, OIL PIPE PLUGS, OIL STRAINER PLUGS, SEAT BALL CHECK RETAINERS, RIVETS, SCREWS, CHECK VALVE BODY SCREWS, FLAT FILLISTER SCREWS, MACHINE SCREWS, ROUND HEAD SCREWS, VALVE STEMS, CIRCULAR SEAL VALVE STEMS, RINGTOP VALVE STEMS, STUDS, GLOBE VALVE BODY STUDS, LEVELLING STUDS, TURNBUCKLE STUDS, PARTS OF NON-MECHANICAL VALVES, CONVERTER VALVES, LOCK DISCHARGE VALVES, IMPELLER RIVET WASHERS, METAL WASHERS, MOLDED CUP WASHERS, AND SPHERICAL WASHERS
Claims use since June 24, 1942.

Ser. No. 503,978. ERROL P. D'AZZO, New York, N. Y. Filed June 15, 1946.

The words "Galvanized," "Iron," and "Steel" are disclaimed apart from the mark.
FOR GALVANIZED BARS FOR STORE AWNINGS.
Claims use since June 1945.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Ser. No. 519,694. RADIRON CORPORATION, Miamisburg, Ohio. Filed Mar. 27, 1947.

FOR ELECTRIC TOASTERS.
Claims use since Jan. 21, 1947.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 509,941. KAY PRODUCTS COMPANY, Cincinnati, Ohio. Filed Sept. 28, 1946.

DOODLE-STIX

Applicant disclaims the use of the word "Stix" excepting in the particular combination shown.
FOR GAME PLAYED WITH SOCKETED PIECES IN WHICH ALL MANNER OF CRYSTAL SHAPES CAN BE MADE OR DEMONSTRATED.
Claims use since Sept. 5, 1946.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Ser. No. 506,196. PHILLIPS MANUFACTURING COMPANY, Chicago, Ill. Filed July 24, 1946.

Vapo-Kleen

The term "Kleen" is disclaimed apart from the mark.
FOR DEGREASING APPARATUS WHICH VAPOR IS PASSED ABOUT METAL OBJECTS FOR DISSOLVING GREASE THEREON.
Claims use since July 3, 1946.

CLASS 28

JEWELRY AND PRECIOUS-METAL WARE

Ser. No. 510,663. DOMINANT, INCORPORATED, Attleboro, Mass. Filed Oct. 11, 1946.

DOMINANT

FOR WATCH ATTACHMENTS AND BRACELETS, NOT INCLUDING WATCHES.
Claims use since Nov. 1, 1945.

Ser. No. 524,948. CAMPUS JEWELRY PRODUCTS, INC., Providence, R. I. Filed June 27, 1947.

Campus

FOR JEWELRY FOR PERSONAL WEAR (NOT INCLUDING WATCHES)—NAMELY, COLLAR-HOLDERS, COLLAR-PINS, COLLAR-BUTTONS, TIE-SLIDES, TIE-HOLDERS, CUFF-LINKS, SHIRT-STUDS, DRESS-SETS, KEY-CHAINS, SPORT-CHAINS, LAPEL-CHAINS, WALDEMAR-CHAINS, DICKENS-CHAINS, AND VEST-CHAINS, POCKET-KNIVES, BUCKLES, AND PENCIL CLIPS, MADE WHOLLY OR IN PART OF, OR PLATED WITH PRECIOUS METAL.
Claims use since June 1, 1937.

CLASS 30

CROCKERY, EARTHENWARE, AND PORCELAIN

Ser. No. 508,487. METLOX MANUFACTURING COMPANY, Manhattan Beach, Calif. Filed Sept. 4, 1946.

Camellia

FOR EARTHENWARE DINNER WARE.
Claims use since July 24, 1946.

CLASS 32

FURNITURE AND UPHOLSTERY

Ser. No. 522,074. DAVID R. DENIS, Winnetka, Ill. Filed May 8, 1947.

NUMISMOUNT

FOR DISPLAY MOUNTING FOR COINS.
Claims use since Feb. 1, 1947.

CLASS 38

PRINTS AND PUBLICATIONS

Ser. No. 522,889. WELCOME WAGON SERVICE COMPANY, INC., New York, N. Y. Filed May 23, 1947.

Baby Time

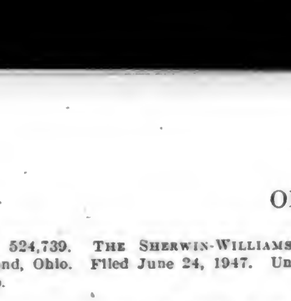
FOR PRINTED FOLDERS REGULARLY DISTRIBUTED BY APPLICANT AND ITS AGENTS.
Claims use since November 1939.

Ser. No. 524,739. THE SHERWIN-WILLIAMS COMPANY, Cleveland, Ohio. Filed June 24, 1947. Under 10-year proviso.

SHERWIN-WILLIAMS

FOR COLOR CHIP COMPILATIONS AND PRINTED PUBLICATIONS ISSUED FROM TIME TO TIME.
Claims use since 1880.

CLASS 39



CLOTHING

Ser. No. 504,316. SAMUEL BERGER, doing business as Montauk Shirt Company, New York, N. Y. Filed June 21, 1946.

Montauk

FOR MEN'S DRESS SHIRTS, SPORTSWEAR—NAMELY, SPORT SHIRTS AND SLACKS, AND PAJAMAS.
Claims use since Feb. 26, 1946.

Ser. No. 505,570. WILLIAM M. FRAZIN, doing business as Wm. M. Frazin Company, Chicago, Ill. Filed July 13, 1946.

The drawing is lined for the color yellow.
FOR NECKTIES.
Claims use since May 25, 1946.

Ser. No. 519,562. ASKIN AND ASKIN, Baltimore, Md. Filed Mar. 26, 1947.

Da-Mil

FOR MEN'S, LADIES', INFANTS', AND CHILDREN'S HOSIERY, UNDERWEAR, HANDKERCHIEFS, AND SPORTSWEAR—NAMELY, SWEATERS, SPORT-SHIRTS, BASQUE SHIRTS, BATHING TRUNKS, AND SLACK SUITS.
Claims use since July 1945.

CLASS 42

KNITTED, NETTED, AND TEXTILE FABRICS, AND SUBSTITUTES THEREFOR

Ser. No. 526,207. THE "DYNAMO" TULLE IMPORTING CO., INC., New York, N. Y. Filed July 4, 1947.

DYNAMO

FOR TULLES, MUSLINS, CREPES, SILKS, VEILINGS, AND NETTINGS, BEING PIECE GOODS AND VEILS.
Claims use since July 10, 1908.

CLASS 46

FOODS AND INGREDIENTS OF FOODS

FOR SOLUBLE SALT FOR USE IN THE PREPARATION AND TREATMENT OF WELL DRILLING FLUIDS.
Claims use since Aug. 31, 1947.

Ser. No. 547,392. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

J

Applicant claims ownership of registration No. 80,946.
FOR SILICATE OF SODA.
Claims use since 1870.

Ser. No. 547,393. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

M

Applicant claims ownership of registration No. 80,947.
FOR SILICATE OF SODA.
Claims use since 1870.

Ser. No. 547,394. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

N

Applicant claims ownership of registration No. 80,948.
FOR SILICATE OF SODA.
Claims use since 1870.

Ser. No. 547,395. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

O

Applicant claims ownership of registration No. 80,949.
FOR SILICATE OF SODA.
Claims use since 1870.

Ser. No. 547,396. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

PQ

The conventional color lining in the drawing merely represents shading. Applicant claims ownership of registration No. 275,244.
FOR SILICATE OF SODA AND SILICATE OF POTASH EITHER ALONE OR IN ADMIXTURE WITH OTHER CHEMICALS.
Claims use since Mar. 2, 1929.

Ser. No. 547,397. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

S

Applicant claims ownership of registration No. 81,099.
FOR SILICATE OF SODA.
Claims use since 1870.

Ser. No. 547,399. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

STAR BRAND

Applicant claims ownership of registration No. 79,519.
FOR SILICATE OF SODA.
Claims use since 1895.

Ser. No. 547,400. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa. Filed Sept. 23, 1947.

U

Applicant claims ownership of registration No. 80,950.
FOR SILICATE OF SODA.
Claims use since 1870.

Ser. No. 547,698. CARON CORPORATION, New York, N. Y. Filed Jan. 22, 1948.

ROYAL BAIN DE CHAMPAGNE

Applicant disclaims the word "Paris" apart from the mark as shown. Applicant claims ownership of registrations Nos. 164,476, 179,333, 181,205, 194,002 and 197,951.
FOR PERFUME, TOILET WATER, AND PERFUMED LIQUID BATH PREPARATION FOR SCENTING AND SOFTENING THE WATER.
Claims use since 1943.

Ser. No. 548,258. HYGIENIC PRODUCTIONS INC., Wilmington, Ohio. Filed Jan. 29, 1948.

HP PRESENTS

FOR PHARMACEUTICAL PREPARATIONS—NAMELY, HYGIENIC POWDER, VAPOR SALVE USED AS AN INHALANT, ANTISEPTIC SOLUTION, MUSCLE RUB LINIMENT AND ALKALINE ANALGESIC POWDER CONTAINING SODIUM, MAGNESIUM AND CALCIUM SALICYLATES.
Claims use since June 1, 1947.

Ser. No. 548,259. HYGIENIC PRODUCTIONS INC., Wilmington, Ohio. Filed Jan. 29, 1948.

MOM 'n' DAD BRAND

The word "Brand" is disclaimed apart from the mark.
FOR PHARMACEUTICAL PREPARATIONS—NAMELY, HYGIENIC POWDER, VAPOR SALVE USED AS AN INHALANT, ANTISEPTIC SOLUTION, MUSCLE RUB LINIMENT AND ALKALINE ANALGESIC POWDER CONTAINING SODIUM, MAGNESIUM AND CALCIUM SALICYLATES.
Claims use since Dec. 30, 1947.

Ser. No. 548,287. PHARMACEUTICALS, INC., Los Angeles, Calif. Filed Jan. 29, 1948.

Pyo-Pheno-Chon

FOR IODOPHENOLS IN A GELATINOUS BASE INDICATED IN THE TREATMENT OF TRENCH MOUTH, GINGIVITIS, PYORRHEA, AND ORAL SURGERY.
Claims use since Oct. 28, 1947.

CLASS 19

VEHICLES

Reg. No. 342,586. Registered Jan. 19, 1937. WEILL & HARTMANN, New York, N. Y. Republished by Arkwright, Incorporated, New York, N. Y., a corporation of New York.

PACE-MAKER

FOR VELOCIPEDES, SCOOTERS, WAGONS (TOY), TOY AUTOMOBILES, ROLLER SKATES, BICYCLES.
Claims use since June 1935.

Reg. No. 410,556. Registered Dec. 5, 1944. AMERICAN BRAKE SHOE COMPANY, New York, N. Y., a corporation of Delaware. Republished by registrant.

Brake Shoe

FOR CAR WHEELS.
Claims use since on or about Apr. 22, 1943.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Reg. No. 111,633. Registered July 25, 1916. THE EMERSON ELECTRIC MANUFACTURING COMPANY, St. Louis, Mo., a corporation of Missouri. Republished by registrant.

Northwind

FOR ELECTRIC FANS, FAN MOTORS, AND FAN FRAMES.
Claims use since Jan. 26, 1916.

Reg. No. 122,801. Registered Sept. 17, 1918. IRVINGTON VARNISH & INSULATOR CO., Irvington, N. J. Republished by Continental-Diamond Fibre Company, Newark, Del., a corporation of Delaware.

Cellulak

FOR ELECTRICAL INSULATION, A PRODUCT FORMED OF LAYERS OF FIBROUS MATERIAL BOUND TOGETHER BY A NATURAL OR SYNTHETIC ROSIN AND MADE UP IN THE FORM OF SHEETS, BLOCKS, RODS, TUBES, AND CYLINDERS.
Claims use since November 1914.

Reg. No. 145,060. Registered July 26, 1921. CHICAGO MICA CO., Valparaiso, Ind. Republished by Continental-Diamond Fibre Company, Newark, Del., a corporation of Delaware.

MICABOND
THE STANDARD MICA INSULATION

The words "The Standard Mica Insulation" are disclaimed apart from the mark as shown.
FOR BUILT-UP MICA INSULATION FOR COMMUTATOR SEGMENTS, FLEXIBLE INSULATING SHEETS FOR TRANSFORMERS, MAGNET-COILS, AND THE LIKE, AND INSULATING COMPOUNDS FOR ELECTRICAL PURPOSES.
Claims use since 1900.

Reg. No. 181,737 Registered Mar. 25, 1924. KIMBLE ELECTRIC COMPANY, Chicago, Ill. Republished by Miehle Printing Press and Manufacturing Company, Chicago, Ill., a corporation of Delaware.

KIMBLE MOTORS

The word "Motors" is disclaimed apart from the mark as shown.
FOR ELECTRIC MOTORS.
Claims use since about July 16, 1913.

Reg. No. 393,303. Registered Feb. 3, 1942. AMERICAN ELECTRIC CABLE CO., Holyoke, Mass., a corporation of Massachusetts. Republished by registrant.

AEC

FOR INSULATED ELECTRIC WIRE, CABLES AND CORDS FOR RADIOS, AUTOMOBILES, AND APPLIANCES.
Claims use since June 1937.

Reg. No. 398,738. Registered Nov. 17, 1942. WILLIAM E. WRIGHT & SONS COMPANY, West Warren, Mass., a corporation of New Jersey. Republished by registrant.

KAPPA

FOR ELECTRICAL INSULATING TAPE, PARTICULARLY SUCH TAPE MADE FROM CELLULOSE ACETATE.
Claims use since June 4, 1942.

Reg. No. 410,926. Registered Dec. 26, 1944. THE VACUUM CLEANER CORPORATION OF AMERICA, Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

Cordomatic

FOR ELECTRICAL CORD TAKE-UP REELS FOR THE FOLLOWING SPECIFIC USES: VACUUM CLEANER HANDLES, WASHING MACHINES, SIGNAL LIGHTS, PHOTOGRAPHIC EQUIPMENT, EXTENSION GARAGE REELS, DESK AND FLOOR LAMPS, SPOTLIGHT REELS, KITCHEN WALL INSTALLATION, BARBER SHOPS, BEAUTY PARLORS, SEWING MACHINES, DICTAPHONES, TYPEWRITERS, CASH REGISTERS, PORTABLE DOMESTIC EQUIPMENT.
Claims use since Jan. 15, 1932.

Reg. No. 416,609. Registered Sept. 25, 1945. CLIMAX ENGINEERING COMPANY, Clinton, Iowa, assignor to General Finance Corporation, Chicago, Ill. Republished by Climax Industries, Inc., Clinton, Iowa, a corporation of Delaware.

CLIMAX

FOR INTERNAL COMBUSTION ENGINE-ELECTRIC GENERATOR UNITS AND ELECTRIC LIGHTING PLANTS.
Claims use since 1922.

Reg. No. 423,612. Registered Sept. 3, 1946. AMERICAN BRAKE SHOE COMPANY, New York, N. Y., and St. Louis, Mo., a corporation of Delaware. Republished by registrant, present address New York, N. Y.

NBM

FOR TROLLEY WHEELS AND TROLLEY HARPS.
Claims use since on or about October 1943.

Reg. No. 428,527. Registered Mar. 25, 1947. MAX H. KRANZBERG, doing business as Radionic Equipment Company, New York, N. Y. Republished by registrant.

Chancellor

FOR RADIO RECEIVING SETS AND RADIO VACUUM TUBES.
Claims use since Feb. 15, 1945.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Reg. No. 342,586. Registered Jan. 19, 1937. WEILL & HARTMANN, New York, N. Y. Republished by Arkwright, Incorporated, New York, N. Y., a corporation of New York.

PACE-MAKER

FOR VELOCIPEDES, SCOOTERS, WAGONS (TOY), TOY AUTOMOBILES, ROLLER SKATES, BICYCLES.
Claims use since June 1935.

Reg. No. 370,333. Registered Aug. 22, 1939. MCLOUGHLIN BROS., INC., Springfield, Mass., a corporation of Massachusetts. Republished by registrant.

JOLLY SCRAP CLIPS

FOR PAPER TOY.
Claims use since Mar. 29, 1939.

Reg. No. 380,161. Registered Aug. 13, 1940. MCLOUGHLIN BROS., INC., Springfield, Mass., a corporation of Massachusetts. Republished by registrant.

FOR MUSICAL TOY BOOK.
Claims use since Dec. 1, 1939.

Reg. No. 412,823. Registered Mar. 27, 1945. SPORTING GOODS, INC., Springfield, Mass., a corporation of Massachusetts. Republished by registrant.

FOR SOFT BALLS AND BASE BALLS FOR PLAYING GAMES.
Claims use since Aug. 27, 1944.

Reg. No. 432,884. Registered Sept. 16, 1947. GENERAL MACHINE COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

RITE-ARC

DROP-IN

The term "Rite-Arc" is disclaimed apart from the mark as shown.
FOR GOLF CLUBS OF THE CHARACTER KNOWN AS "PUTTERS."
Claims use since Aug. 28, 1946.

Reg. No. 432,885. Registered Sept. 16, 1947. GENERAL MACHINE COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

RITE-ARC

FALL-IN

The term "Rite-Arc" is disclaimed apart from the mark as shown.
FOR GOLF CLUBS OF THE CHARACTER KNOWN AS "PUTTERS."
Claims use since Aug. 28, 1946.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Reg. No. 78,215. Registered May 31, 1910. THE STRONG, CARLISLE & HAMMOND CO., Cleveland, Ohio. Republished by Strong, Carlisle & Hammond Company, Cleveland, Ohio, a corporation of Illinois.

FOR STEAM SPECIALTIES, COMPRISING ENGINE-GOVERNORS, ENGINE-STOPS, AND PUMP-GOVERNORS.
Claims use since Feb. 12, 1908.

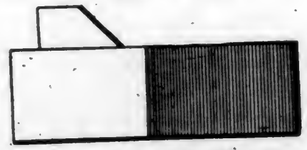
Reg. No. 109,724. Registered Apr. 18, 1916. THE GEOMETRIC TOOL COMPANY, New Haven, Conn., a corporation of Connecticut. Republished by registrant.

GEOMETRIC

FOR TAPS, DIES, DIE-HEADS, TOOL-HOLDERS, THREADING-TOOLS AND THREADING-MACHINES.
Claims use since 1905.

Reg. No. 158,263. Registered Aug. 29, 1922. MIEHLE PRINTING PRESS & MANUFACTURING COMPANY, Chicago, Ill. Republished by Miehle Printing Press and Manufacturing Company, Chicago, Ill., a corporation of Delaware.

The Miehle Vertical



The word "Vertical" is disclaimed apart from the mark as shown.
FOR PRINTING PRESSES.
Claims use since Oct. 11, 1921.

Reg. No. 163,912. Registered Feb. 6, 1923. CLIMAX ENGINEERING CO., Clinton, Iowa. Republished by Climax Industries, Inc., Clinton, Iowa, a corporation of Delaware.

CLIMAX

FOR INTERNAL-COMBUSTION ENGINES.
Claims use since June 25, 1917.

Reg. No. 188,113. Registered Aug. 19, 1924. CHARLES BOND COMPANY, Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

The drawing is lined to indicate the color red. The representation of the picker is disclaimed apart from the mark as shown.
FOR LOOM PICKERS.
Claims use since Nov. 15, 1923.

Reg. No. 206,304. Registered Nov. 24, 1925. FIDELITY MACHINE COMPANY, Wilmington, Del., and Philadelphia, Pa. Republished by Fidelity Machine Company, Inc., Philadelphia, Pa., a corporation of Pennsylvania.

The words "The," "Universal," "Hosiery," and "Ribber" are disclaimed apart from the mark as shown.
FOR FOOTER, KNITTING AND RIBBING MACHINES AND PARTS THEREOF.
Claims use since Apr. 1, 1924.

Reg. No. 228,387. Registered May 31, 1927. REIFF & NESTOR COMPANY, Lykens, Pa., a corporation of Pennsylvania. Republished by registrant.

NU-TRIX

FOR TOOLS FOR RECONDITIONING THREADS OF BOLTS, AXLES, HUBS, ETC.
Claims use since Jan. 10, 1927.

Reg. No. 238,151. Registered Jan. 31, 1928. CHARLES BOND COMPANY, Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

BONDFLEX

FOR SHAFT COUPLINGS.
Claims use since June 1924.

Reg. No. 296,854. Registered Aug. 23, 1932. NORTH BRO'S M'F'G CO., Philadelphia, Pa. Republished by North Brothers Manufacturing Company, Philadelphia, Pa., a corporation of Pennsylvania.

LIGHTNING

FOR ICE BREAKERS FOR HOUSEHOLD USE.
Claims use since Aug. 1, 1931.

Reg. No. 326,569. Registered July 30, 1935. PROPORTIONEERS, INC., Providence, R. I., a corporation of Rhode Island. Republished by registrant.

CHLOR-O-FEEDER

The word "Feeder" is disclaimed apart from the mark as shown.
FOR PROPORTIONING APPARATUS, FOR PUMPING FLUIDS SUCH AS TREATING FLUIDS OR REAGENTS.
Claims use since June 29, 1932.

Reg. No. 345,499. Registered Apr. 27, 1937. CATERPILLAR TRACTOR CO., San Leandro, Calif., a corporation of California. Republished by registrant.

CATERPILLAR

FOR TRACTORS ADAPTED TO BE EMPLOYED IN FARMING OPERATIONS, ROAD BUILDING, MINING, LOGGING, EARTH MOVING, HAULING, AND FOR OTHER INDUSTRIAL AND AGRICULTURAL PURPOSES; INTERNAL COMBUSTION ENGINES ADAPTED FOR EMPLOYMENT AS THE SOURCE OF POWER FOR SELF-PROPELLED VEHICLES, AND AS STATIONARY OR PORTABLE POWER UNITS FOR INDUSTRIAL AND AGRICULTURAL USES; POWER AND MANUALLY CONTROLLED GRADERS, SCARIFIERS, SCRAPERS, BULLDOZERS AND PLOWS ADAPTED TO BE EMPLOYED FOR THE CONSTRUCTION AND MAINTENANCE OF ROADS, FOR MOVING AND REMOVING OF EARTH, SNOW, AND LIKE MATERIALS, FOR PREVENTING SOIL EROSION AND FOR OTHER INDUSTRIAL AND AGRICULTURAL USES; PARTS AND TOOLS FOR ALL OF SAID PRODUCTS AND ATTACHMENTS, ACCESSORIES AND EQUIPMENT ASSOCIABLE WITH ALL OF SAID PRODUCTS, AND PARTS FOR TERRACERS, PLANERS, LEANING WHEEL GRADERS, ELEVATING GRADERS, LEVELERS, DITCHERS, BANK CUTTERS, BANK SLOPERS, HARVESTERS, COMBINE HARVESTERS, MOWERS, PUSH RAKES, WINDROW HEADERS, WINDROW PICK-UPS AND IMPLEMENT HITCHES.
Claims use since September 1904.

Reg. No. 366,892. Registered May 2, 1939. NORTH BRO'S M'F'G COMPANY, Philadelphia, Pa. Republished by North Brothers Manufacturing Company, Philadelphia, Pa., a corporation of Pennsylvania.

Handyman

FOR SCREW DRIVERS, CHUCKS, DRILLS, AND COUNTERSINKS.
Claims use since May 1936.

Reg. No. 370,498. Registered Aug. 29, 1939. ECONOMY FORMS CORPORATION, Des Moines, Iowa., a corporation of Iowa. Republished by registrant.

ECONOMY

FOR SPREADER TIE PULLERS, PIN TOOLS, PLATE CLAMP TOOLS, GROUT GUNS, DRIFT PIN TOOLS, LOCKING PINS AND CUTTING NIPPERS FOR USE IN CONNECTION WITH METAL FORM PLATES FOR CONCRETE STRUCTURES DURING THE SETTING AND HARDENING THEREOF.

Claims use since Oct. 1, 1933.

Reg. No. 373,837. Registered Dec. 26, 1939. UNITED CO-OPERATIVES, INC., Indianapolis, Ind., a corporation of Indiana. Republished by registrant, present address Alliance, Ohio.

QUALITY UNICO PRODUCTS

The words "Quality Products" are disclaimed apart from the mark as shown.

FOR HAY, MANURE, SPADING, BARLEY FORKS; FIELD AND GARDEN SCUFFLE AND MORTAR HOES; GARDEN, LAWN, LAWN-BROOM RAKES; HAND, WHEEL, AND ROTARY CULTIVATORS; DIRT, DIGGING, IRRIGATION, COAL, AND SNOW SHOVELS; GARDEN, POST, DRAIN, DITCH, AND NURSERY SPADES; GRAIN, COAL, AND FURNACE SCOOPS; AXES; COMPRESSED AIR, HAND, AND POWER SPRAYERS, ATOMIZERS; WHEEL-BARROW AND BARREL SPRAYS; HAND, PISTON, AND FAN TYPE, PORTABLE AND POWER DUSTERS.

Claims use since Feb. 7, 1939.

Reg. No. 380,559. Registered Aug. 27, 1940. ROTARY SEAL COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

FOR SHAFT SEALS FOR COMPRESSORS, PUMPS, FLUID MOTORS, AND LIKE SHAFTED EQUIPMENT.

Claims use since Mar. 31, 1939.

Reg. No. 388,727. Registered July 8, 1941. THE DALTON FOUNDRIES, INC., Warsaw, Ind., a corporation of Indiana. Republished by registrant.

BIG BOY

FOR AUTOMOBILE LIFTING JACKS.

Claims use since Nov. 14, 1940.

Reg. No. 398,785. Registered Nov. 24, 1942. DITTO, INCORPORATED, Chicago, Ill., a corporation of West Virginia. Republished by registrant.

FILM-O-GRAPH

FOR FLAT BED, GELATINE TYPE DUPLICATING MACHINES.

Claims use since Aug. 31, 1936.

Reg. No. 399,501. Registered Jan. 12, 1943. THE BILLINGS & SPENCER COMPANY, Hartford, Conn., a corporation of Connecticut. Republished by registrant.

BILLINGS

B

The word "Billings" is disclaimed apart from the mark as shown.

FOR AUTOMATIC SCREW MACHINES, HOT SAWS, AND TIMBER SCRIBES.

Claims use since on or about Apr. 1, 1926.

Reg. No. 404,732. Registered Dec. 21, 1943. BUCKEYE TOOLS CORP., Dayton, Ohio, a corporation of Ohio. Republished by registrant.

BUCKEYE

FOR MANUALLY SUPPORTED MOTOR UNITS FOR PORTABLE POWER OPERATED TOOLS OF THE TYPE USED IN INDUSTRIAL METALWORKING PLANTS, EACH UNIT COMPRISING A MOTOR, A SUPPORT FOR DETACHABLY CONNECTING THE IMPLEMENT TO BE OPERATED WITH THE UNIT, AND A DRIVING CONNECTION BETWEEN THE MOTOR AND THE SUPPORT FOR THE IMPLEMENT.

Claims use since Feb. 12, 1943.

Reg. No. 406,001. Registered Mar. 7, 1944. THE VENDO COMPANY, Kansas City, Mo., a corporation of Missouri. Republished by registrant.

VENDO

FOR COIN CONTROLLED BOTTLE VENDING ATTACHMENTS FOR REFRIGERATED CABINETS AND PARTS OF SAID ATTACHMENTS—NAMELY, BOTTLE-HOLDING BASKETS, COVER PLATE, DISC ASSEMBLY, COIN MECHANISM AND COVER THEREFOR, GRILL ASSEMBLY, PARTS FOR ATTACHING THE BOTTLE HOLDING BASKET TO THE CABINET, COIN BOX, OPERATING MECHANISM FOR THE DISC ASSEMBLY, AND PROP ASSEMBLY FOR THE COVER PLATE.

Claims use since Oct. 22, 1936.

Reg. No. 407,211. Registered May 23, 1944. PROPORTIONEERS, INC., Providence, R. I., a corporation of Rhode Island. Republished by registrant.

CHEM-O-FEEDER

The word "Feeder" is disclaimed apart from the mark as shown.

FOR PUMPS FOR PROPORTIONALLY FEEDING REAGENTS.

Claims use since Feb. 10, 1941.

Reg. No. 409,047. Registered Sept. 12, 1944. THE DELTA MANUFACTURING COMPANY, Milwaukee, Wis. Republished by Rockwell Manufacturing Company, Pittsburgh, Pa., a corporation of Pennsylvania.

UNIHEAD

FOR ADJUSTABLE WORK HEADS FOR MACHINE TOOLS.

Claims use since Feb. 14, 1944.

Reg. No. 427,416. Registered Feb. 11, 1947. NOVO ENGINE COMPANY, Lansing, Mich., a corporation of Michigan. Republished by registrant.

NOVO

FOR INTERNAL COMBUSTION ENGINES, PUMPS—NAMELY, SELF-PRIMING CENTRIFUGAL PUMPS, ECCENTRIC OPERATED DIAPHRAGM PUMPS AND POSITIVE DISPLACEMENT RECIPROCATING PUMPS POWERED WITH GASOLINE ENGINES OR ELECTRIC MOTORS AND ALSO WITHOUT POWER UNITS, AND POWER OPERATED HOISTS.

Claims use since Apr. 1, 1908.

CLASS 24

LAUNDRY APPLIANCES AND MACHINES

Reg. No. 211,824. Registered Apr. 20, 1926. MODERN LAUNDRY MACHINE MANUFACTURING COMPANY, Kansas City, Mo. Republished by Birtman Electric Company, Chicago, Ill., a corporation of Illinois.

Mola

FOR CLOTHES OR LAUNDRY WASHING MACHINES.

Claims use since about July 1, 1915.

CLASS 25

LOCKS AND SAFES

Reg. No. 85,021. Registered Jan. 16, 1912. VON DUPRIN FIRE EXIT LATCH COMPANY, Indianapolis, Ind. Republished by Vonnegut Hardware Company, Indianapolis, Ind., a corporation of Indiana.

Von Duprin

FOR LOCKS AND LATCHES.

Claims use since Mar. 16, 1908.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

Reg. No. 131,311. Registered May 11, 1920. GLOBE EAR-PHONE COMPANY, Boston, Mass. Republished by Globe Phone Manufacturing Corporation, Reading, Mass., a corporation of Massachusetts.

GEOPHONE

FOR AURICULAR SEISMOGRAPHS.

Claims use since Aug. 15, 1918.

Reg. No. 231,203. Registered Aug. 16, 1927. METRO-GOLDWYN PICTURES CORPORATION, New York, N. Y. Republished by Loew's, Incorporated, New York, N. Y., a corporation of Delaware.

FOR MOTION PICTURE FILMS.

Claims use since July 25, 1924.

Reg. No. 272,892. Registered July 15, 1930. BUILDERS IRON FOUNDRY, Providence, R. I., a corporation of Rhode Island. Republished by registrant.

ORIFLO

FOR FLUID METERS AND FLUID-RATE CONTROLLERS.
Claims use since Dec. 2, 1929.

Reg. No. 306,069. Registered Sept. 5, 1933. BUILDERS IRON FOUNDRY, Providence, R. I., a corporation of Rhode Island. Republished by registrant.

CHRONOFLO

FOR ELECTRIC FLOW METERS AND PRESSURE OR RATE OF FLOW CONTROLLERS, AND TELEMETERS.
Claims use since Aug. 18, 1932.

Reg. No. 312,245. Registered Apr. 24, 1934. BUILDERS IRON FOUNDRY, Providence, R. I., a corporation of Rhode Island. Republished by registrant.

VENTURI

FOR FLUID RATE OF FLOW METERS AND CONTROLLERS.
Claims use since 1888.

Reg. No. 351,655. Registered Nov. 2, 1937. BUILDERS IRON FOUNDRY, Providence, R. I., a corporation of Rhode Island. Republished by registrant.

FLO-WATCH

FOR MECHANICAL FLOW METERS FOR RECORDING AND TOTALIZING WITH OR WITHOUT INDICATING MEANS.
Claims use since June 10, 1936.

Reg. No. 353,510. Registered Jan. 11, 1938. CHEMCO PHOTOPRODUCTS COMPANY, Glen Cove and New York, N. Y. Republished by Chemco Products Company, Inc., Glen Cove, N. Y., a corporation of New York.

CHEMCO

FOR PHOTO-ENGRAVING AND PHOTOGRAPHIC CHEMICALS—NAMELY, STRIPFILM, A FILM SUPPORTED OR BACKED ON PAPER WHICH STRIPS OR PULLS OFF WHEN CHEMICALLY TREATED, FROM PAPER TO GLASS, THE DEVELOPER FOR THE SAME, COLD ENAMEL, COLD ENAMEL DEVELOPER, ACID SULPHITE SOLUTION, AND COLLODION.
Claims use since Jan. 1, 1920.

Reg. No. 359,054. Registered Aug. 2, 1938. MARINE OPTICAL MFG. CO., Boston, Mass. Republished by Marine Optical Mfg. Co., Boston, Mass., a firm.

FILT-RAY

FOR OPHTHALMIC LENSES, SUN GLASSES, AND LENS BLANKS.
Claims use since Nov. 7, 1936.

Reg. No. 385,872. Registered Mar. 18, 1941. MARINE OPTICAL MFG. CO., Boston, Mass. Republished by Marine Optical Mfg. Co., Boston, Mass., a firm.

Plastex

FOR OPTICAL FRAMES.
Claims use since Oct. 15, 1940.

Reg. No. 408,345. Registered Aug. 8, 1944. OMEGA MACHINE COMPANY, Kansas City, Mo., a corporation of Missouri. Republished by registrant, present address Providence, R. I.

EDUCTOSCOPE

FOR APPARATUS FOR VISUALLY OBSERVING THE FLOW OF A GAS FROM A FEEDING DEVICE OR THE EFFECT THEREOF.
Claims use since on or about Dec. 15, 1942.

Reg. No. 410,585. Registered Dec. 5, 1944. WATCHEMOKET OPTICAL CO. INC., Providence, R. I., a corporation of Rhode Island. Republished by registrant.

impax LENS

The word "Lens" is disclaimed apart from the mark as shown.
FOR INDUSTRIAL SAFETY GOGGLES.
Claims use since Mar. 14, 1944.

Reg. No. 416,912. Registered Oct. 2, 1945. PROPORTIONEERS, INC., Providence, R. I., a corporation of Rhode Island. Republished by registrant.

FOR PROPORTIONING METERS FOR MEASURING PROPORTIONAL VOLUMES OF LIQUIDS AND TEST KITS FOR ANALYZING SAMPLES OF LIQUID TO DETERMINE TURBIDITY AND/OR CHEMICAL CONTENT.
Claims use since March 1944.

Reg. No. 430,004. Registered June 3, 1947. WATCHEMOKET OPTICAL CO., INC., Providence, R. I., a corporation of Rhode Island. Republished by registrant.

STO AWAYS

The representation of the temples is disclaimed apart from the mark as shown.
FOR SUN GOGGLES AND INDUSTRIAL GOGGLES.
Claims use since Apr. 19, 1946.

Reg. No. 430,022. Registered June 3, 1947. MARINE OPTICAL MFG. CO., Roslindale, Boston, Mass., a firm. Republished by registrant.

CONSTELLATION

FOR OPTICAL FRAMES.
Claims use since June 27, 1946.

CLASS 27

HOROLOGICAL INSTRUMENTS

Reg. No. 374,586. Registered Jan. 16, 1940. INVICTA-SEELAND, INC., New York, N. Y., a corporation of New York. Republished by registrant.

MICROTHIN

FOR WATCHES, WATCH CASES, WATCH PARTS, WATCH MOVEMENTS AND WATCH BRACELETS SOLD AS A UNIT WITH THE WATCH.
Claims use since July 7, 1938.

Reg. No. 431,493. Registered July 22, 1947. BULOVA WATCH COMPANY, INC., New York, N. Y., a corporation of New York. Republished by registrant.

MISS EXCELLENCY

FOR WATCHES—NAMELY, WRIST OR STRAP WATCHES.
Claims use since Feb. 8, 1938.

CLASS 28

JEWELRY AND PRECIOUS-METAL WARE

Reg. No. 310,126. Registered Feb. 13, 1934. SCHEIN BROTHERS INC., New York, N. Y. Republished by Schein Brothers, New York, N. Y., a firm.

MOONGLO

FOR JEWELRY FOR PERSONAL WEAR, NOT INCLUDING WATCHES.
Claims use since Sept. 7, 1933.

Reg. No. 374,586. Registered Jan. 16, 1940. INVICTA-SEELAND, INC., New York, N. Y., a corporation of New York. Republished by registrant.

MICROTHIN

FOR WATCHES, WATCH CASES, WATCH PARTS, WATCH MOVEMENTS AND WATCH BRACELETS SOLD AS A UNIT WITH THE WATCH.
Claims use since July 7, 1938.

CLASS 29

BROOMS, BRUSHES, AND DUSTERS

Reg. No. 380,348. Registered Aug. 20, 1940. UNITED CO-OPERATIVES, INC., Indianapolis, Ind., a corporation of Indiana. Republished by registrant, present address Alliance, Ohio.

QUALITY UNICO PRODUCTS

The words "Quality Products" are disclaimed apart from the mark as shown.
FOR STABLE BROOMS AND BRUSHES.
Claims use since Nov. 15, 1939.

CLASS 32

FURNITURE AND UPHOLSTERY

Reg. No. 186,490. Registered July 22, 1924. TENNESSEE FURNITURE CORPORATION, Chattanooga, Tenn. Republished by Cavalier Corporation, Chattanooga, Tenn., a corporation of Tennessee.

FOR BEDROOM, DINING-ROOM, LIVING-ROOM, AND KITCHEN FURNITURE—NAMELY, BEDS, DRESSERS, BUREAUS, DRESSING TABLES, VANITY DRESSERS, CHIFFONIERS, CHIFFONETTES, CHIFFOROBES, WARDROBES, TABLES, NIGHT STANDS, CHAIRS, ROCKERS, TREASURE CHESTS, CONSOLE CHESTS, ORNAMENTAL CHESTS, BENCHES, STOOLS, MIRRORS, CONSOLES, BUFFETS, SERVING TABLES, CHINA CABINETS, TEA WAGONS, SIDEBOARDS AND CEDAR CHESTS.
Claims use since about Nov. 1, 1923.

CLASS 34

HEATING, LIGHTING, AND VENTILATING APPARATUS

Reg. No. 278,313. Registered Dec. 16, 1930. CROWN STOVE WORKS, Chicago, Ill., a corporation of Illinois. Republished by registrant.

Thor

FOR GAS RANGES, AND COMBINATION GAS AND COAL RANGES.
Claims use since July 2, 1930.

Reg. No. 345,513. Registered Apr. 27, 1937. AUTOMATIC BURNER CORPORATION, Chicago, Ill., a corporation of Illinois. Republished by registrant.

MISTOLATOR

FOR OIL BURNERS AND PARTS.
Claims use since on or about Nov. 15, 1933.

Reg. No. 350,907. Registered Oct. 12, 1937. AUTOMATIC BURNER CORPORATION, Chicago, Ill., a corporation of Illinois. Republished by registrant.

PERI-SPIN

FOR OIL BURNERS AND PARTS THEREOF.
Claims use since Apr. 12, 1937.

Reg. No. 368,986. Registered July 11,1939. TRADE-WIND MOTORFANS, INC., Los Angeles, Calif., a corporation of California. Republished by registrant.

FOR FANS AND BLOWERS, HEATING, VENTILATING AND COOLING AND AIR CONDITIONING UNITS.
Claims use since May 22, 1933.

Reg. No. 383,582. Registered Dec. 17, 1940. UNITED CO-OPERATIVES, INC., Indianapolis, Ind., a corporation of Indiana. Republished by registrant, present address Alliance, Ohio.

QUALITY UNICO PRODUCTS

The words "Quality Products" are disclaimed apart from the mark as shown.
FOR GRAVITY ROOF VENTILATORS.
Claims use since Nov. 15, 1939.

Reg. No. 424,628. Registered Oct. 15, 1946. AMERICAN BRAKE SHOE COMPANY, New York, N. Y., and St. Louis, Mo., a corporation of Delaware. Republished by registrant, present address New York, N. Y.

NBM

FOR TUYÈRES, AND BLAST FURNACE PARTS—NAMELY, MONKEYS AND BOSCH PLATES.
Claims use since on or about October 1943.

Reg. No. 429,427. Registered Apr. 29, 1947. AUTOMATIC BURNER CORPORATION, Chicago, Ill., a corporation of Illinois. Republished by registrant.

ABC Range Burner

The words "Range Burner" are disclaimed apart from the mark as shown.
FOR FUEL OIL BURNERS.
Claims use since July 1, 1930.

CLASS 35

BELTING, HOSE, MACHINERY PACKING, AND NONMETALLIC TIRES

Reg. No. 150,064. Registered Dec. 27, 1921. HORACE G. PRESTON COMPANY, Detroit, Mich., a corporation of Michigan. Republished by registrant.

MERCURY CHROME

The word "Chrome" is disclaimed apart from the mark as shown.
FOR LEATHER PACKINGS.
Claims use since 1905.

Reg. No. 226,864. Registered Apr. 19, 1927. THE Q-P SIGNAL COMPANY, Needham Heights, Mass. Republished by The Q-P Manufacturing Company, Needham Heights, Mass., a corporation of Massachusetts.

Q

FOR PACKING FOR STUFFING BOXES.
Claims use since about Jan. 5, 1916.

Reg. No. 244,241. Registered July 17, 1928. GOODALL RUBBER COMPANY, Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant, present address Trenton, N. J.

"Road Builders"

FOR CONDUCTING HOSE COMPOSED OF RUBBER OR RUBBER AND FIBER.
Claims use since Jan. 1, 1925.

Reg. No. 322,520. Registered Mar. 12, 1935. NATIONAL MOTOR BEARING COMPANY, INC., San Francisco, Calif., a corporation of California. Republished by registrant.

The representation of the retainer is disclaimed apart from its combination with the representation of the seal.

810
ROSE PLANT

Leslie A. Tuttle, Pasadena, Calif., assignor to Tuttle Bros. Nurseries, Pasadena, Calif., a partnership composed of Leslie A. Tuttle and Harry E. Tuttle

Application April 21, 1947, Serial No. 742,881

1 Claim. (Cl. 47—61)

The variety of rose plant herein disclosed, characterized by the shadings of the petals of the buds and open rose flowers which are respectively Begonia Pink and Shrimp Red shades, shading to Straw Yellow at their base and tips, and further characterized by the fact that the flowers have fewer petals than the parent "Picture" rose.

PATENTS

GRANTED NOVEMBER 2, 1948

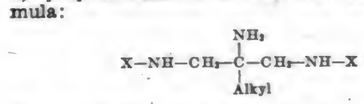
2,452,534

PRODUCTION OF BIOCHEMICALLY PROCESSED LIQUID BASE MATERIAL FOR FOOD PRODUCTS

George A. Jeffreys, Salem, Va., assignor, by direct and mesne assignments, to Nelson Littell, New Canaan, Conn.

No Drawing. Application February 10, 1945, Serial No. 577,340
13 Claims. (Cl. 99—9)

1. In a biochemical process for producing a liquid nutritional material for food products, wherein cereal starch substance in water is cooked and converted to obtain a nutrient liquid and yeast and lactic acid organisms, respectively, are cultured in such liquid until such material is obtained, the improvement which comprises incorporating mold enzymes with the nutrient liquid obtained after the cooking and conversion steps and thereafter culturing yeast and lactic acid organisms therein in the presence of such mold enzymes.



2,452,535

2-AMINO-2-ALKYL-N,N'-DIARYL-1,3 PROPANE DIAMINES AND PROCESS FOR MAKING

Harold G. Johnson, Terre Haute, Ind., assignor to Commercial Solvents Corporation, Terre Haute, Ind., a corporation of Maryland

No Drawing. Application January 8, 1945, Serial No. 571,955
8 Claims. (Cl. 260—576)

1. Symmetrical 2-amino-2-alkyl-N,N'-phenyl-1,3-propanediamines having the general formula:

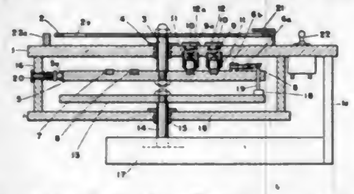
wherein X represents a substituent selected from a group consisting of phenyl, chlorophenyl, aminophenyl and alkylphenyl.

2,452,536

PROCESS FOR IMPREGNATING LEATHER WITH SULFONATED POLYMERIC COMPOSITIONS

Joseph S. Kirk, Seven Hills Village, Ohio, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

No Drawing. Application July 25, 1944, Serial No. 546,579
7 Claims. (Cl. 8—94.21)



1. In a process for modifying leather, the step comprising thoroughly impregnating the leather with a solution of a sulfonated polymeric composition formed by reacting a polymerizable unsaturated carboxylic acid with a polymerizable olefin containing an aromatic substituent and sulfonating the product.

2,452,537

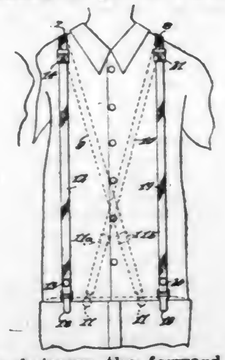
APPARATUS FOR AUTOMATICALLY CONTROLLING DURATION OF ELECTRICAL CURRENT

Ralph V. Anderson, United States Navy

Application April 10, 1946, Serial No. 661,041
6 Claims. (Cl. 200—33)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A device for controlling the duration of electric current comprising a mounting plate, an opening in said mounting plate, a rotatable shaft inserted in said opening, a selective manually operated dial fixed to said shaft and positioned on one side of said mounting plate, a disc fixed to said shaft on the other side of said mounting plate, commutator rings mounted in said disc, brushes mounted on said mounting plate in engagement with said commutator rings, contact points mounted on said disc and electrically connected to said commutator rings, said disc having a hole therethrough adjacent to said contact points, a plunger extending through said hole in said disc and in engagement with one of said contact points, a power driven shaft, a second disc fixed thereon, a cam so positioned on said disc as to engage and move said plunger toward said contact points during rotation of said second disc relative to said first mentioned disc, and detent means for holding said dial and first mentioned disc in selected position, said detent means comprising a spring detent supported by the mounting plate, and detent recesses in the periphery of said first mentioned disc to receive said detent.

2,452,538



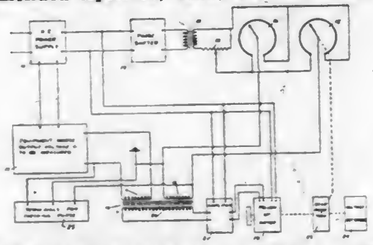
EXTENSIBLE SAFETY SUSPENDERS

Roy S. Ashton, Brooklyn, N. Y.

Application July 4, 1945, Serial No. 603,141
1 Claim. (Cl. 2—325)

A pair of suspenders comprising a pair of flexible straps adapted to be placed over the shoulders of a wearer to provide forward ends to support the forward side of a pair of trousers and rear ends to support the rear side of the pair of trousers, the rear ends of said straps having connecting means for coupling to buttons on the waist band of the trousers, the forward ends having relatively long portions looped upon themselves, a slotted connector adapted to be coupled to the forward side of the waist band of the trouser through which each of the looped forward straps extends, a button snap element on the terminal of each of said forward looped straps, and

a slidable connector releasably clamped to each forward looped strap and provided with a button snap element engageable by the first-named button snap element to provide a quickly detach-



able coupling between the forward terminal of the strap and the clamped connector, the looped straps providing long sliding connections to allow the wearer to drop his trousers without separating said straps from the trousers.

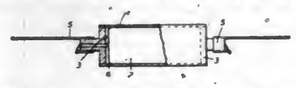
2,452,539

SELF-BALANCING POTENTIOMETER

Bernard J. Baecher, New York, N. Y.

Application August 18, 1945, Serial No. 611,429
10 Claims. (Cl. 171—95)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

9. Electrical apparatus comprising a transformer having a pair of primary windings and a secondary winding, first and second sources of electric energy, means coupling said first source to develop a first voltage across one of said primary windings, means coupling said second source to develop a second voltage across the other of said windings in phase opposition with said first voltage, whereby a net voltage difference between said first and second voltages is derived at the terminals of said secondary winding, means responsive to said net voltage difference for adjusting said second voltage to a value minimizing said net voltage difference, and means connected to said secondary winding for indicating the magnitude of the net-voltage-difference minimizing voltage.



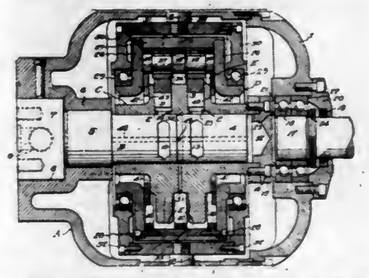
2,452,540

ELECTRICAL CONDENSER

Roy Mayne Barnard, London, England, assignor to International Standard Electric Corporation, New York, N. Y., a corporation of Delaware

Application February 7, 1947, Serial No. 727,023
In Great Britain March 5, 1946
4 Claims. (Cl. 174—77)

4. An electrical condenser comprising a casing formed of a rolled metallic tube made of springy metal and having an overlapping soldered seam, and a pair of end caps, which close



the respective ends of said tube, at least one of said end caps being of ceramic material.

2,452,541

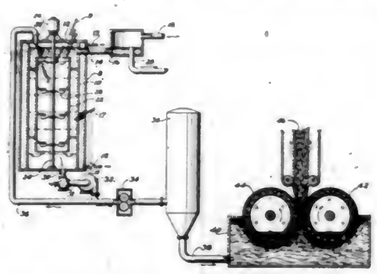
ROTARY HYDRAULIC MACHINE

Elek K. Benedek, Chicago, Ill.

Application September 27, 1945, Serial No. 618,890
20 Claims. (Cl. 103—161)

1. In a hydraulic machine of the character described, a rotatably mounted cylinder barrel having a plurality of radially disposed, circumferentially deployed cylinders; pistons reciprocable respectively in said cylinders and each projecting beyond an end of the associated cylinder; a reactance structure; means mounting said reactance structure to rotate about an axis eccentric to the cylinder barrel axis of rotation; thrust transmitting means interposed between said reactance structure and the piston projecting ends for effecting reciprocation of said pistons when the cylinder barrel and reactance structure rotate; and means providing a fluid tight seal between said cylinder barrel and said reactance structure; said cylinder barrel, said seal means, and said reactance structure providing a substantially fluid tight enclosed chamber accomodating said ends of the cylinders and the piston projecting ends, said chamber being capable of retaining, without substantial leakage therefrom, a body of lubricating fluid.

2,452,542



CONTINUOUS PROCESS FOR MAKING ALKALI CELLULOSE

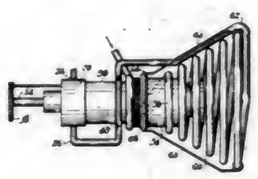
William H. Bradshaw, Wilmington, Del., and William R. Schmitz, Jr., Richmond, Va., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

Application October 27, 1942, Serial No. 463,514
4 Claims. (Cl. 260—233)

1. In a process for the continuous production of alkali cellulose of uniform composition the steps comprising continuously feeding cellulose into a slurry-forming receptacle, said feeding being subject to unavoidable slight fluctuations in feeding rate, continuously feeding sodium hydroxide solution to said receptacle at a substantially constant rate, continuously withdrawing alkali cellulose slurry from said receptacle at a substantially constant volume rate, said withdrawn alkali cellulose slurry containing slightly fluctuating amounts of alkali cellulose as a result of fluctuations in the feed rate of cellulose, continuously removing alkali

cellulose, containing a predetermined constant percentage of sodium hydroxide solution, from the alkali cellulose slurry at a substantially constant volume rate and while maintaining said slurry under superatmospheric pressure, and between

the steps of withdrawing said slurry and removing alkali cellulose therefrom permitting a fluctuating increase and decrease in the volume of the slurry to compensate for the slightly fluctuating amounts of alkali cellulose in the slurry being withdrawn from said receptacle.



2,452,543

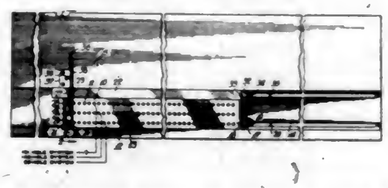
APPARATUS FOR BURNING LIQUID FUEL IN THE PRESENCE OF GAS UNDER PRESSURE

Delphis C. Breault, Lowell, Mass.

Application January 15, 1944, Serial No. 518,317

4 Claims. (Cl. 158—73)

1. Liquid fuel burner comprising a nozzle for projecting fuel in a predetermined direction for burning, a pipe for leading the fuel into the nozzle, said pipe being coiled coaxially of and in advance of the nozzle to preheat the fuel, and means to vary the spacing of the turns of the coiled pipe to vary the amount of air induced through the coil by the fuel projected from the nozzle.



2,452,544

INDEXING DEVICE

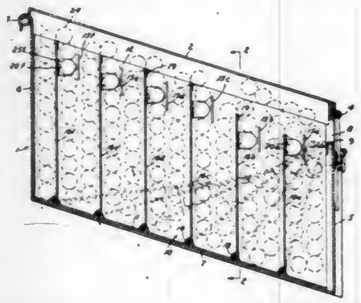
Sidney Steven Brodie, New York, N. Y.

Application March 30, 1944, Serial No. 528,800

6 Claims. (Cl. 33—1)

1. An indexing device for moving a work piece a predetermined distance, comprising a supporting base providing a fixed reference frame, a plate member mounted on said base and movable with respect to said base in a predetermined plane, said plate member containing a plurality of indexing systems fixedly positioned thereon, each indexing system containing a plurality of indicia positions, the distance between two selected indicia in any system being different from the distance between any two indicia in any other indexing system, an arm member mounted on the base and movable only in a plane parallel to the predetermined plane of the plate member, the work piece being fixedly secured to one of said members and movable therewith, said arm member having a reference indicium and locating means associated therewith for engaging an indicium on an indexing system; said arm and plate members provided with position-locking means for independently fixing the position of the arm member and the plate member in any position with respect to the fixed reference frame, said plate and arm members being alternately unlockable and movable from their fixed position with respect to the fixed reference frame a distance equal to the distance between two selected indicia in any system, and continued alternate movement of said members moving the work piece the predetermined distance.

2,452,545



AMMUNITION CHEST

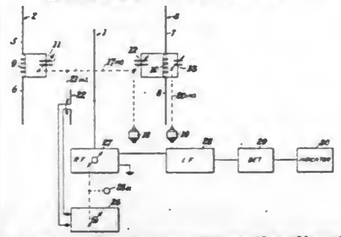
Wilson C. Broga, Westfield, Mass.

Application July 28, 1944, Serial No. 547,091

7 Claims. (Cl. 89—34)

(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

7. An ammunition chest for a belt of cartridges comprising in combination, a case member including vertical side walls and end walls and a bottom wall extending therebetween, the forward of said end walls having a discharge slot near the upper end thereof, a plurality of transversely disposed spacers having their lower ends pivotally mounted adjacent said bottom wall for successive pivotal movement toward said discharge slot, and means for temporarily retaining said spacers in an upright position, said spacers constructed and arranged to be successively released from behind said retaining means whereupon said spacers pivot forwardly to form an upwardly curving auxiliary floor for facilitating the slidable passage of the cartridge belt through said discharge slot, said bottom wall sloping upwardly away from said forward end wall whereby said spacers are mounted in progressively higher relation rearwardly to decrease the amount of cartridges lying beneath the horizontal plane of said discharge slot as the unsupported length of the cartridge belt is increased by the successive inclination of said spacers.



2,452,546

DIRECTION FINDER

Henri G. Busignies, Forest Hills, and John L. Allison, New York, N. Y., assignors to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware

Application June 20, 1945, Serial No. 600,478

22 Claims. (Cl. 343—116)

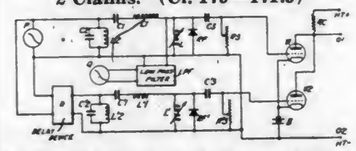
1. The method of determining the direction of a remote source of wave radiations which comprises, exciting a direction finding antenna by primary radiations from said source and also by auxiliary reradiations from a pair of other tuned antennae adjacent said direction finding antenna and rotatable with respect to said direction finding antenna, controlling the tuning of said pair of antennae by an injection signal local thereto, adjusting the phase relation between said pair of antennae and said direction finding antenna and producing an indication when said pair of antennae bear a certain phase relation with respect to said remote source.

5. In a system of the type wherein a main antenna is excited by primary radiations from a distant source and also by reradiations from a pair of tuned antennae also excited from said source, means to insure proper tuning of said pair of antennae comprising a local antenna in predetermined symmetrical relation to said pair of antennae for injecting a tuning tracking signal into said pair of antennae, and means to adjust the tuning of at least one of said pair of antennae until the effect of said injected signal is substantially equal in both said pair of antennae.

2,452,547

PULSE MODULATION SYSTEM OF ELECTRIC COMMUNICATION

Prafulla Kumar Chatterjea and Charles Thomas Scully, London, England, assignors to Standard Telephones and Cables Limited, London, England, a British company



Application July 7, 1945, Serial No. 603,654

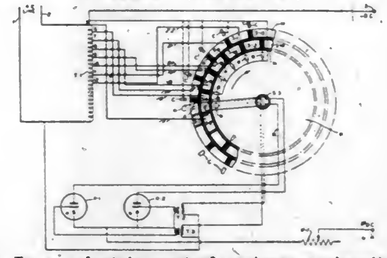
In Great Britain June 22, 1944

Section 1, Public Law 690, August 8, 1946

Patent expires June 22, 1964

2 Claims. (Cl. 179—171.5)

1. A transmitter for producing trains of pairs of pulses, in which one pulse of each pair occurs at constant time intervals while the second of the pulses of each pair is time displaced according to the intelligence to be conveyed, comprising a source of alternating voltage, a pair of magnetic impulse coils, means for applying said voltage to one of said coils, means including a delay device introducing a time delay for applying said voltage to the other of said coils, a signal source, means for applying the signals from said signal source to only said one of said coils, and means for combining pulses produced in said coils into a common train.



2,452,548

ELECTRONIC TRANSFORMER CONTROL

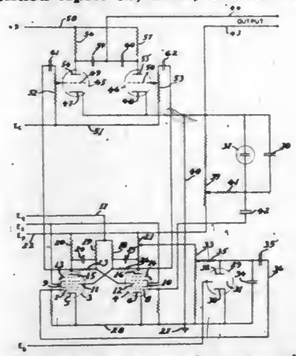
Dudley B. Clark, Palm Springs, Calif.

Application March 1, 1944, Serial No. 524,587

7 Claims. (Cl. 250—27)

1. In an electric control system; a circuit; an electronic tube, including a grid, in said circuit for controlling current flow through said circuit; a circuit for controlling said grid; switching mechanism including a plurality of spaced contacts, each contact being connected with a source of electric current of a voltage different from other of said currents, and a contact connected in the first mentioned circuit, said plurality of contacts and said contact being movable relative to one another whereby said contact engages each contact of said plurality of contacts successively and being disengaged from said contacts for an interval between engagement with each succeeding contact; and means for connecting said grid circuit with an electric current source during said interval.

2,452,549

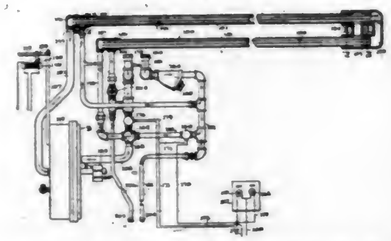


DOUBLE PULSE GENERATOR

Claud E. Cleeton, Washington, D. C.

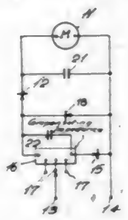
Application June 24, 1939, Serial No. 280,930

15 Claims. (Cl. 250—36)



(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

11. A double pulse generator, comprising a device of the locked electronic relay type having two conductive paths, means operating periodically to block one said path when in a conductive condition and so change the current from one said path to the other, means energized while said other path is conductive to block said other path after a predetermined interval and change the current back to said one path, and means com-



prising a single output signal channel responsive to both said paths and controlled thereby to produce a transient output signal pulse at the instant either path is blocked.

2,452,550
HYDRAULIC DYNAMOMETER
Edwin L. Cline, Pasadena, Calif., assignor to Clayton Manufacturing Company, Alhambra, Calif.
Application May 20, 1942, Serial No. 443,833
41 Claims. (Cl. 188—90)

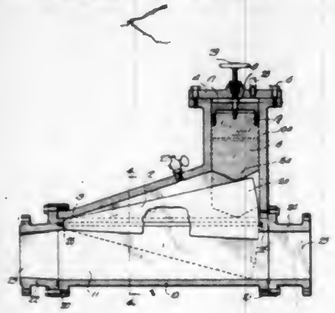
1. Load absorption means comprising: a hollow drum-like housing; a shaft rotatably mounted in said housing; a rotor in said housing secured in said shaft, said housing having a hub portion on the interior thereof and a series of straight vanes arranged substantially tangential to said hub portion and extending from said hub portion to the periphery of said housing forming a series of pockets between said vanes, said rotor having a hub portion and a plurality of radially outwardly extending vanes forming a series of pockets confronting the pockets of said housing; and means for admitting liquid into and for draining liquid from said housing.

2,452,551
RECTIFIER TYPE MEASURING INSTRUMENT
Harold B. Conant, Lincoln, Nebr.
Application April 27, 1945, Serial No. 590,607
6 Claims. (Cl. 171—95)

1. Apparatus for measuring alternating-current quantities comprising a current responsive measuring unit having terminals for connection to an alternating-current source with a direct-current responsive meter and a first rectifier connected in series between said terminals, a second rectifier connected between said terminals in parallel with said measuring unit to pass current in the same direction as said first rectifier for compensating readings of said meter for variable characteristics of said first rectifier, and a third rectifier also connected between said terminals in parallel with said measuring unit to pass current in a direction opposite to that passed by said first rectifier for by-passing substantially all of the inverse current around said meter.

2,452,552
FISHING BAIT AND METHOD OF PREPARING THE SAME
Osborn M. Curtis, Jr., and Theodore M. Prudden, Hingham, Mass., assignors to LobLure, Inc., Hingham, Mass., a corporation of Maine
No Drawing. Application January 10, 1945, Serial No. 572,244
8 Claims. (Cl. 99—3)

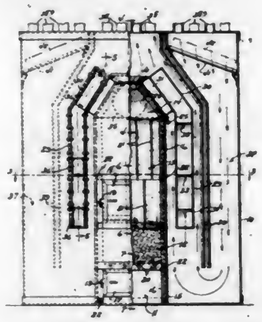
1. A crustacean bait, comprising an absorbent carrier of the class consisting of grease, soap, coco-oil and oil which is dispersible in fishing water and into which has been absorbed a crustacean-attractive essence adapted to be released at a rate related to the rate at which the carrier disperses in the fishing water.



2,452,553
FISHING BAIT
Osborn M. Curtis, Jr., and Theodore M. Prudden, Hingham, Mass., assignors to LobLure, Inc., Hingham, Mass., a corporation of Maine
No Drawing. Application January 30, 1946, Serial No. 644,436
2 Claims. (Cl. 99—3)

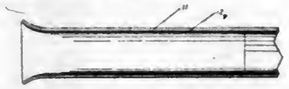
1. A fishing bait for controlled dissemination in fishing water, comprising a luring essence, a liquid carrier, and a container having a restricted outlet opening for accurately controlling the dissemination of the essence when the bait is immersed in the fishing water.

2,452,554
PRODUCTION OF ACRYLONITRILE
Harold S. Davis, Riverside, and Erwin L. Carpenter, Old Greenwich, Conn., assignors to American Cyanamid Company, New York, N. Y., a corporation of Maine
Application June 6, 1942, Serial No. 446,068
7 Claims. (Cl. 260—465.9)



1. The method of producing acrylonitrile which consists of heating ethylene cyanohydrin in the presence of a sufficient amount of a residue resulting from the heat treatment of the ethylene cyanohydrin so as to cause dehydration of the ethylene cyanohydrin.

2,452,555
FRICTION NOZZLE
Joaquin J. de la Roza, Sr., New York, N. Y.
Application January 3, 1944, Serial No. 516,818
2 Claims. (Cl. 137—153)



1. A nozzle device for imposing frictional and constrictive pressures upon materials passing therethrough comprising a body with a longitudinal passageway of rectangular cross section and a closure chamber communicating with the passageway, an inlet and outlet for the passageway, a closure member having the shape of a sector of a cylinder and pivoted along the edge opposite its curved surface and adjacent the inlet to the passageway, the free end moving in an arc across the outlet, a groove in the body surrounding the closure member, a packing strip in the groove forming with said member a liquid-tight seal between the passageway and the closure chamber, a cylinder communicating with the closure chamber, a piston in the cylinder movable into and out of the closure chamber, said piston having its end abutting the closure member near the free end of said member, and a source of gas pressure connected to the cylinder whereby said piston causes said closure member to exert a predetermined pressure on the material passing through the passageway.

2,452,556
RADIATOR STRUCTURE FOR AIR HEATING FURNACES
Frederick W. Eichholtz, Norvelt, Pa.
Application July 17, 1944, Serial No. 545,284
1 Claim. (Cl. 126—99)

In a hot air heating furnace, the combination, which comprises, a centrally disposed furnace unit having a dome-shaped upper end; a plurality of radiator chambers rectangular-shape in vertical and horizontal cross section parallel to and spaced from the sides of said furnace unit, said radiators having horizontally disposed baffles in the intermediate parts thereof and vertically disposed baffles spaced from the rearward ends providing horizontal and vertical passages respectively, the uppermost of said horizontally disposed baffles extending from the forward ends of the said radiators to points spaced from the vertically disposed baffles providing open areas for the downward passage of gases therein, and the lowermost of said horizontally disposed baffles extending from the lower ends of the vertically disposed baffles, providing an L-shaped transverse web in each of said radiators; the lower element of said web extending forward to a point spaced from the forward end of each of said radiators providing open areas for the downward passage of gases therein, flue connections at the forward ends of the radiators positioned above the uppermost of said horizontally disposed baffles and between the upper ends of the said radiators and the dome-shaped upper end of the furnace unit, and stack connections extending from the upper ends of the vertical passages formed by the vertically disposed baffles and merging to a common outlet.

2,452,557
PROTECTED TUBE AND METHOD
Saul A. Eller, New York, N. Y.
Application August 11, 1945, Serial No. 610,378
2 Claims. (Cl. 285—54)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A method for protecting a tube from corrosion and erosion comprising the steps of locating a spray source of rubber-like material at the entry end of the tube, directing a spray stream from said source along the inner surface of the tube to coat the tube for a longitudinal distance of about 6 to 12 inches, controlling said spray stream to form the coating with feathered edges at the entry extremity and at the extremity about 6 to 12 inches therefrom and to form the coating of about .01 to .02 inch thickness between the extremities, controlling said spray stream to streamline the exposed inner surface of the coating, and hardening said coating in situ by exposing said coating to air.

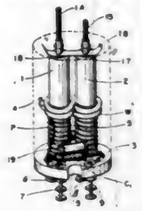
2,452,558
FUSE
Cecil C. Fawcett, Philadelphia, and John J. Hart, Bryn Mawr, Pa., assignors to the United States of America as represented by the Secretary of War
Application December 15, 1939, Serial No. 309,417
2 Claims. (Cl. 102—82)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a fuse, a body having a cavity, a base plug in the cavity of the body, said plug having a recess in its front face and a communicating flash passage reduced to provide a shoulder, a disk fitting in the recess and seated on the shoulder of the plug, said disk having a thickness in excess of the depth of the recess to space the marginal face of the plug from the fuse body, said disk formed with marginal openings establishing communication between the recess and passage in the plug, and an annular powder pellet carried in the marginal face of the plug.

2,452,559
ULTRA SHORT WAVE OSCILLATOR
John Heaver Fremlin, London, England, assignor to Standard Telephones and Cables Limited, London, England, a British company
Application January 20, 1945, Serial No. 573,772
In Great Britain November 19, 1943
Section 1, Public Law 690, August 8, 1946
Patent expires November 19, 1963
7 Claims. (Cl. 250—36)

1. A wave generating arrangement including a discharge device of the velocity modulating type comprising a cathode for producing an electron

beam, a collector electrode, a cavity resonator arranged in the path of said beam between said cathode and collector electrode and provided with apertures for passage of the beam therethrough, a source of variable voltage, first means for connecting said source between said resonator and collector electrode and said cathode for accelerating the electrons in said beam, a control grid adjacent said cathode about said beam path, and second means for connecting said source to said grid for controlling the beam density, said first and second connecting means including a compensating circuit for maintaining the potential applied to said collector electrode and resonator constant.



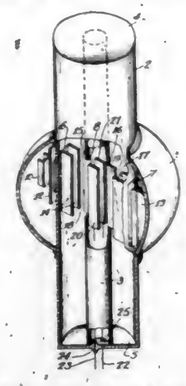
2,452,560

BAND-PASS TRANSFORMER

Joseph B. Gainer, Washington, D. C.

Application August 11, 1945, Serial No. 610,373
10 Claims. (Cl. 178—44)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

7. A radio frequency transformer comprising first and second winding forms disposed in close side by side relation with their axes substantially parallel, a primary winding disposed on said first form, a secondary winding disposed on said second form substantially in juxtaposition to said first winding and inductively coupled thereto, a two-loop closed circuit tertiary winding having at least one turn in each of its loops and one of its loops disposed on said first form substantially coaxial with said primary winding and the other of its loops disposed on said second form substantially coaxial with said secondary winding, said tertiary winding being adjustable as a unit along said forms towards and away from adjacent ends of said primary and secondary windings to effect thereby a variation in the mutual coupling between the primary and secondary windings.



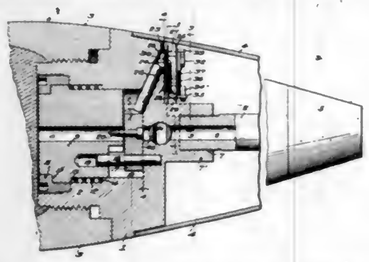
2,452,561

ELECTRON DISCHARGE APPARATUS USING VELOCITY MODULATED BEAMS

William Thomas Gibson, London W. C. 2, England, assignor to Standard Telephones and Cables Limited, London, England, a British company

Application October 5, 1942, Serial No. 460,764
In Great Britain February 6, 1940
4 Claims. (Cl. 315—6)

1. Electron discharge apparatus comprising a resonator including a short length of coaxial transmission line having concentric inner and outer tubular conductors electrically connected at their ends, aligned slots narrower than they are long in said inner and outer conductors along a common diameter forming first and second working gaps, means external to said resonator and aligned with said slots for generating an electron beam and for directing it through said slots, and deflecting plates mounted in said inner conductor on either side of the path of the electron beam, said deflecting plates being separated from said inner conductor so as to permit the deflecting plates and the inner conductor to be given different electric potentials.

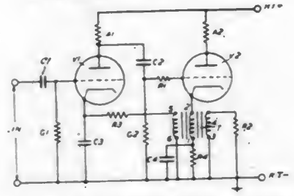


2,452,562

FUSE

John C. Gillette, Washington, D. C., and Braxton H. Tabb, Jr., Arlington, Va.

Application February 29, 1944, Serial No. 524,430
6 Claims. (Cl. 102—79)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



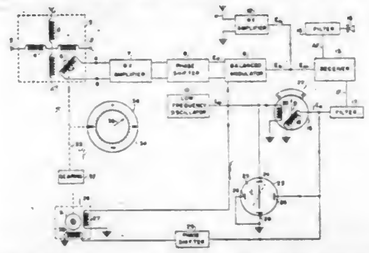
3. In a fuze for attachment to a shell containing an explosive charge, a delay arming mechanism comprising a body having a recess therein, a plunger in said recess mounted for forward movement upon impact, a rotor pivotally mounted on the body normally in the path of and preventing movement of said plunger and being responsive to centrifugal force to move clear of said path to an armed position, a forwardly exposed detonator mounted in the plunger, a firing pin carried by the rotor normally out of line with said detonator but in line therewith when the rotor is in said armed position, movable rotor locking means normally locking the rotor in unarmed position but movable in response to centrifugal force to an unlocking position free of the rotor, a movable delay member carried by said body normally in stopping engagement with said rotor locking means and movable by centrifugal force to a clearing position free of the rotor locking means, said delay member having stopping relation to the rotor locking means through an initial part of the movement of the delay member, and an escapement mechanism operatively connected with said delay member to limit its rate of movement.

2,452,563

CIRCUITS FOR REPEATING SQUARE SHAPED WAVE FORMS

William Frank Glover, London, England, assignor to Standard Telephones and Cables Limited, London, England, a British company

Application January 11, 1945, Serial No. 572,378
In Great Britain January 15, 1944
2 Claims. (Cl. 179—171)



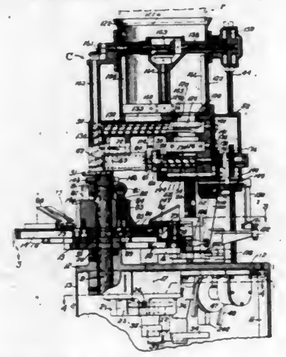
1. An amplifier for electric pulses comprising two thermionic valves, an output transformer having primary, secondary and biassing windings on a core of magnetic material, means to connect the primary winding to the output of one of the said valves, and means to supply current to an electrode of the other valve through the said biassing winding in such a manner as to generate in the said core a flux in opposition to the flux produced therein by pulses transmitted through the said transformer.

2,452,564

DIRECTION FINDER

Maxwell K. Goldstein, Washington, D. C.

Application May 15, 1945, Serial No. 593,900
2 Claims. (Cl. 343—117)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. A radio direction finder for determining the direction of a received signal comprising a directional antenna, directivity orientation control means therefor operative to invert the phase of the signal derived therefrom in dependency on the orientation of a directional characteristic with respect to an incoming signal, a non-directional antenna, oscillator means, means responsive to the oscillator means operative to recurrently invert the directional antenna signal phase, means for combining the non-directional antenna output with the recurrently inverted signal to thereby produce a resultant signal, a monitoring device having a pair of deflecting means operative to provide a visual indication of the relative phase and amplitudes of a pair of input signals applied thereto, means coupling the output of said oscillator to one of said deflecting means, means coupling said resultant signal to the other of said deflecting means whereby an instantaneous indication of the orientation of the directivity of the antenna means with respect to an incoming signal may be had, first power supply means responsive to the oscillator to supply an output voltage, second power supply means responsive to said resultant signal to supply an output voltage of a quadrature phase to the first power output voltage in dependency on the orientation of the directional characteristic with respect to an incoming signal, two phase motor means energized by the first and second power supply means, and means coupling the motor means to the directivity orientation control means operative to orient the directivity characteristic with respect to the incoming signal.

2,452,565

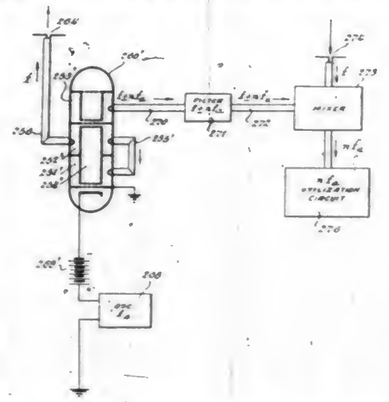
MACHINE FOR APPLYING PLASTIC MATERIAL

Carl F. Hammann, Boston, Mass., assignor to North American Research Corporation, Cambridge, Mass., a corporation of Massachusetts

Application October 20, 1943, Serial No. 506,931
8 Claims. (Cl. 12—79.6)

1. A machine of the type described having, in combination, means for supporting a shoe; mechanism for applying plastic material; spreader ironing means mounted on said machine and being slidably movable in a horizontal plane; means for moving said shoe supporting means into and out of fixed cooperative relationship with said mechanism; and means for operating said mechanism when said supporting means and said mechanism are in cooperative relationship.

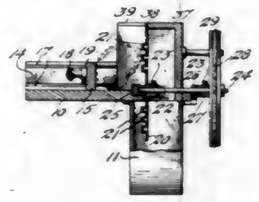
2,452,566



ULTRA HIGH FREQUENCY CIRCUIT AND METHOD

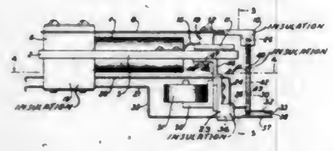
William W. Hansen and John R. Woodyard, Garden City, N. Y., assignors to The Sperry Corporation, a corporation of Delaware

Original application August 21, 1943, Serial No. 499,562. Divided and this application December 23, 1944, Serial No. 569,516
6 Claims. (Cl. 343—12)



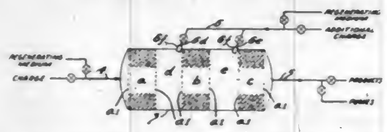
5. Ultra high frequency apparatus, comprising means for producing an electron stream, means for producing self-sustained grouping of the electrons of said stream at a predetermined frequency, means for controlling said stream at a modulating frequency, and means for extracting ultra high frequency energy from said stream at a frequency differing from said predetermined frequency by an integral multiple of said modulating frequency.

6. Apparatus as in claim 5, further including means for extracting energy of said predetermined frequency, means for radiating said extracted energy of predetermined frequency, means for receiving a portion of said radiated



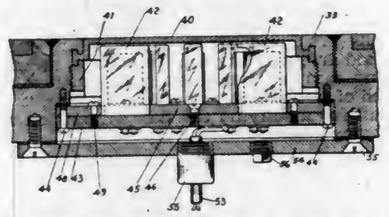
energy, and means for mixing said received energy and said different frequency extracted energy to produce an intermediate frequency of an integral multiple of said modulating frequency and independent of variation of said predetermined frequency.

2,452,567
ROTARY VEGETABLE CUTTER ON A HORIZONTAL AXIS WITH A FOLLOWER FEED
Leonard O. D. Harris, Clifton, Va., and Willie P. Padgett, Forest City, N. C.; said Padgett assignor to said Harris
Application March 14, 1946, Serial No. 654,313
3 Claims. (Cl. 146—115)



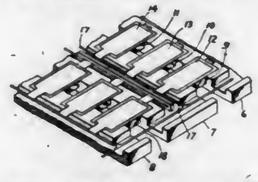
1. A vegetable cutter including a support, a receptacle provided beneath an opening in the support, a cutter member arranged vertically and rotating on a horizontal axis to extend into the receptacle, said cutter member comprising a disk having elongated openings therein extending at right angles to radii of the disk equi-distantly spaced apart and arranged in radial rows, and cutter blades having angular lugs secured to the side of the disk opposed to the side against which the vegetables to be cut are adapted to be arranged, and being in the form of channels with tapered sides having the edges of their wide ends in line with the cutting edges at the open sides of the channels frictionally engaged in the opposite ends of the openings to adjust the projection of the cutting edges from the opposite side of the disk, and means for pressing the vegetables against the cutter and means for adjusting the cutters relative to the vertical plane of the disc, whereby the cutting size may be controlled.

2,452,568
SWITCHING DEVICE
Henry C. Harrison, Port Washington, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application October 1, 1943, Serial No. 504,582
9 Claims. (Cl. 177—353)



1. A switch comprising a coil, an armature, sets of contact springs directly operable by said armature and a member connected to each set of contacts for causing a succeeding set of contacts to be directly operated by said armature and a preceding set of contacts to be released each time the armature is actuated to establish succeeding temporary electrical connections.

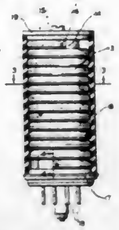
2,452,569
PROCESS OF TREATING HYDROCARBONS IN PRESENCE OF HOT CONTACT MASSES
Eugene J. Houdry, Ardmore, Pa., assignor to Houdry Process Corporation, Wilmington, Del., a corporation of Delaware
Application September 10, 1946, Serial No. 695,921
18 Claims. (Cl. 196—49)



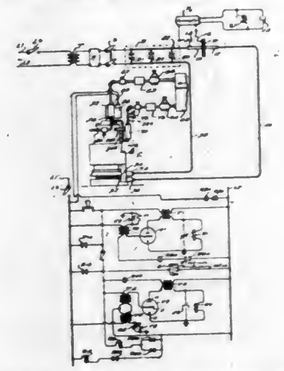
2. The process of treating hydrocarbon material in the presence of contact material adapted to affect conversion endothermically conducted in each of a pair of contact zones having a mixing zone between them and thereafter to be subjected to a regenerating operation, the steps which comprise conducting a conversion operation of the character described below in the presence of such contact material with resultant deposition thereon of an amount of carbonaceous material which, when burned during the subsequent regenerating operation, stores in the contact material an amount of heat substantially in excess of that required for effecting on-stream conversion in the contact zones, burning the deposited carbonaceous material from the contact material with resultant storage therein of an amount of heat as specified above, causing hydrocarbon material having temperature lower than that of the contact material in one contact zone to pass therethrough to remove stored excess heat therefrom with resultant elevation in temperature of the hydrocarbon material and substantial conversion thereof into hydrocarbon products which enter said mixing zone at such elevated temperature, introducing into said mixing zone hydrocarbon material having temperature lower than that of said hydrocarbon products, heat being exchanged between said hydrocarbon products and said hydrocarbon material to produce a hydrocarbon mixture having temperature lower than that of the contact material in the other contact zone, and passing at least a portion of said hydrocarbon mixture, as the operation proceeds, into said last named contact zone with resultant elevation in temperature thereof, substantial conversion thereof and removal of stored excess heat from said last named contact zone.

2,452,570
COMPRESSIONAL WAVE TRANSMITTING AND RECEIVING DEVICE
Beverly R. Hubbard, Melrose, Mass., assignor, by mesne assignments, to Submarine Signal Company, Boston, Mass., a corporation of Delaware
Application May 5, 1933, Serial No. 669,477
6 Claims. (Cl. 177—386)

2. An acoustical apparatus comprising in combination a housing provided with a face for the transit of acoustical energy, electromechanical interchanging means positioned within said housing, said means including a plurality of vibratory Rochelle salt crystals, each of which is provided with end surfaces perpendicular to its compressional axis, a supporting element in said housing, and recesses in said supporting element shaped to conform with individual crystals, said crystals being disposed in said recesses to be thereby supported by said element at points on opposite side surfaces.



2,452,571
SOUND SIGNALING APPARATUS
Ivan C. Clement, Wakefield, Mass., assignor, by mesne assignments, to Submarine Signal Company, Boston, Mass., a corporation of Delaware
Application June 14, 1933, Serial No. 675,700
9 Claims. (Cl. 177—386)



2. A submarine transceiver including a piezoelectric crystal of the Rochelle salt type formed as a flat plate, means supporting the plate near its end positions on one side, a diaphragm covering the plate on the other side and in acoustic relation thereto, said crystal being provided with electrodes and means conductively connected to said electrodes.

2,452,572
DELAY LINE
John L. Jago, Lower Lake, Calif., assignor to the United States of America as represented by the Secretary of War
Application October 20, 1944, Serial No. 559,647
1 Claim. (Cl. 178—44)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

A delay line comprising: a flexible core provided with a first spirally-wound layer of insulated wire, and a second similarly wound layer of insulated wire; said layers being wound in opposite directions and each having its turns spaced by a distance equal to about one-half the diameter of said wire; the resulting wire-wound core being coiled in the form of a helix about an insulated support; means for securing the free ends of said helical wire-wound core to said support, said means comprising dielectric plugs positioned at the ends of said flexible core and pins extending through said core and said plugs and engaging said insulated support, a second insulated support enclosing said delay line, and terminal socket means electrically continuous with said delay line and mechanically engaged by said insulated supports.

2,452,573
DIRECT-CURRENT APPARATUS FOR WELDING UTILIZING ENERGY STORAGE APPARATUS
Fred H. Johnson, Pleasant Ridge, and Chester F. Leathers, Detroit, Mich.; said Leathers assignor to Progressive Welder Company, Detroit, Mich., a corporation of Michigan
Application March 22, 1943, Serial No. 479,998
5 Claims. (Cl. 219—4)

1. A direct current welder comprising an energy storage apparatus capable of storing at one time sufficient energy to make a plurality of welds and of delivering said energy to a welding circuit in the form of direct current energy, said apparatus being adapted for association with electrodes engageable with work, and through which the work may be supplied with said welding current, electrical conductors for connecting said electrodes and said storage apparatus in a welding circuit, said conductors being free of electrical inductance except for the inherent self-inductance thereof, a substantially noninductive circuit controlling means controlling flow of current through said circuit, said controlling means being operable in a first operative condition to permit full welding

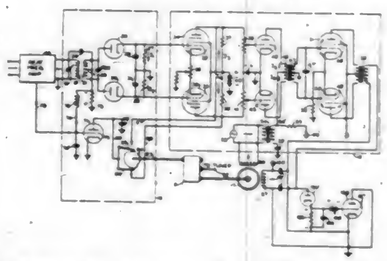
current to flow through said circuit and said electrodes and work, said controlling means being operable in a second operative condition to provide resistance to current flow through said circuit greatly in excess of the normal resistance of said conductors and said electrodes and work whereby the flow of current through said circuit is reduced to a minor fraction of said normal welding current, said controlling means being operable in a third operative condition to interrupt current flow through said circuit, and means to actuate said controlling means from said first condition to said second condition and automatically operable at the expiration of a predetermined time interval subsequent to the actuation of said controlling means out of said first condition to actuate said controlling means into said third condition, said time interval being so related to the inherent self-inductance of the welding circuit that substantially all of the inductively stored energy in said circuit is dissipated prior to the interruption of said current flow.

2,452,574

METHOD OF WELDING SEAM PORTIONS OF ELECTRICALLY CONDUCTING ARTICLES

Lyman L. Jones, Seattle, Wash., assignor to American Can Company, New York, N. Y., a corporation of New Jersey

Application October 29, 1946, Serial No. 706,481
8 Claims. (Cl. 219—10)



1. A method of welding seam portions of electrically conducting articles, which comprises positioning seam portions of two such articles in opposed relation, and passing an electric welding current from the seam portions of one of said articles directly to the seam portions of the other to weld the seam portions of both articles, thereby producing simultaneously two separate and independent welded articles.

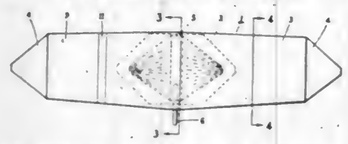
2,452,575

AUTOMATIC FREQUENCY CONTROL

Charles R. Kenny, Crestwood, N. Y., assignor to The Sperry Corporation, a corporation of Delaware

Application April 22, 1943, Serial No. 484,103
29 Claims. (Cl. 250—36)

9. Automatic frequency control apparatus comprising a variable frequency source, frequency regulation means for said source, motive means for actuating said frequency regulation means, means responsive to actuation of said frequency regulating means for controlling operation of said motive means to cause said source frequency to scan a predetermined frequency band, means providing a signal representing variation from a desired frequency condition, and means responsive to said signal for controlling said motive means to maintain said desired frequency condition and for rendering said operation controlling means inoperable to vary the frequency of said source.



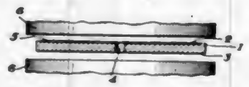
15. Automatic frequency control apparatus comprising frequency regulation means, motor means driving said frequency regulation means, means providing a signal controlling operation of said frequency regulation means, means providing damping substantially proportional to the speed of said motor, and means responsive to said signal for modifying the damping action of said damping means.

2,452,576

METHOD OF GROWING CRYSTALS

Bengt R. F. Kjellgren, University Heights, and Hans Jaffe, Cleveland Heights, Ohio

Application November 10, 1945, Serial No. 627,800
10 Claims. (Cl. 171—327)



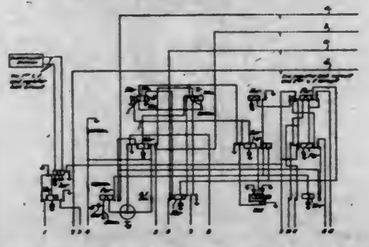
1. The method of growing a crystal which comprises the steps of providing a solution of the substance to be crystallized conditioned to inhibit crystal growth along at least one but not all of the axes of the crystal and to increase substantially the possible degree of supersaturation of the solution without causing spurious crystalline growth therein; introducing into the solution a seed body having extension in the directions of inhibited growth about equal to the corresponding extension of the crystal to be grown; and, for the purpose of accelerating deposition of clear crystal material on the seed body in the direction of uninhibited growth, maintaining a substantially higher degree of supersaturation in the solution than is operable for such purpose in a solution of the said substance free from the stated inhibition.

2,452,577

DRY RECTIFIER ELEMENT AND METHOD OF MANUFACTURE

Chester A. Kotterman, Livingston, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware

Application October 7, 1943, Serial No. 505,330
4 Claims. (Cl. 175—366)



1. A process for producing a dry rectifier element having a semi-conducting layer of specific thickness, comprising forming a base plate with an upstanding rim having a height equal to said thickness and a flat surface extending inwardly from the rim; disposing on said surface a quantity of a thermoplastic semi-conducting material, and forming said material into a flat layer flush with the upper margin of the rim by pressing a flat hot surface against the material and forcing said hot surface toward the base plate until arrested by the rim, the heat and pressure being sufficient to fuse the material and form a continuous uniform layer strongly adherent to the base plate surface.

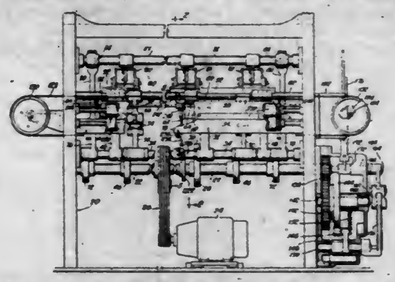
2,452,578

TELEPHONE SYSTEM UTILIZING A REGISTER CONTROLLER

Jacob Kruithof, Ladislas Kozma, and Martinus den Hertog, Antwerp, Belgium, assignors to International Standard Electric Corporation, New York, N. Y., a corporation of Delaware

Application January 22, 1943, Serial No. 473,278
In the Netherlands May 20, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires May 20, 1961
16 Claims. (Cl. 179—18)

1. In a telecommunication system, a plurality of numerically designated lines, selector switches for connecting a calling line towards a called line, said selectors having cyclically operated movable contacts and cooperating sets of stationary bank contacts over all of which said movable contacts move consecutively during each cycle, electromagnetic means for controlling the movement of said movable contacts, groups of outlets connected in multiple to the bank contacts of all selectors, a register controller, means for temporarily associating said register controller with a selector, means associated with the calling line for operating said controller to register the numerical designation of the called line, a control circuit extending from the register controller to the connected selector for controlling said movable contacts to select a group of outlets determined by the numerical designation of the called line and to hunt for an idle outlet in the selected group, means in the connected selector for applying a signaling potential to the control circuit which is characteristic for an outlet with which the movable contacts are connected, there being a plurality of different sources of potential, each characteristic for a different outlet, and a responsive device for controlling the operation of the controller actuated by the signaling potential.



2,452,579

WARP KNITTING MACHINE

Fritz Lambach, Tenafly, N. J.

Application October 3, 1945, Serial No. 620,113
13 Claims. (Cl. 66—34)

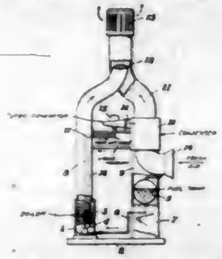
1. A warp knitting machine comprising: a needle bar carrying a series of needles, at least one guide bar carrying a series of warp guides, a guide bar drive associated with said guide bar for periodic actuations thereof with its warp guides so as to feed warp yarns to said needles, a needle bar drive associated with said needle bar for imparting periodic reciprocating movements to same with its needles in a predetermined direction towards and away from said warp guides, at least one filler thread carrier, a carrier drive associated with said filler thread carrier for imparting periodic movements to same in a longitudinal direction so as to lay filler thread substantially parallel to said series of needles, a sinker bar carrying a series of filler sinkers, a sinker bar drive associated with said sinker bar for imparting periodic movements to same with its filler sinkers towards and

away from the direction of the strokes of said needles so as to place, during a movement towards said needles, filler thread laid by the filler thread carrier in position to be incorporated into fabric produced by the knitting implements of the machine, and controlling means associated with said drives for coordinating their functions and the functions of said needles, warp guides, filler thread carrier, and filler sinkers, and the assembly being such as to impart a longitudinal movement to said filler thread carrier during a movement of said needles away from said warp guides.

2,452,580

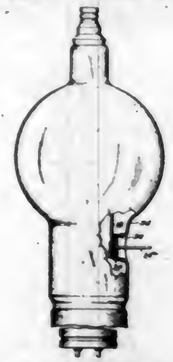
TERMINATION FOR ELECTRIC POWER CABLES

Edwin Charles Lee, London, England, assignor to Standard Telephones and Cables Limited, London, England, a British company



Application February 19, 1945, Serial No. 578,666
In Great Britain February 25, 1944
5 Claims. (Cl. 174—20)

1. A terminating assembly for an electric cable having a conductor, covered by insulation and a metal sheath partly cut back and lapped with tape to form a built-up insulation of uniform diameter along its length comprising, a tubular

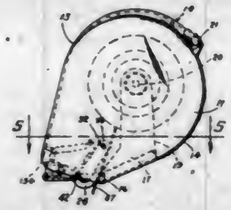


member of insulating material adapted to tightly engage said insulating tape, a porcelain insulating member tightly fitted over said tubular member to form a bonding seal substantially throughout its contact surface, means for sealing said members at one end to said metal sheath, and means for sealing the other end of said members to said cable conductor.

2,452,581
TURBOGENERATOR
Gerard J. Lehmann, New York, N. Y., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application June 7, 1944, Serial No. 539,228
14 Claims. (Cl. 290—2)

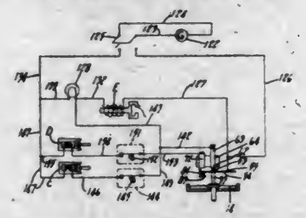
1. A mercury-vapor turbo-generator comprising a mercury-vapor turbine, a generator operated by said turbine, a gas-tight housing enclosing both said turbine and said generator, and gas tight supply means for supplying said mercury vapor to said turbine means for permitting passage of said mercury vapor between said turbine and said generator.

2,452,582
LEAD CONNECTOR FOR ELECTRONIC DISCHARGE DEVICES
Charles V. Litton, Redwood City, Calif., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application December 22, 1943, Serial No. 515,268
17 Claims. (Cl. 250—27.5)



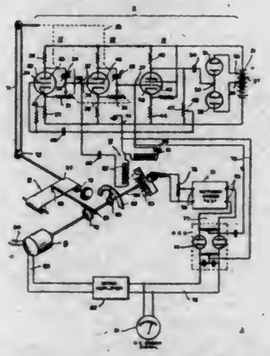
1. In an electronic discharge device, an envelope, an internal lead member positioned within said envelope, said lead member having a plane surface portion provided with a generally circular opening therethrough, an external lead member having a disc-shaped portion, a metal cup whose closed bottom is provided with an extension protruding through and beyond the opening in said internal lead member and on its inner side surrounding said disc-shaped portion, a portion of said extension beyond said opening extending outwardly to overlap part of the plane surface of said internal lead member, and another portion of said extension extending inwardly to overlap part of the disc-shaped portion of said external lead member so as to attach said lead members to said metal cup, and means sealing the lip of said metal cup to an opening in said envelope.

2,452,583
SLEEVE VALVE ENGINE
Marcus Lothrop, United States Navy, Berkeley, Calif.
Application October 31, 1945, Serial No. 625,925
4 Claims. (Cl. 123—188)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



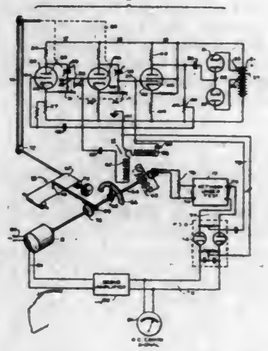
4. A clamp for use in an engine having a cylinder with ports therein, a piston within said cylinder, moving elements which function in timed relation with the operation of the engine and a thin, flexible sleeve disposed between said cylinder and piston, the sleeve being movable to cover and uncover said ports, the clamp being disposed for linking the sleeve to said moving elements and including a member having projections thereon which are in engagement with portions defining openings in the sleeve, another member in nested relation with the first-named member for effecting close contact of the sleeve therewith, and means for holding the nesting members in engagement.

2,452,584
ADHESIVE TAPE APPLYING DEVICE
George C. Luebkeman, Cincinnati, Ohio, assignor of one-half to J. David Luebkeman, Libertyville, Ill.
Application July 26, 1946, Serial No. 686,407
18 Claims. (Cl. 216—22)



1. A tape applying device comprising a casing to house a roll of adhesive tape and provided with an opening, a shoe pivoted within the opening in the casing, a yoke shiftably mounted in the housing adjacent said opening, a presser member on the yoke and normally exposed by said opening and cooperating means on the yoke and shoe positively resisting movement of the presser member into the casing, the shoe being movable about its pivotal mounting by pressure on one end thereof for releasing said cooperating means and permitting movement of the yoke whereby the presser is retired to the interior of the casing, and a cutter secured in the shoe and presenting its cutting edge toward the roller.

2,452,585
RATCHET MOTOR CONTROL MECHANISM
William W. Maher, San Francisco, Calif., assignor to American Can Company, New York, N. Y., a corporation of New Jersey
Application April 30, 1946, Serial No. 666,104
13 Claims. (Cl. 318—21)

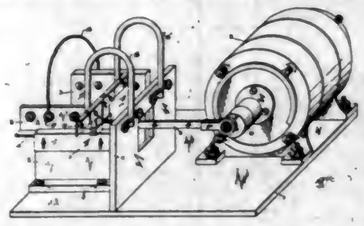


1. In a control mechanism for can testers, the combination of a detector unit including a diaphragm and a movable contact head, an adjustable holder mounted in said unit and axially movable relative to said diaphragm, a stationary contact head supported by said holder and having cooperation with said movable contact head under action of the diaphragm for detecting leaks in cans, and means mounted in said unit and operable on said holder for shifting said holder to reset said stationary contact head to establish a neutral position for said diaphragm.

2,452,586
PHASE SHIFT CIRCUITS
Rawley D. McCoy, Bronxville, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Application March 23, 1944, Serial No. 527,769
8 Claims. (Cl. 250—36)

1. An oscillator, comprising first and second amplifier type phase-shift circuits connected in cascade and a phase inverter circuit coupled back from the second phase shift circuit to the first, each of said amplifier-type phase shift circuits comprising an electron discharge device and a phase shift circuit connected thereto and arranged to produce a phase shift varying through 90° according to frequency.

2,452,587
NETWORK MEASURING APPARATUS
Rawley D. McCoy, Bronxville, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Original application March 23, 1944, Serial No. 527,769. Divided and this application February 24, 1945, Serial No. 579,592
3 Claims. (Cl. 346—32)

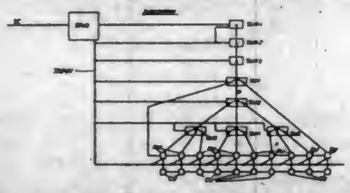


3. Network transmission test apparatus comprising a variable frequency generator including means for adjusting the frequency thereof, means having two input circuits for receiving first and second alternating voltages, a first coupling channel connected between said generator and one of said input circuits, a second coupling channel including said phase shifter connected between said generator and the second input circuit of said receiving means, means for including a test network in one of said channels, coupling means responsive to phase shift between said first and second alternating voltages for adjusting said phase shifter according to the phase angle between said first and second voltages, a recorder including a first element comprising a record receiving medium and a stylus second element, means for simultaneously moving said frequency adjusting means and one of said two elements of said recorder, and means coupling the other recorder element to said phase shifter adjusting means for varying the position thereof according to the position of said phase shifter adjusting means.

2,452,588
CABLE AND CABLE CONNECTOR FATIGUE TESTING MACHINE
Joseph Luther McFarland, Cairo, W. Va., and Kenneth Matzinger, Detroit, Mich.
Application October 2, 1945, Serial No. 619,912
3 Claims. (Cl. 73—100)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

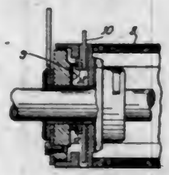
2. Equipment for fatigue testing cable-like elements including two stationary anchor plates disposed approximately at right angles to each other, a carriage reciprocable in a plane parallel to one of said plates and perpendicular to the other, said carriage being provided with a reciprocating plate

parallel to said plane and a traveling bar perpendicular to said plane, means for anchoring the ends of said elements to the reciprocating plate, the traveling bar and the two stationary anchor plates, and means for reciprocating said carriage



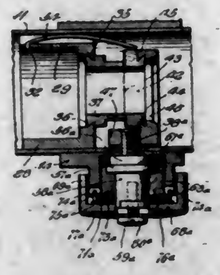
so as to simultaneously reciprocate said reciprocating plate and said traveling bar, whereby to twist and flex elements connected to the reciprocating plate and the anchor plate parallel thereto and to flex elements connected to the traveling bar and the other anchor plate.

2,452,589
ELECTRIC REMOTE CONTROL AND INDICATION SYSTEM
Eric Malcolm Swift McWhirter and Hugh Jennings Ward, London, England, assignors to Standard Telephones and Cables Limited, London, England, a company of Great Britain
Application January 14, 1944, Serial No. 518,250
In Great Britain January 22, 1943
32 Claims. (Cl. 177—353)



4. In a system for the electrical supervision of apparatus, a number of switching means each having contacts in a position corresponding to the condition of an apparatus to be supervised, a number of further switching means each adapted to assume a sequence of positions for producing in each position a group of simultaneous impulses representing a code so that in said sequence of positions a train of codes is produced, a sender adapted to be connected selectively to each one of the sequence switching means, relay means controlled from the sequence switching means of one apparatus when said sequence switching means is connected, said relay means preparing the connection of a sequence switching means of another cyclically predetermined apparatus so as to determine the order in which the different sequence switching means shall be connected, and means initiated by a change in condition of one of the apparatus for connecting and operating the associated sequence switching means, said connection being effective depending upon said relay means.

2,452,590
ELECTRIC SIGNALING SYSTEM
Eric Malcolm Swift McWhirter and Hugh Jennings Ward, London, England, assignors to Standard Telephones and Cables Limited, London, England, a British company
Application January 8, 1945, Serial No. 571,862
In Great Britain December 24, 1943
7 Claims. (Cl. 177—353)

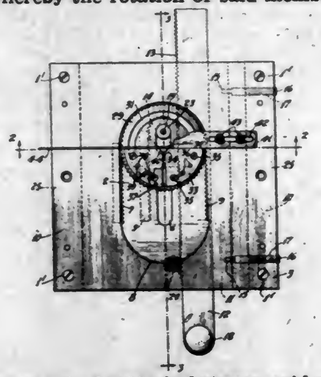


1. An electric selective signalling system comprising a control station and a substation, means at the control station for preparing a series of code signals which vary in kind, means for converting said signals and for sending corresponding signals to said substation, a plurality of selection units at said substation for receiving each signal, of said series of code signals, means in said selection units responsive to said signals for performing a selection in response thereto according to the kind of said signal means associated with each of said selection units for sending back to the control station a signal corresponding in kind to the transmitted signal and means at the control station for sending a further signal only upon the receipt of a signal following the selection effected by the signal sent immediately preceding such receipt.

2,452,591
PIN-WHEEL FEED
Albert W. Metzner, Dayton, Ohio, assignor to The Standard Register Company, Dayton, Ohio, a corporation of Ohio
Original application December 9, 1937, Serial No. 179,021. Divided and this application March 9, 1942, Serial No. 433,915
20 Claims. (Cl. 271—2.3)

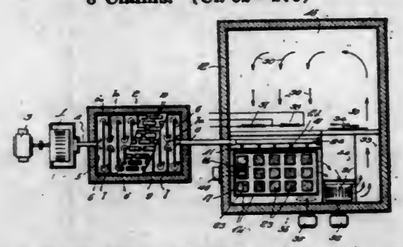
1. In a record making apparatus wherein continuous relatively adjustable superposed record strips each having a succession of longitudinally spaced record receiving areas are progressively aligned and registered at a record receiving position with like areas of another of the strips, and wherein each strip has therein a succession of longitudinally spaced elongated slots for progressive engagement of the strips with a series of traveling flat feeding pins by which the strips are advanced past a record receiving position, the combination with such strip of a rotary carrier and a series of radial spaced flat teeth carried thereby engageable in the slots of the strip mounted for limited to and fro axial movement relative to the carrier into agreement with succeeding slots of the strips and movable radially relative to the carrier into and out of feeding engagement therewith.

2,452,592
TELESCOPIC SIGHT
Clarence H. Meyer, Ann Arbor, Mich., assignor to Argus, Incorporated, a corporation of Michigan
Application February 3, 1944, Serial No. 520,935
12 Claims. (Cl. 33—50)



1. In an optical sighting device having a tube providing a longitudinal sighting path, a hollow support disposed in said tube and having a first guideway at one end thereof, a first adjustment member mounted for sliding movement along said guideway and having a second guideway at right angles to said first guideway, means on said tube for positively moving said member along said first guideway, a reticule holder mounted for sliding movement at one end thereof along said second guideway and having a third guideway parallel to said first guideway at its other end, a second adjustment member having a slide connection with said third guideway, and means for positively moving said second member in a direction perpendicular to said third guideway whereby movements of said reticule holder in directions at right angles to each other may be effected solely by moving said first and second adjustment members.

8. In an optical apparatus having a sighting tube and a sighting device mounted within said tube for adjustment transversely of the sighting path, a screw for adjusting said sighting device projecting outwardly through an opening in said tube; means on said tube providing an outwardly facing cup having an annular bottom wall encircling the projecting end of said screw; sealing means coacting with said annular wall and said screw for preventing ingress of extraneous material into said tube; pressure means for establishing a predetermined degree of seating pressure between said screw and said sealing means; and means for rotating said screw.



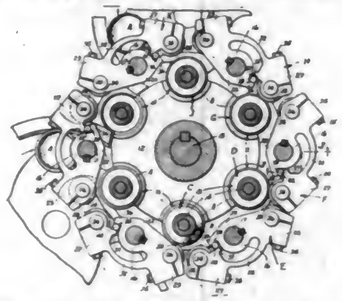
2,452,593
WIRE LOOPING MACHINE
Edward H. Miller, Newark, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application October 11, 1945, Serial No. 621,827
5 Claims. (Cl. 140—104)

1. In a wire looping machine, two members, one face of each of said members extending in the same plane, cutouts in the adjacent ends of said members, a pin member mounted opposite the faces of said members, means for rotating each one of said members in a direction opposite to that of the other to a position in which the said faces are opposed, means for moving said pin member against and between said members during the rotating movement of the latter, said pin member being adapted to press the wire to be looped against the said cutouts of the said members, whereby the rotation of said members and

the movement of said pin between said members completes the formation of a loop in said wire.

2,452,594
METHOD OF REFRIGERATION EMPLOYING DRY ICE
Nathan Morris, Silver Spring, Md., assignor, by mesne assignments, to American Instrument Co., Inc., a corporation of Maryland
Application May 5, 1944, Serial No. 534,314
8 Claims. (Cl. 62—170)

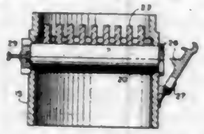
1. The method of effecting refrigeration with solidified CO_2 at sub-zero temperatures which comprises dehydrating air, precooling the dehydrated air and blowing the precooled dehydrated air over the surface of solidified CO_2 in a confined temperature controlled area at a velocity sufficient to maintain the solidified CO_2 free from the collection of gas over the surface area thereof.



2,452,595
N(ETHYL MERCURY) PARA-TOLUENE SULFONANILIDE AND METHOD OF MAKING SAME
Dwight F. Mowery, Jr., Springfield, Mass., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application March 8, 1945, Serial No. 581,721
2 Claims. (Cl. 260—433)

1. N(ethylmercury) para-toluene sulfonanilide.

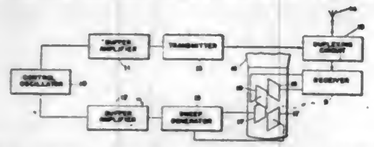
2,452,596
SEAMING ROLLER MOUNTING
Ronald E. J. Nordquist, Maplewood, N. J., assignor to American Can Company, New York, N. Y., a corporation of New Jersey
Application December 3, 1945, Serial No. 632,291
5 Claims. (Cl. 113—23)



5. A can closing machine for sealing covers onto cans, the combination of a seaming head, a chuck

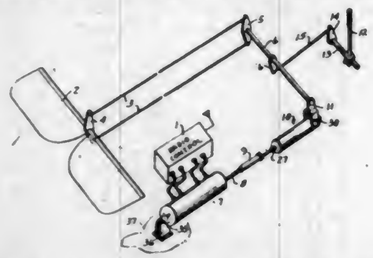
in said head for clamping a cover on a superimposed can for a seaming operation, a movable rocker element carried in said head adjacent said chuck, said element including a fixed arm and a yieldable spring arm having a free end spaced from the element, a first operation seaming roller carried on said fixed arm, a second operation seaming roller carried on said spring arm said rollers having cooperation with said chuck during

relative movement between the chuck and the seaming head, and wedging means secured to said fixed arm and engaged by the free end of said spring arm for imposing a preloaded spring pressure on the latter, said preloaded spring pressure being determined by the distance between said spring arm end and said element and providing a predetermined sealing pressure effective at said second operation seaming roller during seaming.



2,452,597
LOW-TEMPERATURE ENGINE STARTING AID
Robert I. Olsen, United States Navy
Application May 28, 1947, Serial No. 751,005
6 Claims. (Cl. 123—122)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

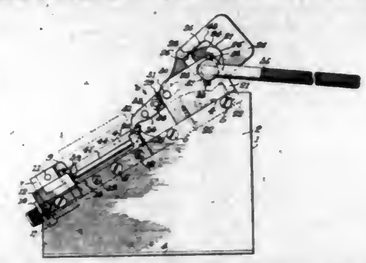
1. An intake manifold air heater unit comprising a hollow body portion defining a manifold passage, aperture means in the body portion for admitting an exothermic chemical heating capsule into the manifold passage, supporting means carried by the body operative to receive the capsule in a position transverse of the passage, and biasing means retractably engageable with the capsule for positioning the same on the supporting means.



2,452,598
MULTIPLE RANGE INDICATOR
Robert M. Page, Washington, D. C.
Application January 6, 1942, Serial No. 425,719
11 Claims. (Cl. 343—13)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

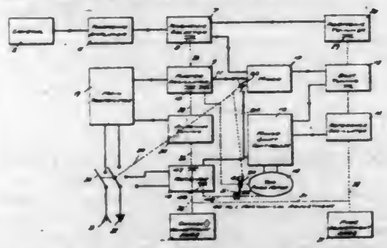
1. A radio pulse echo system comprising means for transmitting a regular series of pulses, means for receiving the reflections of said pulses from reflecting objects, a cathode ray tube, means forming on the viewing screen of said tube a recurring time trace synchronized with said pulse transmission, means forming on said time trace indications of the reception of said reflections, a scale in juxtaposition to said time trace and having its zero mark opposite the point of

origin thereof, means for changing the frequency of said pulse transmission and means for maintaining the point of origin of said time trace opposite the zero mark of said scale, the rate of movement of said time trace remaining constant.



2,452,599
CONTROL SYSTEM FOR TARGET AIRCRAFT
Charles L. Paulus, Dayton, Ohio, and Howard A. Klein, Oakdale, Pa.
Application July 9, 1943, Serial No. 494,029
3 Claims. (Cl. 74—480)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a system for controlling an aircraft in flight, in combination, an aircraft control surface, actuating means therefor, servo-operating means associated with said actuating means, remote control means for controlling operation of said servo means, yieldable force transmitting means interposed between portions of the actuating means intermediate said servo means and said aircraft control surface, and manual control means directly connected with said aircraft control surface for actuation thereof independently of said servo means, said yieldable force transmitting means being normally operative to transmit controlling force from said servo means through said actuating means to said aircraft control surface for actuation of the latter, and said yieldable force transmitting means being yieldable to permit relative movement between said portions of the actuating means intermediate said aircraft control member whenever said manual control means is actuated.



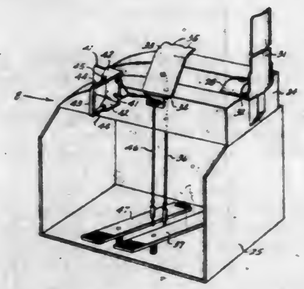
2,452,600
CLIP LOADING MACHINE
John E. Pool, Washington, D. C., and John W. P. Beaver, Alexandria, Va.
Application January 14, 1947, Serial No. 722,014
2 Claims. (Cl. 86—48)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A machine for loading clips having extremities cooperating to receive and retain blasting caps, comprising a support, an adjustably mounted block, pull hooks mounted on said block, said pull hooks adapted to engage one extremity of the clips, and manually actuated means including a cam shaft, a cam mounted on said shaft and a follower plate actuated by said cam, said follower block coacting with the other extremity

of the clips for spreading the extremities of the clips apart, whereby the blasting caps may be loaded in the clips which are actuated by the cam follower plate for releasing said extremities whereby the caps are retained in the clips.

2,452,601
FREQUENCY CONTROL MEANS
Richard H. Ranger, United States Army, Newark, N. J.
Application June 10, 1944, Serial No. 539,696
6 Claims. (Cl. 250—36)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. Means for maintaining constant the frequency at which radio apparatus operates, said means comprising, first means adapted to generate a first selected frequency, second means adapted to generate a second selected frequency, a circuit arranged to receive said first frequency and said second frequency and to transmit the beat between said frequencies, first manually operable means controlling the respective frequencies of the component waves which together form said beat, third means adapted to generate a third selected frequency, second manually operable means interlocked with said first manually operable means and affording a more delicate control of the respective frequencies of the component waves which together form said beat, a two-phase motor operable in response to any frequency difference between said beat and said third frequency, a mechanical connection between said motor and said second means, whereby said motor tunes said second means so that said beat frequency is equal to the frequency of said third frequency and therefore the operating frequency of the apparatus is maintained constant, and sixth means mechanically connected under the control of said second manually operable means and electrically connected to the first means so as to tune said first means to compensate for any change in the first selected frequency caused by operation of said first manually operable means.



2,452,602
MANUFACTURE OF ALIPHATIC POLYAMINES
Correl N. Robinson, Jr., Trenton, and John F. Olin, Grosse Ile, Mich., assignors to Sharples Chemicals Inc., Philadelphia, Pa., a corporation of Delaware
No Drawing. Application May 5, 1944, Serial No. 534,352
8 Claims. (Cl. 260—583)

1. In the manufacture of amines by condensing a carbonyl compound having an unsaturated linkage with an aminating agent and hydrogen, the process of forming an aliphatic polyamine which comprises introducing a compound chosen from the class consisting of alpha, beta, ethylenic unsaturated aliphatic aldehydes and ketones progressively into a reaction vessel containing hydrogen under pressure, a hydrogenation catalyst, and an aminating agent chosen from the class consisting of ammonia and primary aliphatic amines, the alpha, beta unsaturated carbonyl compound being introduced into the reaction vessel containing the aminating agent at a rate not substantially greater than the rate of reaction thereof with the aminating agent.

2,452,603
METAL CONTACT RECTIFIER
Otto Saslaw, Lyndhurst, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
No Drawing. Application April 8, 1944, Serial No. 530,181
4 Claims. (Cl. 175—366)

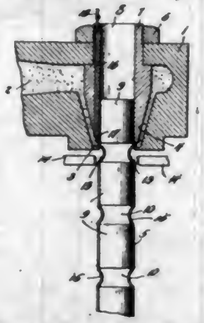
1. A process of making a metal contact rectifier comprising fusing a semi-conducting selenium layer to a base plate, preparing a lacquer by dissolving a lacquer base in a volatile solvent, dissolving selenium dioxide in a compatible solvent and mixing the solutions, applying the lacquer to the selenium layer to form a coating, and applying a counter-electrode to the lacquer coating.

2,452,604
METHOD OF AND APPARATUS FOR INCLOSING A FOLDED PARACHUTE PACK
Edward L. Seismeyer, Green Bay, Wis.
Application April 3, 1945, Serial No. 586,433
10 Claims. (Cl. 100—14)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A device for folding the projecting flaps of a cover around a folded article resting on said cover, said device comprising means shaped to support and to hold in place the cover with the article therein, a holder to bear on said folded article

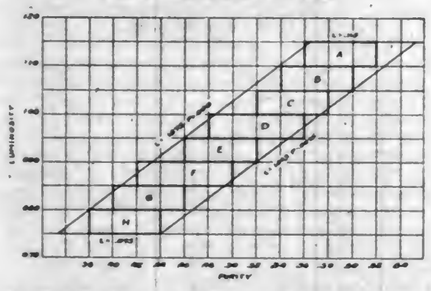
and hold it in place, a holding member including means to engage one flap of the cover whereby to hold said flap firmly in position, and means for clasping therein a flap opposite the first said flap and drawing it down in closed position thereon in such a manner that a third flap on the cover can be conveniently drawn manually in closed position to facilitate withdrawing the cover with the folded article incased therein from the device.

2,452,605
LUBRICATED CRANK STRUCTURE
Leon R. Shanton, Cherryvale, Kans.
Application February 6, 1947, Serial No. 726,911
3 Claims. (Cl. 74—605)



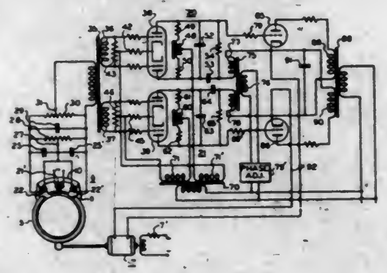
1. A self lubricated crank structure comprising a crank disc, a hub on the crank disc having a shaft receiving bore concentric with the crank disc, a radial arm integral with the crank disc lying between the periphery thereof and the hub, said arm having an opening therein lying parallel with the shaft receiving bore in the hub, a crank pin fixed in the opening and extending outwardly therefrom opposite the hub, said crank pin having a longitudinal oil inlet duct extending therethrough, said pin having a longitudinal oil return duct extending from the end which is fixed in the opening to a point intermediate its ends and a radial duct opening through its side into the return oil duct, an anti-friction bearing on the crank pin, an oil tight housing enclosing the anti-friction bearing, a coupling on the housing for connection to a connecting rod and a hollow cover enclosing the arm for cooperation with the crank disc in forming a reservoir for lubricant, the pin and the arm having a duct therein which establishes communication with the inlet duct and the reservoir and the pin and the arm having a duct therein which establishes communication between the return duct and the reservoir.

2,452,606
PHTHALOCYANINE PIGMENTS AND PROCESS FOR PRODUCING SAME
Alfred Siegel, Roselle, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application November 20, 1945, Serial No. 629,921
7 Claims. (Cl. 106—289)



1. A process for producing a coalesced phthalocyanine coloring material, which comprises reacting in the substantial absence of moisture and at temperatures ranging from about 150–350° C. an aryl-orthodinitrile with a compound of a metal in the presence of from one-half to twenty parts per part of phthalocyanine pigment in the mixture of a substratum which is potentially reactive with said coloring material, comprising a calcined, anhydrous, white, inorganic pigment substance selected from the group consisting of titanium oxide and zirconium oxide.

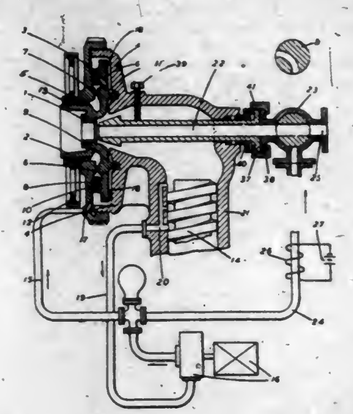
2,452,607
METHODS OF PACKAGING
Charles E. Slaughter, New Canaan, Conn., assignor to Extruded Plastics, Inc., Norwalk, Conn., a corporation of Connecticut
Application February 2, 1945, Serial No. 575,856
8 Claims. (Cl. 18—59)



1. The method of producing plastic sheathed articles which comprises extruding heated thermoplastic resin in the form of a continuous tubing conforming substantially to the cross-sectional shape of the articles, intermittently inserting a series of discrete rigid articles within the tubing after the latter has attained its tubular shape and as the tubing is being extruded in such manner that the articles of the series are spaced from each other within the tubing, and rigidifying said tubing, said articles being of such a size that each article is in intimate contact with the wall of the tubing, the articles being so spaced that an unfilled portion of tubing extends beyond each article.

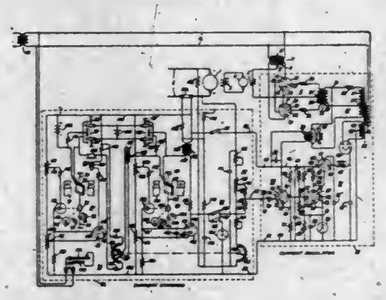
2,452,608
IRON OXIDE PIGMENTS AND METHOD OF PRODUCING THE SAME
George B. Smith, Evanston, Ill., assignor to Minnesota Mining & Manufacturing Company, St. Paul, Minn., a corporation of Delaware
Application May 29, 1941, Serial No. 395,763
9 Claims. (Cl. 106—304)

1. The method of producing an iron oxide pigment comprising mixing ground iron ore having an iron content of at least about 80% in terms of Fe_2O_3 with concentrated sulphuric acid of at least about 66° Baumé and in an amount less than the stoichiometric amount of said acid required to convert all of the iron oxide content of the ore to ferric sulphate, but in an amount sufficient to convert at least about 70% of said iron oxide content to ferric sulphate, continuing the reaction between said iron and said acid by conserving within the reactants sufficient heat given off by the exothermic nature of said reaction so as to maintain said reactants at an elevated temperature of the general order of 240°–270° F. and so as to form a reaction product which is fluid enough at said elevated temperature so that it can be discharged as a fluid from the reaction zone and will form a granular sensibly dry material upon cooling, and then calcining such material to convert the ferric sulphate to Fe_2O_3 and to form an iron oxide pigment.



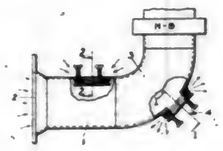
2,452,609
ANTIHUNT FOLLOW-UP SYSTEM
Brock A. Somers, Garden City, Rawley D. McCoy, Bronxville, and James R. Lilienthal, Brooklyn, N. Y., assignors to The Sperry Corporation, a corporation of Delaware
Application October 2, 1942, Serial No. 460,726
9 Claims. (Cl. 318—31)

1. In a follow-up system for gyro compasses and the like embodying means furnishing a reversible electrical signal responsive to the magnitude and sense of the positional disagreement of the sensitive and "phantom" elements, a two-branch circuit fed thereby, each branch comprising means for obtaining a composite potential having a reversible phase alternating component corresponding to said signal and a reversible polarity non-alternating component derived from said signal and proportional to a time derivative of change of said disagreement, grid controlled rectifier tubes receiving said composite potentials respectively in like phase relationship and differentially controlled thereby, circuit means for supplying grid bias potentials and plate potentials to said tubes each in opposite phase relationship to tubes respectively associated with different ones of said branches and a direct current, constantly excited motor reversibly actuated by the outputs of said tubes for positioning said "phantom" element.



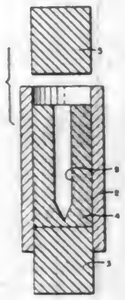
2,452,610
EXTRUSION MACHINE FOR PRODUCING POWER CABLES
Hugo Sonnenfeld, Bradford, England, assignor to Standard Telephones and Cables Limited, London, England, a British company
Application January 1, 1945, Serial No. 570,894
In Great Britain October 26, 1943
4 Claims. (Cl. 18—13)

1. An extrusion machine comprising a die for extrusion of an unsymmetrical body of predetermined lay, means for rotating the die in predetermined relation to the speed of extrusion, and to the said lay, said die being mounted in a rotatable die holder and a gear wheel being fixed externally to said die holder, a die holder cover in which said rotatable die holder is mounted, an extrusion head to which said die holder cover is fixed, a shaft bearing and a thrust bearing provided between said die holder and said die



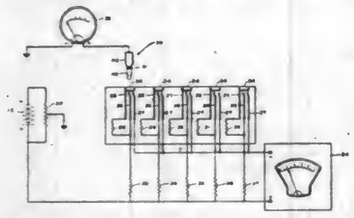
holder cover, and compressed air means provided for compensating the axial thrust on said thrust bearing.

2,452,611
ELECTRIC REGULATOR
Jerry L. Stratton, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
Application March 21, 1946, Serial No. 655,981
11 Claims. (Cl. 322—36)



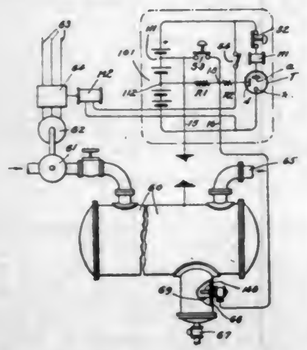
1. In combination, an electric circuit to be controlled, means for controlling said circuit, means for providing an electric quantity having a constant value, means for comparing an electric quantity of said circuit with said electric quantity of constant value and for providing a controlling electric quantity variable in accordance with the difference between the electric quantity of constant value and the electric quantity of said electric circuit, control means responsive to said controlling electric quantity for controlling said first mentioned means, means for deriving a second electric quantity from said electric circuit, a standard of reference, means for comparing said second electric quantity with said standard of reference for providing a differential quantity variable in accordance with the departure of said second electric quantity from said standard of reference, and means responsive to said differential quantity for modifying the operation of said control means.

2,452,612
RELIEF VALVE ASSEMBLY FOR VENTILATION SYSTEM
Walter A. Swenberg, Long Beach, Calif.
Application March 26, 1945, Serial No. 584,993
2 Claims. (Cl. 277—61)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. In combination, a ventilating duct open at one end to the atmosphere containing a bend, a pressure relief valve in the wall of said duct at the bend thereof comprising a seat ring, a resilient gasket on said seat ring, studs protruding from said seat ring, a valve plate movably engaged with said studs, yieldable means normally holding said valve plate against said gasket, an equalizer valve situated in the wall of a portion of the duct approaching the bend comprising a seat ring, a resilient gasket on said seat ring, a valve plate, studs protruding from the valve plate through said gasket seat ring and wall of the duct, and yieldable means normally holding the valve plate against the gasket.

2,452,613
METHOD OF DETERMINING EFFECT OF MOLD CONDITIONS ON METAL CASTINGS
Howard F. Taylor, Washington, D. C., and Robert E. Morey, Forest Heights, Md.
Application April 24, 1945, Serial No. 590,100
2 Claims. (Cl. 73—15)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

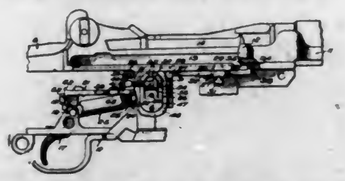


1. A method of determining the effect of mold conditions on casting, comprising embedding a metal pin in a quantity of mold material to form a composite article, heating the article to cause a reaction to take place between the metal pin and the mold material, and then opening the article to permit examination of the pin and the mold material.

2,452,614
ELECTRICAL TEST CIRCUIT
Roy J. Teetsell, Red Bank, N. J., assignor to the United States of America as represented by the Secretary of War
Application February 14, 1944, Serial No. 522,291
2 Claims. (Cl. 175—183)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

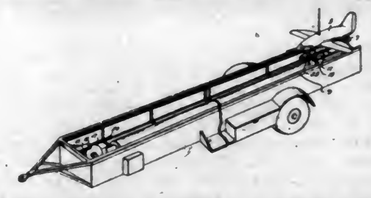
1. A circuit arrangement for the comparison testing of a multi-range standard ammeter with an ammeter of undetermined accuracy comprising in combination a standard ammeter including a plurality of shunts, an ammeter under test, a source of energy, a plurality of current-limiting resistors, means for simultaneously connecting one of said shunts across said standard ammeter and connecting said source of energy with said standard ammeter in series with one of said resistors and said ammeter under test whereby both said standard ammeter and said ammeter under test are energized, each of said resistors being proportional to each corresponding shunt to limit maximum energization of said standard ammeter to values which do not appreciably exceed those corresponding to full scale deflection of the standard ammeter.

2,452,615
ELECTRIC SUPERVISORY APPARATUS
E. Craig Thomson, Boston, Mass., assignor to Photoswitch Incorporated, Cambridge, Mass., a corporation of Massachusetts
Application January 13, 1944, Serial No. 518,127
2 Claims. (Cl. 137—111)



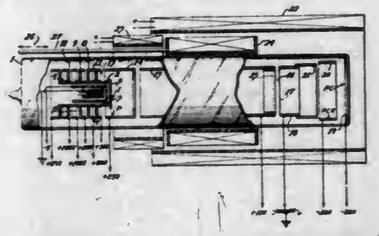
1. Battery operated electric supervisory apparatus for separating water from gasoline or the like comprising, in combination with a main container having an inlet to said container for mixed water and gasoline or the like, a water settling container connected with said main container, and a water outlet from said settling container; a cold cathode type electron discharge tube having an anode, a cathode, and a starting electrode; a battery having two end terminals and two auxiliary terminals intermediate said end terminals; a relay for closing said inlet when energized; the anode-cathode circuit of said discharge device being connected to said end terminals and including said relay; said auxiliary terminals having between them a relatively low potential, one of said auxiliary terminals being at a potential above and the other of said auxiliary terminals at a potential below the starting potential of said discharge device; a resistor connected at one end to the auxiliary terminal at less than starting potential and at the other end to said starting electrode; a probe electrode disposed in said water settling container above the height to which water may be permitted to rise in a separating operation, and connected to said starting electrode; and a connection from said auxiliary terminal at higher than starting potential to said water settling container and through said container to the water therein contained; whereby when said water touches said probe electrode, said terminal at higher than starting potential is connected to said starting electrode and said discharge tube is rendered conductive to energize said relay; said relatively low potential preventing sparking at said probe electrode when said water falls away therefrom.

2,452,616
ZIRCONIUM LAKES AND METHOD OF MAKING SAME
Eugene Wainer, Niagara Falls, N. Y., and Henry L. Van Mater, Highland Park, N. J., assignors to The Titanium Alloy Manufacturing Company, Niagara Falls, N. Y.
No Drawing. Application April 6, 1944, Serial No. 529,820
15 Claims. (Cl. 106—289)



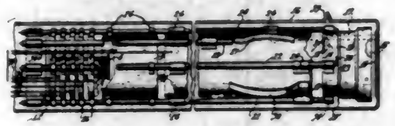
13. A method for producing a color lake comprising mixing a relatively insoluble hydrous basic zirconium compound as a substratum and a solution containing a dye having a sulphonic acid radical therein and thereafter adjusting the pH of the mixture to the neighborhood of 7, adding a surface tension reducing agent to the mix and then a water soluble zirconium salt added in successive increments until the dye is precipitated from the solution upon the substratum as a zirconium compound of the dye.

2,452,617
GAS OPERATED SHOULDER WEAPON
Joseph W. Wechsler, New York, N. Y.
Application July 23, 1945, Serial No. 606,696
10 Claims. (Cl. 89—140)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



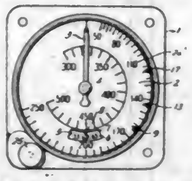
4. An automatic fire attachment for a rifle comprising a pair of slidably mounted rods, and a pivotally mounted lever connected to the adjacent ends of said rods to cause the rods to move in opposite directions, one of the rods having a portion adapted to be engaged by an operating part of the rifle to impart forward movement to said rod to thereby cause rearward movement of the other rod through said lever, and said last mentioned rod, when moved rearwardly, engaging a movable rifle part for holding the same inoperative.

2,452,618
SNUBBING DEVICE FOR CATAPULTS
David L. Weeks, Berkeley, Calif.
Application April 10, 1946, Serial No. 661,639
5 Claims. (Cl. 244—63)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



3. In a catapult apparatus including a launching car member and a track member for the car, a snubbing device comprising a fluid-filled cylinder mounted on one of said members and having a frangible seal closing an open end thereof, a piston mounted on the other of said members and having a tapered free end extending toward said seal and adapted to pierce said seal when said car member reaches a predetermined point on said track member, continued movement of said car member acting to force said piston into said cylinder, the diameter of said piston being slightly smaller than the inside diameter of the sealed end of said cylinder, whereby to force said fluid past said piston and out of said cylinder as the piston enters the cylinder, thus arresting movement of the car member.

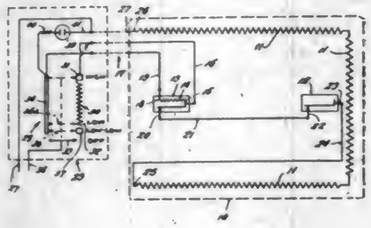
2,452,619
CATHODE-RAY TUBE
Paul K. Weimer, Princeton, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application February 7, 1946, Serial No. 646,076
2 Claims. (Cl. 250—164)



1. A cathode ray tube of the Orthicon type comprising a cathode and an anode for forming a beam of electrons, a semi-conducting target, a metal screen in front of the target, a photocathode and electric field producing means for forming a charge image on one surface of the target, field producing means for scanning electrons from said beam through said screen and over the other surface of said target to discharge said image, said screen being spaced from the target at such distance as to preclude the superimposing of screen image signals on the beam returning from the target through said screen.

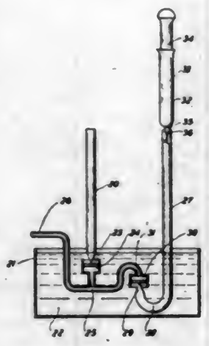
2,452,620
ELECTRODE SUPPORT IN TELEVISION TUBES
Paul K. Weimer, Princeton, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application November 14, 1946, Serial No. 709,734
6 Claims. (Cl. 250—165)

1. A television tube comprising an envelope containing a cathode ray beam gun, a mount for said gun at one end of the envelope, a photocathode at the opposite end of the envelope, a target between the gun and the photocathode, a cylinder anode adapted to accelerate the photoelectrons from the photocathode to said target, a fine mesh screen across the cylinder anode adjacent one side of the target for collecting secondary electrons emitted by the target, a second cylinder anode of high resistance between the target and the gun, a fine mesh screen across the second mentioned cylinder anode adjacent the other side of the target, insulation rods secured to the gun end of said envelope supporting said mount and said cylinder anodes.



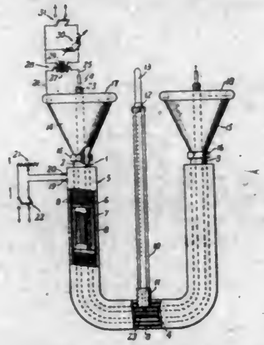
2,452,621
FLIGHT OPERATION INDICATOR
Joseph Weissenbach, Los Angeles, Calif.
Application March 29, 1946, Serial No. 658,190
4 Claims. (Cl. 73—178)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

4. In an airspeed indicator having a dial with airspeed graduations and a cooperating pointer adapted to indicate the instant value of airspeed, auxiliary indicators respectively movable over zones of the airspeed dial graduations such that coincidence of the pointer with the respective auxiliary indicators indicates that the instant airspeed corresponds to the desired airspeed for a selected flight performance condition, a gross weight indicating means settable for indicating the gross weight of the aircraft, gearing interconnecting the auxiliary indicators and the gross weight indicating means such that the settings of the auxiliary indicators bear a functional relation to the setting of the gross weight indicating means, and manual means for actuating the gearing.



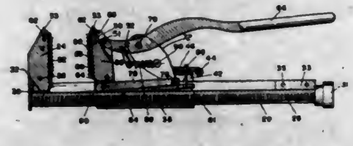
2,452,622
HEATING PAD
Joseph Youhouse, Fairfield, Conn., assignor to Casco Products Corporation, Bridgeport, Conn., a corporation of Connecticut
Application May 10, 1946, Serial No. 668,802
15 Claims. (Cl. 219—46)

1. In a heating device, a thermostatic switch; a heater for the thermostatic switch; a resistor, said heater and resistor at one point each having a common connection; a pair of current supply wires; means for selectively connecting one of the current supply wires either solely to another point on the heater, or to the said other point on the heater and simultaneously to another point on



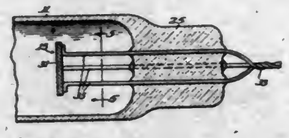
the resistor, or to the said common connection of the resistor and heater; and electric heating means connected with the said common connection of the resistor and heater and with the other current supply wire, the said thermostatic switch controlling the circuit of the said heating means.

2,452,623
APPARATUS FOR TRANSFER OF LIGHT LIQUID
William S. Young, Philadelphia, Pa., assignor to Consolidated Engineering Corporation, Pasadena, Calif., a corporation of California
Application January 19, 1946, Serial No. 642,376
12 Claims. (Cl. 137—78)



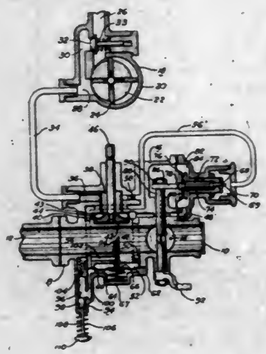
1. In apparatus for transferring a light liquid, the combination which comprises a conduit, a container, a pool of heavy liquid that is substantially immiscible with the light liquid disposed in the container, a porous member communicating with the conduit and covered by the pool, the member being pervious to the light liquid but impervious to the heavy liquid, a second container for the light liquid to be transferred consisting of a tube of small bore having an open end for contacting the portion of the porous member covered by the pool, and means for producing a pressure differential between the second container and the conduit to induce flow of the light liquid from the second container to the conduit through the tube and the porous member when the latter two are in contact with each other.

2,452,624
APPARATUS FOR TESTING INSULATION OF ELECTRICAL CABLES
Karl H. Zimmermann, Nutley, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application June 11, 1945, Serial No. 598,688
1 Claim. (Cl. 175—183)



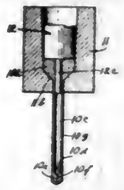
In test apparatus of the character described, the combination of, a substantially U-shaped tube having legs adapted to be positioned upright with openings at the upper ends of its legs whereby an insulated conductor may be passed through the tube, a pair of end-bells attached to said upper ends and flaring outwardly therefrom, a heater jacket formed by an electric heater covered by heat-insulating material and substantially enclosing said tube whereby its temperature may be controlled, a tube parallel to said legs and open at its lower end to the central portion of said tube thereby to provide a thermometer-well, and means to impress a test potential between the tube and a conductor placed therein whereby the insulation on the conductor is tested.

2,452,625
SCREW AND TOGGLE ADJUSTED WRENCH AND CLAMP
Henry Alpers, Columbus, Nebr.
Application October 25, 1945, Serial No. 624,420
2 Claims. (Cl. 81—84)



1. A device of the character described, comprising a shank which is U-shaped in cross-section having opposed jaw receiving portions, a fixed jaw secured intermediate of and to said jaw portions, a member slidably mounted on said shank, a movable jaw pivoted to said member, a hand lever pivoted at one end to said movable jaw, supporting arms intermediate the sides of said slidable member, means carried by said arms for pivotally supporting said hand lever intermediately of said arms, a screw mounted in said shank and clutch means pivotally mounted on said supporting arms adapted to co-act with said screw to lock said movable jaw in fixed position with relation to said fixed jaw said clutch means comprising a block member pivoted at one end to said movable jaw and at the other end to said supporting arms and a plate member secured to the undersurface of said block member having screw threads therein to coact with said screw.

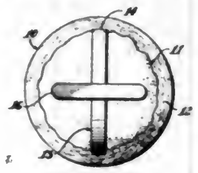
2,452,626
ELECTRON EMITTER
Zed J. Atlee, Elmhurst, Ill., assignor to General Electric X-Ray Corporation, Chicago, Ill., a corporation of New York
Application March 3, 1945, Serial No. 580,818
1 Claim. (Cl. 176—126)



A gaseous conduction device comprising a sealed envelope of glass containing a gas, an electron emitting member comprising columbium, and means for supporting said member on and in said envelope comprising a length of beryllium wire electrically and mechanically secured to said member within said envelope, said wire extending outwardly of the envelope and being sealed to the envelope and thereby supported thereon.

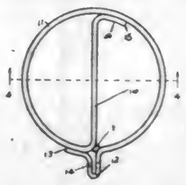
2,452,627
FUEL SUPPLY SYSTEM
Frederik Barfod and Emil O. Wirth, South Bend, Ind., assignors to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application June 6, 1946, Serial No. 674,868
13 Claims. (Cl. 123—119)

1. In a fuel supply system for an engine, a conduit having a discharge nozzle for delivering fuel to the engine, a means driven by said engine for varying the pressure of the fuel in said conduit in accordance with engine speed, a restriction in said conduit posterior to said first mentioned means for metering the fuel delivered to said engine, and a means communicating with the inlet and outlet sides of the first mentioned means for controlling the metering head across said restriction, said last mentioned means being regulated in accordance with throttle position.



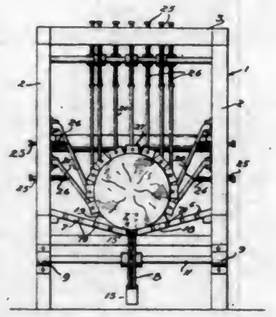
2,452,628
METHOD OF MAKING HOLLOW POPPET VALVES
Kenneth M. Bartlett and Edward G. Pekarek, Cleveland, Ohio, assignors to Thompson Products, Inc., Cleveland, Ohio, a corporation of Ohio
Application August 25, 1944, Serial No. 551,179
2 Claims. (Cl. 29—156.7)

1. The method of making bodies for hollow poppet valves from thick-walled seamless tubing having an outside diameter less than the diameter desired for the finished valve head and an inside diameter greater than the desired diameter for stem cavity of the finished valve stem which comprises inserting a relatively short length of said tubing into a tapered die having a tapered extrusion throat converging to a circular hole of valve stem diameter, inserting a short mandrel into said tube to terminate intermediate the ends of the tube, centering the mandrel in the tube in spaced relation from the interior tube wall, pressing an end face of the tube without deforming the contour of said end face to force the opposite end through said extrusion throat and to collapse the tube into conformity with the tapered die wall, simultaneously collapsing said opposite end of the tube in advance of the mandrel to form a solid leading end on the tube, extruding a portion of the collapsed tube through said hole to form a solid valve stem end portion, aligning the leading end of the mandrel in the central portion of said circular hole, continuing the extruding operation around said mandrel to form a hollow valve stem of desired length, terminating the extruding operation before the pressed end portion of the tube has been forced through the extrusion throat to leave a head of appreciable mass on the tube and having a neck portion conforming to the shape of the extrusion throat, removing the mandrel from the resulting blank, removing the blank from the die, seating the head of the blank in a coining die having a die cavity of desired valve head and neck contour, inserting another mandrel into the head end of the blank, and coining the head end of the blank around said second mandrel to increase the diameter of the head of the blank and to form the head into the desired valve head shape without deforming the original contour of the end face of the tube.



2,452,629
CAKE PROTECTING DEVICE
Joseph J. Bonekamp, Cincinnati, Ohio
Application June 24, 1946, Serial No. 678,747
1 Claim. (Cl. 99—171)

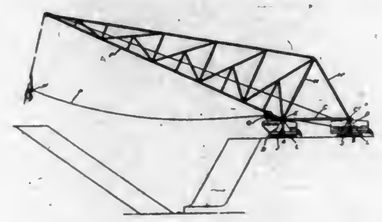
A protective device for bakery products having a soft upper surface comprising a pair of strips of cardboard pivotally joined together adjacent their central points to permit adjustment of said strips at right angles to one another with their flat surfaces contacting about the pivot, one of said strips being longer than the other, the longer of said strips being adapted to be bent to a bowed configuration to permit the ends thereof to be inserted into the upper surface of the bakery products while the main body of said longer strip



and the entire length of the shorter strip are out of contact with said upper surface.

2,452,630
TUBULAR FENCE POST CONSTRUCTION
Walter L. Burritt, Omaha, Nebr.
Application March 29, 1944, Serial No. 528,532
6 Claims. (Cl. 189—23)

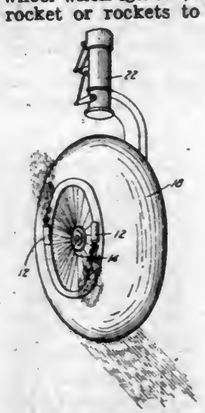
1. A sheet-metal post formed of a single sheet of metal rolled into a configuration having a generally tubular portion and a bracing portion, said sheet being elongated and one longitudinal edge of said sheet being disposed overlapping the outer side of said tubular portion, the other longitudinal edge of said sheet being disposed against the inner side of said tubular portion, a longitudinal section of said tubular portion being folded longitudinally so that the two parts of said longitudinal section are disposed in approximate parallelism with respect to each other, said two parts having spaced apertures therethrough, the apertures of one of said parts being in alignment with the apertures in the other of said parts.



2,452,631
SELF-ADJUSTING WOOD PEELER
Curtice B. Cameron, Laurel, Miss.
Application May 4, 1946, Serial No. 667,326
3 Claims. (Cl. 144—208)

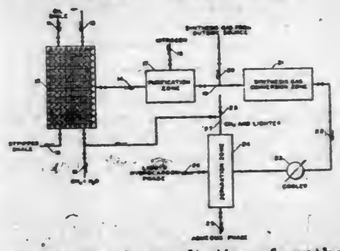
1. A self-adjusting log peeler including a supporting frame, a V-shaped slotted trough mount-

ed longitudinally thereof and having longitudinally slotted opposite sides, an endless conveyor disposed between the opposite sides at the apex of said trough, means on said conveyor for engaging the log to move the same longitudinally of said trough, an undercutter plate disposed transversely of the trough adjacent its apex for removing the bark from the lower portion of a log as it is moved longitudinally along the trough, a plurality of cutter elements supported by arms pivoted on said frame, said cutter elements engaging the opposite sides and top of the log to cut the bark therefrom, and means mounted between said arms and frame to resiliently bias said cutter elements towards said log.



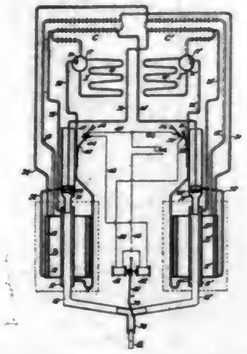
2,452,632
EXCAVATING MACHINE
Colin McLeod Cameron, Ipswich, England, assignor to Ransomes & Rapier Limited, Ipswich, England, a company of Great Britain
Application July 24, 1945, Serial No. 606,827
In Great Britain April 13, 1944
5 Claims. (Cl. 37—116)

1. An excavating machine of the drag-line type provided with a drag-line bucket and comprising in combination two separate base structures each adapted to rest on the ground and situated one in front of the other and spaced apart in the longitudinal direction of the machine each of these structures comprising a base member, a centre post, a circular roller path on the base member and an upper frame rotatable about the centre post on this path on the base, a boom having its heel connected to the upper part of the front base structure, an A frame erected on the said two base structures with the forward end of the horizontal member of this frame connected to the said front base structure, a connection including a universal joint between the rear end of the horizontal member of the said A frame and the top of the upper frame of the said rear base structure, a connection between the boom and the apex of the said A frame, means for individually moving each base structure over the ground, and mechanism disposed on the said rear base structure for controlling the operation of the drag-line bucket.



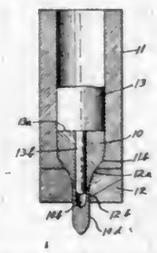
2,452,633
MEANS FOR CAUSING PREROTATION OF AIRCRAFT WHEELS
John R. Cautley, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application February 17, 1945, Serial No. 578,511
7 Claims. (Cl. 244—103)

1. Aircraft wheel pre-rotation means comprising one or more rockets secured to the wheel at a distance from its axis of rotation and so constructed and directed as to develop a propulsive force on said wheel when ignited, and means for igniting said rocket or rockets to develop such



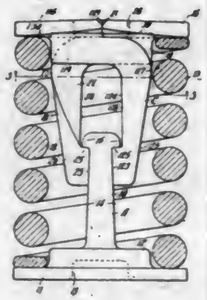
propulsive force for rotating said wheel prior to landing the aircraft.

2,452,634
FISCHER-TROPSCH SYNTHESIS GAS FROM OIL SHALE
Alfred Clark, Bartlesville, Okla., assignor to Phillips Petroleum Company, a corporation of Delaware
Application August 25, 1947, Serial No. 770,534
10 Claims. (Cl. 260—449.6)



1. A process for the production of synthesis gas which comprises introducing simultaneously particles of oil shale of a size not exceeding about 2 mesh and an oxygen-containing gas into the upper portion of a reaction zone; maintaining a temperature in said upper portion of said reaction zone in the range of about 1500 to 3000° F.; maintaining a pressure in said reaction zone in the range of about atmospheric and about 500 pounds per square inch; maintaining the ratio of oil shale to oxygen in said oxygen-containing gas such that the carbonaceous material in the oil shale will be substantially completely converted to carbon monoxide and hydrogen, passing the resulting hot spent shale to the lower portion of said reaction zone; maintaining the temperature in said lower portion of said reaction zone in the range between about 1600 and 2000° F.; introducing a mixture comprising methane and water into the lower portion of said reaction zone, causing said mixture to pass upwardly through said lower portion of said reaction zone and countercurrently to said hot spent shale whereby said methane-water mixture is converted to synthesis gas, withdrawing from an intermediate portion of said reaction zone synthesis gas resulting from the reactions in both the upper and lower portions of said reaction zone, and removing the spent shale from the reaction zone.

2,452,635
ABSORPTION REFRIGERATING SYSTEM
Curtis C. Coons, North Canton, Ohio, assignor to The Hoover Company, North Canton, Ohio, a corporation of Ohio
Application September 27, 1943, Serial No. 503,866
14 Claims. (Cl. 62—5)



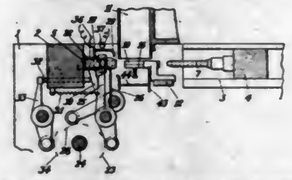
1. That method of producing refrigeration utilizing absorber-generators operating alternately on the absorbing and generating phases, which includes the steps of quickly cooling the absorber-generators at the ends of their generating phases with refrigerant evolved from the generator-absorbers to be cooled and subsequently continuing cooling of the absorber-generator operating on the absorbing phase with refrigerant evolved in the associated absorber-generator.

2,452,636
METHOD OF MAKING HOLLOW VALVES
John E. Cunningham and Robert A. Kempe, Cleveland, Ohio, assignors to Thompson Products, Inc., Cleveland, Ohio, a corporation of Ohio
Application September 2, 1944, Serial No. 552,394
2 Claims. (Cl. 29—156.7)

2. The method of making bodies for hollow poppet valves from a solid cylindrical metal billet having a diameter intermediate the stem and head diameter of the valve which comprises piercing the central portion of one end face of the solid billet to a depth inwardly from said one end face, simultaneously extruding the opposite face of the billet at a much slower rate than the rate of piercing for positioning the piercing tool in the path of the extruding metal, terminating the piercing operation before the piercing tool penetrates the extruding end of the billet, continuing the extruding operation alone to extrude a portion of the billet only to valve stem diameter size while said piercing tool prevents the extruding metal from collapsing to maintain the pierced hole in the extruded valve stem, terminating the extruding operation materially short of said one end face of the billet without substantially deforming said end face to maintain an end on the extruded member having the same diameter as the original billet and said end having an average axial depth not appreciably less than the radial thickness thereof, coining the non-extruded end of the billet between coining surfaces which shape said end into valve head size and shape to provide a valve head with an opening bounded by an upstanding rim wall having an end face terminating in the original end face of said one end of the billet.

2,452,637
FRICTION SHOCK ABSORBER
George E. Dath, Chicago, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a corporation of Delaware
Application February 8, 1944, Serial No. 521,548
7 Claims. (Cl. 267—9)

1. In a friction shock absorber, the combination with a friction post; of tiltable friction shoes embracing said post at opposite sides, each shoe comprising a friction plate section having a base portion extending laterally therefrom, the base portions of said shoes comprising counterpart plate sections, said counterpart plate sections being in edge to edge engagement at their inner sides, said counterpart plate sections having crowned inner surfaces and being fulcrumed at their inner side edges, said shoes and post being slidable lengthwise with respect to each other; and a spring opposing relative movement of the shoes and post, said spring bearing on the crowns of said counterpart plate portions of the base portions of said shoes to resist tilting movement of the latter.



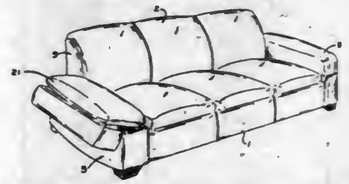
2,452,638
PACKAGE EXTRACTOR
Harry S. Drum and William C. Dodson, Abington, and William H. Jaxheimer, Philadelphia, Pa., assignors to Smith, Drum & Company, Philadelphia, Pa., a corporation of Pennsylvania
Application February 7, 1945, Serial No. 576,668
7 Claims. (Cl. 34—58)

1. An extractor for yarn packages wound on tubes comprising a rotatable plate, a plurality of individual yarn package receptacles having perforations in the side thereof, means to attach each receptacle to said plate and spindles adapted to telescopically receive the respective tubes of said packages, said spindles respectively rising axially from the bottoms of said receptacles

for telescopic mounting of said yarn packages respectively.

2,452,639
MACHINE FOR PRODUCING A VENT IN CARTRIDGE CASES
Gunnar Ekström, Stockholm, and Gustaf Örström, Alsten, Sweden, assignors to Arenco Aktiebolag, Stockholm, Sweden, a Swedish joint-stock company
Application September 21, 1944, Serial No. 555,102
In Sweden December 7, 1942
12 Claims. (Cl. 164—88)

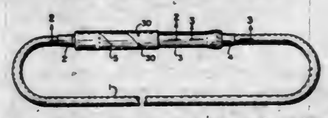
1. In a machine for producing a vent in the bottom of metallic cartridge-cases, the combination with two punching tools adapted to open and close relatively to one another, of a sleeve for exteriorly guiding a cartridge-case, mounted on one of said tools, into proper position relatively to the second of said tools when closing, said first-mentioned tool being capable of entering a cartridge-case into contact with the bottom thereof.



2,452,640
ROOF AND WALL STRUCTURE
Armin Elmendorf, Winnetka, Ill.
Application May 1, 1946, Serial No. 666,300
4 Claims. (Cl. 108—1)

1. A wall or roof structure including two panels placed edge to edge, each panel having on one side a sheathing, the sheathings on both panels being extended in the form of flanges into the joint between the panels, the meeting edges of the panels being shaped to create a tunnel into which th flanges project, a separate trough extending lengthwise through the tunnel with said flanges extending into the same, the trough being of such a width that free space is left in the trough beside the flange, the panels being further shaped at said edges to produce on the second side thereof, a wide, deep, open groove following the joint, a strip in said groove, and fastenings passing through said strip into both panels.

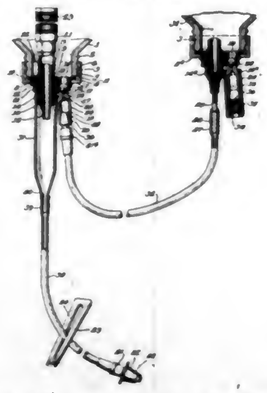
2,452,641
IODIZED SALT COMPOSITION
William H. Engels, Westfield, N. J., assignor to Merck & Co., Inc., Rahway, N. J., a corporation of New Jersey
No Drawing. Application March 23, 1946, Serial No. 656,786
6 Claims. (Cl. 99—143)



1. An iodized salt composition, stabilized against iodine loss on storage, comprising common salt, an inorganic iodide, and activated carbon.

2,452,642
FOLDING ARM DAVENPORT
Albert L. Ewing, Continental, Ohio
Application April 2, 1947, Serial No. 738,846
5 Claims. (Cl. 155—113)

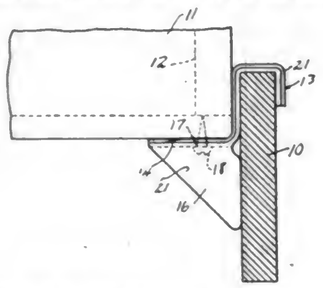
1. In a davenport having a substantially horizontal seat portion, a folding arm comprising, in combination, a hollow stationary arm frame erected adjacent the end of said seat portion and having its upper open end approximately on the plane of the seat portion, a hollow folding arm frame having an open bottom and hinged to the upper end of said stationary frame along their outer horizontal joining edges, and a pair of support plates adapted to be concealed within said arm frames, each of said plates being pivotally connected to one of said arm frames between the ends thereof and adjacent the inner horizontal joining edges of said frames, said plates being pivotally linked to each other along their other edges parallel to the inner and outer edges of said arm frames, said support plates serving to limit outward swinging movement of said folding arm frame and to support a pillow at an incline to the end of said seat portion, when said arm is unfolded.



2,452,643
DISPOSABLE VENOCLYSIS SET
Mack R. Fields, Chicago, Ill., assignor to Abbott Laboratories, North Chicago, Ill., a corporation of Illinois
Application May 23, 1946, Serial No. 671,736
5 Claims. (Cl. 128—214)

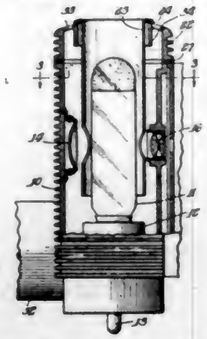
2. A venoclysis set comprising a length of flexible resilient tubing, an adapter tube of flexible resilient material having a larger internal diameter than said length of tubing, and a needle

adapter, said adapter tube and said needel adapter being secured respectively to the opposite ends of said length of tubing, said needle adapter having a stem portion inserted into one end of said length of tubing and a portion projecting from said tubing, and a tubular connector interconnecting said adapter tube and said length of tubing, said connector having a stem portion seated tightly in the other end of said length of tubing and a portion projecting from said last mentioned tubing end, said projecting portion of said connector having an external diameter which is larger than the internal diameter of said adapter tube and being inserted into said adapter tube with the latter stretched around and resiliently gripping said projecting portion of said connector.



2,452,644
APPARATUS FOR INTRAVENOUS ADMINISTRATION OF LIQUIDS
Mack R. Fields, Chicago, Ill., assignor to Abbott Laboratories, North Chicago, Ill., a corporation of Illinois
Application October 5, 1946, Serial No. 701,519
8 Claims. (Cl. 128—214)

1. Apparatus for intravenous administration of liquids, comprising a length of flexible tubing, a fitting on one end of said tubing for detachable connection to a needle, a bottle cap provided with means for detachably connecting the cap to a bottle, an outwardly projecting outlet nozzle for discharging liquid from a bottle to which the cap may be attached, and with an inlet passageway for permitting fluid to enter said bottle, and an apertured fitting carried by said cap in communication with said inlet passageway, said apertured fitting being a tubular member having an end portion seated in said inlet passageway, a check valve structure in the opening of said tubular member for preventing discharge of fluid from said bottle through said inlet opening, and outer and inner surfaces on its other end portion respectively adapted to detachably receive an air filter and a tube end fitting substantially as described.

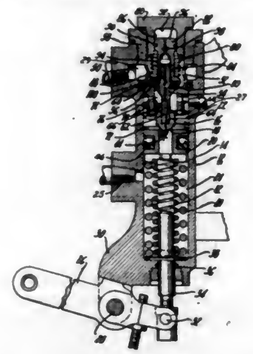


2,452,645
BED SPRING SUPPORT
Maurice S. Firsel, Birmingham, Ala.
Application December 7, 1946, Serial No. 714,687
3 Claims. (Cl. 5—207)

1. Means for supporting a bed spring from a bedstead rail comprising a unitary support made from a single piece of metal plate and comprising a hook portion for engaging the bedstead rail, a horizontal shelf portion for receiving the side frame of the spring, braces turned downwardly from the shelf portion for engaging the side of the

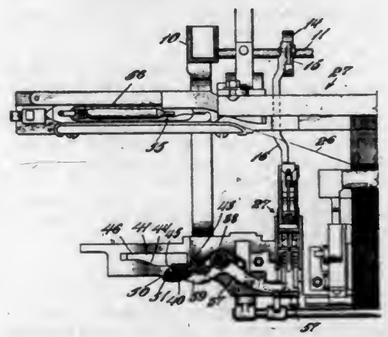
bedstead rail, and a reinforcing rib formed on the support and extending midway thereof substantially from the tip of the hook portion to the end of the shelf portion.

2,452,646
LAMP HOUSING FOR FILM PROJECTORS
Leo Frankel, Chicago, Ill.
Application May 29, 1944, Serial No. 537,782
5 Claims. (Cl. 88—24)



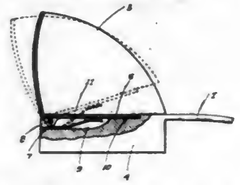
1. In a projector, a lamp housing including an apertured housing cap, low heat conductivity material between said housing and cap, a lamp disposed vertically in the housing, a casing suspended from the cap and surrounding the lamp, and means for forcing air through said housing and out through said cap, a portion of such air passing between the lamp and such casing.

2,452,647
CONTROL VALVE
Charles V. Gagen, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application November 25, 1944, Serial No. 565,068
6 Claims. (Cl. 303—54)



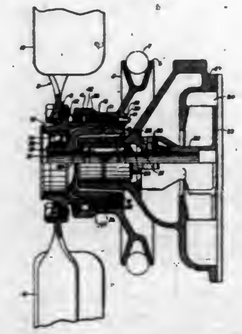
1. In a control valve for a fluid pressure system, said valve having an inlet port adapted to be connected to a source of pressure, an exhaust port adapted to be connected to a reservoir, an outlet port adapted to be connected to a controlled motor, and exhaust valve means controlling communication between the outlet port and the exhaust port; an inlet valve construction for controlling communication between the inlet port and the outlet port comprising a valve element cutting off such communication when seated and held

on its seat by the pressure of the aforesaid pressure source, and a piston member connected to said valve element and having two opposed pressure responsive surfaces, the first of which is subjected to the pressure prevailing in the pressure source to assist in moving the valve element from its seat, and the second of which is subjected to the pressure prevailing in the motor to gradually counteract the effect of the pressure acting on



said first piston surface as the pressure in the motor increases, said piston member and valve element being provided with a passage extending therethrough to permit communication of the motor side of the inlet valve with said second piston surface, said passage having a cross-sectional area arranged to restrict the flow of fluid therethrough in order that pressure increases occurring in the motor will not be immediately effective in urging the valve element toward its seat.

2,452,648
CONTROL FOR STOPPING LOOMS
Joseph M. Godreau, Moosup, Conn.
Application November 21, 1946, Serial No. 711,389
8 Claims. (Cl. 139—377)



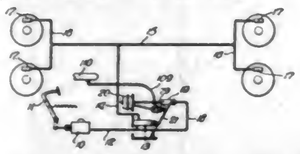
1. In a loom, a shipper lever, a spring to move the lever in one direction, a shipper lock comprising, a body having a slot in which said lever is movable with an offset notch to receive said lever and providing a shoulder to engage said lever to lock the lever in operating position against the action of said spring, means to move said lever out of said notch upon failure of the filling and means to catch the shipper lever when moved from said shoulder and delay its movement by said spring.

2,452,649
SLIPPER
Charles H. Graves, Stockton, Calif.
Application November 30, 1946, Serial No. 713,366
1 Claim. (Cl. 36—2.5)

In footwear which includes a sole having a forward and a rear portion, an initially separate, forwardly opening counter unit disposed above the rear portion of the sole, and means hinging the counter unit for rocking motion between a rearwardly tilted position and a forward upstanding position; the counter unit including a bottom heel plate and the hinge being in a plane below the top of the sole, the latter being recessed to receive said heel plate.

2,452,650
SPEED CLUTCH REGULATION OF FAN AND PUMP FOR COOLING SYSTEMS
Harry R. Greenlee, Indianapolis, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a corporation of Delaware
Application August 6, 1945, Serial No. 609,271
4 Claims. (Cl. 123—175)

4. In a fluid circulatory system for an internal combustion engine or the like having a pump chamber, the combination of a driving means comprising a pair of coaxially extending sleeve portions, a shaft fixed at one end to said driving means for rotation therewith and having a pump at its other end adapted to be disposed in said pump chamber, driven means having a sleeve extending coaxially of and between the pair of sleeves of said driving means, said sleeve of said driven means and one of the pair of sleeves of said driving means having clutch surfaces arranged in spaced apart and overlapping relation, a fan drivingly connected to said driven means, bearing means between said driving and driven means for rotatably supporting the latter for rotation upon said driving means, a coil spring clutch disposed between the clutch surfaces of said driving and driven means and being fixed at one end to said driving means for rotation therewith, said coil at its other end being pre-stressed to normally engage the clutch surface of said driven means to clutch said driving and driven means together for



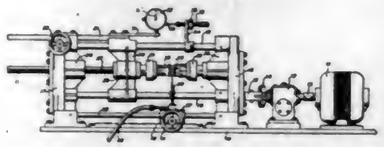
conjoint rotation, and said other end of said coil being adapted to be disengaged from the clutch surface of said driven means by centrifugal force upon a predetermined speed of rotation of said driving means.

2,452,651

HYDRAULIC PRESSURE BOOSTING MEANS FOR BRAKING SYSTEMS

Ralph R. Gunderson, Chicago, Ill.

Application April 21, 1944, Serial No. 532,131
9 Claims. (Cl. 60—54.5)



1. In a braking system of the character described, a master cylinder and means for displacing brake fluid from said cylinder under pressure, wheel cylinders, a hydraulic power unit connected to said wheel cylinders, a lever for operating said unit, a booster motor having power operating connection with said lever, and means on said lever for rendering said motor operative and inoperative comprising means subject to pressure of brake fluid displaced from said master cylinder and acting in opposition to the power exerted by said motor on the lever.

2,452,652

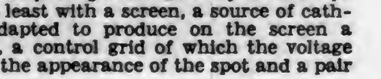
GLASS SEALING METHOD AND MACHINE

Rolf K. Hansen, Bloomingdale, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Application August 1, 1944, Serial No. 547,638
7 Claims. (Cl. 49—1)

1. An external measuring device for determining the internal space relation between parallel metallic electrodes adapted to be sealed into an enclosing vessel formed of separate parts containing said electrodes individually, comprising opposed rotatable supporting means for the separate parts of said vessel, spindle means extending beyond said supporting means and adapted to abut against said parallel metallic electrodes, means for slidably moving one of said supporting means with respect to the other, an arm parallel to said slidable supporting means and movable therewith, an indicator carried by said arm, and a stop member opposite said indicator in relation to said other supporting means.

5. The method of accurately gauging the space relation between internal electrode surfaces supported in separate sections of a vessel adapted to be splice-sealed between said surfaces in a glass sealing lathe having opposed rotatable chucks including projecting spindles and a gauge indicator carried by one of said chucks comprises, inserting a hand gauge between the spindles to record an identical measurement on said indicator, removing the hand gauge and securing said sections in the chucks with the electrodes seated on the ends of said spindles, advancing said sections together in abutting splice relation, said electrode surfaces being spaced apart within said sections, heating the splice to a plastic state, moving one of said chucks in an axial direction until the previously recorded measurement appears on said indicator, and fusing the splice while maintaining said indicator at the recorded measurement.



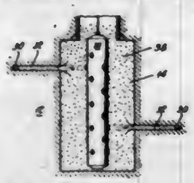
2,452,653

2-ALKYLIDENE-3-KETO-4-ACYLAMIDO-TETRAHYDROTHIOPHENE

Stanton A. Harris, Westfield, and Karl Folkers, Plainfield, N. J., assignors to Merck & Co., Inc., Rahway, N. J., a corporation of New Jersey

No Drawing. Application September 16, 1944, Serial No. 554,452
20 Claims. (Cl. 260—329)

2. A compound represented by the formula:



wherein R is an acyl group, R' is an alkyl radical, and *n* is a small integer.

2,452,654

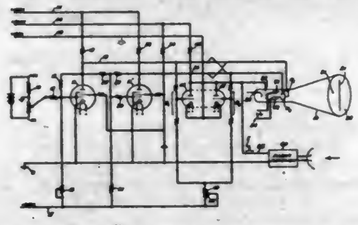
METHOD OF GRAVELING WELLS

Everett P. Hayes and Allen D. Garrison, Houston, Tex., assignors to Texaco Development Corporation, New York, N. Y., a corporation of Delaware

Application June 9, 1944, Serial No. 539,486
5 Claims. (Cl. 166—26)

5. The method of graveling a well having a well cavity in a producing formation which comprises lowering into said cavity a device of the gun-perforator type, filling the space around said device with granular material, shooting bullets from said device through the surrounding granular material into the walls of the producing formation whereby some of the granular material is drawn into the tubular passages formed in the formation back of said bullets, replacing said device with a well screen, and placing sufficient additional granular material in said cavity to fill the space around said screen.

2,452,655



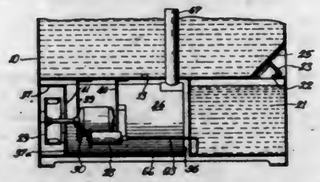
CATHODE-RAY OSCILLOSCOPE CIRCUIT

George Hecht, Astoria, N. Y., and Larned A. Meacham, Summit, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Application April 25, 1947, Serial No. 743,980
5 Claims. (Cl. 315—22)

1. A cathode-ray oscilloscope circuit responsive to a source of voltage varying in each direction from zero, comprising a cathode-ray oscilloscope provided at least with a screen, a source of cathode-rays adapted to produce on the screen a bright spot, a control grid of which the voltage determines the appearance of the spot and a pair

of horizontal deflecting plates, a phase inverter circuit controlled by the varying voltage to apply to the plates separately voltages varying in proportion to the varying voltage equally and oppositely from a normal value, means for applying



to the control grid a voltage normally adequate to insure the appearance of the spot and means controlled by the inverter circuit to reduce the control grid voltage when either of the plate voltages departs positively by a prescribed amount from the normal value.

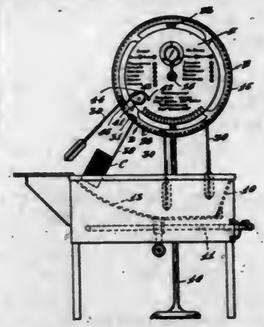
2,452,656

PORTABLE LIQUID HEATER

Harry B. Holthouse, Chicago, Ill., assignor to Motorola, Inc., a corporation of Illinois

Application July 17, 1943, Serial No. 495,152
1 Claim. (Cl. 126—350)

A self-contained portable liquid heater comprising a container provided with a liquid chamber, a partition wall extending between the side walls of said container to act as the bottom wall of said liquid chamber and to define a compartment beneath said wall, a heating unit disposed in said compartment and provided with means defining a combustion chamber having a tubular outer wall, a fuel reservoir disposed in said compartment, said heating unit including means in said compartment for delivering fuel from said reservoir and air for combustion to said combustion chamber, a jacket enclosing said tubular wall to define therewith a sealed liquid heating chamber, inlet and outlet conduits extending through said partition wall, said conduits having open ends communicating with said liquid chamber and opposite open ends communicating with said liquid heating chamber, a partition wall extending through said liquid heating chamber between said opposite ends of said conduits to provide for circulation of the liquid from said inlet conduit through said heating chamber to said outlet conduit, and staggered heat radiating fins alternately extending inwardly from opposite ends of said heating chamber to cause the liquid circulating through said heating chamber to follow a sinuous path.



2,452,657

FOOD PROCESSING APPARATUS

Hubert A. Hooper, Brantford, Ontario, Canada

Application April 23, 1945, Serial No. 589,845
8 Claims. (Cl. 99—343)

1. Food processing apparatus used in combination with a container carrying a processing medium, comprising a rotary member disposed substantially in a vertical plane, circumferentially spaced apart means on said rotary member for detachably carrying a shank designed for moving a food carrier, a graduated scale in connection with said rotary member coinciding with a lower arc of the latter and indicating interval cooking periods for various foods, said shank carrying

means, on the rotary member, moving arcuately past said scale, said shank being connected by an operator with said shank carrying means of the rotary member opposite to the graduation of the scale corresponding to the processing period required for the particular food to be processed, said rotary member lifting the food carrier from the processing medium when said shank receiving means moves beyond the end of said scale.

2,452,658

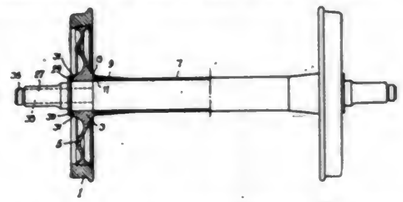
MUSICAL INSTRUMENT

Hal Horne, New York, N. Y.

Application December 12, 1944, Serial No. 567,834
5 Claims. (Cl. 46—178)

1. A musical instrument which comprises a casing which has an inlet opening, the wall of said casing comprising a plurality of assembled shells, said wall being vibrant, a blade spring removably located at said inlet opening, said spring having external legs which are external to the interior space of said casing, said spring having internal legs which are located in said interior space, said spring having transverse legs which obstruct a part of said inlet opening, said external legs resiliently biasing said shells against each other, said shells being separable from each other, said blade spring being the sole means to hold said shells in assembled relation.

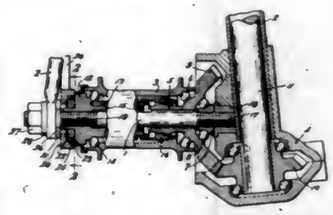
2,452,659



CAR WHEEL ASSEMBLY

Kristoffer Andreas Huldt, Stockholm, Sweden

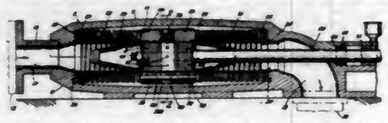
Application August 20, 1943, Serial No. 499,418
In Sweden June 26, 1942
Section 1, Public Law 690, August 8, 1946
Patent expires June 26, 1962
6 Claims. (Cl. 295—36)



2. In a car wheel assembly, a hollow axle of uniform wall thickness, a conical sleeve fitted upon

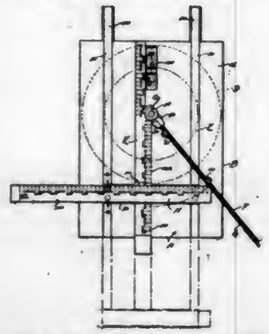
an end of the axle and welded thereto, the outer diameter of the sleeve increasing towards the end of the axle, a wheel hub having an inner diameter substantially equal to the inner diameter of said axle, and weld metal forming a butt connection of the inner side surface of the wheel

hub to the adjacent end surfaces of the axle and sleeve, the maximum diameter end of the sleeve being approximately equal to the diameter of the hub at its inner surface and the weld metal forming a smoothly tapering connection of the hub to the sleeve.



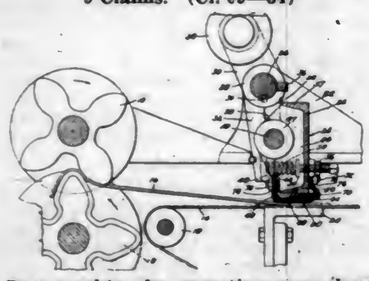
2,452,660
CONE BEARING ADJUSTMENT FOR GEAR-DRIVEN COASTER BRAKE
Chester L. Hussey, Belchertown, Mass., assignor to Savage Arms Corporation, Utica, N. Y., a corporation of Delaware
Application October 8, 1945, Serial No. 621,097
2 Claims. (Cl. 192—6)

1. In a coaster brake for bicycles of the gear drive type wherein the axle is stationary in the frame, and the wheel hub assembly comprises a driver sleeve with inner and outer ball bearings and a drive end cone member on the axle, together with a combined brake anchor cone member for a ball bearing at the brake end of said hub, together with an anchor arm secured to the frame to hold said brake anchor and cone member against rotation, the combination therewith of means rigidly fixing the drive end cone member to the axle, said brake anchor and cone member being threaded on said axle for rotatable adjustment thereon in adjusting the bearings between said cone members, and means for locking the rotatable adjustment of said brake anchor and cone member in a wide variety of angular increments within 360° of arc comprising a repositioning member carried by said brake anchor and cone member and multiple detent interlocking means between said repositioning member and anchor arm.



2,452,661
HOMOGENIZER
Aldon M. Kinney and Andrew N. Jergens, Cincinnati, Ohio
Application January 12, 1944, Serial No. 517,930
16 Claims. (Cl. 259—4)

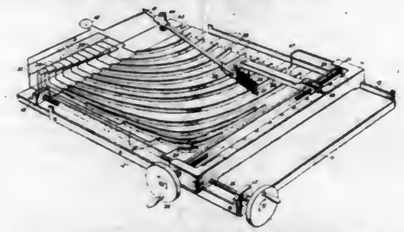
1. In an homogenizer the combination of a plurality of spaced compressor elements, means for



forcing material between the elements, and means for mutually reciprocating said elements.

2,452,662
TRIGONOMETRIC CALCULATOR
Anthony B. King, Brooklyn, N. Y.
Application December 11, 1943, Serial No. 513,942
12 Claims. (Cl. 33—97)

8. A calculating device for determining triangles, consisting of a bearing, a shaft thereon, a sleeve on the shaft, a protractor mounted on the sleeve to turn therewith, a sleeve mounted on the first sleeve, a protractor mounted on the second sleeve to turn therewith, scales arranged in cross wise relation to each other for cross-wise sliding relation, one of said scales also having a sliding movement parallel to the movement of the other scale, and arms connected with the sleeves and mounted to turn in a common horizontal plane over the scales as an indicator of delineations thereon, one of the scales having its reading edge disposed across the center of the protractors, and one of the protractors being smaller than the other protractor.

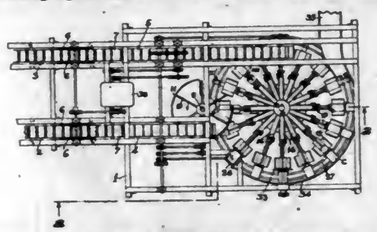


2,452,663
MACHINE WITH RESILIENT WORK HOLDING CLAMP
Cutler D. Knowlton, Rockport, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application September 27, 1947, Serial No. 776,547
9 Claims. (Cl. 69—34)

1. In a machine for operating upon sheet material such as hides, skins, and leather, work

treating and tensioning means, means for supporting a work piece for presentation of the latter to the work treating and tensioning means, and a work clamping device arranged to press said work piece against said supporting means, said device including a base part with a smooth surface and a work engaging part of wedge-like cross section, said work engaging part being arranged to slide on said smooth surface and wedge between the work piece and said surface.

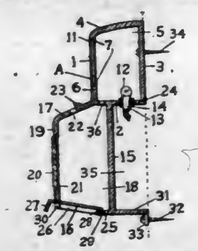
2,452,664
INTERPOLATING POTENTIAL DIVIDER AND COMPUTER
Walter Koenig, Jr., Clifton, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application October 20, 1943, Serial No. 506,933
24 Claims. (Cl. 235—61.5)



1. In a potential divider, a sequence of spaced conductive strips, means for applying to said strips electrical potentials proportional to the sequential relation of said strips, a contactor adapted to engage a minimum of any two adjacent ones of said strips and to interpose a resistive instrumentality having a potential dividing tap terminal between the points of contact with said strips, means for producing relative movement between said conductive strips and said contactor along and transversely of said strips, and means for indicating the electrical potential of said tap terminal.

2,452,665
PROCESS FOR THE SEPARATION OF METALS
William J. Kroll and Frederick E. Bacon, Niagara Falls, N. Y., assignors to Electro Metallurgical Company, a corporation of West Virginia
No Drawing. Application March 31, 1944, Serial No. 528,955
10 Claims. (Cl. 75—63)

3. In a method of reacting a solid metal alloy with a molten chloride of a metal having a substantially lesser affinity for chlorine than at least one ingredient of said alloy, the improvement which comprises contacting said alloy in a finely comminuted form with a molten mixture of said chloride with at least one chloride selected from the group consisting of the alkali metal chlorides and the alkaline earth metal chlorides.

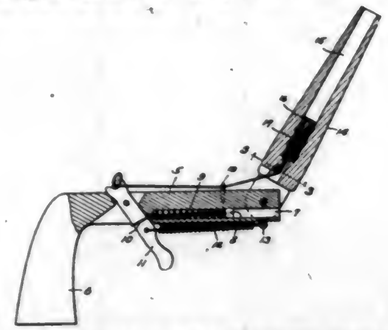


2,452,666
FISH CANNING MACHINE
Max K. Kuther, Monterey, and James Leonard Smith, Pacific Grove, Calif.
Application June 23, 1944, Serial No. 541,822
5 Claims. (Cl. 226—103)

1. In a produce canning machine, a carrier mounted for rotation about a substantially vertical axis, a plurality of radially disposed spaced arms on the carrier, an open top produce receiver on the outer end of each arm, means for delivering produce to the receivers, a compressing element pivoted on each arm and arranged for movement toward the produce receiver on said arm, whereby the produce in the receiver may be engaged and compressed, can delivery means for delivering open cans to the carrier, means for ar-

ranging the cans in positions whereby they may receive the compressed produce from the receivers, means on each arm and synchronized with the carrier and the compressing elements for forcing the produce from the receivers into the cans while the compressing elements are in engagement with the produce in the receivers.

2,452,667
ILLUMINATED MAILBOX AND HOUSE NUMBER
Arthur J. Lambert, Wichita, Kans.
Application December 23, 1946, Serial No. 717,975
2 Claims. (Cl. 40—132)

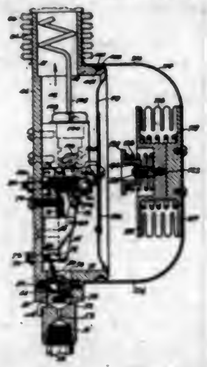


1. In an illuminated house fixture of the class described comprising a casing composed of an upper compartment and a lower compartment, the upper compartment having an open front providing a rectangular frame, opaque numbers and means to support the same in the opening of said frame, a light producing element positioned in the upper compartment and being below said numbers for illumination of said upper compartment, there being a slot between said compartments and communicating therewith for indirect illumination of said lower compartment, and a transparent window in the front of said lower compartment as visual means for the presence of mail in said compartment.

2,452,668
TOY GUN
George P. Lee, Stroudsburg, Pa.
Application March 17, 1944, Serial No. 526,940
1 Claim. (Cl. 124—27)

A toy gun comprising a main gun barrel, a gun barrel pivotally connected to the main gun barrel and adapted to be adjusted to various angular positions with respect to the main gun barrel, plungers operating in the barrels, springs within the barrels adapted to normally urge the plungers outwardly, a trigger pivotally mounted on the main gun barrel, a flexible member connected with the plunger operating within the pivoted

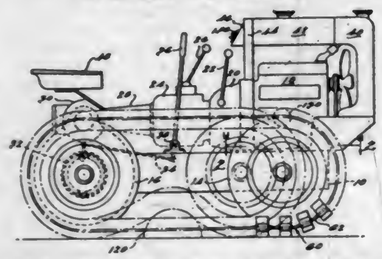
gun barrel, and being releasably connected to said trigger at a point above the pivot point of the trigger, a flexible member connected with the plunger of the main barrel and being connected with the trigger at a point below the pivot point of the trigger, a control spring connected with the main gun barrel and being connected with the



trigger at a point below the pivot point of the trigger, and adapted to normally urge the upper end of the trigger rearwardly against the action of the spring in the pivoted barrel, and said trigger adapted to release the spring in the pivoted barrel and simultaneously tension the control spring and spring in the main gun barrel, when the trigger is moved rearwardly, and the spring in the main gun barrel adapted to eject an article from the main gun barrel when the trigger is released.

2,452,669
COPOLYMERIZATION OF POLYESTERS AND VINYL COMPOUNDS
Max M. Levine, Rochester, N. Y., assignor, by mesne assignments, to Cornell Aeronautical Laboratory, Inc., Buffalo, N. Y., a corporation of New York
No Drawing. Application February 8, 1945, Serial No. 576,895
2 Claims. (Cl. 260—45.4)

1. In the copolymerization of a polyester taken from the class consisting of diethylene glycol maleate, triethylene glycol maleate, tetraethylene glycol maleate, hexamethylene glycol maleate, diethylene glycol chloromaleate, 2 ethyl 1, 3 hexanediol maleate and 2, 3 butanediol maleate with an ethylenic unsaturated compound copolymerizable with such polyester in the presence of an organic peroxide as a catalyst, the method of accelerating the copolymerization comprising conducting the same in the presence of an organic peroxide and 1 to 20 percent, based upon the weight of the copolymerizable material, of a compound of the group triethanolamine, triisopropanolamine and methyl diethanolamine.

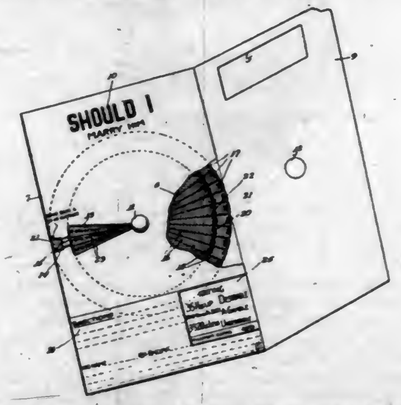


2,452,670
BREATHING APPARATUS
Phillip E. Meidenbauer, Jr., Lancaster, N. Y., assignor to Scott Aviation Corporation, Lancaster, N. Y., a corporation of New York
Application April 10, 1944, Serial No. 530,262
27 Claims. (Cl. 128—142)

1. A breathing apparatus comprising a respiration chamber having an inlet adapted to be connected with a supply of oxygen under pressure and an outlet adapted to be connected with the breathing system of a person, valve means for opening and closing said inlet, and control means for controlling the opening of said valve means for increasing the maximum pressure at which the lungs of said person are inflated in proportion to the altitude where the apparatus is used including a diaphragm which is operatively associated with said valve means, an aneroid device

which is inactive relative to said diaphragm in lower altitudes but operates in higher altitudes to resist the expansion of said diaphragm, and yielding buffer means interposed between said diaphragm and said aneroid device.

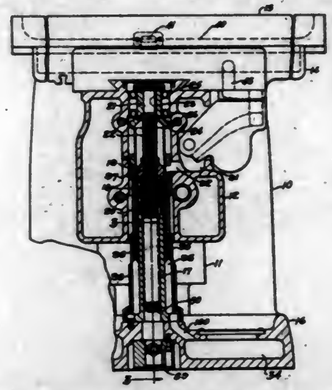
2,452,671
TRACK-LAYING TRACTOR
Lewis B. Merrill, Baldwin, Mich., assignor to Harry V. Tutton, Detroit, Mich.
Application April 1, 1944, Serial No. 529,087
16 Claims. (Cl. 305—9)



1. In a tractor vehicle of the class wherein a pair of wheels are provided at each side thereof and an endless track is trained over the wheels on each side of the vehicle, the combination with said tractor vehicle and one of the wheels on each side thereof of means for mounting each of said one wheels with respect to said vehicle operable to permit bodily shiftable movement thereof toward and from the other of said wheels on the same side of the vehicle, and fluid pressure means operable to constantly urge said shiftable wheels away from said others of said wheels.

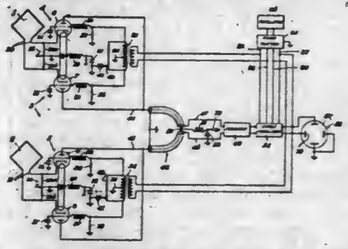
2,452,672
MANUFACTURE OF UNSATURATED ORGANIC COMPOUNDS
Samuel Aaron Miller and Walter Henry Groombridge, Spondon, near Derby, England, assignors, by mesne assignments, to Celanese Corporation of America, a corporation of Delaware
No Drawing. Application October 13, 1944, Serial No. 558,604. In Great Britain November 11, 1943
11 Claims. (Cl. 260—465.9)

1. A process for the production of alpha-beta unsaturated acids and their nitriles and esters, which comprises heating to boiling a mixture containing a lower fatty acid ester of a compound of formula $R_1R_2C(OH).CHR_3R_4$, where R_1, R_2 and R_3 are members of the group consisting of hydrogen atoms and lower alkyl radicles and R_4 is a member of the group consisting of the nitrile, carboxyl and esterified carboxyl radicles, and a free lower fatty acid, heating the vapor mixture so produced to a temperature at which the said ester decomposes into its lower fatty acid component and a compound of formula $R_1R_2C:CR_3R_4$, where R_1, R_2, R_3 and R_4 have the meanings set out above, separating from the vapor mixture so obtained at least a substantial part of its content of free lower fatty acid, and returning the separated free lower fatty acid to the boiling mixture.



2,452,673
QUESTION AND ANSWER RATING DEVICE
Louis Moscove, Chicago, Ill.
Application December 18, 1944, Serial No. 568,588
9 Claims. (Cl. 273—161)

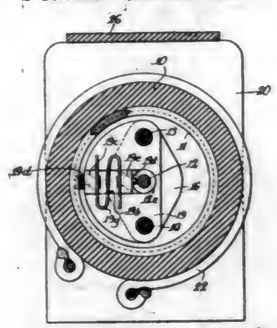
1. A selective amusement device, comprising a sectorially divided dial, and a front and back cover device in which it is rotatable and partially concealed, the front cover having a sector opening corresponding to several of the sectors of the dial, the dial sectors having selective display matter visible through the opening, removable means in or at the ends of the dial sectors for indicating the choice of display matter, and the front and back cover device having corresponding notches at the edges into which the end of any one of the selected dial sectors projects so that the removable means at the end of that sector may be manually engaged on both sides thereof for bodily removing it from the sector.



2,452,674
KNEE ACTUATING MECHANISM FOR MILLING MACHINES
Lester F. Nenninger and Fred A. Hassman, Cincinnati, Ohio, assignors to The Cincinnati Milling Machine Co., Cincinnati, Ohio, a corporation of Ohio
Application April 22, 1946, Serial No. 664,122
6 Claims. (Cl. 90—11)

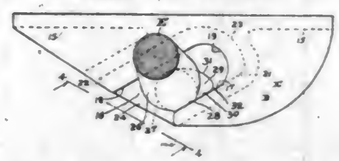
1. In a milling machine having a column, a cutter spindle journaled in the column, a knee slidably mounted on the column for movement toward and from the spindle, an upstanding pedestal integral with the column, a nut member mounted in the top of said pedestal, an elevating screw supported in the knee for operative engagement with said nut member, a drive gear for actuating said screw, inner and outer sets of telescoping tubes surrounding said pedestal to form an annular space therebetween, a coolant-conducting passage formed in the knee, means connecting said passage to said annular space

whereby returning coolant may pass in heat-exchanging relationship with the pedestal, passageways connecting said space with a reservoir in the base of the machine, and means for supplying coolant from the reservoir to the knee by way of the cutter spindle.



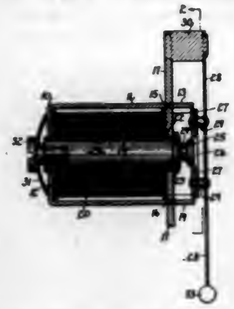
2,452,675
DIRECTION FINDING SYSTEM
John H. Newitt, Maplewood, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application May 4, 1946, Serial No. 667,273
1 Claim. (Cl. 343—121)

A radio direction finder comprising a pair of antennas having different radiant action directivities; a source of low frequency energy having a dual output of which one output is substantially 90° out of phase with the other; a pair of balanced modulators for modulating radio frequency energy derived from one of said antennas with the relatively low frequency energy of one phase from said low frequency source, each modulator comprising a pair of electron discharge devices each having an anode, cathode, and control electrode, a pair of cathode resistors each connected at one end to one of said cathodes and at the other end to ground, means for coupling one of said antennas to said cathodes in push-pull, means for applying the low frequency energy of one phase from said low frequency source to said control electrodes in push-pull, means grounding said control electrodes at said radio frequency but offering a substantial impedance at said low frequency, and means coupling said an-



odes together; a direction finding receiver, a transformer having each end of its primary connected to a separate pair of anodes in a separate one of said balanced modulators, means coupling the secondary of said transformer to said receiver, a cathode ray tube, means coupling energy from said low frequency source to produce a deflection of the beam in said cathode ray tube, and means coupling the output of said receiver to said cathode ray tube to modulate said deflection.

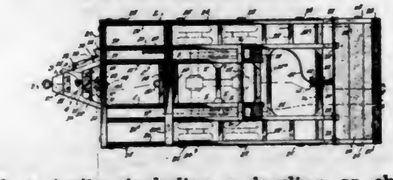
2,452,676
ADJUSTABLE INDUCTOR
Edgar O'Brien, Chicago, Ill., assignor, by mesne assignments, to Belmont Radio Corporation, Chicago, Ill., a corporation of Illinois
Application August 12, 1944, Serial No. 549,275
2 Claims. (Cl. 171—242)



1. An adjustable inductor comprising a tubular form of insulation material, a helical inductor winding disposed on the inside wall of said form, a conductive rod disposed centrally in said form and having a helical groove of the same pitch as said winding, an internal contact member including a first contact element electrically engaging said winding and a second contact element engaging said groove, spring means biasing said first and second contact elements into engagement with said winding and groove respectively and electrically interconnecting said contact elements, means for rotating said member about said rod to cause said first contact element to move in a helical path while maintaining a sliding engagement with said winding, and a pair of terminals connected to electrically spaced points of said inductor, one of said terminals being connected to said rod, whereby the circuit between said terminals includes only two sliding contacts.

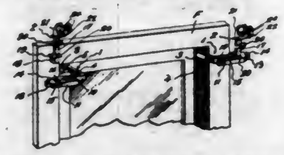
2,452,677
DOOR FASTENER
Roland J. Olander, Chicago, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a corporation of Delaware
Application November 29, 1946, Serial No. 712,835
3 Claims. (Cl. 292—241)

1. In a door fastener for a hinged door of a container, the combination with a fixed keeper on said container, said keeper having a cam slot defined by spaced, vertically disposed, front and rear walls, said front wall facing the door; of a rotary operating bar mounted on the door; a crank member rotatable with said bar, said crank member including a crank pin engageable in said cam slot, said crank pin being engageable with said front wall to force the door closed; and a radially extending flange on said crank pin engageable with said front wall to hold the door closed when the parts of the mechanism become disaligned.



2,452,678
ELECTROMAGNETIC AUDIBLE-SIGNAL DEVICE
Arthur B. Poole, Harwinton, Conn.
Application September 27, 1945, Serial No. 618,866
4 Claims. (Cl. 172—126)

3. An electromagnetic audible-signal device, including in combination: an energizing-coil; a magnetic core extending through the interior of the said energizing-coil and having a relatively-slender neck adjacent one end and an overhanging head at the end of the said neck projecting beyond the adjacent end of the said energizing-coil a distance materially greater than the thickness of the hereinafter-mentioned armature; a magnetic shell extending over the exterior of the said energizing-coil and provided at its end adjacent the head of the said core with two pole-salients located substantially diametrically opposite each other on the respective opposite sides of the head of the said core and projecting beyond the adjacent end of the said energizing-coil a distance materially greater than the thickness of the hereinafter-mentionad armature; and an armature having a substantially-central opening therethrough adapted to freely fit over the head of the said core and the said armature being shaped and sized to freely fit between the respective pole-salients of the said shell and to vibrate therebetween without striking any of the aforesaid pole-salients or the said energizing-coil.

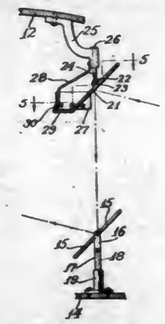


2,452,679
RADIO-FREQUENCY TRANSFORMER
Clayton W. Ramsden, Elizabeth, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application April 16, 1945, Serial No. 588,682
5 Claims. (Cl. 171—119)

1. A transformer comprising an insulating tube, a primary winding and a secondary winding surrounding said tube, said primary winding comprising a first coil and a second coil spaced from said first coil, said coils being serially connected so as to produce opposing fluxes, said secondary winding comprising a third coil and a fourth coil spaced from said third coil, said third and fourth coils being wound in opposite directions around

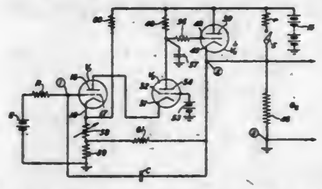
said tube, and means for electrically connecting said third and fourth coils intermediate their ends to provide a desired mutual inductance for said primary and secondary windings.

2,452,680
CURTAIN AND SHADE SUPPORT
Robert E. Ratcliffe, Dallas, Tex.
Application November 25, 1944, Serial No. 565,088
2 Claims. (Cl. 248—252)



1. A support of the character described comprising a main bracket adapted to be secured to a window frame and provided with a socket open at upper and lower ends, and an auxiliary bracket over the main bracket including a vertical shank having its lower end removably engaged in said socket, front and rear forks carried by said shank and curved towards each other for fitting about the curtain pole, and one fork terminating in inner and outer fingers formed with openings for receiving a fastener to hold a curtain rod between the fingers and projecting from the inner finger to engage a curtain pole and hold the same between the forks.

2,452,681
HEAVY-DUTY TRAILER
Edward A. Rehberger, South Orange, N. J.
Application June 28, 1947, Serial No. 757,837
11 Claims. (Cl. 214—85)



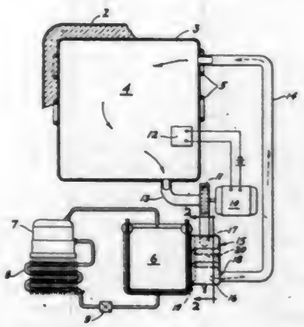
1. A trailer including a hauling or chassis frame having a road wheel structure attached at one end and hauling means at the other end with a positioning roll near the latter end, a loading or platform type of frame pivotally carried on the first mentioned frame with hydraulic means hand operative from in front of the end of the loading frame for tilting the loading frame about the pivot so its rear extremity may be brought into engagement with the terrain whereby structures to be loaded, may be readily moved onto it, said means then being operable to bring the loading frame back to normal horizontal position and means for anchoring the loading frame in normal load carrying position.

2,452,682
REFLECTOR DRIFT INDICATOR APPARATUS FOR BOATS AND AIRCRAFT
Walter W. Remy, Angola, Ind.
Application March 23, 1945, Serial No. 584,426
3 Claims. (Cl. 88—1)

1. A drift indicator for a pilot of aircraft, boats, and the like, comprising upper front view objective mirror having means mounting it for swinging movement on a horizontal axis and upon a vertical axis, a transverse drift indicating line on the mirror parallel to the vertical axis, an eye piece mirror spaced from the objective mirror having means mounting it for movement about a vertical axis and a horizontal axis, and the face of the eye piece mirror having a central marked dot for locating the reflection of the drift indicating line of the objective mirror with respect thereto.

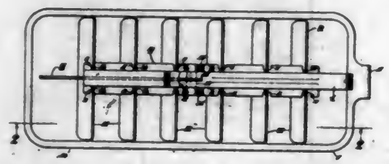
2,452,683
SWEEP CIRCUIT
John W. Rieke, New York, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application March 21, 1944, Serial No. 527,457
2 Claims. (Cl. 250—36)

1. A circuit for the production of a sweep voltage varying linearly with time at a rate determined by a unidirectional control voltage comprising a first, a second and a third thermionic vacuum tube having each at least a cathode, a control grid and an anode, a first resistance connected between ground and the cathode of the first tube, a second resistance connected between ground and the cathode of the third tube, a direct connection between the anode of the first tube and the cathode of the second tube, a conductive connection between the anode of the second tube and the control grid of the third tube, power supply for said tubes including a source of unidirectional voltage conductively connected negatively to ground and positively to the cathode of the first tube and to the anodes of the second and third tubes, a sweep condenser connected between the cathode of the third tube and the control grid of the first tube, a source of unidirectional control voltage connected negatively to ground and



positively through a third resistance to the control grid of the first tube, a fourth resistance connected between the cathode of the third tube and a point on the first resistance and a switching circuit connected between the cathode and the anode of the third tube operable directly to charge initially the sweep condenser and thereafter reversely to enable said condenser to be discharged at a rate determined by the magnitude of the control voltage, thereby providing across the second resistance a voltage decreasing substantially linearly with time.

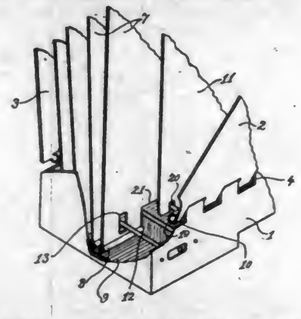
2,452,684
PORTABLE HOD STAND
Vernon C. Robinson, Phoenix, Ariz.
Application January 14, 1947, Serial No. 721,943
4 Claims. (Cl. 72—134)



1. In a portable hod stand, a hod having an extending handle, a plurality of legs substantially of the same length as the handle of the hod, a channel element secured to the under side of said hod, a mounting element slidably mounted on said channel element, and means pivotally mounting the legs in the mounting element.

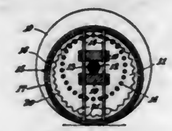
2,452,685
HUMIDITY CONTROL APPARATUS
William Rudoy, Philadelphia, Pa., assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa., a corporation of Pennsylvania
Application June 4, 1945, Serial No. 597,546
9 Claims. (Cl. 62—6)

1. In refrigeration apparatus including a plurality of refrigerated zones one of which comprises a compartment adapted to be maintained at a condition of high relative humidity, cooling means effective to maintain said compartment at a non-frosting temperature, cooling means adapted to operate at a temperature below that prevailing in said compartment and effective to cool another of said zones to a temperature below the freezing point of water, a freezable liquid in heat exchange relation with said last-mentioned cooling means, said liquid having a fusion temperature in the region of 32° F. and a relatively high latent heat of fusion, said liquid normally being maintained in a frozen condition by the action of the cooling means and presenting a substantial and stable thermal mass when raised to the fusion temperature, and means for effecting circulation of air from said compartment in heat exchange relation with said frozen liquid, whereby to condense moisture from the air at a stable temperature in the region of the freezing point of water and without effecting substantial increase in the temperature of said last-mentioned cooling means.



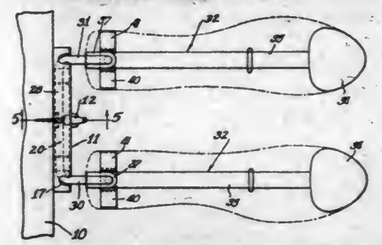
2,452,686
ICE TRAY
Frederick W. Sampson, Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application April 24, 1946, Serial No. 664,557
4 Claims. (Cl. 62—108.5)

1. A partioning grid for a freezing tray, comprising a main longitudinal wall having an upstanding bearing projection on its upper edge, a series of cross walls loosely mounted upon said main wall so as to be tiltable longitudinally thereof, said cross walls having aligned open notches cut thru their upper edges, a longitudinally movable actuating bar for tilting said cross walls, said bar lying within said aligned notches and having a hole therein thru which said upstanding bearing projection extends, a hand lever having a forked end pivotally mounted upon said upstanding projection and having laterally extending opposed eccentric lugs on said forked end, said actuating bar having integral open-top sockets within which said eccentric lugs project laterally for moving said actuating bar horizontally upon swinging said hand lever about its pivot mounting, said hand lever being insertable to its assembled position upon the grid after said actuating bar and cross walls have been fully assembled upon said main wall.



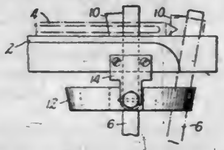
2,452,687
VISIBLE INDEX
Frank Stanley Schade, Holyoke, Mass., assignor to National Blank Book Company, Holyoke, Mass., a corporation of Massachusetts
Application May 13, 1944, Serial No. 535,443
2 Claims. (Cl. 129—16)

1. A visible index holding tray having end bottom portions, the portion of the bottom of the tray intermediate the end portions being at a higher elevation than the end portions and continuous from end portion to end portion, a plurality of separating sheets having end portions the lower edges of which rest on the end bottom portions of the tray, the portions of the lower edges of the separating sheets intermediate said end portions being spaced above the elevated intermediate portion of the bottom of the tray, said elevated intermediate portion forming a continuous support for the lower edges of record cards positioned between the separating sheets, and rod



means spaced above the surface of the elevated portion.

2,452,688
COMBINATION EMERGENCY WHEEL AND ANTISKID DEVICE
Otto Schlett, Woodside, N. Y.
Application February 9, 1946, Serial No. 646,528
8 Claims. (Cl. 301—47)

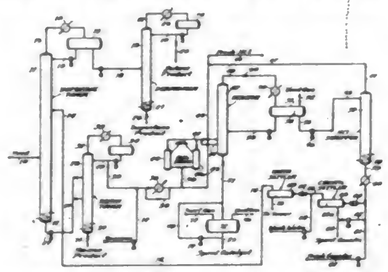


6. In a device of the class indicated, a wheel axle supporting frame, a wheel axle journaled therein, a vehicle wheel structure removably supported by the axle and including a brake drum and wheel body, a housing having movable and fixed substantially disc-shaped portions, the movable portion being associated with the wheel structure, and having an endless series of power transmitting means at its interior, the fixed portion being secured to the frame, a substantially annular mechanism operative between the two housing portions and being adapted to normally assume a position concentric with the wheel, while in inoperative position, and to move to an eccentric, operative position, and to engage the wheel supporting surface, said mechanism comprising a non-rotary ring frame, connectors secured at the top and bottom portions thereof, fixed guide means for the connectors arranged above and below the wheel axle frame, a bridging member provided with the connectors, hydraulic means engaging said bridging member, spring elements associated with said connectors, some of the spring elements bearing against the upper portion of the ring frame, other spring elements being interposed between the bridging member and the lower ring frame portion, said hydraulic means being adapted to impart vertical movements to said ring frame by way of said bridging member, said connectors and said spring elements, a substantially channel-shaped annulus embracing and being rotatable about said ring frame and having its channel flanges directed radially inwards, one of its flanges being provided with an endless series of power transmitting elements adapted for engagement with power transmitting means arranged at the movable housing portion, the downward movement of the ring frame, caused by said hydraulic means, effecting the interengagement between said power transmitting elements of the annulus and the power transmitting means of the movable housing portion, and exchangeable, antiskid tread means associated with the annulus.

2,452,689
FOLDAWAY SHOE TREE
William F. Sheppard, Chicago, Ill.
Application June 29, 1946, Serial No. 680,436
4 Claims. (Cl. 12—128.1)

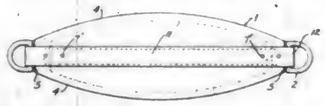
1. In a shoe tree device of the character described, in combination, an elongated bracket substantially channel-shaped in cross section and providing a central body portion and top and bottom flanges integral therewith, said bracket having a transverse slot formed in the body portion thereof adjacent the ends respectively and the top flange having a notched opening in connecting relation with each said slot, an arm member journalled by the bracket, said arm member including an arm at each end thereof adapted to extend through one of said slots, whereby the arms extend outwardly of the bracket by extending through said slots and in front of the central body portion when horizontally positioned and whereby the arms are releasably held in a vertical position by said notched openings as a result of the tension effect of the arms therewith, and means including resilient members comprising a shoe tree fixed to the outwardly extending end of each arm.

2,452,690
CHECK STRAP
Homer J. Shivell, Kingsport, Tenn.
Application November 27, 1945, Serial No. 631,009
4 Claims. (Cl. 139—161)



1. A check strap of the loop type for high speed automatic looms, said strap having ventilating openings through said strap and distributed over the area of said strap beyond that in which the strap is secured to the loom.

2,452,691
ISOMERIZATION OF PARAFFINIC HYDROCARBONS
Bernard H. Shoemaker, Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill., a corporation of Indiana
Application March 31, 1943, Serial No. 481,313
19 Claims. (Cl. 260—683.5)



1. The method of isomerizing normal paraffin hydrocarbons of more than 3 but less than 6 car-

bon atoms by means of a Friedel-Crafts catalyst which method comprises isomerizing said hydrocarbons by contacting them with said catalyst

under isomerization conditions in the presence of an amount of an aromatic hydrocarbon within the approximate range of 0.02 to 3% by volume based on hydrocarbon charge.

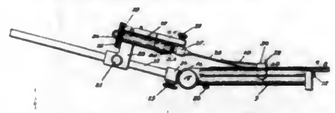
2,452,692
DUCK STRAP
Herbert A. Sleep, Yreka, Calif.
Application December 22, 1945, Serial No. 636,670
2 Claims. (Cl. 224—7)

1. In a shoulder strap for carrying fowl or the like, a leather back for placing over the shoulder of a person and having a widened central section and straight and parallel end edges, D-shaped brackets at opposite ends of the back, a handle strap extending lengthwise over the back and having folded end sections passing through the D-shaped brackets and underneath the ends of the back, and means passing through the folded end sections of the strap, and adjacent end sections of the back for anchoring the handle strap to the back and for furnishing supporting loops for the brackets.

2,452,693
MINERAL OIL COMPOSITIONS RESISTANT TO FOAMING
Herschel G. Smith, Wallingford, and Troy L. Cantrell, Lansdowne, Pa., assignors to Gulf Oil Corporation, Pittsburgh, Pa., a corporation of Pennsylvania
No Drawing. Application October 4, 1946, Serial No. 701,072
6 Claims. (Cl. 252—32.5)

1. A mineral oil composition resistant to foaming comprising a major amount of a mineral oil and an amount at least sufficient to reduce the foaming tendency of said oil of a salt of (1) a salt-forming constituent selected from the class consisting of metals and an organic ammonium group derived from the class consisting of heterocyclic nitrogen bases and N-dialkarylamines and (2) the viscous liquid reaction product of heating at a temperature not exceeding 300° F. 1 mol of a glycol having from 2 to 6 carbon atoms, 1 molar equivalent of a phosphorus compound selected from the class consisting of phosphorus oxychloride and phosphorus pentoxide and 1 mol of a saturated aliphatic monohydric alcohol having from 1 to 18 carbon atoms.

2,452,694
ANCHOR FASTENING
Aurelius Sofia, Mamaroneck, N. Y.
Application June 13, 1947, Serial No. 754,496
4 Claims. (Cl. 248—28)

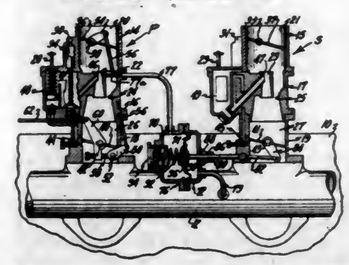


1. An anchor fastening for hanging pictures, mirrors or the like on a supporting surface comprising a body member adapted to be secured against an upright supporting surface and including a substantially V-shaped portion disposed to open upwardly and having a lower, bight portion adapted to receive and engage a portion of a length of picture wire or the like adapted to be attached at its ends to a mirror, picture or similar article to be supported, and means carried by said body member and disposed to be advanced or retracted relatively to the inner side of said bight portion for engaging and clamping the wire, when in an advanced position, to prevent said wire from sliding relatively to the bight portion.

2,452,695
BASEBALL MITT
William J. Sonnett and Benjamin B. Stobbe, Ada, Ohio, assignors to Ohio-Kentucky Manufacturing Company, Ada, Ohio, a corporation of Ohio
Application September 3, 1947, Serial No. 771,932
3 Claims. (Cl. 2—19)

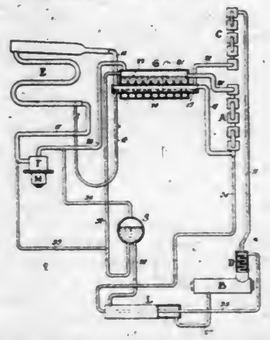
1. A baseball mitt having a palm piece and a back piece each having an aligned opening formed therein to divide said pieces into a thumb part and a fingers section for the mitt, means for joining the marginal edges of the pieces, a U-shaped backstop member positioned in the openings between the thumb part and fingers section, and comprising a pair of spaced leg portions integrally joined at their lower extremities by a semi-solid base portion, flexible means connecting the edges of the thumb part and fingers section made by the opening to the adjacent outer edges of the base and leg portions of the backstop member, and flexible means for connecting the adjacent edges of the leg portions of the member.

2,452,696
MEANS FOR DRESSING AND REPOINTING HYPODERMIC NEEDLES
Robinson R. Stabler, Greensboro, N. C.
Application January 8, 1948, Serial No. 1,221
6 Claims. (Cl. 51—59)



1. A device for restoring the points of hypodermic needles comprising, an elongated main frame having a longitudinally extending way formed therein, a slide mounted for endwise reciprocation in said way, a honing slab engaged by said slide, said frame being shaped to provide an elongated chamber beneath said slide, a spring housed in said chamber, means for engaging said spring with the slide in such manner as to cause the spring to tend to move the slide toward one end of the frame, an inclined guide bar extending upwardly and outwardly beyond the other end of the frame and in the direction of the length of the frame, means for pivotally connecting the lower end of said guide bar to the last named end of the frame, a mandrel comprising a shaft, a bearing head in which said shaft is mounted, a foot slidably mounted upon the guide bar and by which the bearing head is carried, means for holding the foot in varying positions of adjustment along said guide bar, said shaft extending in the direction of the length of said guide bar, and means at that end of the shaft nearest the honing slab constructed to engage a conventional hypodermic needle to hold the said needle in axial alignment with the shaft.

2,452,697
DEVICE FOR SHARPENING HYPODERMIC NEEDLES
Robinson Ryland Stabler, Greensboro, N. C.
Application May 20, 1947, Serial No. 749,207
17 Claims. (Cl. 51—59)



1. A device for restoring the points of hypodermic needles which comprises an elongated honing slab having a plane upper face, a frame in which said slab is disposed for longitudinal guided reciprocation, said frame being shaped to permit the slab to be grasped and manually reciprocated endwise, a member, a shaft by which said member is carried, said member comprising means for receiving and engaging the hub of a hypodermic needle, a bearing housing in which said shaft is mounted to turn, a guide extending lengthwise of and away from one end of the frame, means for mounting the bearing housing for bodily adjustment along said guide toward and from the honing slab, said guide lying at an acute angle to the plane of the upper face of the slab, said angle being such that when the bearing housing and member are advanced toward the slab and along said guide the usual angular face of the needle rests flat upon the upper face of said slab, and means for binding the housing to the guide at varying points in the length of said guide to limit the movement of the needle toward the slab and to thereby limit the pressure of the needle point upon said slab.

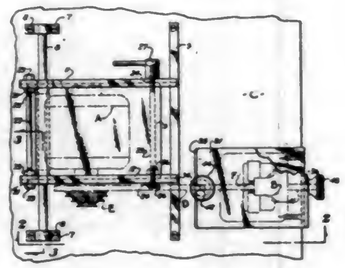
2,452,698
CARBURETOR
Richard R. Strebinger, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Original application July 5, 1941, Serial No. 401,170. Divided and this application June 30, 1944, Serial No. 542,978
4 Claims. (Cl. 261—23)

2. In a multiple stage carburetor system for internal combustion engines: a primary induction passage controlled by a throttle valve; a secondary induction passage controlled by a throttle valve; manual means for controlling the primary throttle valve; suction responsive means for operating the secondary throttle valve; a conduit connecting the last mentioned means with the primary induction passage anterior to the primary throttle valve and a second conduit connecting said means with a source of manifold vacuum, whereby said means tends to open the secondary valve upon an increase in suction anterior to the primary throttle valve and tends to close the secondary valve in accordance with manifold vacuum; and means adjacent the induction passage end of the first mentioned conduit modifying the suction in said conduit relative to that in the induction passage.

2,452,699
REFRIGERATION
Otis B. Sutton, Canton, Ohio, assignor to The Hoover Company, North Canton, Ohio, a corporation of Ohio
Application February 18, 1944, Serial No. 522,858
9 Claims. (Cl. 62—119.5)

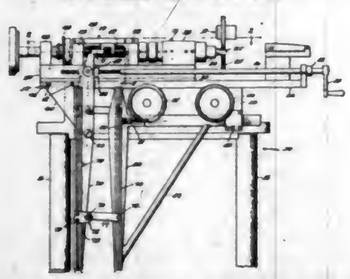
1. In an absorption refrigerating apparatus of the inert gas type embodying an evaporator, an

absorber and a condenser; means constructed and arranged to provide mutual heat transfer between lean solution enroute to the absorber, liquid refrigerant enroute to the evaporator and inert gas flowing into and away from the evaporator.



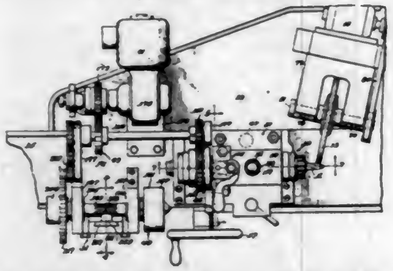
2,452,700
COPOLYMERS OF 2,5-DIMETHYL-1,5-HEXADIENE AND ACRYLIC ESTERS
Pliny O. Tawney, Passaic, N. J., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application June 29, 1946, Serial No. 680,515
6 Claims. (Cl. 260—84.5)

6. A method which comprises heating together 2,5-dimethyl-1,5-hexadiene and a monomeric acrylic ester of the formula



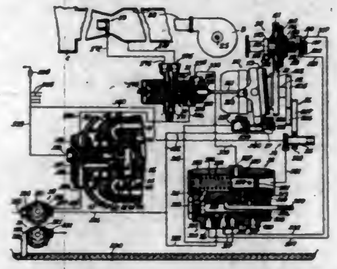
where X is a radical selected from the group consisting of H and alkyl, and Y is a radical selected from the group consisting of alkyl, aryl and aralkyl, in the presence of a per-oxy compound catalyst, the molar ratio of the diene to the acrylic ester being at least 6:1, whereby to produce an acetone-soluble interpolymerizate of said monomers.

2,452,701
IMPLEMENT MOUNTING
Edgar C. Trefry, Los Angeles County, Calif., assignor of one-half to G. Loren Le Munyon, Los Angeles County, Calif.
Application February 18, 1946, Serial No. 648,281
5 Claims. (Cl. 51—134.5)



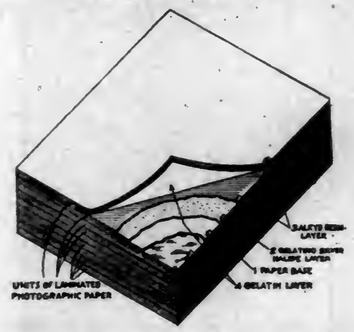
1. A motor mounting means for a driving motor adapted for use in a drive-connected unit including a driven tool which is subject to change with a resulting alteration in the position of the drive-connection, said motor and tool being mounted on a common supporting member, which comprises: a motor plate adapted to be affixed to said motor; rails extending longitudinally toward the position of said tool and having longitudinal channels wherein the lateral margins of said motor plate are slidably engageable; means for holding said rails in substantially parallel spaced relation; means for clamping said rails to said plate; and means connecting said motor plate and said rails to said common supporting member, inclusive of a slide bar extending at right angles to said rails and friction reducing means between said rails and said slide bar whereon said plate and rails are slidable at right angles to said rails.

2,452,702
DRILL GRINDING MACHINE
Walter Umbdenstock, Chicago, Ill., assignor to Lion Manufacturing Corporation, Chicago, Ill., a corporation of Illinois
Application December 18, 1944, Serial No. 568,607
9 Claims. (Cl. 51—94)



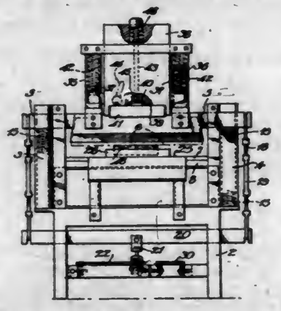
3. In a drill grinding machine, means for rotating the drill, grinding means, means to move the drill longitudinally relative to the grinding means, said drill rotating means including a driven helical gear and a helical driving pinion, means to shift said pinion relative to said gear to vary the timed driving relation therebetween during longitudinal movement of said drill, and means to oscillate the drill relative to the grinding means in synchronism with the drill rotation for relief grinding.

2,452,703
DRILL GRINDING MACHINE
Walter Umbdenstock, Chicago, Ill., assignor to Lion Manufacturing Corporation, Chicago, Ill., a corporation of Illinois
Application December 18, 1944, Serial No. 568,608
17 Claims. (Cl. 51—94)



1. A grinding machine comprising means for supporting and rotating a work piece in grinding position with respect to a grinding member, including a chuck head, a carriage for said head, said carriage being movable to traverse the work piece in front of the grinding member, means to reciprocate said carriage, said head being movable on the carriage in a direction transversely of the direction of movement of the carriage whereby to project the work piece grindingly against said member, spring means normally holding the head in retracted position, a magnet operable to move the head against the resistance of the spring means, adjustable means for limiting the movement of said head, and timer means for actuating the magnet in timed relation with respect to the rotation of said work piece whereby said head and work piece will be moved toward and from said grinding member at timed intervals during the rotation of said work piece.

2,452,704
HYDRAULIC TRANSMISSION AND CONTROL
Gunnar A. Wahlmark, Rockford, Ill., assignor to Sundstrand Machine Tool Co., Rockford, Ill., a corporation of Illinois
Application August 7, 1943, Serial No. 497,750
23 Claims. (Cl. 98—1.5)



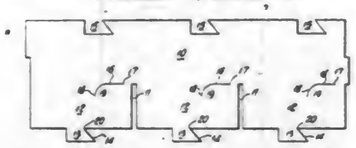
18. In a system for supercharging an aircraft cabin, which includes a blower for supercharging the cabin and means including a venturi through which the blower discharges air into the cabin and an engine having a power take-off, a hydraulically actuated clutch driven from the aircraft engine power take-off, a hydraulic transmission having an input shaft driven from the aircraft engine power take-off through said clutch and an output shaft geared to the blower, means for varying the speed of the output shaft above and below the speed of the input shaft, means for adjusting said speed varying means comprising a pair of opposed and unequal piston and cylinder devices, adjustment of said speed varying means under the influence of the smaller of said piston and cylinder devices reducing the speed of the output shaft relative to the input shaft and adjustment of said speed varying means under the influence of the larger of said piston and cylinder devices adjusting said speed varying means to increase the speed of the output shaft relative to the input shaft, means for supplying and controlling actuating fluid for said piston and cylinder devices and said clutch comprising a pump driven directly from the aircraft engine power take-off, means for maintaining the fluid discharged from said pump at a predetermined pressure value, a conduit leading from said pump directly to the smaller of said piston and cylinder devices constantly to supply fluid under pressure thereto, a conduit for supplying fluid from said pump to the larger of said piston and cylinder devices, a servo valve means interposed in said last named conduit to control the flow of fluid thereto including cooperating parts one actuated by said speed varying means, a pressure responsive device for actuating the other of said parts having connection to the venturi and the air inlet side of the conduit through which the blower supplies air to the aircraft cabin, a system for supplying fluid for the actuation of said clutch, a manually actuable valve interposed in said system and having a clutch engaged and a clutch disengaged position, said manually actuable valve also being interposed in the conduit leading to the larger of said piston and cylinder devices and operable in clutch engaged position to place control of the fluid flowing to the larger of said piston and cylinder devices under said servo valve and in clutch disengaged position to block said first named conduit and to connect the larger of said piston and cylinder devices for free discharge of the fluid therein, a third valve interposed in said first named conduit normally permitting flow of fluid through said conduit, and means responsive to the speed of said driven element operable as the speed thereof increases to certain values to urge said third valve in a direction to cut off the flow of fluid through said last named conduit and eventually to connect the larger of said piston and cylinder devices for the free discharge of fluid therefrom.

2,452,705
PACKAGE OF PHOTOGRAPHIC LIGHT-SENSITIVE PAPERS
Stanley Frederick William Welford, Ilford, England, assignor to Ilford Limited, Ilford, England, a British company
Application February 23, 1945, Serial No. 579,489
In Great Britain March 3, 1944
1 Claim. (Cl. 95—8)

A package of light-sensitive elements each element comprising a paper support carrying on one side thereof a gelatino silver halide emulsion layer and a superimposed layer of an alkyd resin which is water-insoluble but alkali-soluble and carrying on the other side thereof a layer of gelatin, the said elements being packed in the package face to back.

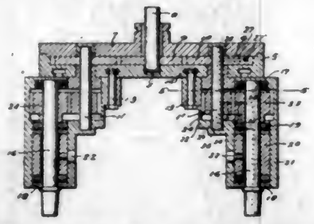
2,452,706
ROCK SHEARING MACHINE
Elvin E. White, Tempe, Ariz.
Application August 5, 1947, Serial No. 766,282
4 Claims. (Cl. 125—23)

1. A rock shearing machine comprising a base, a fixed bottom blade thereon, a slab supporting table adjacent thereto having a spring support to resiliently support a slab thereon slightly above the edge of said blade, a top blade slidably supported on said base above said bottom blade, springs adapted to normally hold said top blade above said bottom blade, mechanism for drawing said top blade down upon the face of a rock slab



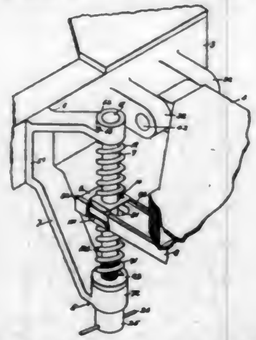
positioned on said bottom blade, including links attached to said blade, an evener bar and a hold down treadle, and mechanism for administering a sharp downward blow to said top blade, including an anvil on said blade, a reactance plate slidably supported thereabove having a cavity to hold an explosive charge on said anvil, and a firing pin operative to discharge said charge.

2,452,707
ART OF ORNAMENTED KNITTED ARTICLE MANUFACTURE
Emery F. Wirtz, Appleton, Wis., assignor to Zwicker Knitting Mills, Appleton, Wis., a corporation of Wisconsin
Application October 30, 1946, Serial No. 706,569
4 Claims. (Cl. 66—169)



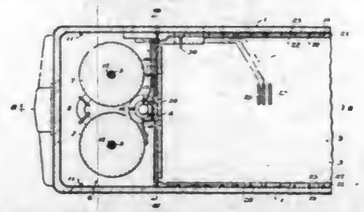
1. The method of producing a knit fabric which consists of knitting a body portion and during the progress thereof incorporating in said body portion mock spirally intertwining extents with floats of the body strands underlying the same, and during the knitting of said intertwining extents knitting into the opposite marginal portions thereof gathering strands in a manner so that the floats thereof intermingle with the floats of the body strands and tautly underlie said intertwining extents to cause outward protruding thereof.

2,452,708
INTERLOCKING STRIP SHINGLES
Herbert Abraham, New York, N. Y., assignor to The Ruberoid Co., New York, N. Y., a corporation of New Jersey
Application March 6, 1947, Serial No. 732,798
3 Claims. (Cl. 108—7)



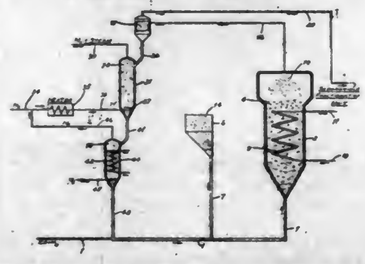
3. An interlocking strip-shingle having the portion thereof which is exposed when laid divided into a plurality of shingle-simulating units, each unit having a locking tab extending downwardly from approximately the middle of its lower edge, and a plurality of narrow openings in the body of the strip in substantially horizontal alignment with the upper end of the shingle-simulating units and spaced from the side edges thereof, said openings each terminating at one end in a downwardly extending slit to provide flap portions that can be raised temporarily out of their normal plane to permit of inserting all of the tabs of a like overlying strip into engagement with the openings of the underlying strip by longitudinal movement of the former.

2,452,709
LUBRICATING SYSTEM FOR ADJUSTABLE MULTIPLE SPINDLE DRILL HEAD
Rolland B. Alman, Pendleton, Ind.
Original application August 15, 1942, Serial No. 454,979, now Patent No. 2,349,240, dated May 23, 1944. Divided and this application April 17, 1944, Serial No. 531,440
1 Claim. (Cl. 184—6)



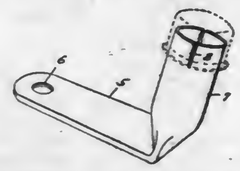
A multiple drill head comprising a body having a gear chamber therein adapted to receive a lubricant under pressure, a drive spindle journaled in the body, a plurality of shafts having lubricating passages therein, spur gears keyed respectively to the spindle and to the shafts in the chamber and operatively connecting the spindle with the shafts, a radial grease passage in the gears of the shafts communicating with the chamber, a check valve in each of said passages, a plurality of driven spindles having lubricating passages therein, and spur gears connecting the shafts with the respective driven spindles, said last-named gears having communicating radial passages and also providing communication between the passages of the shafts and the passages of the driven spindles.

2,452,710
TONGUE STABILIZER FOR VEHICLES
Elmo W. Allen, Fresno, Calif., assignor to Stan-Wall Manufacturing Company, Fresno, Calif., a corporation of California
Application March 4, 1946, Serial No. 651,834
7 Claims. (Cl. 280—33.44)



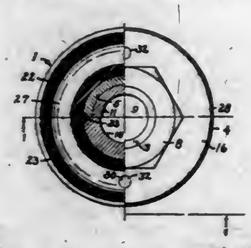
1. In combination with a one axle carriage having a frame, a tongue pivotally connected with the frame, and means adapted to normally and yieldingly hold said tongue in an extended horizontal position, consisting of a bracket rigidly attached to the frame of the carriage, a bar rigidly attached to the tongue of the carriage the bracket having arms extending in a direction to overlap the free end of the bar, and being aligned therewith a pin extending through the arms and the bar, the bar being adapted to move freely on the pin between the two arms, compression springs positioned around the pin on either side of the bar and adapted to bear against the bar and against the arms on the bracket, and means for adjusting the tension of said springs.

2,452,711
REFRIGERATING APPARATUS
David Aronson, Greensburg, Pa., assignor to Elliott Company, Jeannette, Pa., a corporation of Pennsylvania
Application May 14, 1947, Serial No. 748,079
6 Claims. (Cl. 257—3)



1. Refrigerating apparatus comprising spaced upwardly extending evaporator tubes for receiving at their lower ends a highly volatile liquid and having an internal diameter sufficiently small to cause vapor resulting from the evaporation of liquid therein to carry upward unevaporated liquid, a conduit for withdrawing vapor from the upper ends of the tubes, a condenser for receiving vapor from the conduit, a vaporizer located within but spaced from the bottom of the condenser and adapted to receive a liquid refrigerant having a very low boiling point, whereby the vapor in the condenser will be condensed to a liquid that collects in the bottom of the condenser without being subcooled by the refrigerant, and a conduit for conducting the liquid from the condenser to the lower ends of the evaporator tubes.

2,452,712
METHOD OF PRODUCING HYDROCARBON AND THE LIKE
Harold V. Atwell, Beacon, N. Y., assignor to The Texas Company, New York, N. Y., a corporation of Delaware
Application May 22, 1946, Serial No. 671,571
10 Claims. (Cl. 260—449.6)



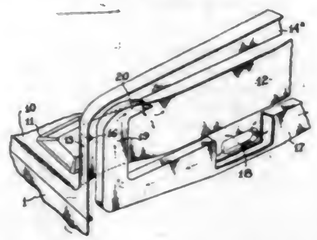
1. In the production of hydrocarbons, oxygenated hydrocarbons and the like by the catalytic reduction of carbon monoxide with hydrogen in the presence of a solid synthesis catalyst capable of effecting such conversion with the accompanying formation of water, the improvement which comprises passing said reactants in contact with said catalyst in a reaction zone under an elevated temperature and pressure effective for conversion of the reactants into desired products of reaction, maintaining said contact for a period of time sufficient to effect a substantial degree of conversion, continuously introducing into said reaction zone a desiccant material which chemically combines with the water produced in the reaction zone to form a compound, the dissociation pressure of which is substantially less at the temperature and pressure conditions of conversion than the partial pressure of water in said conversion zone, passing said desiccant material through the reaction zone, removing the desiccant from the reaction zone after combination with water vapor and maintaining the introduction and removal of the desiccant at a rate at which a substantial portion of the water formed in the reaction zone is removed thereby.

2,452,713
FILLER CAP SUPPORT
Roy Wilbur Bandy, Aspen, Colo.
Application January 21, 1947, Serial No. 723,372
1 Claim. (Cl. 248—224)

A filling tube cap support for attachment to a motor vehicle engine, comprising a bar having an opening formed adjacent to one end thereof, in which a bolt of the engine block extends, securing the attachment to the engine block, a tubular supporting member formed integral with one end of the bar and being extended at right angles with respect to the bar, the tubular supporting member having slots extended inwardly from the free end thereof, lending resiliency to the tubular supporting member and said slotted end of the tubular supporting member adapted to expand into contact with the wall of a filler tube cap, holding the cap on the tubular supporting member by frictional contact therewith.

2,452,714
PISTON
Harold Barnard, Houston, Tex., assignor to The Whitehead Bros. Rubber Company, a corporation of New Jersey
Application April 7, 1945, Serial No. 587,059
6 Claims. (Cl. 309—23)

6. A piston including an assembly comprising a body having end flanges and an intermediate



flange forming packing receiving grooves about the assembly, the opposed flange faces in each of said grooves being tapered convergingly outwardly and merging with the periphery of the flanges in a curved surface, a packing ring filling each of said grooves, said packing ring having flared peripheral edges overlying said curved surface to provide annular seal lips about the piston, and means responsive to fluid pressure upon said piston for expanding the packing rings radially of the assembly.

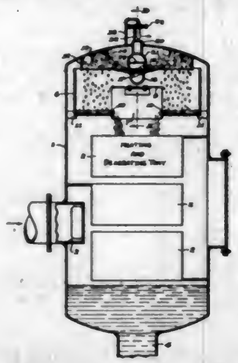
2,452,715

CONCEALED VENTING MEANS FOR STOVES

William Bauer, Mansfield, Ohio, assignor to The Tappan Stove Company, Mansfield, Ohio, a corporation of Ohio

Application May 22, 1946, Serial No. 671,495
6 Claims. (Cl. 126—21)

6. In a gas range, the combination of an horizontally extending top, a rear wall extending upwardly from the rear edge of said top, said rear wall being shaped to define a forwardly directed recessed portion and a pair of rearwardly directed recessed portions one at each side of said forwardly directed recessed portion, a hood extending over said rearwardly directed recessed portions and said forwardly directed recessed portion and providing communication between the upper end of each of said rearwardly directed recessed portions and the upper end of said forwardly directed recessed portion, an oven disposed below said top, a vent flue connected to said oven through which the products of combustion are discharged, said vent flue comprising an horizontally extending conduit disposed below said top and to the rear of said oven, a vertically extending conduit connected to each end of said horizontally extending conduit and disposed within said rearwardly directed recessed portions, and a discharge outlet secured to the upper end of each of said vertically extending conduits and extending over said forwardly directed recessed portion and arranged to discharge downwardly into said forwardly directed recessed portion.



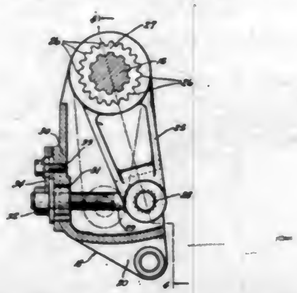
2,452,716

DEAERATING HEATER

Carl Hugo Bergquist, Forest Hills, Pa., assignor to Elliott Company, Jeannette, Pa., a corporation of Pennsylvania

Application August 4, 1945, Serial No. 608,999
18 Claims. (Cl. 183—2.5)

12. A deaerating heater comprising a deaerating tank having a vent for escape of non-condensible gases, a spray pipe inside the tank adjacent the entrance to the vent, the tank being provided below the spray pipe with an inlet for steam, said pipe being adapted to be connected to a source of water outside the tank and being positioned to spray a curtain of water across said vent entrance to separate the steam from the vent, the entrance to the vent being confined to a portion of said curtain where substantially all of the steam reaching that portion is condensed before it can pass through the curtain, a movable valve member for restricting the outlet of the vent, a spring urging said member toward wide open position, a flexible diaphragm connected to said member, means putting one side of the diaphragm in communication with the inside of said vent to assist the spring, and means putting the opposite side of the diaphragm in communication with the inside of the tank outside of the vent to urge said valve member toward closed position, whereby the pressure drop from the tank into the vent can be held at the minimum necessary for bleeding off non-condensible gases regardless of pressure variations in the tank.

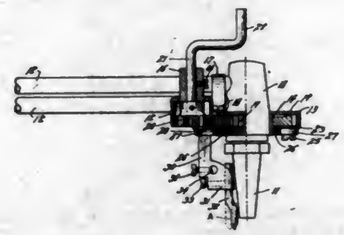


2,452,717

WHEEL BRAKE ADJUSTING MECHANISM

Arthur H. Blau, Milwaukee, Wis., assignor to Sterling Motor Truck Company, Inc., Milwaukee, Wis., a corporation of Wisconsin

Application October 10, 1945, Serial No. 621,492
4 Claims. (Cl. 74—522)



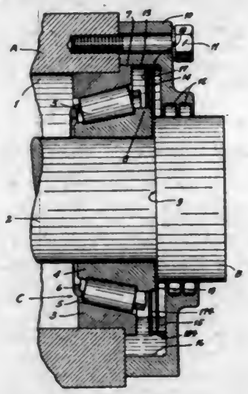
1. A mechanism of the character described, comprising an oscillatory shaft, means for varying the oscillatory movement of the shaft for brake operating purposes commensurate with the condition of the brake mechanism, said means comprising a main lever loosely mounted on said shaft for swinging movement, a second lever angularly adjustably anchored at its outer end to the main lever, gear means providing a shiftable indexing anchorage between the inner end of said second lever and said shaft, and operating connections extending to said main lever for swinging it.

2,452,718

CUTTING TORCH HOLDER

James Henry Blythe, Denver, Colo.

Application July 24, 1944, Serial No. 546,355
11 Claims. (Cl. 33—27)



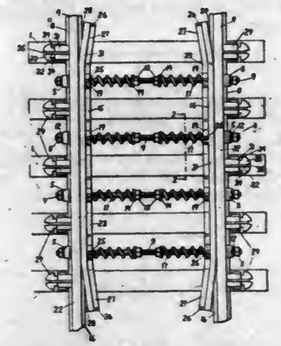
3. A guiding attachment for a tool comprising: a ring gear mounted to rotate about the axis of said tool; means for rotating said ring gear about said tool; a radius arm pivotally clamped at its one extremity to said ring gear at one side of the axis of said tool and extending arcuately thereabout to the opposite side thereof; and a center point member extending from the free extremity of said arm to a radial position with reference to said axis.

2,452,719

BEARING LUBRICATION

Ernest G. Boden, Canton, Ohio, assignor to The Timken Roller Bearing Company, Canton, Ohio, a corporation of Ohio

Application February 12, 1945, Serial No. 577,525
8 Claims. (Cl. 308—187)



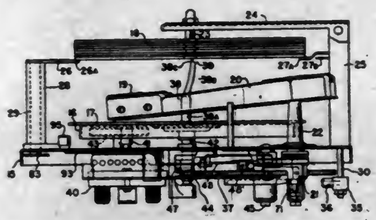
1. The combination with a housing having a lubricant reservoir in the lower portion thereof, a rotary horizontal shaft above said reservoir and an antifriction bearing for said shaft, of a lubricating device for said bearing comprising a centrifugal slinger element rotatable with said shaft and through the reservoir therebelow adjacent to one end of said bearing, and a non-rotary capillary distributor element having a surface that is easily wetted by lubricant interposed between said centrifugal slinger element and said end of said bearing and having an outer peripheral portion in position to receive lubricant from said centrifugal slinger element and an inner peripheral portion in position to deliver such lubricant to said end of said bearing.

2,452,720

RAILWAY CAR RETARDER

John A. Bodkin, New York, N. Y.

Application December 10, 1947, Serial No. 790,828
2 Claims. (Cl. 188—62)

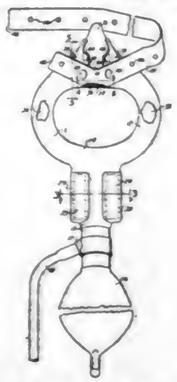


1. A car-retarding railroad appliance comprising a plurality of parallel rods provided with screw threads, a pair of substantially parallel auxiliary rails extending across said rods, being supported by the same and being slidable in the longitudinal direction of said rods, a plurality of pairs of jaw members, the jaw members of each pair being positioned at opposite ends of one of said rods and outside of said pair of auxiliary rails, said rod passing through said jaw members, a plurality of pairs of nuts, the nuts of each pair engaging one of said rods outside of said jaw members whereby said nuts are adapted to press said jaw members against the outer sides of the rails of a railroad while said auxiliary rails are positioned between said railroad rails, and resilient means urging said auxiliary rails outwardly.

2,452,721

AUTOMATIC RECORD CHANGING APPARATUS

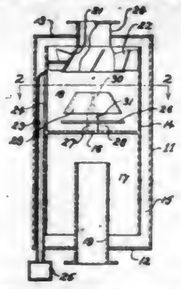
Ortis C. Booher, Fort Wayne, Ind., assignor, by mesne assignments, to Farnsworth Research Corporation, a corporation of Indiana



Application July 30, 1940, Serial No. 348,575
11 Claims. (Cl. 274—10)

1. In an automatic phonograph having a pick-up arm, a continuously moving member including a projection and a cam, a cam wheel adapted to be driven by said continuously moving member, said cam wheel having a gap in its periphery for disengaging said cam wheel from said continuously moving member, a projection associated

with and rotatable with said continuously moving member, a coupling member operatively associated with said cam wheel for moving in a vertical plane and being positioned normally in the path of said projection for being moved thereby for bringing said cam wheel into driving relationship with said continuously moving member, a catch operatively associated with said coupling member and said cam for holding said coupling member out of the path of said projection, and means for moving said catch to release said coupling member comprising a lever frictionally connected to said pickup arm and movable into engagement with said catch.



2,452,722
CLINICAL MASK FOR BREATHING AND REBREATHING MIXTURES OF GASES
Walter M. Boothby and Arthur H. Bulbulian, Rochester, Minn., and William Randolph Lovelace, II, Albuquerque, N. Mex.
Application July 14, 1947, Serial No. 760,892
4 Claims. (Cl. 128—202)

1. A mask structure embodying a body portion adapted to be positioned over breathing openings of a wearer and when so positioned forming a breathing chamber, a depending tube having gas passageway connection with said breathing chamber, a rebreathing bag depending from and having gas connection with the tube, a pair of openings formed in the tube at opposite sides thereof positioned between the connection of the tube with the breathing chamber and the rebreathing bag, turret members forming chambers connected with the respective openings and having openings to atmosphere therefrom, and a sponge rubber disc in each of said turret member chambers.

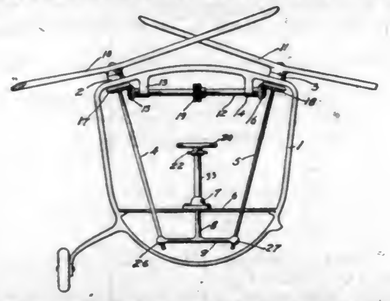
2,452,723
SPARK ARRESTER SILENCER
Roland B. Bourne, West Hartford, John P. Tyskewicz, Hartford, and Arthur E. Chase, Elmwood, Conn., assignors to The Maxim Silencer Company, Hartford, Conn., a corporation of Connecticut
Application May 4, 1945, Serial No. 591,958
3 Claims. (Cl. 183—94)

1. A construction for reducing the back pressure of a substantially cylindrical chamber of the type in which the gas is introduced into the chamber in a direction so that the gas has a whirling motion in the chamber and is removed from the chamber through a coaxial outlet, comprising a baffle spaced from the end of the chamber opposite the outlet, an open ended frustum of a cone positioned between the baffle and the inner

end of the outlet, and one or more whirl breaking vanes within the cone.

2,452,724
SOAPMAKING PROCESS
George B. Bradshaw, Wilmington, Del.
Application June 5, 1945, Serial No. 597,661
4 Claims. (Cl. 260—417)

1. A continuous process for producing soap, which comprises continuously forming a water-in-oil type emulsion by continuously adding approximately stoichiometrical proportions of a concentrated, aqueous, caustic alkali solution and of lower alkyl esters of higher fatty acids to an agitated body of such an already formed emulsion maintained at a temperature of about 35° to 65° C. and containing from 10% to 25% of soap, passing this emulsion at the rate it is formed through an enclosed space in which it is maintained at a temperature of from about 100° C. to below 140° C. under autogenously developed pressure, until nearly complete saponification of the fatty acids has taken place, and then reducing the pressure on the reaction mixture as it emerges from said enclosed space sufficiently to evaporate off the major part of the lower alcohol and a substantial part of the water present therein, whereby said reaction mixture is cooled and a solid, soap of excellent commercial purity is obtained.



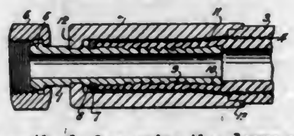
2,452,725
SOAPMAKING PROCESS
George B. Bradshaw, Wilmington, Del.
Application June 29, 1945, Serial No. 602,227
4 Claims. (Cl. 260—418)

1. A process for making soap which comprises saponifying a mixture of lower alkyl esters of higher fatty acids and an aqueous soap solution by adding caustic alkali to said mixture in several successive stages at temperatures between about 100° C. and about 120° C. under autogenous pressure and continued agitation, adding to the resulting, hot, saponification product a cool, dilute, aqueous solution of an electrolyte, thereby reducing the temperature of the resultant mixture to about 85° C., permitting said mixture to settle at atmospheric pressure, and then separating the neat soap from the nigre therein.

2,452,726
MULTIROTOR HELICOPTER WITH TILTABLE ROTORS
Conrad R. Buchet, Pasadena, Calif., assignor of one-half to Milton H. Lees, Jr., Pasadena, Calif.
Application July 16, 1945, Serial No. 605,230
10 Claims. (Cl. 244—17)

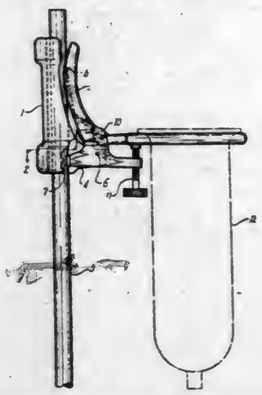
1. In a helicopter having a fuselage, two downwardly converging angularly adjustable shafts

arranged in a transverse vertical plane within said fuselage in one angular position thereof, rotors on the upper ends of said shafts above the fuselage, means for rotating said shafts in oppo-



site directions, and a control element manually operable simultaneously to move the two shafts thereby to vary the angular relation of one shaft to the other.

2,452,727
TIE RACK
George C. Burton, Washington, D. C.
Application July 3, 1947, Serial No. 758,915
2 Claims. (Cl. 211—124)



1. A supporting rack of the character described, an elongated base adapted to be secured to a supporting surface, two fixed clamp elements of circular cross section secured to the forward side of said base and disposed longitudinally thereof and in parallel, abutting engagement, a rod of circular cross section engaging uniformly against the outer portions of said fixed clamping elements and extending into the outwardly opening cavity therebetween, and resilient means for connecting said rod to the base and for yieldably mounting said rod relatively to said fixed clamping elements and for movement in directions toward and away from the fixed clamping elements, said resilient means comprising contractile coil springs disposed adjacent the ends of the base, fixed clamp elements and rod, said base and fixed clamp elements being provided with aligned bores to receive said springs, and means for anchoring the ends of the springs to said rod and base.

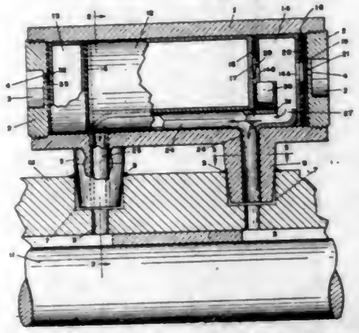
2,452,728
COUPLINGS FOR FLEXIBLE HOSE
Edward Charles Carling, Stoke Newington, London, England
Application December 23, 1944, Serial No. 569,615
4 Claims. (Cl. 285—84)

1. The method of securing the sleeve and insert of an end fitting to a braided rubber hose which comprises removing the outer covering of rubber on the braid at an end of the hose, so providing a metal abutment extending between the sleeve and insert that the abutment is positioned against axial movement in a direction away from the inner end of the insert but is free to deform, the insert and the sleeve having surfaces to interlock in introducing the prepared end of the hose between the sleeve and insert and up to the abutment, and in then progressively reducing the sleeve in a direction towards the abutment to secure the hose in position and to bring the interlocking surfaces into position to lock the sleeve and insert to one another.

2,452,729
MERCURY LEVELING CLAMP
George W. Carlson, Bridgeville, Pa., assignor to Burrell Technical Supply Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application October 28, 1944, Serial No. 560,811
1 Claim. (Cl. 248—125)

A mercury leveling clamp comprising a bifurcated bracket having a V-shaped groove for engaging a vertical slide rod, a lever pivotally mounted on the bifurcated end of said bracket, one arm of which constitutes a handle portion and the other arm a gripping portion, the handle portion being provided with a groove, a spring having one end secured to said lever and extending along the handle portion for engaging the slide rod, said spring being displaceable in the groove of said handle portion and functioning to normally bias the lever into contact with said slide rod at the gripping portion thereof, and a container support pivotally mounted on and extending horizontally away from the gripping portion of said lever whereby the weight on said support is fulcrumed on the gripping end of said lever.

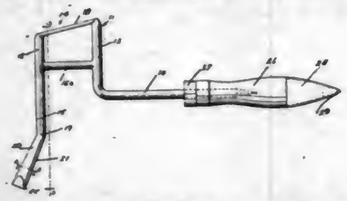
2,452,730
LIQUID FILLED DICE AGITATOR
Albert C. Carter, Cincinnati, Ohio, assignor of one-half to Abe Buchmann, one-fourth to Julius Mintz, and one-fourth to Max E. Levinson, all of Cincinnati, Ohio
Application September 23, 1944, Serial No. 555,441
3 Claims. (Cl. 273—145)



2. In an amusement device the combination of a closed chamber having an opaque side wall, a transparent end wall for the chamber, a substantially opaque liquid filling the chamber, a buoyant, multi-faced member immersed in the liquid and having an overall, exterior color substantially that of the liquid, and indicia on the

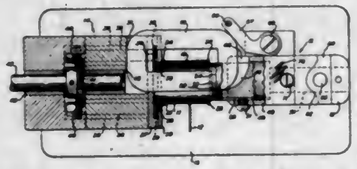
faces of the member, said indicia having a color contrasting with that of the liquid and said faces, whereby only the indicia on the upper most face

of the member is distinguishable through the end wall when said device is operated to present the member beneath the said end wall.



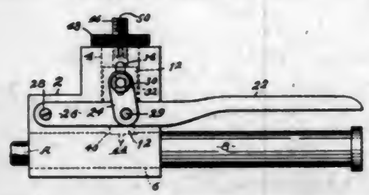
2,452,731
HOTBOX COOLER
Sam W. Clutton, Missoula, Mont.
Application March 8, 1946, Serial No. 652,952
5 Claims. (Cl. 184—1)

2. A device of the character described comprising a horizontal casing having removable closures for its ends, necks extending downwardly from said casing and adapted to be secured in openings formed in a journal box, an oil reservoir in said casing, a drum in the casing between the reservoir and one end of the casing, the end of the reservoir confronting said drum being formed with an outlet closed by a plug of fusible metal, a discharge pipe extending from said drum along the reservoir and having branches entering the necks for delivering oil to the journal box when the plug is melted in response to predetermined temperatures of an overheated journal box, the drum and the closure for the adjoining end of the casing being formed with air inlet openings, and an auxiliary reservoir for an odorous material disposed in the casing at the opposite end of the oil reservoir from said drum and normally closed by a plug of fusible metal.



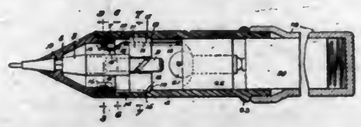
2,452,732
HAND CULTIVATING TOOL
Leon M. Coles, Port Chester, N. Y.
Application October 22, 1945, Serial No. 623,667
4 Claims. (Cl. 97—61)

1. In a garden tool, a handle shank portion, a double-bent portion located radially of said shank portion and including a bight portion and inner and outer substantially parallel arms continuing from said shank portion, a brace and hand portion connecting said arms between said bight portion and a point in the plane of the longitudinal axis of said handle shank portion, an extension continuing from the free end of the outer arm of said double-bent portion radially beyond and substantially perpendicular to said handle shank portion, said extension radially beyond said



handle shank portion offset in directions laterally of and longitudinally beyond said handle shank portion, said offset extension portion having a cutting edge at one of its longitudinal edges, and said bight portion having cutting edges at its longitudinal edges.

2,452,733
WINDING MACHINE
Robert M. Conklin, West Newbury, Mass., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application October 8, 1946, Serial No. 701,871
7 Claims. (Cl. 242—4)

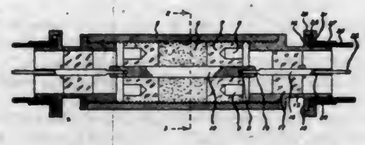


1. A machine for winding a coil on a closed metallic core having a split tube forced around one side of the core and having a notched end, the machine comprising a driving head including a gear with an open portion to receive the core and projections adjacent its inner periphery to interengage the notched end of the tube to form a driving connection with the tube, and means to drive the gear to rotate the tube to wind a coil on the tube.

2,452,734
INSULATION CUTTER
John F. Costelow, Kansas City, Mo.
Application October 26, 1945, Serial No. 624,820
4 Claims. (Cl. 30—91)

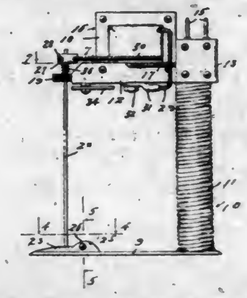
2. An insulation cutter comprising a frame provided with a recess and a bore which latter extends longitudinally through the frame, guide means secured in said bore and provided with an aperture registering with an aperture extending from the bore to the recess, a blade holder in said recess, and a blade carried by said blade holder adapted to project through said apertures into the path of insulation on a cable being drawn from said guide means.

2,452,735
PENCIL WITH INTERNAL ILLUMINATING MEANS
John J. Devine, Middletown, Conn.
Application October 1, 1945, Serial No. 619,461
3 Claims. (Cl. 120—18)



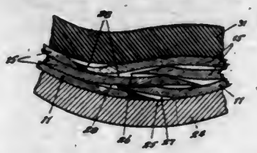
1. In an internally illuminated pencil, a tubular transparent casing constructed of yieldable material, a rotatable transparent cap closing one end of the casing, a lead projecting and retracting means secured to the cap, extending into the casing, said lead projecting and retracting means including a screw and a member rotated by rotation of the cap, lighting means disposed at the rear of the lead projecting and retracting means, a retaining plate secured to the inner end of the screw directly in front of the lighting means, said retaining plate having notches formed in the ends thereof, and lugs on the inner surface of the casing extending into the notches removably securing the retaining plate and lead projecting and retracting means in position within the casing.

2,452,736
METHOD OF TREATING OIL WELLS
Allen G. Eickmeyer, Salt Lake City, Utah, assignor of one-fourth to Charles M. McKnight, Tulsa, Okla.
No Drawing. Application August 28, 1945, Serial No. 613,226
4 Claims. (Cl. 252—8.55)



3. The method of treating an oil well which consists of subjecting the porous strata adjacent the well and consisting wholly or in part of calcareous material to a fatty acid containing at least ten carbon atoms to render the porous strata preferentially oil wettable and water repellant.

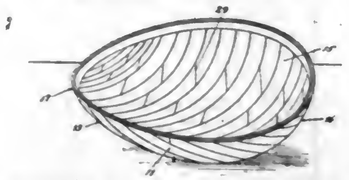
2,452,737
RESISTOR
Albert S. Eisenstein, Cambridge, and Kenneth J. Germeshausen, Newton Centre, Mass., assignors, by mesne assignments, to the United States of America as represented by the Secretary of War
Application March 21, 1944, Serial No. 527,498
2 Claims. (Cl. 201—63)



1. A non-inductive resistance comprising an internally threaded outer metallic sleeve, an externally threaded annular resistance element disposed within said sleeve and in threaded engagement therewith, and a central conductor disposed axially within and in conducting contact with said sleeve and extending through said resistance element.

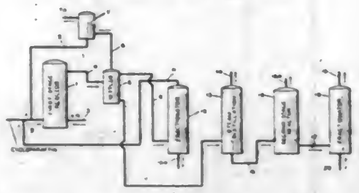
2,452,738
ELECTRIC MARKING DEVICE
Clayton M. Elstad, Minneapolis, Minn.
Application April 2, 1947, Serial No. 738,967
1 Claim. (Cl. 219—29)

In a device of the class described, a base, an upright handle on the base, a housing having primary contacts, a long horizontally disposed support extending forwardly over the base and having at its outer end an insulating guide, an upright resistance marking element having its lower end secured to the base and its upper end portion held by the guide, and two secondary contacts, one of which is on the marking element, said marking element being substantially unobstructed throughout its entire length and spaced materially from the handle for the insertion of a stack of tongue-shaped pieces of goods formed by an indentation cut in the goods, the insertion of the goods between the handle and the marking element positioning the marking element in the indentation, whereby the goods may be marked by forward, rearward or lateral movement of the marking element by the device.



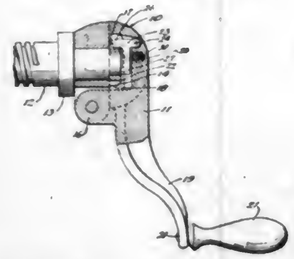
2,452,739
METHOD OF FORMING HOLLOW LAMINATED STRUCTURES
Sherman M. Fairchild, New York, N. Y., assignor, by mesne assignments, to William B. Scarborough, as trustee
Application November 27, 1943, Serial No. 512,009
7 Claims. (Cl. 154—110)

6. The art of fabricating suitable material into a structural assembly having surfaces of compound curvature, which comprises forming the material into flat elongated strips having substantially straight side and end edges; bevelling the side and end edges of the strips to be adhered together; applying adhesive to the strips; placing the strips in side by side relationship on a rigid curved die surface of predetermined contour conforming with the desired contour of the surface of the structure; overlapping proximate bevelled edges of adjacent strips; securing at least one



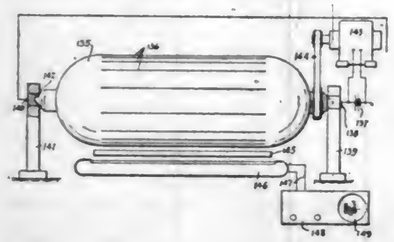
end of each strip with respect to the die surface leaving the remainder of the strip free to shift; applying fluid pressure directed normal to the die surface at all points in its area to press the material thereagainst to cause the strips to adjust themselves to the contour of the die surface and the overlaps to shift simultaneously from their original extents to extents they assume under the applied pressure and after adjustment on the die; and adhering together contacting surfaces of adjacent strips while under pressure.

2,452,740
MOLDED STRUCTURE
Sherman M. Fairchild, New York, N. Y., assignor, by mesne assignments, to William B. Scarborough as trustee
Original application November 27, 1943, Serial No. 512,009. Divided and this application June 27, 1945, Serial No. 601,876
3 Claims. (Cl. 20—89)



1. A structural assembly, comprising strips having substantially straight edges, the edges of the strips being bevelled, the several strips being arranged in pairs, each pair extending from border to border of the assembly, the strips of each pair being arranged end to end, with proximate ends overlapping, the pair being arranged side to side with proximate sides overlapping, the overlapping ends and sides forming joints adhesively secured together, the thickness of the assembly at joints being irregular and comprising the additive thickness of the several overlapping edges, the structure having one surface of regular smooth contour, irregularities resulting from variations in thickness of the material at joints being additive towards the opposite surface.

2,452,741
PRODUCTION OF DIBASIC ACIDS
Harold W. Fleming, Bartlesville, Okla., assignor to Phillips Petroleum Company, a corporation of Delaware
Application March 28, 1947, Serial No. 737,973
10 Claims. (Cl. 260—533)

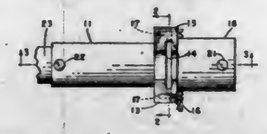


8. A process for the production of dibasic aliphatic acids which comprises oxidizing a cycloparaffin in liquid phase with gaseous oxygen to form a mixture containing a non-aqueous phase comprising cyclic ketones and cyclic alcohols and an aqueous phase comprising aliphatic hydroxy acids and lactones, separating said aqueous phase from the non-aqueous phase and further oxidizing said aqueous phase at a temperature of 50 to 90° C. with gaseous oxygen to form the corresponding dibasic acids.

2,452,742
CRANK DEVICE
Robert D. Franzene, Lake Geneva, Wis., assignor to Henry Hildebrandt, Chicago, Ill.
Application June 14, 1945, Serial No. 599,433
2 Claims. (Cl. 74—548)

1. A crank device which comprises a shaft having a slotted head, a bearing rotatably secured to the shaft adjacent the head, and a crank pivotally secured to the bearing and having a head engaging means in a recessed portion thereof, said means including a key pivotally secured within the recess and adapted to mesh with the slotted head, and spring means bearing against the key and tending to force the key out of engagement with the head.

2,452,743
SYMPHONIC INSTRUMENT
Antonio Fuschi, New York, N. Y.
Application December 14, 1942, Serial No. 469,023
4 Claims. (Cl. 84—1.18)

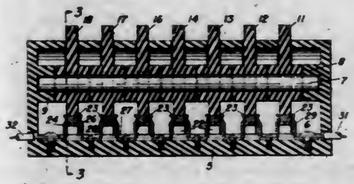


1. In a sound reproducing apparatus a flat, stationary record comprising a sound track having a plurality of adjacently arranged sections each carrying a photographic record of a sound, a rotatable cylinder, a source of light within said cylinder, a light sensitive cell, said cylinder having at least one transparent slit providing means for intermittently directing light from said source through said sections of said sound track and upon said cell, and means for controlling passage of said light through said sections, said controlling means comprising a plurality of shutters one for each of said sections and a plurality of respective keys for actuating said shutters selectively, and sound volume control means operable by said keys, and means for producing sound in accordance with variations in output of said cell.

2,452,744
FLOOR CLEANING MACHINE
John W. Gardner, Richmond Hill, N. Y.
Application June 6, 1945, Serial No. 597,870
1 Claim. (Cl. 242—55.2)

In a frame having a front end and a rear end and including a pair of spaced parallel upright side members extending substantially the length of the frame, the rear end of one of said members having a horizontal bore, the rear end of the other of said members having the lower corner thereof cut out thereby providing a rearwardly extending tongue from the upper portion of said other of said members with said tongue positioned above said cut out, said tongue having a flat bottom surface, said other of said side members having an additional cut out extending through the underside of said tongue at the base thereof and upward and forward to provide a second rearwardly extending tongue on the lower edge thereof, said last-named tongue having a substantially semicircular recess cut down into the upper surface thereof in alignment with said bore, a drum having a pin on one end registering in said bore and having a staff on the other end removably resting in said recess, a leaf spring having one end secured to said flat bottom and extending forward into said last-named cut out and contacting the upper surface of said staff thereby normally urging said staff into said recess.

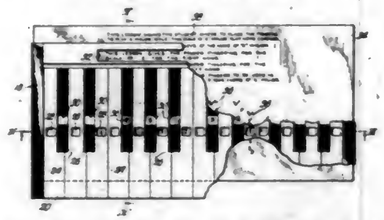
2,452,745
STILL PICTURE ATTACHMENT FOR MOVING PICTURE PROJECTORS
Herman Getter, Bronx, N. Y.
Application April 3, 1946, Serial No. 659,372
1 Claim. (Cl. 88—28)



An attachment for motion picture machines, comprising an inner cylindrical section detachably secured, at one end, to a projector of a motion picture machine, a block element having a vertical slot, a horizontal slot and a central opening formed therein, secured to the opposite end of said inner cylindrical section, the said opening being concentrically aligned with the said inner cylindrical section, an outer cylindrical section concentrically attached to the said block element and a lens holding cylinder having lenses therein and slideable within the said outer cylindrical section, the said vertical slot in said box element adapted to receive and guide a motion picture film therethrough and hold same stationary therein to permit a single picture projection, and the said horizontal slot in said box element adapted to receive a single framed stationary picture for projection therefrom.

2,452,746
AERIAL TOY
Emil J. Giara, Mobile, Ala.
Application February 20, 1945, Serial No. 578,835
3 Claims. (Cl. 244—155)

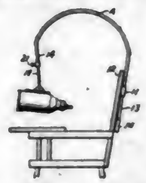
2. A toy device of the character stated comprising a parachute, a hook attached thereto for connection with a kite string, and a body designed to be secured on the kite string to effect the disconnection of the hook from the string as the hook moves therealong, comprising a head portion in the form of a substantially flat member having a central opening through which the kite string is adapted to pass whereby said flat member lies in a plane perpendicular to the string, and a plurality of relatively long substantially triangular vanes connected with said head member and extending therefrom longitudinally of the string in the direction from which the hook approaches on the string, said triangular vanes being spaced around the kite string and having the tapered lower ends in close proximity to the string whereby said hook may ride up along the edge of a vane, the vanes and head member being turnable on the string under the weight of the hook and parachute, to throw off the hook from the vane.



2,452,747
MULTIPLE SWITCH
Charles Frank Gomez, San Francisco, Calif.
Application October 20, 1947, Serial No. 780,958
1 Claim. (Cl. 200—43)

A multiple switch, including a casing, a shaft positioned in said casing, a plurality of spaced contacts mounted in said casing and in parallel

alignment with said shaft, parallel stops formed in said casing and on opposite sides of said aligned contacts, a plurality of disks mounted on said shaft, each of said disks having a bridging piece formed therein, and capable of being moved through the rotation of said disks into and out of engagement with adjacent contacts, each of said disks having a shoulder formed thereon for abutment against said stops.



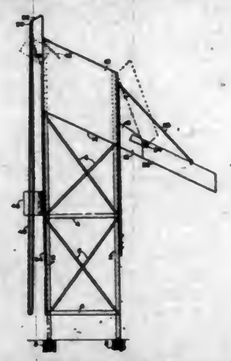
2,452,748
MUSIC INSTRUCTION DEVICE FOR USE WITH THE PIANO
David Grosch, Kansas City, Mo.
Application November 8, 1943, Serial No. 509,352
1 Claim. (Cl. 84—473)

A piano instruction device of the character described comprising a holder of sheet material having a pictorial illustration of a portion of the piano keyboard on one face thereof, said illustration including a row of white keys and a row of black keys, and apertures formed through the sheet material in the areas defining each key of the illustrated portion of said keyboard, there being one aperture for each key respectively; and a single chart having indicia thereon, shiftably mounted on the holder in positions where certain of the said indicia are exposed to view through certain of the apertures, the apertures in the areas occupied by the black keys being in alignment across the holder, the apertures in the areas occupied by the white keys being in alignment across the holder, the line of apertures in the black key areas being offset from the line of apertures in the white key areas, the indicia on the chart being grouped with respect to the position of the two lines of apertures, said indicia being of a character to teach the order in which the corresponding keys of the piano keyboard are to be struck, said holder being provided with an elongated window adjacent the normally uppermost longitudinal, marginal edge thereof through which particular areas of the chart are viewable when certain indicia are exposed to view through the said apertures, said particular areas having explanatory matter applicable to the indicia showing through the apertures when the explanatory matter is viewable through the window said chart being frictionally held in position by the sheet material holder, said holder being of flat, tubular form presenting two planar, superimposed walls to receive the chart therebetween, said chart being shiftable within the said tubular holder in directions parallel with the longitudinal length of said keys.

2,452,749
NURSING BOTTLE HOLDER
Nicholas W. Guden, Chicago, Ill.
Application May 3, 1946, Serial No. 667,196
4 Claims. (Cl. 248—104)

1. A bottle holder comprising an upright standard mounted for swinging adjustment only, said standard having a downturned upper end with a terminal portion of said end straight and hollow, a rod telescopically entered in said hollow end and endwise adjustable in the same, a clamp on the end of said straight portion for securing said rod in adjusted position in said end, the exposed end of said rod being flattened and scored, a casing for receiving a nursing bottle, said casing comprising a substantially cylindrical member of transparent plastic material having a bottle neck restricting collar at one end and a hinged latchable end plate at the other end to prevent escape of pieces of the bottle should the bottle break while in said casing and at the same time pro-

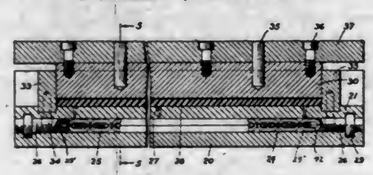
viding full visibility of the encased bottle, a rib along the cylindrical portion of said casing and integral with it, two jaw members having portions for engaging said rib and having flattened wing portions for contacting the flattened end of said rod on each side of the same, a bolt through registering apertures in said end and said wing and threaded in one of said wings to secure the jaw members to the rod in angularly adjusted relation and also to engage the casing rib anywhere along its length whereby the encased bottle may be positioned at a height and inclination as will be most convenient for the user.



2,452,750
SUPPLEMENTAL THERAPEUTIC FOOD
Thomas W. Halliday, Los Angeles, and Glenn H. Joseph, Corona, Calif.; said Joseph assignor, by mesne assignments, to said Halliday
No Drawing. Application September 3, 1941, Serial No. 409,364
6 Claims. (Cl. 99—132)

5. A process for the preparation of a supplemental food product comprising solubilizing in situ a major proportion of the pectinous component of a pectinous source material, tempering said solubilized material, mixing therewith an oleaginous substance as a lubricating material to improve the subsequent shearing of the treated material, and finally simultaneously shearing and flaking the so treated material to form very thin fiber-disrupted flakes containing soluble pectin and readily hydratable cellulose.

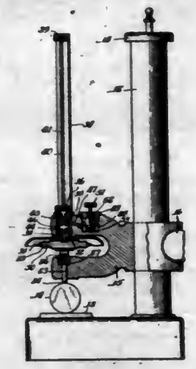
2,452,751
APPARATUS FOR RECEIVING AND DUMPING REFUSE
Warren D. Hardy, Roanoke, Va.
Application November 6, 1946, Serial No. 708,088
1 Claim. (Cl. 214—120)



In a domestic refuse elevator, the combination which comprises a vertically disposed frame rectangularly shaped in plan having posts at the four corners supported by suitable bracing elements, a hopper having a sloping floor with sloping sides and having a longitudinally disposed partition therein dividing the interior into separate sections, said hopper supported by the frame in spaced relation above the ground, a plurality of vertically disposed parallel rails providing upwardly extending tracks on the side of the frame corresponding with the high side of the hopper, a

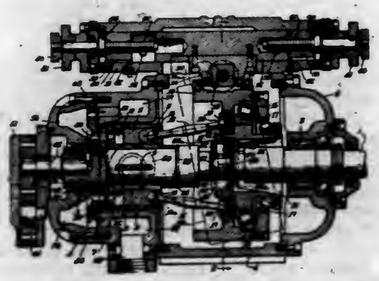
supporting bar suspended above the upper end of the hopper and extended laterally to bridge the said tracks, a pulley block slidably mounted on the bar, a carrier having a bail on the upper end and extensions on one side positioned to coact with the rails of either of the tracks whereby the rails hold the carrier against outward movement away from the frame, trips at the upper ends of each of said tracks for actuating the carrier to dumping po-

sition, as the carrier reaches the upper ends of the tracks whereby the contents of the carrier are dumped into the sections of the hopper respectively, a common chute pivotally mounted on the lower side of the hopper and positioned to receive materials from each section thereof, gates in the sections of the hopper and on the low side thereof, and suitable cables for operating the carrier, chute and gates of the hopper.



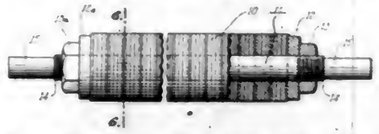
2,452,752
METHOD OF MAKING ELASTIC CHAINS
William Hartranft, Palmyra, N. Y., assignor to Elastic Chain Company, Bratenahl, Ohio, a firm
Application January 13, 1947, Serial No. 721,862
5 Claims. (Cl. 18—59)

3. The method of manufacturing an elastic device which comprises placing a chain in a receptacle with the chain in fully contracted position, injecting an elastic medium into said receptacle and in and around the links of the chain, and allowing the elastic medium to adhere to the chain while holding the chain so contracted.



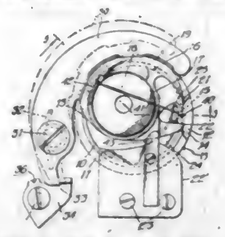
2,452,753
COMPARATOR GAUGE
Claude M. Hathaway, Denver, Colo.
Application October 13, 1945, Serial No. 622,215
1 Claim. (Cl. 33—147)

In a comparator gage having an anvil, a vertical column and adjustably positioned arm on said column, the combination comprising a pair of concave corrugated metal diaphragms connected together at their peripheries to form a liquid chamber and adapted to be moved by objects to be gaged to decrease the volume of said chamber, a support mounted on said arm, said support being connected only to the central portion of the top diaphragm to hold said chamber in a position depending from said arm to permit



free movement of the periphery of said chamber, and a protective guard mounted between said arm and said chamber and extending beyond the periphery thereof, said guard being spaced away from said chamber except adjacent the center thereof.

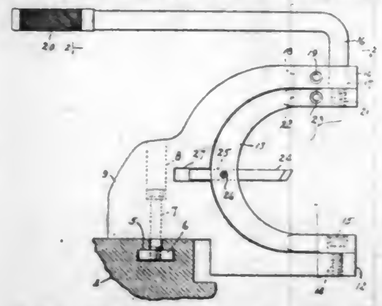
2,452,754
VARIABLE POWER TRANSMISSION
Rudolph E. Herrstrum, Rockford, Ill., assignor to Rockford Machine Tool Company, Rockford, Ill., a corporation of Illinois
Application February 21, 1944, Serial No. 523,188
11 Claims. (Cl. 74—60)



1. In a variable power transmission, the combination of a casing, a rotary shaft therein, a cylinder barrel fixed to said shaft and having cylinders disposed in a series around the shaft with their axes extending longitudinally with respect thereto, pistons in said cylinders, a bearing ring supported on said casing and encircling the shaft and disposed with its axis oblique to the shaft axis, a swash plate carried by said ring for rotation about the axis of the ring, piston rods connecting said swash plate with the several pistons, and a drive connection between said swash plate and the shaft comprising a pair of projections extending radially from opposite sides of the shaft, the swash plate having a central opening with inwardly facing longitudinal slots in which said projections are respectively engaged, and anti-friction means transmitting the driving torque from said projections to the swash plate.

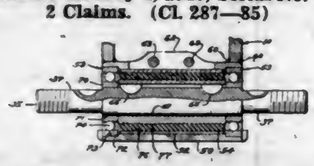
2,452,755
COMPRESSED LAMINATED MACHINE ROLL
Paul R. Heygel, Asheville, N. C., assignor to Ecusta Paper Corporation, a corporation of Delaware
Application June 19, 1945, Serial No. 600,369
4 Claims. (Cl. 242—68)

2. A compressed, laminated machine roll comprising a central shaft of comparatively small diameter, and an annular plywood body carried by said shaft, said plywood body being composed of a plurality of annular plywood blanks mounted with the course of the grain in said blanks disposed transversely on said shaft and then highly compressed to a dense mass.



2,452,756
SEWING-MACHINE HOOK MECHANISM
Richard K. Hohmann, Jamaica, N. Y., assignor to White Sewing Machine Corporation, Cleveland, Ohio, a corporation of Delaware
Application January 15, 1945, Serial No. 572,931
6 Claims. (Cl. 112—228)

1. A sewing machine mechanism, comprising in combination a loop taker element turning about a vertical axis and having a bobbin holder seat at its upper side including an uprising rib portion of said element extending circularly about said axis, and a bobbin holder element normally held in engagement with said seat by gravity and vertically movable toward and away from said seat, and formed with a groove in the form of an arc extending circularly about said axis for substantially less than 360°, and entered by said rib, said bobbin holder element having a peripheral portion cut away to form horns separated by a notch and at least one of which is angularly displaced about said axis from said groove and extends over said rib whereby the latter restricts the downward displacement of said horn, and a stationary needle guide extending through said notch and cooperating with said horns to restrict angular movement of the bobbin holder element about said axis in either direction.

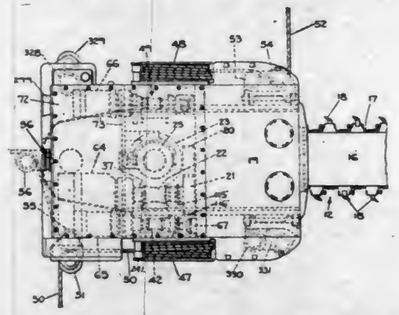


2,452,757
LATHE RADII ATTACHMENT
Warren B. Holdridge, Los Angeles, Calif.
Application September 10, 1945, Serial No. 615,300
2 Claims. (Cl. 82—12)

1. A radii attachment for lathes and like machines comprising a generally C-shaped frame formed with vertically spaced parallel arms and with an intermediate projection extending in a direction opposite to the arms, said projection having a hole therethrough for a securing bolt engaged with a support for adjustably fastening the attachment to said support, the lower of said arms being provided with a screw-tapped seat and the upper arm with a smooth bore aligned with said seat, said upper arm, also, having a vertical through slot extending from the smooth bore inwardly of the upper arm and a transverse screw-receiving hole having internal screw threads in said upper arm on one side of said slot, a transverse screw in said latter hole for effecting contraction of the slot and, therefore, of the smooth bore, a tool-holding C-shaped member having a nesting position in the C-shaped frame and formed with vertically spaced parallel arms generally coextensive with the arms of the frame, the lower arm of the tool-holding member having a bore aligned with the threaded seat of the lower

arm of the frame, a lower pivot screw having a cylindrical head in the latter bore and its threaded shank in said seat, the upper arm of the tool-holding member having an internally threaded hole and a vertical connecting slot aligned with the smooth bore and connecting slot in the upper arm of the frame, a transverse screw similar to the above-mentioned transverse screw in said upper arm of the tool-holding member for effecting contraction of the slot and internally threaded hole, and a handle having a threaded end in said internally threaded hole and extending through the aligned smooth bore to form an upper pivot aligned with the lower pivot screw, whereby swinging movement of the handle will cause swinging movement of the tool-holding frame on its pivots, and whereby contraction of said smooth bore to frictionally grip the handle will lock the tool-holding member against movement.

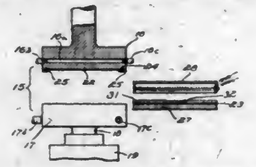
2,452,758
VEHICLE FRAME JOINT
Hugh A. Hutchins, Arcadia, Calif.
Application February 1, 1946, Serial No. 644,886
2 Claims. (Cl. 287—85)



1. A pivotal connection between two members including, a split housing fixed to one member, a case arranged in the housing, means clamping the housing onto the case, a sleeve fixed to the other member, bearing means mounting the sleeve centrally in the case and for relative rotation between the sleeve and case, and a body of shock absorbing material between and fixed to the case and sleeve.

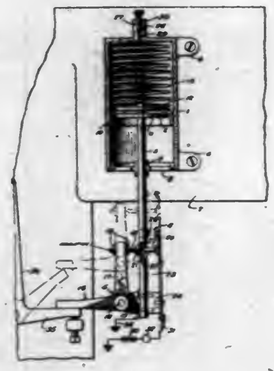
2,452,759
INSECTICIDE CONTAINING METHYLATED NAPHTHALENE AND 4,4' DICHLORO-DIPHENYL-TRICHLOROETHANE
Julius Hyman, Chicago, Ill., assignor to Velsicol Corporation, Chicago, Ill., a corporation of Illinois
No Drawing. Application September 22, 1944, Serial No. 555,395
8 Claims. (Cl. 167—32)

1. An insecticide containing as active ingredients an insect toxic proportion of methylated naphthalene and 4, 4' dichloro-diphenyl-trichloroethane.



2,452,760
MINING MACHINE
Robert K. Jeffrey, deceased, late of Bexley, Ohio, by Florence H. C. Jeffrey, executrix, Bexley, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company, a corporation of Ohio
Application August 10, 1943, Serial No. 498,087
28 Claims. (Cl. 262—30)

1. In a mining machine, the combination with a supporting frame, of cutting mechanism mounted thereon, a motor connected to said cutting mechanism to drive the same, a feeding rope drum, a retarding rope drum, a rotary hydraulic motor operatively connected to said feeding rope drum, an additional rotary hydraulic motor connected to said retarding rope drum and constructed to operate also as a pump, a hydraulic system including a pump for supplying hydraulic pressure medium connecting said rotary hydraulic motors in series with each other and with said pump whereby the motor connected to the retarding rope may act as a pump to drive the other motor, and valve mechanism for controlling said hydraulic motors.

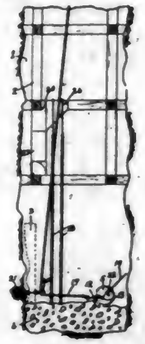


2,452,761
METHOD OF FORMING SLABS OF ORGANIC PLASTIC MATERIAL
Raymond S. Jesionowski, Hartford, Conn., assignor to Plax Corporation, Hartford, Conn., a corporation of Delaware
Application February 16, 1944, Serial No. 522,602
7 Claims. (Cl. 18—47.5)

1. The method of forming an approximately rectangular slab of organic plastic material which comprises forming a charge of molding powder to a pattern selected to form said rectangular slab, said pattern being approximately that of a bow tie and having reentrant ends, placing said charge between parallel horizontal forming surfaces of a press, and subjecting the charge to heat and pressure in said press to reduce the material of the charge to a predetermined lesser thickness and causing unobstructed horizontal

flow of the material until said approximately rectangular slab is formed.

2,452,762
STOP LIGHT SIGNAL DEVICE
John Karow, De Forest, Wis., assignor to Sverre Quisling, Madison, Wis.
Application August 26, 1946, Serial No. 693,060
5 Claims. (Cl. 200—52)

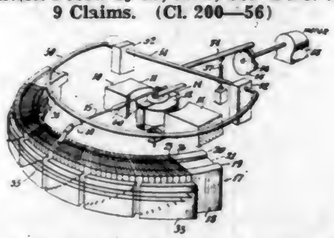


2. A signal control adapted to be operated by a portion of a motor vehicle fuel feeding control comprising, a switch having a movable arm, a reciprocable support for said switch, means on said support engageable by said portion of the motor vehicle fuel feeding control to open said switch and move said support, and means to retard the return movement of said support when the engagement with said portion of the motor vehicle fuel feeding control is broken.

2,452,763
MUCKING MACHINE FOR MINE SHAFTS
William E. Kindsvater, Paige, Idaho
Application January 27, 1947, Serial No. 724,545
5 Claims. (Cl. 214—120)

1. In a mucking apparatus, the combination with a frame erected in a vertical shaft being dug, a hopper carried by said frame and having a depending discharge chute, a track extending vertically in the shaft with its upper portion disposed along a wall of the hopper, said track having transversely spaced rails having hooks at their upper ends, a scoop having an inlet across its front, a yoke carried by said scoop and projecting forwardly therefrom, and a cable extending vertically in the shaft and having its lower end connected with the yoke, said cable constituting means for drawing the scoop forwardly in a filling motion and then upwardly along the track, and the hook at the upper end of the track constitut-

ing means for engaging through the inlet of the scoop and causing the scoop to tilt over the upper



end of the track to a dumping position over the hopper.

2,452,764

SELECTABLE CONTACT TRANSMITTER MEANS FOR SENSITIVE INSTRUMENTS

John O. Kirwan, Bloomfield, N. J., assignor to Wallace & Tiernan Products, Inc., Belleville, N. J., a corporation of New Jersey

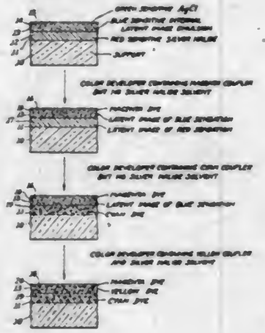
Application February 19, 1947, Serial No. 729,564
9 Claims. (Cl. 200—56)

1. Electrical transmitter means comprising, in combination, a member adapted to be positioned at any place along a predetermined path, an array of regularly spaced contact bars along the path, said bars extending transversely of the path all at substantially the same acute angle thereto, said member being shaped at its end to fit between and against any pair of said bars, and said member being biased to remain clear of said bars, and depressor means for moving the member against the array of bars, to seat the end of the member between and in electrical contact with the pair of bars corresponding to the position of the member in the path, said member including resilient structure supporting its aforesaid end, to permit the latter to move transversely of the path to insure its being seated between bars, when the said end is urged against the bars by the depressor means.

2,452,765

MULTILAYER PHOTOGRAPHIC ELEMENT HAVING A MIXED GRAIN EMULSION AND PROCESS EMPLOYING IT

Edward B. Knott and Guy William Willis Stevens, Harrow, England, assignors to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey



Application February 21, 1948, Serial No. 10,186
In Great Britain September 2, 1942
5 Claims. (Cl. 95—2)

1. A sensitive photographic element comprising a support having thereon two superposed emulsion layers, one of which layers is a red sensitive silver halide emulsion (II) a test portion of which upon exposure to light and development for 4 minutes at 20° C. in the following developer (IIb):

	Grams
Hydroquinone	12
N-methyl-p-aminophenol sulfate	3
Sodium sulfite, crystals	90
Potassium bromide	4
Sodium carbonate, crystals	150
Sodium thiosulfate, crystals	20
Water to 1000 ccs.	

gives a density along the $\log_{10}E$ axis of the characteristic curve which does not exceed the density at the same point along the $\log_{10}E$ axis obtained when an identical test portion of the light-sensitive silver halide emulsion (II) is exposed and developed for 4 minutes at 20° C. in the following developer (III):

	Grams
Hydroquinone	12
N-methyl-p-aminophenol sulfate	3
Sodium sulfite, crystals	90
Potassium bromide	4
Sodium carbonate, crystals	150
Water to 1000 ccs.	

and the other of which layers is a mixture of emulsions, one being a green sensitive silver chloride emulsion of the type (II) specified above, and the other a blue sensitive silver halide emulsion (I) a test portion of which last-mentioned emulsion upon exposure to a light intensity scale for a fixed time between 1/100 and 1 second and development for 3 minutes at 20° C. in the following developer (IIa):

	Grams
Hydroquinone	15
N-methyl-p-aminophenol sulfate	15
Sodium sulfite, anhydrous	50
Potassium bromide	10
Sodium hydroxide	25
Sodium thiosulfate, crystals	20
Water to 1000 ccs.	

gives a maximum density at least 5 times the maximum density obtained when the equally exposed identical silver halide emulsion is developed for 4 minutes at 20° C. in the following surface developer (I):

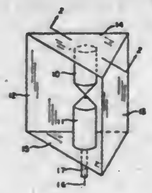
	Grams
p-Hydroxyphenylglycine	10
Sodium carbonate	100
Water to 1000 ccs.	

2,452,766

DEVICE FOR FRAMING LADIES' HANDBAGS

Sam Kolsky, Trenton, N. J.

Application March 26, 1946, Serial No. 657,245
2 Claims. (Cl. 154—1)



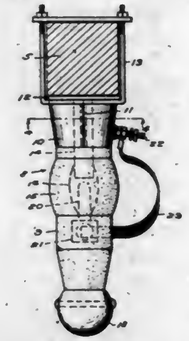
1. In a device for assembling ladies' handbags, comprising a base member revolvably mounted upon a supporting block, upright members slidable upon said revolvable base member, fins formed upon and depending from the base of said upright members slidably engaging in grooves upon said revolvable base member, screws upon said base member engaging through slots in said base member and through the base of said upright member to fix the said upright members in position, framing members attached upon said upright members and radially adjustable thereon, screws upon said upright members engaging through slots in said framing members to fix same thereon, and a holding and locking frame hinged to one of said framing members to hold in position a hinged handbag frame.

2,452,767

BROAD-BAND ANTENNA

John D. Kraus, Newton Center, Mass., assignor to the United States of America as represented by the Secretary of War

Application April 2, 1946, Serial No. 658,942
5 Claims. (Cl. 250—33.65)



2. A broad-band plane polarized antenna assembly including a vertical corner reflector having a pair of side plates which meet to form a corner and a bottom plate and a top plate inclosing said corner, a center fed radiating element vertically oriented in said reflector adjacent the corner thereof with the ends of said element electrically connected to the top and bottom plates of said reflector whereby a sharply defined unidirectional antenna pattern is obtained when the length of said element corresponds to approximately one-half of a wavelength or more of the operating frequency and a bidirectional antenna pattern is obtained when the length of said element corresponds to approximately one quarter of a wavelength or less of the operating frequency.

2,452,768

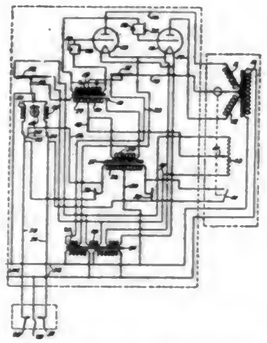
TIRE DEFLATION OPERATED SWITCH

Edward H. Kuster, Del Ray Beach, Fla.

Application April 26, 1946, Serial No. 665,121
1 Claim. (Cl. 200—58)

A tire deflation signal device comprising an elongated cylindrical body portion of molded rubber having a spherical lower end, a metallic spherical wear resisting cover for the spherical end, a retaining pin passing through the cover and the spherical end, a metallic conical ferrule having inwardly pressed ribs and laterally extending oppositely directed attaching plates, said ferrule having the upper end of the body portion molded therein and around the said ribs, said body portion provided with a spherical bulb-like enlarged portion intermediate its ends, said bulb-like portion provided with a substantially concentric cavity therein, a centrally disposed contact element formed on the ferrule and extending through the body portion axially thereof and terminating in the said cavity, a centrally disposed contact element molded into the body portion and projecting upwardly in axial alignment with the first named contact and terminating in the said cavity in slightly spaced relation to the first named contact, the free end of the second named contact being rounded, a binding post carried by the ferrule and extending outwardly therefrom, a flexible braided electrical conductor soldered to the base of the second named contact and extending outwardly of the body portion for connection with the binding post, said binding post insulated from the said ferrule and U-shaped clamps for supporting the device upon the axle of a ground vehicle in proximity to its wheels.

2,452,769



ELECTRIC MOTOR CONTROL SYSTEM

Karl A. Lang, Glenview, Ill., assignor to Lindberg Engineering Company, Chicago, Ill., a corporation of Illinois

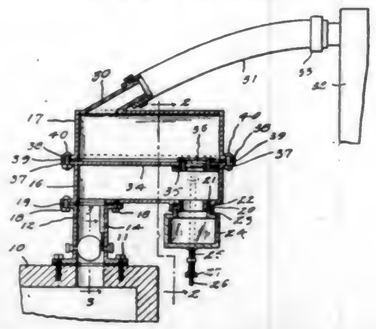
Application February 19, 1944, Serial No. 523,036
9 Claims. (Cl. 318—28)

1. An electric control system comprising a reversible electric motor having a main winding and a pair of shaded pole windings, a bridge circuit having a pair of adjustable resistors, the motor being connected to one of the resistors to adjust it, a second reversible motor for adjusting the other resistor, means responsive to a

condition to be controlled to control the operation of the second motor, a pair of gaseous discharge tubes connected to the shaded pole windings respectively, a transformer having a pri-

mary winding connected across the bridge circuit and a center tapped secondary winding, the ends of the secondary winding being connected to the grids of the tubes respectively and the center tap being connected to the tube cathodes.

2,452,770
COCOA-SUGAR COMPOSITION
Louis Lang, New York, N. Y., assignor to The National Sugar Refining Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application September 6, 1944, Serial No. 552,929
8 Claims. (Cl. 99—26)

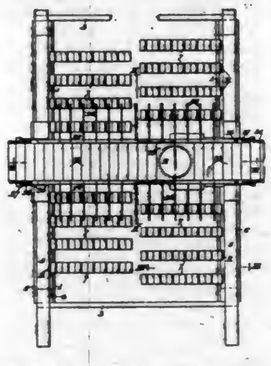


1. Process for the production of a cocoa product which comprises adding cocoa to a sugar syrup at a temperature of from about 250° to 320° F. with continuous beating, and continuing the beating until a dry, powdery product is obtained.

2,452,771
PICKER SPINDLE
Samuel W. La Rocque, Pawtucket, R. I., assignor to The La Rocque Mfg. Co., Inc., Pawtucket, R. I., a corporation of Rhode Island
Application April 14, 1945, Serial No. 588,358
4 Claims. (Cl. 139—158)

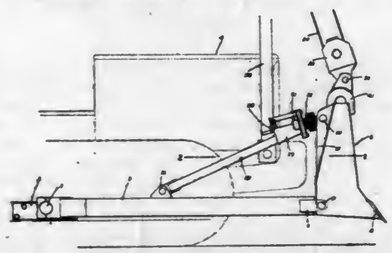
1. Means for lubricating a loom picker, comprising a hollow lubricant containing picker spindle having an air inlet vent and closed ends, diametrically opposite horizontally aligned orifice means adjacent the outer end thereof slightly interior of the outer throw of the picker to be covered by the picker at the outer end of its stroke having countersunk outer ends, and continuous yarn strand wick means extending diametrically across said hollow picker spindle on the lower wall thereof having ends projecting slightly radially beyond the outer surface of the picker spindle preventing flow when the picker is inactive, compressible against said countersink in opposite directions by the back and forth movement of the picker sleeve to squeeze lubricant from the ends of said wick means to increase the capillary flow thereof as the picker reciprocates in use.

2,452,772
FILTER
Henry Laughlin, Derry, Pa.
Application May 28, 1947, Serial No. 751,154
1 Claim. (Cl. 210—165)



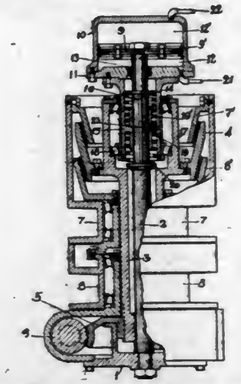
A filter for a flow line comprising a casing having upper and lower sections and a partition plate mounted horizontally between the said sections and providing upper and lower chambers in the casing, the upper section having an outlet at its top and the lower section having an inlet at its bottom adjacent one end thereof, said partition having an opening formed therein, a sleeve mounted through the opening of the partition and carrying filtering material for removing foreign matter from liquid passing through the sleeve from the lower chamber into the upper chamber, a neck extending downwardly from the bottom of the lower chamber about an opening formed therein near the opposite end of the lower chamber from its inlet, said neck being formed at its lower end with an annular recess, a gasket in said recess, a cup under the casing having an upwardly projecting neck fitting snugly into the recess and against the gasket, a U-shaped bracket having a bridge spaced downwardly from the cup and arms extending upwardly from ends of the bridge in spaced relation to opposite sides of the cup and the lower section of the casing and provided at their upper ends with pintles engaged in sockets at opposite sides of the said lower section and mounting the bracket for swinging movement longitudinally of the casing from a raised position to a depending position disposing the bridge under the cup diametrically thereof, said bridge having an enlargement midway its length formed with a threaded opening, and a threaded stem engaged through the threaded opening and disposed vertically under the cup with its upper end in pressing engagement with the bottom of the cup to hold the neck of the cup in compressing engagement with the gasket and form a tight joint when the bracket is in its lowered position.

2,452,773
CUTTING TABLE
David Levin, Brooklyn, N. Y.
Application June 1, 1946, Serial No. 673,865
13 Claims. (Cl. 164—73)



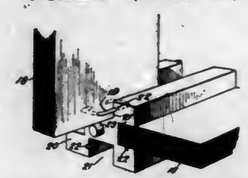
1. A cutting table comprising, a frame, a plurality of supports pivotally mounted in the frame, releasable means for holding the supports in work-supporting position, a carriage extending across the frame and movable longitudinally thereof, portions of the supports and the carriage top lying in a single plane to constitute a work-supporting table surface, a cutting tool mounting

on the carriage, and means on the carriage moving the supports out of the path of said carriage adjacent the carriage on the side toward which



it is moved and returning the supports to said plane adjacent the carriage on the opposite side thereof.

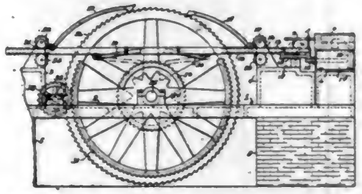
2,452,774
ADJUSTABLE PUSH GRADER MOUNT
Robert G. Le Tourneau, Peoria, Ill., assignor to R. G. Le Tourneau, Inc., Stockton, Calif., a corporation of California
Application October 30, 1944, Serial No. 561,000
3 Claims. (Cl. 37—144)



2. An adjustable push grader mount comprising a pair of transversely spaced, longitudinally extending push beams, means adapted to couple the push beams at their rear ends to the tractor on opposite sides thereof, said means coupling the push beams to the tractor for limited lateral rocking motion, a push grader blade disposed transversely ahead of the push beams, means pivotally connecting the blade adjacent its lower edge to the forward ends of the push beams, a compression bar unit pivoted to each push beam intermediate its ends and thence extending at a forward and upward incline, means pivotally connecting the blade adjacent its upper edge to the forward ends of the compression bar units, said compression bar units lying in the same vertical planes as the corresponding push beams and being free between the pivotal connections with said push beams and the blade, at least one of the compression bar units being selectively extensible so that differential lengthening thereof relative to the other compression bar unit causes tilting of the blade transversely of the direction of travel; there being an inwardly projecting rigid horizontal brace adjacent the outer end of each push beam, the outer end of each brace being pivotally connected to the blade adjacent its bottom edge.

2,452,775
MULTIPLE PNEUMATIC CLUTCH
Lawrence B. Lindsley, Los Gatos, Calif., assignor, by mesne assignments, to Wooldridge Manufacturing Company, Sunnyvale, Calif., a corporation of Nevada
Original application October 19, 1942, Serial No. 462,636. Divided and this application July 19, 1943, Serial No. 495,372
4 Claims. (Cl. 192—87)

1. In a pneumatic clutch control, a rotatable drive clutch element, a driven clutch element arranged on each side of the drive clutch element, a stationary shaft concentric with said elements, a reciprocable and non-rotatable member splined to said shaft, said reciprocable member rotatably supporting the drive clutch and adapted to move the latter into engagement with either of the driven clutches, spring means active on both sides of the drive clutch element for holding it in neutral position between the driven clutch elements, a non-rotatable casing mounted on the reciprocable member, a piston slidable in the casing and connected to the stationary shaft, and pneumatic means for actuating the non-rotatable reciprocable member in either direction of its reciprocatory movement for connecting the drive clutch element with either of the driven clutch elements.

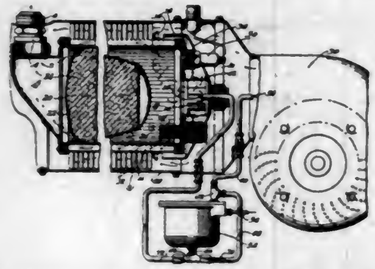


2,452,776
TOY MOVING PICTURE PROJECTOR
Thomas S. MacMechan, Sharon, Mass., assignor to Midgette Toy Company, Sharon, Mass.
Application February 14, 1945, Serial No. 577,876
3 Claims. (Cl. 88—19)

3. In a toy moving picture projector having a housing with side walls, a rotor journaled on said side walls and extending between same, said rotor formed with an axially disposed slot, a book comprising a plurality of picture bearing cards marginally secured, said marginally bound part proportioned to fit said axial slot, and elongated ridge and groove means associated with said marginal bound portion of the book and a side wall

of the slot respectively, extending lengthwise of the slot so as to permit sliding insertion of the bound portion of the book axially of the rotor and to positively prevent radial displacement of the book with respect to the rotor.

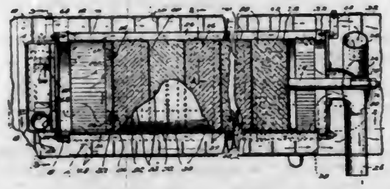
2,452,777
POWER TRANSMISSION
Norberto Martinez, Somerville, Tex., assignor to Horace Gonzales, Chicago, Ill.
Application August 29, 1945, Serial No. 613,285
1 Claim. (Cl. 74—129)



A transmission device, comprising a driving shaft, a ratchet wheel secured thereto, a driving spur gear secured to said shaft and spaced axially from said ratchet wheel, a reciprocating bar on each side of said ratchet wheel, means supporting the bars for reciprocating movement, a pivotally mounted lever, a pin and slot means connecting each end of the lever with one of said bars whereby oscillatory movement of said lever causes reciprocation of the bars in directions opposite to each other, a prime mover for oscillating said lever, a pair of pawl members offset from said bars, said pawl members being in alignment with each other and operable in the plane of said ratchet wheel to engage the same for alternatively driving the same, means pivoting one of said pawl members to one of said bars for bodily movement therewith and engaging said ratchet wheel for moving the same in one direction, means pivoting the other of said pawl members to the other of said bars for bodily movement therewith and engaging said ratchet wheel for moving the same in said one direction, whereby said ratchet wheel is uni-directionally driven, a power take-off shaft, a spur pinion on said power take-off shaft and meshing with said driving spur gear.

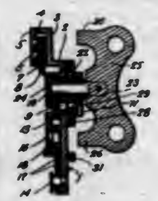
2,452,778
UNIVERSAL SWIVEL
Ralph C. Mathewson, West Pittston, Pa.
Application March 6, 1944, Serial No. 525,231
4 Claims. (Cl. 248—341)

1. A universal swivel coupling, comprising a body having an opening the body being shaped to provide a bearing ball raceway encircling the opening, bearing balls in said raceway, a ball resting on said bearing balls and having a stem extending through said opening, and a cap comprising a central portion encasing the upper part of the ball, an encircling flange secured to the body and a part intermediate the central portion and the flange and lying over and in close proximity to but spaced from the bearing balls and coacting with said raceway to maintain the bearing balls in operative position.



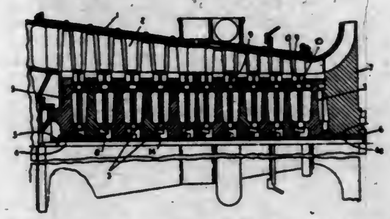
2,452,779
COMBUSTION HEATER HAVING AIR PREHEATING AND CARBURETING MEANS
Henry J. De N. McCollum, Chicago, Ill.; Thelma McCollum, executrix of said Henry J. De N. McCollum, deceased, assignor to Stewart-Warner Corporation, Chicago, Ill., a corporation of Virginia
Application February 19, 1943, Serial No. 476,430
1 Claim. (Cl. 158—28)

In a heater having a combustion chamber having a cylindrical wall and an end wall, and heat exchange means receiving hot products of combustion from the combustion chamber, the combination of a cup-shaped combustion air spinner attached to the end wall of the combustion chamber and in open communication with the combustion chamber, said spinner having a series of slots in the cylindrical wall thereof, an inwardly directed tongue associated with each of said slots to give the air passing therethrough a whirling motion, a plate spaced from the end wall and having a cylindrical portion in telescopic relation to and spaced from the cylindrical wall, said plate enclosing said spinner, means forming a jet delivering at the axial center of said spinner and at a point spaced from the base thereof, means for supplying a rich mixture of fuel and air to said jet, and means for supplying preheated combustion air to said spinner by forcing said air between said plate and the combustion chamber walls.



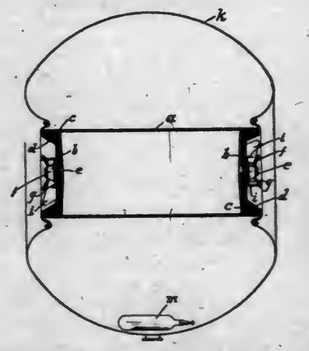
2,452,780
NONPULSATING INTERNAL-COMBUSTION HEATER
Henry J. De N. McCollum, Chicago, Ill.; Thelma McCollum, executrix of said Henry J. De N. McCollum, deceased, assignor to Stewart-Warner Corporation, Chicago, Ill., a corporation of Virginia
Application March 6, 1943, Serial No. 478,259
11 Claims. (Cl. 126—116)

9. A heater of the class described comprising a heat exchanger having inwardly open longitudinally extending gas channels on the inner periphery thereof, means forming a combustion chamber in direct communication with one end of said heat exchanger for supplying hot gases of combustion to said channels, means directly communicating with the opposite end of said heat exchanger and forming an outlet for exhausting said gases, a muffler concentrically disposed in said heat exchanger and confining to said channels the flow of hot gases from said combustion chamber to said exhaust outlet, means forming a plurality of compartments arranged in end to end relation lengthwise of said muffler, each compartment being sealed against direct communication



with an adjacent compartment and having a series of openings providing acoustic coupling between each compartment and the hot gases, the openings in any one compartment being positioned at points in the wall thereof subject to a pressure variable from time to time but of the same magnitude at each of said openings at any given time when the heater is operating, a sound absorbing material contained in said compartments, and means for directing ventilating air over said heat exchanger.

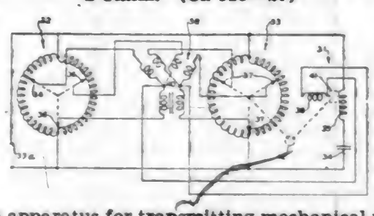
2,452,781
ROTARY TYPE CAN OPENER
Robert E. McLean, Fort Benning, Ga.
Application January 18, 1944, Serial No. 518,760
18 Claims. (Cl. 30—15)



1. A rotary drive wheel type can opener comprising a body having a longitudinal opening, a cutter carried by the body, a rotary shaft extending through the body opening for movement lengthwise of the body, a member rotatably supported on the shaft, a driving wheel carried by the shaft for rotation thereby and for coaction with the cutter, means connected with and actuated by said member upon rotation thereof for effecting translational movement of the wheel and cutter, means for turning the shaft and wheel independently of the rotatable member, a trigger element slidably connected with and carried by the rotatable member for rectilinear movement, means for limiting said rectilinear movement, means for forming a driving connection between the trigger element and the shaft turning means upon turning the turning means to rotate the rotatable member, and means for releasing the trigger element from the shaft turning means upon rotation of said rotatable member in one direction to a predetermined extent.

2,452,782
CONSTRUCTION OF ROTORS FOR COMPRESSORS AND LIKE MACHINES
Roderick Cristall McLeod, Cropston, and Geoffrey Bertram Robert Felliden, Lutterworth, England, assignors to Power Jets (Research & Development) Limited, London, England
Application January 15, 1946, Serial No. 641,305
In Great Britain January 16, 1945
8 Claims. (Cl. 230—134)

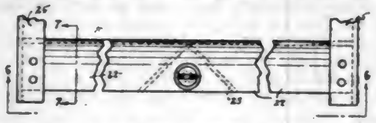
1. A rotor for a multistage axial flow compressor, turbine, or like machine, comprising a plurality of axially spaced substantially disc-type wheels each having peripheral blade root anchorages formed by seating recesses extending axially from side to side thereof, at least one row of blades fabricated separately from the wheel and having roots engaged in said recessed anchorages with said wheels taking the whole centrifugal load of such blading, said blade roots and seatings having complementary axially extending blade retaining formations permitting axial entry and removal of the blades to and from said seatings, a tensioning element lying on the axis of rotation surrounded by said wheels and separably holding said wheels together by compressive stress, abutment means located radially inwardly of the blade roots but near the wheel peripheries and transmitting the whole of such compressive stress, and shroud rings between the peripheries of adjacent wheels to fill the spaces between adjacent blade rows and to locate said blades axially.



2,452,783
SHOCKPROOF AERIAL DELIVERY CONTRIVANCE
Robert J. Nebesar, Bristol, Va., assignor to Universal Moulded Products Corporation, Bristol, Va., a corporation of Delaware
Application October 13, 1945, Serial No. 622,205
4 Claims. (Cl. 244—138)

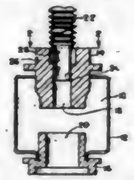
1. A shock-proof aerial-delivery contrivance that may be launched from an airplane and which comprises a supplies container and a collapsible

and inflatable bag of flexible and elastic material: said container comprising a tubular body, an end closure or closures therefor, said closure comprising a backing plate and an elastic packing adapted to be freely insertable into the end of the container, said packing having a relatively thin central portion and increasing in thickness toward its periphery so as to thereby provide a packing having a substantially frusto-conical outer face area, a thin dished-in cap conforming to and engaging the outer face of the packing and having a marginal extension curved outward over and spaced from the end edge of the tubular container and thence backward outside of and spaced from the end portion of the tubular container when the backing plate, packing and cap are inserted therein as specified, a central bolt in rigid relation with the backing plate and extending through the relatively thin central portion of the packing and through the center of the cap, and a nut on the bolt positioned in the recess formed by the dished-in cap and adapted to be tightened to expand the packing radially and axially to thereby effectually seal the closure; said bag being secured to said container between said packing and cap and together with said closure or closures completely sealing the bag from the atmosphere; and means to inflate the bag.



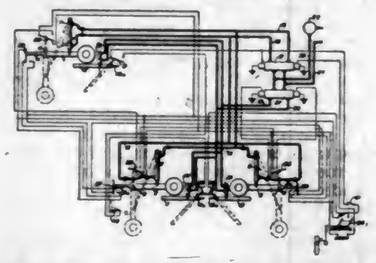
2,452,784
ELECTRICAL MOTOR CONTROL SYSTEM
Samuel Noodleman, Dayton, Ohio, assignor, by mesne assignments, to the United States of America as represented by the Secretary of War
Application January 24, 1945, Serial No. 574,369
1 Claim. (Cl. 318—29)

In apparatus for transmitting mechanical position from a first point to a second point by electrical means, a first continuously variable autotransformer including a ring coil having three movable contacts thereon arranged in equally spaced relation, a second continuously variable auto-transformer including a ring coil having three movable contacts thereon arranged in equally spaced relation, star-arranged transformers coupling the movable contacts of said first transformer respectively with the movable contacts of said second transformer, a source of alternating current connected to the ring coils of said first and second transformers at opposing points of each such coil, a drive motor having its armature mechanically coupled to the contacts of said second transformer, means responsive to a voltage established at the common terminals of said star-arranged transformers for energizing said drive motor whereby it displaces the contacts of said second transformer to a position of correspondence with the contacts of said first transformer.



2,452,785
TRAILER HITCH
William H. Olney, Youngstown, Ohio
Application October 17, 1945, Serial No. 622,907
6 Claims. (Cl. 280—33.44)

1. A trailer hitch consisting of a channel member having end plates affixed thereto so as to enable the said hitch to be positioned between frame members of a truck and attached thereto, said hitch including a guide member positioned in the channel member and forming an area for the



reception of a trailer tongue, openings formed in the said channel member within the area defined by the said guide member so as to provide for the insertion of a pin therethrough.

2,452,786
CATHODE STRUCTURE
Harry T. O'Neill, Taunton, Mass., assignor to the United States of America as represented by the Secretary of War
Application February 18, 1946, Serial No. 648,544
2 Claims. (Cl. 250—27.5)

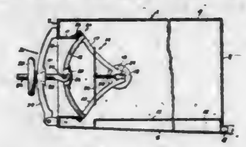
1. An electronic device comprising a cathode unit including a plurality of filament wires spaced from one another and mounted in a generally cylindrical configuration, vertically spaced centrally-apertured metallic cooling members to which the upper and lower ends of said wires are respectively secured and a bellows having and end portion extending into the central aperture of one of the upper said metallic members and secured to the aperture thereof, said last-mentioned metallic member providing an annular space surrounding said end portion, said bellows being open to receive circulating water passing through the central apertures of said metallic members.

2,452,787
LANDING GEAR SYSTEM
Arthur C. Patch, Van Nuys, Calif., assignor to North American Aviation, Inc.
Application January 2, 1948, Serial No. 285
14 Claims. (Cl. 244—102)

1. A landing gear for aircraft adapted to be moved from and to a faired retracted position with respect to said aircraft and provided with fairing doors adapted to be closed when said landing gear is either fully extended or retracted, comprising electrically controlled hydraulic means for moving said gear to and from extended position and electrically controlled hydraulic means for moving said fairing doors from and to closed position in response to movement of said gear either to a retracted or a fully extended position.

2,452,788
TELESCOPIC FISHING ROD
John H. Peters, Toledo, Ohio
Application April 17, 1947, Serial No. 742,009
5 Claims. (Cl. 43—24)

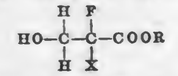
1. A combination coupling and line guide for a pair of telescopic fishing rod sections having slip-fit connection one within the other, comprising a split tapered terminal portion on the outer section, threading on said outer section extending away from the terminal portion to a collar fixed on said section, a first nut on said threading having an extension for engaging the tapered terminal to clamp the same to the inner section as said nut is moved along the threading toward each collar, a second nut on said threading between the first nut and collar, and a line guide providing arm between said second nut and collar, said arm swingable around the sections to extend radially therefrom at a predetermined position and locked in such position by rotation of the second nut on the threading to clamp the same between the second nut and the said collar.



2,452,789
TRAILER
Albert F. Pike, Houston, Tex.
Application June 11, 1945, Serial No. 598,809
3 Claims. (Cl. 280—33.05)

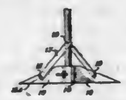
1. A trailer comprising, a main frame, a supplemental frame, upper and lower series of links pivoted at one end to the main frame and at their other ends to the supplemental frame, flooring on the frames and the upper series of connecting links and forming load supporting surfaces, said supplemental frame being movable to declining position to form a loading and unloading ramp and being movable to elevated position to form a tractor hitch and releasable latches on the supplemental frame engageable with the lower series of links when the supplemental frame is in elevated position to lock said supplemental frame in said position.

2,452,790
PRESSURE COOKER
William A. Pledger, San Francisco, Calif.
Application September 29, 1945, Serial No. 619,324
4 Claims. (Cl. 220—25)



1. In a pressure cooker a box having an inlet opening on one side thereof, an arcuate door in the inside of said box, an arcuate seat on the inside of said opening conforming to the face of said door, the concave face of said arcuate door facing inwardly from the box to be pressed by the pressure in the box and toward said seat, and mounting means inside of the box to swingably support said door and to transmit swinging movement to said door toward to and away from said opening, said door mounting means including pivot shafts journaled in the box, mounting arms extended from the concave side of said door being slidably held on said pivot

shafts and for rotation with said pivot shafts, resilient elements connected to said pivot shafts and to said arms to normally pull said arms and said door away from said opening and towards said pivot shaft, and a handle on the outside of one of said pivot shafts for the manipulation of said door.

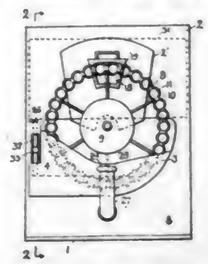


2,452,791
FLUOROHYDRACRYLIC ACIDS AND THEIR ESTERS
Maynard S. Raasch, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application March 4, 1946, Serial No. 651,967
6 Claims. (Cl. 260—484)

3. A chemical compound having the formula

where X is a member of the class consisting of fluorine and hydrogen and R is a member of the class consisting of hydrogen and aliphatic hydrocarbon radicals having less than twelve carbon atoms.

2,452,792
COLLAPSIBLE STAND
Charles H. Roberts, Cheyenne, Wyo.
Application October 30, 1945, Serial No. 625,615
1 Claim. (Cl. 248—48)



A tree stand for supporting Christmas trees, comprising duplicate legs, each of said legs contacting two other of said legs, said each first mentioned legs arranged at a right angle to each of the said other legs, said first mentioned legs coming in contact with each other, bolts in the ends of said legs, a slot in the side of each leg rearwardly of the inner end of said bolt, said slots adapted to receive the bolts of the legs set at right angles thereto, said slots being of a size to permit variation in the position of the point of contact of said legs with each other for reception of trees of various sizes in the space between said legs, each of said legs having a passage therein extending from one end of said slot to the corresponding end of said leg, braces secured to said legs and said tree at each end thereof, nuts on said bolts for holding said legs in fixed relation to each other, and holding means in said legs of a size large enough to extend into the tree, said holding means adapted to enter the tree in-

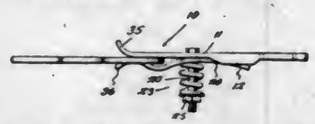
termediate of the bolts on the legs, when the stand is in assembled portions, but above the plane of the bolts so that said holding means do not interfere with the assembly of said stand.

2,452,793
ABRASIVE PRODUCTS
Norman P. Robie, Lewiston, N. Y., assignor to The Carborundum Company, Niagara Falls, N. Y., a corporation of Delaware
No Drawing. Application April 3, 1946, Serial No. 659,435
17 Claims. (Cl. 51—308)

1. A flexible abrasive-coated article comprising a flexible backing having abrasive particles adhesively secured thereto by a bond comprising the reaction product of a mixture comprising a soluble alkali silicate and a water-soluble, heat hardenable reaction product of an aldehyde and a urea compound.

2,452,794
BUBBLE MAKING MACHINE
Thomas Saachy, New York, N. Y.
Application January 18, 1946, Serial No. 641,958
7 Claims. (Cl. 46—8)

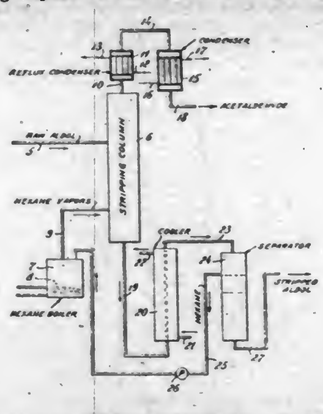
1. A bubble making machine comprising a base; a vertically extending wall supported on the base; a disc rotatively supported on the wall for rotation in a vertical plane; means rotating the disc, the disc having a plurality of openings near its periphery; an open vessel for a viscous liquid supported at the lower portion of the wall enclosing the lower portion of the disc and the openings therein, the openings in the disc entraining the liquid in the form of films; the upper portion of the wall extending above the top of the disc and the openings therein; the wall having an opening in its upper portion opposite the openings in the disc; a shutter intermittently closing the opening in the wall; means producing a draft of air; and means directing the draft of air through the opening in the wall and through the openings in the disc for producing bubbles.



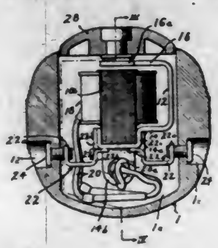
2,452,795
ERASER HOLDING MECHANISM
Mark E. Savoie, Cleveland, Ohio
Application August 25, 1945, Serial No. 612,589
6 Claims. (Cl. 120—38)

3. An eraser holder for an elongated eraser having an axially disposed opening, said eraser holder comprising, sleeve means, an eraser magazine turnably mounted within said sleeve means and extending outwardly therefrom for supporting said eraser, said eraser magazine having an eraser support portion and a head portion, said head portion having an annular groove and said support portion having means fitting into said annular groove, whereby the eraser support portion is rotatably but not longitudinally movable with respect to said head portion, an elongated screw non-rotatably supported by said head portion and extending co-axially of the eraser magazine and

into the opening of said eraser, said eraser and said screw having cooperating means for propulsion of the said eraser along the said screw by rotation of the said magazine with respect to the said sleeve means.



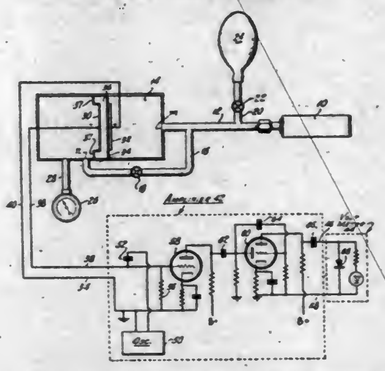
2,452,796
SELF-RELEASING ROPE HITCH
Ole Martin Skibsted, Wolford, N. Dak.
Application November 15, 1945, Serial No. 628,750
2 Claims. (Cl. 280—150)



1. For use in tractor and implement assemblies, a hitch comprising a pair of plates rockingly engaging each other substantially medially, a pivot pin extending through said plates at substantially the medial points thereof, spring means on said pin for resiliently biasing said plates toward each other, jaw members at one pair of ends of said plates, cam surfaces on the opposite pair of plate ends rockingly engaging each other, longitudinal guide rails on a predetermined plate receiving the other plate therebetween.

2,452,797
STRIPPING OF ACETALDEHYDE FROM ALDOL BY HYDROCARBON VAPORS
Henry B. Smith, Baltimore, Md., assignor, by mesne assignments, to U. S. Industrial Chemicals, Inc., a corporation of Delaware
Application May 29, 1944, Serial No. 537,877
7 Claims. (Cl. 202—46)

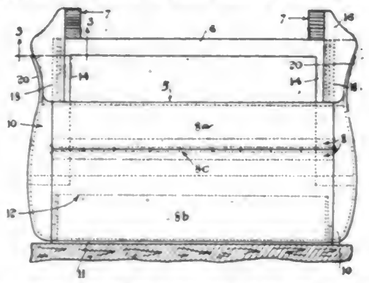
7. The method of separating acetaldehyde from an aqueous mixture containing acetaldehyde and aldol, which comprises introducing such aqueous mixture into a stripping zone, contacting such mixture therein with the vapor of a hydrocarbon selected from the group consisting of saturated aliphatic and alicyclic hydrocarbons having from 5 to 6 carbon atoms to vaporize the acetaldehyde, the vapor of the hydrocarbon being simultaneously condensed, said hydrocarbon being insoluble in aldol, not forming an azeotrope with acetaldehyde or with acetaldehyde and water boiling below the boiling point of acetaldehyde, having a boiling point between 50 and 85° C., and having a density permitting separation thereof from aldol by gravity, withdrawing the resulting vapors as the overhead from the stripping zone, partially condensing such vapors to produce an overhead consisting substantially only of acetaldehyde vapor, and returning the resulting condensate to the stripping zone.



2,452,798
MASSAGING DEVICE
Leland H. Snyder, Chicago, Ill., assignor, by mesne assignments, to Knapp-Monarch Company, St. Louis, Mo., a corporation of Delaware
Application February 17, 1947, Serial No. 729,000
3 Claims. (Cl. 128—41)

1. In a massaging device, a casing shaped to be grasped by hand, said casing defining a generally cylindrical recess opening at one end of the casing, a laminated magnetic core structure insertable in said recess through said open end, said core structure having a base portion and a plurality of pole portions projecting from said base toward said open end of the casing, an armature member of generally U-shape, one arm of said armature member being shaped to snugly surround said base portion of said magnetic laminations to secure said laminations in assembly, the other arm of said armature member having laterally extended end portions normally disposed adjacent the ends of said pole portions and spaced therefrom but movable against the inherent resilience of the U-shaped member into a bridging position across said pole ends, a pair of brackets of generally U-shape configuration, said brackets having one arm thereof respectively secured to diametrically opposed portions of the wall of said recess, and another arm respectively disposed adjacent opposite faces of said base portion of the magnetic structure, and a single fastener traversing both of said other bracket arms, said one end of said armature member, and said base portion of the magnetic structure to secure said elements in assembly.

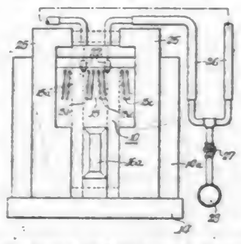
2,452,799
APPARATUS FOR AND METHOD OF MEASURING OR INDICATING LIMB OR DIGITAL VOLUME CHANGES RESULTING FROM ARTERIAL PULSATIONS
David M. Speaker, East Orange, N. J., and Joseph B. Hersh, Flushing, N. Y.
Application April 3, 1947, Serial No. 739,264
5 Claims. (Cl. 128—2.1)



1. Apparatus for measuring or indicating limb or digital volume changes resulting from arterial pulsations which comprises, a capacitative electro-static pressure conversion element comprising two members, one of which is movable relative to the other, connected to an electronic circuit responsive to said capacitance variations, means for applying balanced static fluid pressure to both sides of both members of said element, means for applying fluid pressure means to a limb or digit, and means for transmitting variations in the pressure of said fluid pressure means induced by volume changes resulting from arterial pulsations to one side only of the movable member of said element to change the capacitance of said element.

3. The method of measuring or indicating limb or digital tissue volume changes resulting from arterial pulsations which comprises connecting in an electric circuit a capacitance electro-static pressure conversion element comprising two members one of which is movable relatively to the other, and interconnecting said limb or digit and said movable member with a fluid column to vary the position of said movable member in response to variations in the volume of said limb or digit.

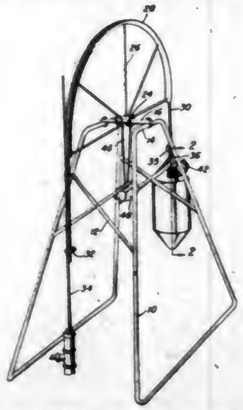
2,452,800
FOOT SCRAPER
Paul Staheli, Arvida, Quebec, Canada
Application May 3, 1944, Serial No. 533,899
2 Claims. (Cl. 15—237)



1. A shoe cleaning scraper assembly including an open top casing comprising a bottom wall and vertically extending front, rear and end walls, a scraper blade provided with downwardly directed extensions secured to the end walls of said casing to support the scraper blade in an elevated position above the upper edges of the front and rear walls, and a pair of brush holders provided with vertical grooves in which the outer

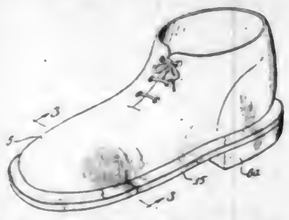
edge portions of the downwardly directel extensions of the scraper blades are slidably fitted so that the brush holders may be removed by sliding them upwardly to a position clear of the scraper blade, the end walls of said casing being provided

with spring extensions bearing against the brush holders to retain them against casual displacement and brushes mounted on said brush holders and overlying opposite ends of the scraper blade.



2,452,801
APPARATUS FOR HIGH-FREQUENCY INDUCTION HEATING
Herbert F. Storm, West Allis, Wis., assignor to Sunbeam Corporation, a corporation of Illinois
Application June 7, 1944, Serial No. 539,108
1 Claim. (Cl. 219—13)

A high-frequency induction heating apparatus for heating a work piece including two substantially parallel arms, each arm thereof having a sharply convex surface portion, and for concentrating the heating over a predetermined portion of the convex surface of each arm of the work piece comprising, a heating inductor consisting of a continuous winding including two pairs of coaxial coils, the coils of each pair being spaced for the reception of an arm of said work piece and connected so that their magnetic fields are in aiding phase and the pairs of coils being closely adjacent and connected so that their fields are in opposing phase, for developing between the coils of each pair a high-frequency magnetic field which, in the absence of a work piece, has a relatively uniform field over its cross-sectional area, and positioning means for locating the work piece with each of its arms extending between the coils of one pair with said predetermined convex surface portion thereof effectively cutting across said field.

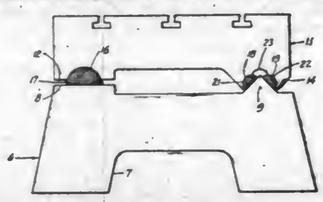


2,452,802
COUNTERBALANCING ATTACHMENT FOR PUMPS
Tomas B. Strickland, Animas, N. Mex.
Application August 5, 1947, Serial No. 766,363
8 Claims. (Cl. 74—590)

4. A counter balancing attachment for pumps comprising a frame, a shaft removably secured to said frame including an annular shoulder and a threaded portion adjacent said shoulder receivably engaging a nut, a bearing journaled for rotation on said shaft interposed between said shoulder and said nut, spokes radiating from said bearing, a guide fixedly secured to the outer ends of

said spokes, a cable slidably mounted on said guide, one end of said cable adjustably mounted on a pump rod, a container selectively receiving a weighted material carried by the opposite end of said cable and a counter balance suspended from said bearing.

2,452,803
SELF-ADJUSTABLE SHOE UPPER
Esther Sudiah, Brooklyn, N. Y., and Rachel Sudiah, deceased, late of Brooklyn, N. Y., by Esther Sudiah, legal representative, Brooklyn, N. Y.
Application November 20, 1946, Serial No. 711,186
1 Claim. (Cl. 36—12)

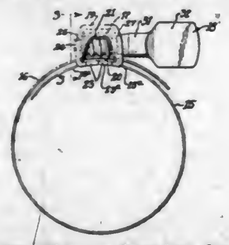


A shoe having a sole and an upper having a turned marginal edge disposed on the sole, and a clamping unit consisting of individual sections hinged to the sole and adapted to clamp the marginal edge of the upper thereto.

2,452,804
MACHINE CONSTRUCTION
Deuta Sulprizio, Oakland, Calif.
Application April 12, 1945, Serial No. 587,957
2 Claims. (Cl. 308—3)

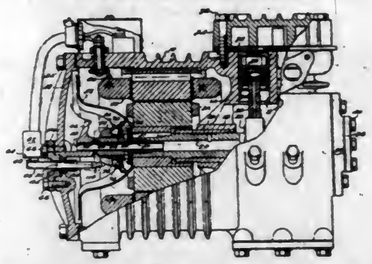
2. In combination, a machine element, a machine bed member having a first support surface and a second support surface thereon extending in the same direction and providing a support for said machine element, said first support surface being substantially flat, said second support surface including a pair of plane surfaces arranged in such relation to each other as to form

a V, means for supporting said element on said first support surface comprising a semi-circular recess in said element and a semi-circular support member mounted in said recess with the planar face on said member in engagement with the flat surface of said first support surface, and means for supporting said machine element on said second support surface and comprising a



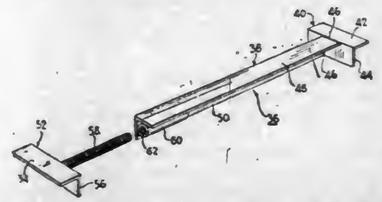
pair of independent support members, each support member having a surface resting on and slideable over one of said pair of surfaces, said machine element having a semi-circular recess therein on each side of said V to receive a semi-circular portion on each of said support members and to support said members independently of one another.

2,452,805
COMPOSITION OF MATTER FOR SEALING SPOT-WELDED JOINTS
Paul Sussenbach, St. Louis, Mo., assignor to The Presstite Engineering Company, St. Louis, Mo., a corporation of Missouri
Application October 14, 1944, Serial No. 558,721
1 Claim. (Cl. 106—193)



A sealing composition for use between metal parts to be spot-welded, comprising by weight approximately 17% of cellulose nitrate; approximately 30% of a fugitive solvent mixture comprising butyl acetate, butyl lactate, glycol-monoethyl-ether and glycol-mono-methyl-ether; approximately 48% of castor oil as a plasticizer; and approximately 5% of at least one electrical conducting material selected from the class consisting of carbon black and aluminum flakes dispersed therethrough.

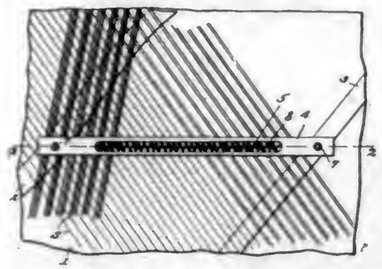
2,452,806
CLAMP
Benjamin A. Tetzlaff, Riverside, Ill.; Lillian B. Tetzlaff, Ralph W. Tetzlaff, and Clarence C. Tetzlaff executors of said Benjamin A. Tetzlaff, deceased
Application April 14, 1944, Serial No. 531,061
4 Claims. (Cl. 24—19)



1. In combination, a housing for attachment to a band in a clamp device, having opposed end walls and a non-circular opening in one end wall thereof, a band-tightening unitary member extending through said opening and having a screw-threaded portion in the space within the housing between said end walls and a plain shank portion extending through said opening, the end wall containing said opening being thin enough to permit it to pass between the convolutions of the screw thread during the rotary insertion of the screw threaded portion of said tightening member through said opening into the housing.

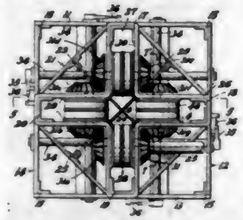
2,452,807
SEALED REFRIGERATION UNIT
Harry E. Thompson, Sidney, Ohio
Application May 19, 1945, Serial No. 594,637
8 Claims. (Cl. 230—58)

1. In a motor-compressor unit of the class wherein a motor and a compressor are sealed within a housing and are provided with a common operating shaft, the motor being of a type provided with a starting winding, the combination with said motor of centrifugally actuated mechanism driven thereby including a member movable axially of said shaft, a switch mounted upon the outside of said housing and connected in the series with said starting winding, a member projecting through an opening in a wall of said housing and mounted for pivotal movement about an axis extending transversely thereof, the outer end of the second-mentioned member lying in operative relation with respect to said switch and the inner end of said second-mentioned member lying in cooperative relationship with respect to said axially movable member, and means sealed to said housing and to said second-mentioned member sealing said opening against the flow of fluid therethrough between the interior and exterior of said housing, the relationship of said parts being such that when said centrifugally actuated mechanism is inactive said switch is in closed position and when said centrifugally actuated mechanism is active and said motor reaches a predetermined speed, said switch is open.



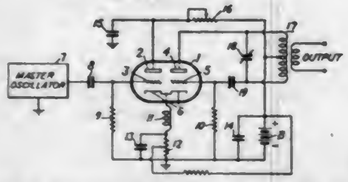
2,452,808
BED SLAT
Morris Tucker, Brooklyn, N. Y., assignor to Robert Tucker, Brooklyn, N. Y.
Application December 4, 1946, Serial No. 714,019
5 Claims. (Cl. 5—209)

1. A slat comprising an elongated structural member, a bracket rigidly secured to one end of said structural member, said bracket including a



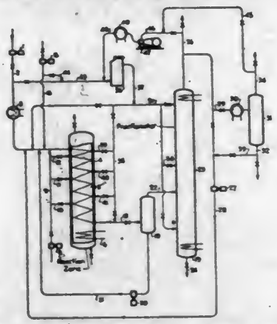
vertical portion and a horizontal portion extending outwardly away from the vertical portion, a bracket member including a vertical portion and a horizontal portion extending outwardly away from the vertical portion and means to interconnect said bracket member with the other end of said elongated structural member, said means including a threaded rod rigidly secured to one of said members and extending parallel to the longitudinal axis of said elongated structural member and an element rigidly secured to the other member and having a tapped opening in which the rod is threadedly received.

2,452,809
RESONATOR FOR MUSICAL INSTRUMENTS
Archie Mitchell Tyson, Dallas, Tex.
Application October 9, 1945, Serial No. 621,203
4 Claims. (Cl. 84—189)



1. A resonator for stringed musical instruments including an elongated non-flexible strip having a longitudinal slot, a vibratory spring held under tension within and longitudinally of the slot, the ends of the strip being each formed with a bore extending therethrough, anchoring pins extended through the respective bores and having their ends projecting therefrom, one end of each pin being anchored to a bridge of a musical instrument, and means for fastening the ends of the strip to the anchoring pins in positions of adjustment longitudinally of the pins.

2,452,810
SEED POTATO CUTTING MACHINE
Lenaard V. Uglow, Minatare, Nebr.
Application May 13, 1947, Serial No. 747,761
3 Claims. (Cl. 146—163)



1. A machine comprising an upright frame having four opposed walls and a floor, said frame having a horizontal frame member on the top thereof, said top frame member having intersecting vertical openings therethrough in the form of a cross thereby providing four corridor-like slots and a central space between the juxtaposed ends of said slots, each of said slots having a horizontal shaft mounted in the opposed walls thereof and projecting through said walls, the extremities of said shafts having bevel gears rigid thereon, each of said gears being in mesh with the adjacent gear of the adjacent of said shafts, each of said shafts having a pulley rigid thereon between the walls of its said slot, four horizontal crank shafts positioned in a common plane below said top frame member and having their extremities mounted in opposed walls of said frame and positioned substantially in vertical alignment with said first shafts, each of said crank shafts having a single offset crank axle at the center thereof, each of said crank axles having a pulley thereon, resilient means normally positioning said crank axles above said common plane and urging the same inward toward each other, four yokes having the arms thereof extending upward, said yokes being positioned in a common horizontal plane under said first-named horizontal plane and being substantially in vertical alignment with said second-named four pulleys, said yokes having pulleys loosely mounted therein, each of said yokes having a coiled spring secured by one end thereto, the other end of each of said springs being secured to said floor, a belt trained about each of said first-named pulleys and that one of said last-named pulleys in vertical alignment therewith, each of said second-named pulleys being positioned between the sides of one of said belts and by virtue of said resilient means being urged against that side of the belt which is adjacent an imaginary vertical line drawn through the center of said space, said resilient means thereby urging said side of each belt toward said center line, a cross-shaped cutter frame rigidly mounted in said frame between said first-named and said last-named pulleys, one of said first-named shafts having an extension thereon adapted to be rotated to actuate the machine, said extension being adapted to be rotated in such direction that the mutually juxtaposed sides of said belts are moved in a downward direction, and said cutter member having blades thereon positioned under said space.

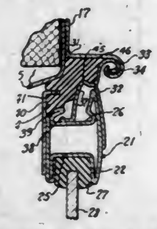
2,452,811
FREQUENCY DIVIDER
George L. Usselman, Port Jefferson, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application June 30, 1944, Serial No. 542,950
12 Claims. (Cl. 250—36)

6. In a frequency divider circuit to be controlled by oscillatory energy of fundamental frequency, a pair of electron discharge systems each including an electron source, an anode and a control electrode, biasing circuits connected between the electron source and control electrode of each system, connections to the anode and electron source of each system for maintaining the anodes electro-positive relative to the electron source, connections for applying said oscillatory energy to the control electrode of one system, a circuit tuned to resonance at a sub-harmonic frequency coupled to the anode of the other system, connections to the electrodes of the other system such that the same generates oscillatory energy in said resonant circuit of a sub-harmonic frequency and a common impedance connected between the electron source of both of said systems and the control elcetrode of both systems, said common impedance being high with respect to current of said fundamental frequency and constituting means for locking in step the oscillations of subharmonic frequency generated in said second system and the oscillatory energy fed to the control electrode of said first system.

2,452,812
PREVENTION OF CORROSION IN HYDROGEN FLUORIDE CATALYTIC ORGANIC REACTIONS
Aaron Wachter, Berkeley, Calif., assignor to Shell Development Company, San Francisco, Calif., a corporation of Delaware
Original application January 14, 1944, Serial No. 518,273. Divided and this application December 26, 1946, Serial No. 718,585
10 Claims. (Cl. 260—683.4)

1. In a catalytic hydrocarbon conversion process wherein hydrocarbons are contacted under conversion conditions with a catalyst comprising hydrogen fluoride in a reaction zone comprising a metal-containing surface in direct contact with said catalyst, said metal-containing surface being subject to corrosion by said catalyst, the method of inhibiting corrosion of said metal surface which comprises injecting into said reaction zone at a plurality of intermediate points along the length thereof a halide of a metal of groups IV and V of the periodic table.

2,452,813
THERAPEUTIC AGENT
Stanley M. Wade, Benicia, Calif., assignor of one-half to John R. Wiederrich, Lodi, Calif.
Application November 5, 1945, Serial No. 626,763
2 Claims. (Cl. 128—350)

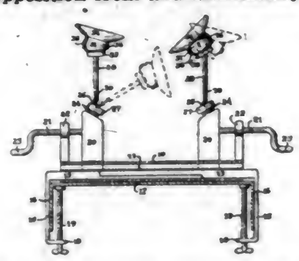


1. A device of the type described comprising a tubular member having resilient wing-like portions adapted to be closed and form a conical top, an adhesive for holding the wings in closed position and being meltable at human body heat and/or moisture to free the wings, a sack-like member depending from the tubular member and being of the same diameter, the sack-like member being normally folded within the tubular member, the wings when closed and forming the conical top aiding the insertion of the tubular member into a body opening, the wings when freed, yieldingly engaging with the wall of the opening for preventing the accidental removal of the device.

2,452,814
HAIR CLAMP
Ira G. Wagle, Washington, D. C.
Application October 8, 1945, Serial No. 620,940
14 Claims. (Cl. 132—46)

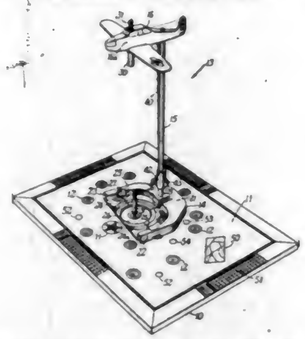
1. A hair clamp comprising in combination a first clamp member, a second clamp member attached through resilient means to one end of said first member, said resilient means normally urging together said clamp members, a net-like member pivotally connected to one of said clamp members, and a second resilient means connected between one of said clamp members and said net member for normally urging said net-like member towards the clamp member to which it is pivotally connected.

2,452,815
WINDOW CONSTRUCTION
Carl J. Wagner, Detroit, Mich.
Application March 11, 1946, Serial No. 653,488
7 Claims. (Cl. 189—69)



1. A window assembly for a window opening, comprising a fixed frame surrounding the opening, a ventilator having a frame provided with top, side and bottom bars, cooperating hingedly connected parts respectively secured to the top bars of the fixed and ventilator frames, a flexible sealing lip extending around the perimeter of the ventilator frame from one end of the hinge parts to the opposite end of the latter and engageable with the adjacent surfaces of the fixed frame to form a weather-tight seal, and flexible sealing blocks anchored to one of the hinge parts at the extremities of the sealing lip and engageable with the other hinge part to seal the space between the hinge parts at the extremities of the latter.

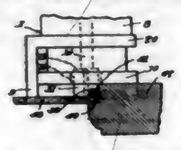
2,452,816
JAW-SUPPORTING APPLIANCE
Venus M. Wagner, Denver, Colo.
Application May 21, 1945, Serial No. 594,815
7 Claims. (Cl. 311—10)



2. A jaw-supporting appliance of the character described comprising, a base member, bars slid-

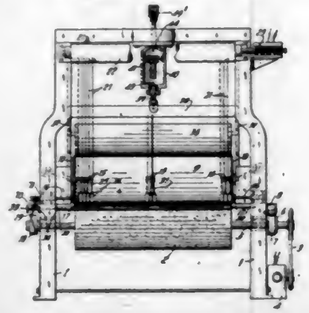
ably engaged within and selectively extensible oppositely from said base member, clamp means on outer ends of said bars selectively engageable with and to clamp said base member transversely of and to a table top, abutments upstanding in spaced opposition from and individually slidable

longitudinally of said base member, means for selectively adjusting and holding said abutments relative to said base member, a stem adjustably engaged with and extending upwardly from each abutment upper end, and a jaw-engaging cushion adjustably associated with the upper end of each said stem.



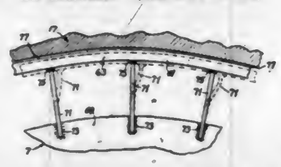
2,452,817
TOY BOMBING GAME
Jack Van H. Whipple and Anthony B. C. Palazzo, New York, N. Y.
Application November 22, 1944, Serial No. 564,617
3 Claims. (Cl. 273—95)

2. A game comprising, in combination, a board having one or more target areas thereon, a device including a base member adapted to be supported by and to be slid over said board, said base member including a sighting device having reference marks indicative of a sighting point adapted to be registered with the target to be hit, a missile retaining and discharging member including a tube in which the missile is received, means supporting said member above said base and in fixed relation thereto so that the axis of said tube passes through said sighting point, and means associated with said tube and operable to release a missile held therein.



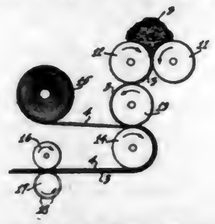
2,452,818
MACHINE FOR REMOVING PUTTY
Alan W. Williams, Westwood, Los Angeles, Calif.
Application June 25, 1946, Serial No. 679,215
5 Claims. (Cl. 90—12)

1. A machine for removing putty from the edges of the frame of a glass window, a cutter, a guide for engaging the face of the glass of said window, a pair of frame-edge guides for engaging a puttied edge of said window, and means for



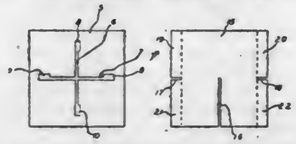
operating said cutter for cutting away the putty from said edge as said cutter is guided by said guides along said puttied edge.

2,452,819
WARP YARN COMPRESSING SPOOLER
Ezekiel J. Wilson, Slingerlands, N. Y., assignor to F. C. Huyck & Sons, Rensselaer, N. Y., a corporation of New York
Application June 30, 1945, Serial No. 602,509
5 Claims. (Cl. 28—38)



3. In a warp yarn compressing spooler, the combination with means for driving a flanged spool, of a plurality of yarn guides and pivotal mountings therefor adapting said guides to swing independently of each other towards and away from the axis of said spool between the flanges thereof, and means for oscillating said guides parallel to the axis of said spool; said yarn guides being normally held against the yarn on said spool by the tension of the respective yarns guided thereby; and counterweights on said guides adapted to cause said guides to swing away from said spool in the event of breakage of the yarn guided thereby.

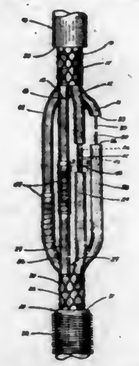
2,452,820
EDDY-CURRENT COUPLING
Martin P. Winther, Waukegan, Ill., assignor to Martin P. Winther, as trustee, Waukegan, Ill.
Application August 26, 1946, Serial No. 693,057
25 Claims. (Cl. 172—284)



1. In an eddy-current coupling, a discontinuous inductor ring consisting of a plurality of ring segments, and resilient means supporting said segments for permitting substantially radial deflections thereof throughout the extent of said segments.

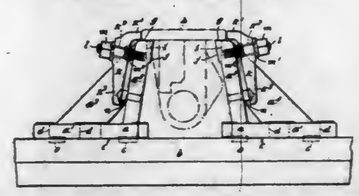
2,452,821
METHOD OF MAKING PHONOGRAPH RECORDS
Lawrence A. Wood, Jr., Indianapolis, Ind., assignor to Radio Corporation of America, a corporation of Delaware
Application June 29, 1944, Serial No. 542,723
6 Claims. (Cl. 18—48.4)

1. A method of producing a phonograph record from a blank having a substantially continuous playing surface comprising a thermoplastic material, said method comprising providing said surface with a plurality of grooved passages intercommunicating with each other and with the edge of said blank and impressing a grooved sound track in said surface with sufficient heat and pressure to completely eliminate said intercommunicating passages.



2,452,822
REFLECTOR
James M. Wolf, Boston, Mass., assignor, by mesne assignments, to the United States of America as represented by the Secretary of War
Application April 28, 1944, Serial No. 533,234
2 Claims. (Cl. 343—18)

1. An energy reflector having associated sheets presenting perpendicular plane surfaces to incidence rays whereby rays parallel thereto are reflected regardless of incidence ray direction, said reflector comprising a supporting sheet having centrally intersecting perpendicular slits therein which terminate short of the sheet edges, and two cooperating sheets perpendicular to each other and to said supporting sheet, said cooperating sheets each having a slit extending from its center to an edge whereby the sheets may be interfitted to be received in said perpendicular slits of said supporting sheet, and means for holding said supporting sheet to said interfitted sheets, said sheets having energy reflecting surfaces.

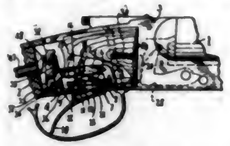


2,452,823
CABLE SPLICE
Robert L. Wright, II, Dundalk, Md., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application September 18, 1943, Serial No. 502,964
1 Claim. (Cl. 174—84)

A spliced cable, which comprises two lengths of flexible cable, each of said lengths of flexible cable including a plurality of individually insulated conductors of which one end of each is bare and a braided, tension-bearing, metallic sheath enclosing the insulated conductors, a plurality of electro-conductive tubes, each of said tubes being crimped on the bared end of one of the insulated conductors of one of the lengths of cable and closely but slidably engaging the bared end of an insulated conductor of the other length of cable to electrically connect the respective

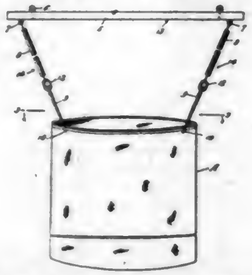
conductors, a plurality of masses of insulating material serving to enclose the respective tubes to insulate them from one another, and a braided, tension-bearing, metallic sheath enclosing the insulated tubes and mechanically connecting the tension-bearing sheaths of the lengths of cable.

2,452,824
WORK HOLDER
Herbert Yates, Kingsbury, London, England
Application September 12, 1945, Serial No. 615,780
In Great Britain October 10, 1944
6 Claims. (Cl. 90—60)



1. A work piece holder consisting of a pair of brackets each consisting of a metal block of obtuse angled L cross section formed in and on the base limb with bolt slots and with a flat undersurface and on the upstanding limb with a flat upper surface parallel with and in both brackets equi-distant from said flat undersurface and on the overhanging face of said upstanding limb with an obliquely undercut surface, L-shaped clamping bars mounted on the back of said upstanding limb of each said bracket and each presenting one limb overhanging said flat upper surface and fulcrumed at the end of the other limb of said clamping bar, and means for forcing said clamping bars towards the upstanding limb of the respective bracket.

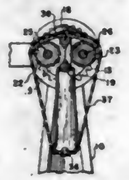
2,452,825
SINGLE TRIGGER ACTION FOR DOUBLE-BARREL SHOTGUNS
Charles A. Young, Springfield, Ohio
Application August 23, 1945, Serial No. 612,181
7 Claims. (Cl. 42—42)



1. Dual firing mechanism for a double barreled firearm, wherein separate impact members, one

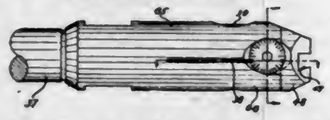
for each barrel, are independently held cocked by separate sears independently releasable by separate sear actuators, including a single finger trigger common to both firing mechanisms carried by one of the sear actuators, a coupler pivotally mounted on the same sear actuator by which the

finger trigger is carried, having operative relation with the sear of one impact member movable into operative engagement with the sear of the other impact member by oscillatory adjustment of the pivoted coupler, and a stationary guide member with which the pivoted coupler is engageable in its alternate positions of oscillatory adjustment.



2,452,826
SACK HOLDER
William H. Backs, Lockwood, Mo.
Application December 5, 1945, Serial No. 632,909
2 Claims. (Cl. 248—95)

1. A bag holder of the class described comprising a horizontally elongated hanger bar provided with means for attachment to a relatively fixed support, and a pair of duplicate depending bag engaging, spreading and suspending devices, each device comprising an elongated coiled spring swingably connected at its upper ends to an adjacent end portion of said bar, and also including an inverted V-shaped bag engaging and spreader unit connected by a link to the adjacent lower end of the elongated coiled spring, each device being of wire formation, the wire being bent between its ends to provide a combination eye and spring, the ends being bent to outwardly and downwardly diverting relationship and the terminals thereof being fashioned into hooks for releasable connection with the mouth portion of the bag.

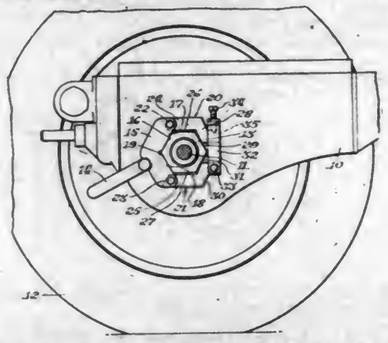


2,452,827
SHARPENING DEVICE FOR THE CUTTING ROLLERS OF PENCIL SHARPENERS
Fred E. Bearden, Spartanburg, S. C.
Application July 31, 1946, Serial No. 687,493
2 Claims. (Cl. 51—250)

2. A sharpening device for the cutting rollers of a pencil sharpener comprising a frame fixed on a rotatable shaft and having a pair of rotary cutting rollers mounted in the frame and spaced apart from each other, and having means for imparting rotation to the same, comprising an elastic band having an abrasive substance on its side next to the cutting rollers adapted to be placed in contact with the cutting rollers, and means adapted to be disposed between the elastic

band and the frame for resiliently holding the abrasive surface in contact with the cutting rollers while they are rotating to sharpen the cutting surfaces of the cutting rollers.

2,452,828
BORING HEAD
Nicholas Bell, Dearborn, Mich.
Original application December 18, 1942, Serial No. 469,743. Divided and this application October 22, 1945, Serial No. 623,617
1 Claim. (Cl. 77—58)

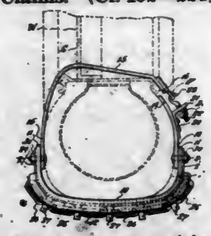


A tool of the class described, comprising an elongated supporting head having a diametrically directed groove formed in its front face and communicating with a longitudinally directed slit extending axially inwardly therefrom for separating the forward part of said head into a pair of separable parts; a cutting tool retainer; a diametrically extending rib on the rear face of said retainer engageable in said groove for radial momevent relatively to said head and having an internally threaded passage extending longitudinally therethrough, said retainer having on its forward face a tool receiving slot extending parallel to said rib; a stud threaded into said passage; a head on said stud engaging in a recess formed in said separable parts and provided with a peripheral groove; and flange members on each of said separable parts for engaging in said peripheral groove and retaining said screw in fixed radial relation to said supporting head; and means extending through said separable parts for clamping the same together.

2,452,829
TRACTOR ATTACHING STRUCTURE FOR IMPLEMENTS
Frederick T. Blaydes, Canton, Ill., assignor to International Harvester Company, a corporation of New Jersey
Application September 19, 1947, Serial No. 775,105
3 Claims. (Cl. 280—33.44)

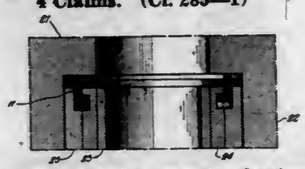
1. In an agricultural implement including a tractor having a rear axle housing, said rear axle housing being hexagonal in section, an implement attaching bracket comprising a triangular member having adjacent faces forming a V-notch engaging adjacent faces of said hexagonal housing, links pivotally connected to the ends of said member and swingable to positions substantially paralleling respective opposite faces of said axle, each of said links being bent inwardly at an angle to conform generally to the angle made by adjacent faces of said axle housing but at a smaller angle, whereby the inwardly bent ends only of

said links engage respective adjacent faces of said housing opposite said member, a latch member



pivoted on the end of one said link, and adjustable means for securing said latch member to the other said link.

2,452,830
COMBINATION MICROPHONE AND CONTROL MEANS FOR DICTATING MACHINES
Gustav F. Braun, Elizabeth, N. J., assignor to Thomas A. Edison, Incorporated, West Orange, N. J., a corporation of New Jersey
Application February 28, 1945, Serial No. 580,182
4 Claims. (Cl. 200—157)

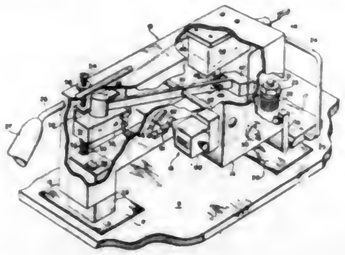


1. A control device for dictating machines comprising an elongated handpiece having a cavity therein open at the side of the handpiece along substantially the entire length thereof; an outwardly-urged cover loosely fitting the outer portion of said cavity and projecting beyond the handpiece so that the cover is pressed inwardly as the handpiece is gripped by the hand; a switch in said cavity operated by said cover as the cover is pressed inwardly; and a separable hinge connection between said cover and said handpiece comprising an end portion of said cover having two spaced-apart projections provided with grooves in the end faces thereof extending laterally of the cover, and three cooperating tongues on said handpiece spaced laterally of said cavity from one another and projecting into the cavity longitudinally thereof, the central one of said tongues being inset inwardly of the cavity with respect to the other two tongues and lying between said projections of the cover and the two outer tongues being in pivotal engagement with the grooves of said projections respectively.

2,452,831
ANTISKID DEVICE
Robert J. Burkhart, Nutley, N. J.
Application November 30, 1946, Serial No. 713,207
2 Claims. (Cl. 152—224)

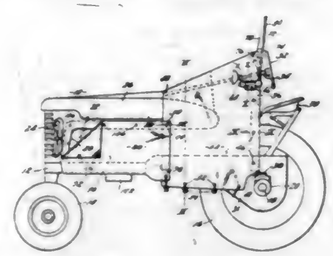
1. An anti-slip device comprising a rigid U-shaped tread plate to transversely embrace the periphery of an automobile wheel tire, said tread plate having means for securing the same to the wheel and tire, said tread plate having integral laterally spaced continuous radial ribs extending from end to end thereof to provide an intermediate receiving and seating channel, a conformably U-shaped metallic base-strip removably seated within said channel, a ground gripping link chain having certain links disposed in a plane perpendicular to the surface of said base-strip and welded thereto so as to be unitary therewith and alternate links disposed parallel to said base-strip, said latter links having calks outwardly projecting therefrom, and cooperative means between corresponding ends of said base-strip and tread plate for detachaby securing the former to the latter.

2,452,832
SEALING UNIT AND GASKET
James Coolidge Carter, Pasadena, Calif.
Application December 3, 1946, Serial No. 713,770
4 Claims. (Cl. 285—1)



2. In a coupling unit, a member having a sealing face at one end and including a channel of L-shaped cross-section opening to said face, the lateral extension of said channel being spaced from said sealing face, a resilient gasket overlying said face and having an L-shaped tongue projecting from one face thereof and fitting in but not bottoming in said channel to lock said gasket against displacement from said face, said gasket having on its other face and substantially opposite said L-shaped tongue a sealing bead so disposed that pressure against said bead on sealing will cause the material of said gasket to be pressed into said channel prior to material expansion of said gasket along said sealing face.

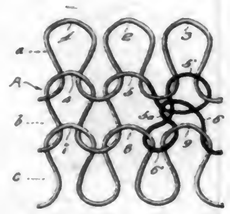
2,452,833
HARDNESS TESTING DEVICE
Stig Christensen, Los Angeles, William G. Rosenberg, Glendale, and Jay D. Swift, San Fernando, Calif., assignors to Lockheed Aircraft Corporation, Burbank, Calif.
Application December 20, 1945, Serial No. 636,158
7 Claims. (Cl. 73—81)



1. A hardness tester comprising a case, means for moving the case toward the part to be tested,

a point for penetrating the material of said part, means for mounting the point on the case for relative movement, spring means for resisting relative movement between the case and point, a stamp carried by the case for marking said part,

a lever in the case for operating the stamp, electromagnetic means for actuating the lever, and a switch arranged to be closed to energize the electromagnetic means only upon a given movement of the case relative to the point.

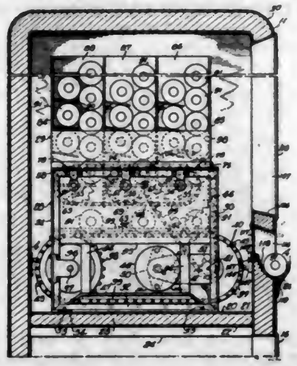


2,452,834
HOT-AIR DEFLECTOR FOR TRACTORS
Clyde E. Clapper, Kansas City, Mo.
Application March 17, 1945, Serial No. 583,345
16 Claims. (Cl. 180—54)

16. The combination with a tractor including a frame having open sides, an engine carried within said frame, a ventilation fan driven by said engine and a seat structure carried by said frame at the rear of said engine, of a formed bar member carried by said frame adjacent said seat structure, a continuous deflector secured at its rear edge about said bar member and at its forward end to the front portion of said frame to cover the open sides of said frame and to form with said frame a continuous passageway from said engine to said formed bar member, whereby air forced about said engine by said engine fan will be caused to travel in said passageway and into the seat zone.

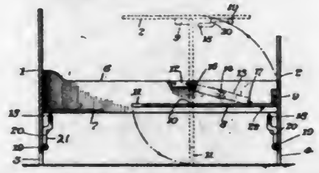
2,452,835
KNITTED FABRIC AND PROCESS OF MAKING SAME
Arthur J. Cobert, Greensboro, N. C., assignor to Burlington Mills Corporation, New Castle County, Del.
Application October 22, 1945, Serial No. 623,647
2 Claims. (Cl. 66—169)

1. The method of producing a lock-loop in a knitted fabric formed of plain loops and lock-loops, which consists in drawing a partial plain loop of a course through an adjacent plain loop in the same course, releasing the adjacent plain



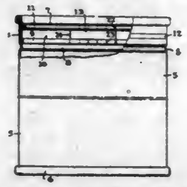
loop from its needle, and impaling the partial plain loop upon this needle.

2,452,836
KNITTED FABRIC AND PROCESS OF MAKING SAME
Arthur J. Cobert, Greensboro, N. C., assignor to Burlington Mills Corporation, New Castle County, Del.
Application March 28, 1946, Serial No. 657,756
2 Claims. (Cl. 66—187)



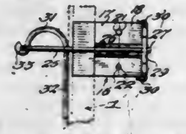
1. The method of knitting a flat knit stocking comprising leg, foot and intermediate sections, said intermediate section including a central instep portion and heel portions located at opposite sides thereof, which consists in forming the leg section, thence extending the fabric forward from the initial points of curvature of the heel and instep portions and progressively outward to form the upper instep portion and rear heel portions of triangular formation located at opposite sides thereof and of gradualy increasing width up to points determining the greatest width of the heel section, thence extending the fabric forward while maintaining such width to form an intermediate part of the instep portion and rectangular front heel portions at opposite sides thereof and to define in each front heel portion an outer triangular area and an inner triangular area, said areas having obliquely inclined margins facing each other and extending between the inner rear corner and outer front corner of the front heel portions, and transferring a group of inner wales outward and forward in each front heel portion on oblique lines in the general direction of knitting to form gores arranged between the oblique margins of said areas in said front heel portions and located wholly within and extending from the inner rear to the outer front corners of the front heel portions, whereby said front heel portions will be so disposed as to adapt the gores to extend substantially vertically and the rear heel areas to inherently curve to conform to the natural curvature of the human heel when the blank is folded and seamed, and then progressing the fabric from the forward margins of the front heel portions to form the foot section.

2,452,837
VENDING APPARATUS
Carl C. Colbert, Columbus, Ga., assignor to Nehi Corporation, Columbus, Ga., a corporation of Delaware
Application November 20, 1944, Serial No. 564,250
5 Claims. (Cl. 312—46)



1. A dispensing apparatus comprising a plurality of vertical containers each adapted to receive a plurality of articles to be dispensed, a feeding device arranged beneath each container and adapted to support the articles therein, a conveyor arranged beneath said feeding devices, means for advancing said conveyor in a given step to dispense an article thereon, and means for simultaneously operating said feeding devices and said conveyor advancing means, said operating means and said feeding devices being so constructed and arranged that upon the advancing of said conveyor in a number of steps corresponding to the number of said containers, said feeding devices will simultaneously release an article from each container to be dropped by gravity to said conveyor.

2,452,838
FURNITURE
Leonard P. Come, White Plains, N. Y.
Application April 24, 1945, Serial No. 590,039
3 Claims. (Cl. 5—3)

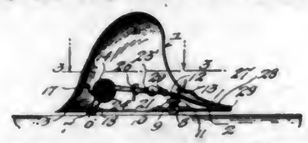


1. A convertible article of furniture, comprising a frame having members forming a vertically disposed back and side members and a horizontally disposed seat member secured between said back and side members, a member pivoted in said frame between said side members in normally complementary relation to said seat member, and an end member secured to said pivoted member at right-angles thereto, said end member being normally in vertical position and co-operating with the side and back members to enclose a rectangular space, said seat member and pivoted member co-operating to form a bottom to said space, said pivoted member being movable in such a manner as to carry and support said end member in a horizontal position in front of said back and seat members.

2,452,839
COLLAR CAN COLLAR STRUCTURE
John Coyle, Baltimore, Md., and Jacob F. Egenolf, New York, N. Y., assignors to Continental Can Company, Inc., New York, N. Y., a corporation of New York
Application April 3, 1945, Serial No. 586,296
5 Claims. (Cl. 220—61)

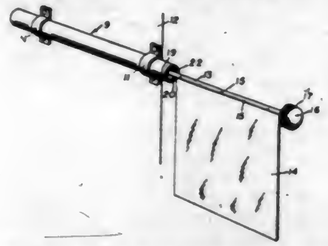
1. A collar for a collar can, said collar having upper and lower edge portions disposed in parallel relation throughout the whole circumference of the collar and comprising a band shaped to fit within a can and having its ends overlapped flatwise, the overlapped ends of the band at one edge portion having complementary interlocking notches and tongues with the tongues of each overlapped end at said one edge portion disposed to engage in the notches of the other overlapped end at said one edge portion with the tongues engaging in edge to edge contact, said one edge portion of the band including the interlocked tongues thereof being formed into a curl having a smooth exterior devoid of external surface projections throughout the circumference of the collar, and means securing the overlapped ends against separation in the radial direction.

2,452,840
FENCE POST
Harold L. Craig, Hampton, Iowa
Application September 27, 1946, Serial No. 699,900
2 Claims. (Cl. 174—45)



1. A fence post comprising an elongated member, a pair of opposed insulated blocks adapted to be clamped against opposite sides of wire fencing, and means for clamping said blocks against said fencing and one block to said post comprising a presser plate opposed to the other block with key-hole slots therein, a bail straddling said member and blocks with enlarged ends interlocking with one end of the slots and removable out of the other ends of said slots, and a member on said bail swingable against said elongated member to exert pressure on said bail to pull said plate against said other block.

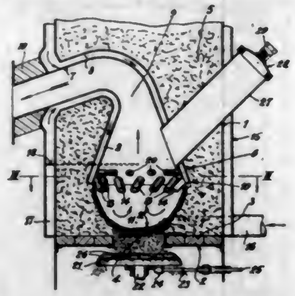
2,452,841
TOY
William E. Dailey, Chicago, Ill.
Application December 21, 1945, Serial No. 636,445
1 Claim. (Cl. 46—97)



A toy for rolling over a floor comprising a hollow animal body and head, a front and rear wheels for supporting said body, means in said body for operating one of the rear wheels comprising a crank shaft and a spring motor for operating the shaft, a pitman to which said crank

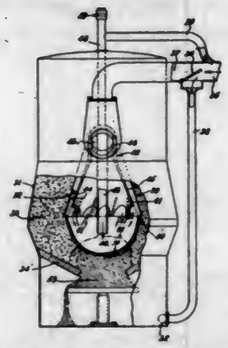
is operatively connected, and a noise making device in said body operative intermittently by said pitman, said device being operative by air under pressure passing through the same, said head having an open snout end and being supported by said body with said front wheel ex-

tending upwardly into the same whereby said head is adapted to be disposed close to the floor, and a tube extending from said device into said head to said snout end for discharging air from the device out of said snout end onto the floor to intermittently stir up dust on the floor and create the illusion that the animal is snorting.



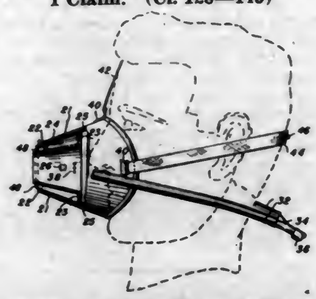
2,452,842
FLAG HOLDER AND DISPLAYER
Sydney B. Davis, Nerstrand, Minn., assignor of twenty-five per cent to La Vern R. Kielmeyer. Nerstrand, Minn.
Application March 12, 1947, Serial No. 734,135
2 Claims. (Cl. 116—173)

1. A flag holder of the class described comprising an elongated cylindrical casing closed at its inner end and open at its outer end, an elongated cylindrical sleeve slidably and rotatably mounted in said casing, said sleeve being open at opposite ends and provided interiorly with openwork spiders forming hubs, a rod rigidly connected at longitudinally spaced points with said hubs and having a substantial portion located concentrically within the confines of said sleeve, said rod projecting outwardly and beyond the open end of the sleeve, said projecting end being provided with a closing cap for said casing and a flag attached to that portion of the rod between the sleeve and cap.



2,452,843
COMBUSTION APPARATUS FOR SOLID COMBUSTIBLES IN FRAGMENTS
Robert Esnault-Pelterie, Geneva, Switzerland, assignor to Spladis Société pour l'Application d' Inventions Scientifiques, Luxemburg (Luxemburg), a corporation of Luxemburg
Application February 17, 1944, Serial No. 522,851
In Switzerland February 17, 1943
6 Claims. (Cl. 110—29)

1. A combustion apparatus for solid combustibles in fragments, comprising a container for the combustible, the bottom of which has a central aperture for the passage of the ashes, a grate below said central aperture, a substantially bell-like means positioned within said container and defining a channel for evacuating the combustion gases, said channel extending downwardly within the container above said central aperture, means defining an annular air feeding channel surrounding said combustion gases exhausting channel and adapted to be surrounded by descending combustible which is inserted into said container, means for introducing air to said air feeding channel to cause the air and the combustion gases



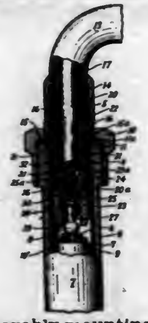
to circulate at counter-flow in said channels, means on the outlet end of said annular air feeding channel for projecting the air downward and toward the center of the container above the central aperture and below the bell-like means, whereby the combustible will be caused to crumble in the form of a central crater and the combustion will be localized in the superficial zone of said crater.

2,452,844
PROCESS AND APPARATUS FOR BURNING SOLID FUEL
Robert Esnault-Pelterie, Geneva, Switzerland, assignor to Spladis Société pour l'Application d'Inventions Scientifiques, a corporation of Luxemburg
Application June 17, 1944, Serial No. 540,862
In Switzerland July 15, 1943
4 Claims. (Cl. 110—29)

1. A process for effectuating the combustion of combustible in pieces, in which the combustible is presented in a combustion zone in the form of a substantially circular crater having a crumbling-slope, comprising supplying air for combustion, feeding a major portion of such air downwardly and tangentially so as to sweep the surface of said slope in the same direction as that of its fall, said major portion of air licking the said surface of the combustible without penetrating deeply into the mass of the latter, and simultaneously feeding a minor portion of said air into the combustible from underneath the combustion zone and passing said minor portion of air upwardly through part of the combustible mass in the reverse direction to that of its fall to afterwards emerge from the surface of the slope.

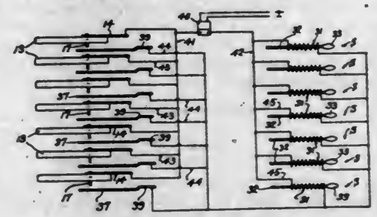
2,452,845
DRILLER'S MASK
James Fisher, Middletown, N. Y.
Application April 5, 1946, Serial No. 659,983
1 Claim. (Cl. 128—145)

In a protective mask, the combination which comprises a substantially conical-shape casing elliptical in cross section and shaped to fit over the nose and mouth of a person with the large end in sealing relation with the face and with the walls thereof converging outwardly from the face, an inner double walled frusto-conical shaped member having inner and outer sections with the inner end of the inner section flanged and with the flange sealing the inner end of the said frusto-conical shaped member, the walls of the said inner and outer sections of the frusto-conical shaped member being in spaced relation providing an annular air chamber between the sections and with the outer ends of the chamber open, said frusto-conical shaped member positioned in the outer end of the mask with the open end of the chamber therein extended outwardly, and suitable connections to the said frusto-conical shaped member for supplying air to the chamber therein wherein the air supplied to the chamber provides a continuous circular air screen around the outer end of the mask.



2,452,846
ICE CUBE TRAY
Charles A. Flynn, Phoebus, Va.
Application October 12, 1945, Serial No. 621,873
1 Claim. (Cl. 62—108.5)

An ice cube tray including a substantially vertical well having an aperture therein to limit the level of the contained liquid, and a door pivoted to the wall on an axis at right angles thereto for closing the opening.

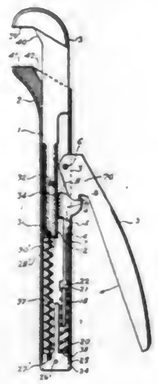


2,452,847
ELECTRICAL CONNECTING MEANS AND RADIO SHIELDING MEANS THEREFOR
Jakob R. Frei, Sidney, N. Y., assignor to Bendix Aviation Corporation, New York, N. Y., a corporation of Delaware
Application November 18, 1942, Serial No. 466,046
8 Claims. (Cl. 174—35)

2. In apparatus of the class described, a radio-shielding conduit, an electrical conductor fixed in and insulated from said conduit, said conductor projecting from said conduit, a tube of insulating material having one end extending into said conduit to receive said projecting end of the conductor, said tube being physically detached from said conductor and flexible, a rigid insulating tube secured to the flexible tube, yield-

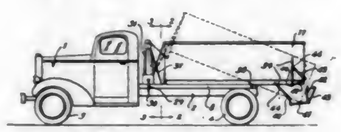
able means removably mounting said rigid tube in said conduit for limited axial and free angular movement relative thereto, and means embedded in the free end of said rigid tube, said last-named means being adapted for electrically connecting said conductor with conducting means outside said tube.

2,452,848
ELECTRIC PIANO ACTION
James F. Goodwin, Los Angeles, Calif.
Application May 29, 1944, Serial No. 537,871
7 Claims. (Cl. 84—246)



1. In an electrically powered piano, including a keyboard, an individual action for each key and its associated string, said action comprising a string damper a rod supporting said damper, a percussion element, a current source, electromagnetic means for actuating the percussion element, a circuit closer cooperative with the key for energizing the electromagnetic means during the initial fingered movement of the key, arms pivotally connected to said rod means on each key coacting with one of the arms on said rod for withdrawing the damper from the string simultaneously with the depression of said key and with the operation of the percussion element, a coil spring for returning the percussion element to its normal position of rest, the upward movement of said key after its depression releasing the damper for its return by gravity to its normally engaged position with the string.

2,452,849
WRENCH WITH SPRING CLOSED JAWS AND HANDLE AND PAWL FEED
Oswald M. Gross, Detroit, Mich.
Application October 5, 1945, Serial No. 620,441
4 Claims. (Cl. 81—89)

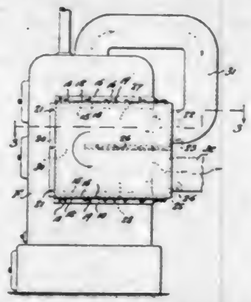


1. A self-adjusting wrench comprising a tubular handle formed at one end with a nut en-

gaging jaw, a complementary jaw member formed with an extension slidable in the handle, said extension having transverse serrations, a cam formed with a face confronting the serrated portion of the jaw extension and similarly serrated, said cam slidable in the tubular handle, an operative handle pivoted on the tubular handle in alignment therewith formed with a cam face ar-

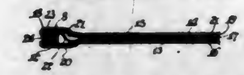
ranged to engage the slidable cam to operably engage said cam with the serrated jaw extension, a closure member for the tubular handle formed with a medial extension defining two parallel spring dwells in the handle, a compression spring seated in one dwell and engaging the slidable cam and an expansion spring having its ends anchored respectively to the slidable jaw and the bottom of the other spring dwell.

2,452,850
DUMP BODY FOR TRUCKS
Clans Guidry, Jennings, La.
Application April 22, 1946, Serial No. 663,996
1 Claim. (Cl. 298—19)



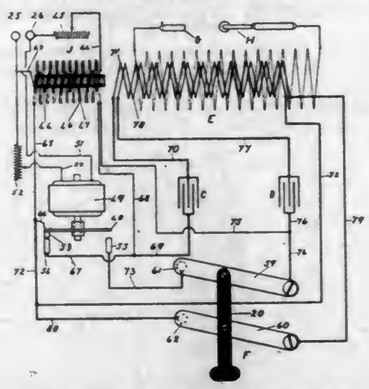
1. In combination with a truck chassis, of a dump body pivotally supported thereon at a point nearer its rear end than to its forward end, longitudinally extending I-beams supported upon said chassis between the same and the mount for said dump body, a plurality of support members including a pair of converging rods positioned at the forward end of said dump body and depending therebelow, a bar secured at the ends of said plurality of members, a manually operated hoist secured to said beams and provided with a pedestal supported sheave, and a hoist cable secured to said hoist and extending over said sheave and connected with said bar whereby rotation of said hoist will elevate the forward end of said body, and when dumped gravity will cause said body to resume its normal position.

2,452,851
HINGE
George Washington Henry, Westfield, Mass., assignor to Anderson & Sons, Inc., Westfield, Mass., a corporation of Massachusetts
Application September 4, 1947, Serial No. 772,160
8 Claims. (Cl. 33—115)



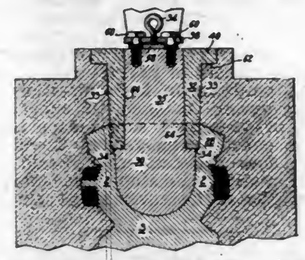
1. A hinge construction comprising two strips, one of said strips being slotted to form two prongs, opposed arcuate recesses in the adjacent faces of said prongs, spaced depressions in the walls of said recesses, and lugs struck out from the other strip passing through said first strip and turned over into engagement with the surface thereof, the edges of said lugs being adapted to engage said depressions to maintain the strips in desired angular relationship and to be disengaged from said depressions against the spring action of said prongs when one strip is rotated relative to the other.

2,452,852
HEAT RECLAMATION ATTACHMENT FOR HEATING FURNACES
John A. Hilkene, Bloomfield, N. J.
Application July 6, 1945, Serial No. 603,460
2 Claims. (Cl. 122—4)



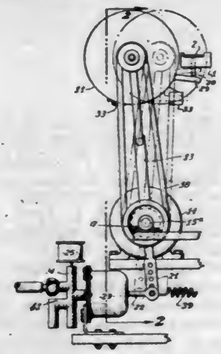
1. A heat reclamation attachment for a heating furnace or boiler comprising an open sided sheet metal casing formed by a flexible side wall, end walls and top and bottom walls, said top and bottom walls having transverse slits extending inwardly from the free edges thereof whereby the same may expand and contract to permit curving of said free edges and curving of said side wall to conform the casing to external contours of a furnace or boiler to which the open side of said casing is operatively applied, means to hold said casing in such operative attached relation to a furnace or boiler, said holding means comprising flexible sheet metal supporting bracket members adapted to be fastened to an external wall of the furnace or boiler, said members having outwardly projecting flange means to which top and bottom walls of the casing are secured, and said flange means also having transverse slits extending inwardly from free edges thereof to permit longitudinal expansion of said flange means and thereby curving of the bracket members conformably to the contours of said furnace or boiler, said casing having an inner partition adapted to divide the interior thereof into interconnecting ingoing and outgoing flue gas passages, conduit means to connect the flue gas discharge outlet of the furnace or boiler fire-box in communication with the ingoing flue gas passage of said casing, and a smoke pipe connected in communication with and leading away from the outgoing flue gas passage of said casing.

2,452,853
CLOSED EDGE FLY FRONT FOR GARMENTS
Frank Ippoliti, Philadelphia, Pa.
Application June 2, 1947, Serial No. 751,815
2 Claims. (Cl. 2—96)



1. A garment fly comprising an inner and an outer wall or ply of garment material disposed in parallel spaced relation, with the outer edges turned in and secured together to form a seam located between the walls of garment material, the inner wall having buttonholes as the only access to the space between the garment walls, and two layers of lining material having contiguous edges of both layers secured to the seam between one side thereof and one adjacent garment wall, one of said lining layers extending over the inside surface of said adjacent wall, and the other lining layer being separated from the first mentioned lining layer and extending over the inside surface of the opposite garment wall and covering the inturned seam to conceal the latter from view through the buttonholes.

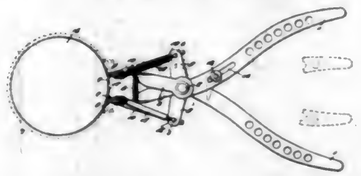
2,452,854
ELECTROTHERAPEUTICAL APPARATUS
Henry William Joy, Yonkers, N. Y.
Application November 18, 1944, Serial No. 564,119
9 Claims. (Cl. 128—422)



1. In apparatus of the class described, the combination of a pair of spark producing windings energized from a suitable source of electrical current, a rotary sparking device having a plurality of spark points co-operating with said windings, a condenser coupled to each of said windings and said sparking device, a high frequency oscillatory member having a pair of separate primary windings and a single secondary winding, said primary windings being separately coupled to said condensers, a pair of applicators connected to the terminals of said secondary winding, and circuit connections whereby the primary windings of said high frequency oscillatory member are alternately energized in rapid succession to neutralize time losses between cycles as generated.

2,452,855
MOLD FOR MAKING CASTINGS
Louis W. Kempf, Lakewood, and La Verne W. Eastwood, University Heights, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa., a corporation of Pennsylvania
Application January 6, 1943, Serial No. 471,414
2 Claims. (Cl. 22—131)

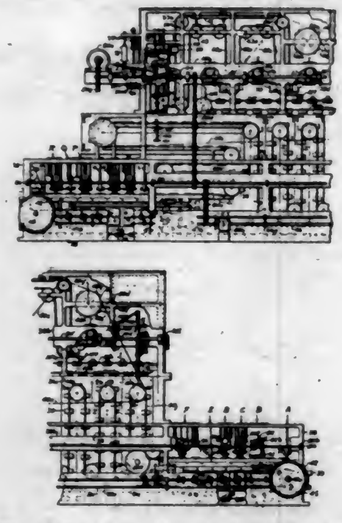
2. A mold assembly for making from a light metal alloy a hollow cylindrically shaped casting closed at one end, comprising an external sand mold body closed at the bottom and having a mold cavity therein and a central opening extending upwardly from said cavity to the top surface of said mold body of sufficient size to permit the insertion and removal of a core, a metal core consisting of a portion within the mold cavity and a stem portion extending outside of said cavity, and a refractory sleeve snugly fitted between the stem portion of said core and the walls of the central opening and extending downwardly into the mold cavity whereby the core is aligned and supported in predetermined position and the mold cavity partially sealed against escape of air therefrom during the filling of said cavity with molten metal, said mold cavity being gated below the level of the lowest portion of the metal core, and having a blind riser at the top of said cavity, the portion of the sleeve extending into the mold cavity forming one wall of said riser.



2,452,856
MATERIAL HANDLING DEVICE
Theodore W. Kerr, West Hollywood, Calif., assignor to E. E. Kotkin, doing business as Plastics Process Company, Los Angeles, Calif.
Application June 8, 1945, Serial No. 598,229
11 Claims. (Cl. 164—76)

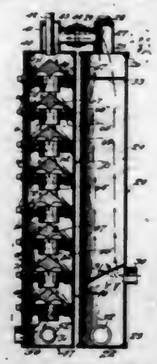
1. A material handling device adapted to sever equal length pieces from a longitudinally movable strip of material, which comprises: a support

member adapted to receive and guide a strip of material for longitudinal movement; stop means positioned to engage a free end of a strip located on said support member and interrupt the longitudinal movement thereof; severing means located in spaced relation to said stop means, said severing means being adapted for transverse movement with respect to said strip from between one position entirely out of engagement with said strip into severing engagement with said strip and thence into a second position severing said strip; actuating means for effecting said transverse movement of said severing means between said positions in both directions; stop-disengaging means adapted to effect relative movement between said stop means and such free end to effect disengagement therebetween; and control means associated with said severing means for actuating said stop-disengaging means in timed relation to the movement of said severing means.



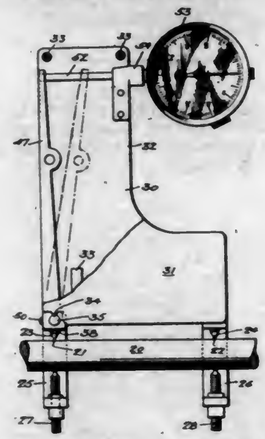
2,452,857
PISTON RING TOOL
George Mesaros, Linden, N. J.
Application October 13, 1945, Serial No. 622,169
2 Claims. (Cl. 29—223)

1. A piston ring tool of the character described comprising a pair of handles pivotally connected at one end, arms projecting from the pivoted end portions of said handles, legs pivotally mounted on the pivoted end portions of the handles, coacting pivoted and stationary jaws on the free end portions of said legs, lugs rotatably mounted on the arms by means passing at right angles through the arms, rods having one end operatively connected to the pivoted jaws and their other end portions threadedly engaging through the lugs at right angles to the axes thereof at one side of said arms for actuation by the arms and for varying the length of said rods so as to adjust the pivoted jaws with reference to the stationary jaws for varying the width of the jaw openings, and springs on the other side of said arms connected to the lugs and to the pivoted jaws for opening said pivoted jaws and for securing the lugs to the arms.



2,452,858
METHOD OF AND APPARATUS FOR PRODUCING POTTERY WARE
William J. Miller, Swissvale, Pa., assignor to Miller Pottery Engineering Company, Swissvale, Pa., a corporation of Pennsylvania
Original application March 1, 1929, Serial No. 343,693. Divided and this application March 29, 1935, Serial No. 13,683
98 Claims. (Cl. 25—22)

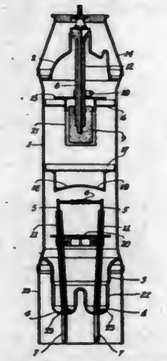
1. Apparatus for fabricating pottery ware comprising a dryer having a main drying chamber arranged in zones and an opening for the removal of ware, a series of fabricating units mounted in co-operative relation with the dryer, a plurality of molds for supporting ware, means for advancing the molds to and through said fabricating units to have ware fabricated thereon, and then through the dryer all in a closed cycle, means for establishing a forced circulation of air through the drying chamber and around said molds and ware, means for controlling the temperature and



humidity of the air in each zone to thereby regulate the moisture content of the advancing ware in accordance with speed of travel thereof toward a point of removal.

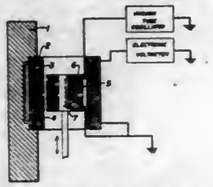
2,452,859
DEODORIZING AND STEAM CONDENSING DEVICE
George D. Moody, Arkansas City, Kans., assignor of one-third to Ralph E. Moody, Arkansas City, Kans.
Application January 5, 1946, Serial No. 639,190
3 Claims. (Cl. 183—17)

2. In an apparatus of the class described, a steam tower having a bottom inlet and a top outlet and adapted for receiving therein through said inlet steam carrying solid matter therewith, means in said steam tower above said inlet for baffling steam arising in said tower and deflecting the solid matter toward the bottom of said tower, a condensing tower alongside the steam tower communicating at the top thereof with the outlet of said steam tower, vertically spaced diametrical plates in said condensing tower, conical solid condensing members in said condensing tower surmounting said plates in vertically aligned relation and spaced above said plates to provide for steam entering between the same and said plates, downtake tubes in said plates discharging onto subjacent condensing members and aligned vertically with the apices thereof, and means to introduce cooling water into the top of the condensing tower onto the uppermost condensing member, said condensing members having toroidal bottom recesses therein for pocketing the steam to facilitate condensing the same.



2,452,860
EXTENSOMETER OR STRAIN GAUGE
Franz C. Mostertz, Philadelphia, Pa., assignor to F. F. Metzger and Son, Philadelphia, Pa., a firm
Application June 12, 1947, Serial No. 754,177
5 Claims. (Cl. 33—148)

2. In an extensometer, cheek plates united together in spaced relation, cooperating knife edges on the cheek plates, a circular bearing shaft having knife edge slots extending across the knife edges with the knife edges in the slots, a lever block between the knife edges having a transverse opening through which the bearing shaft passes, rigid with respect to the bearing shaft, a gauge pin integral with the lever block and transverse to the bearing shaft, walls forming a spring slot transverse of the bearing shaft on the opposite side of the lever block from the gauge pin, a spring abutment in the spring slot, a spring acting on the spring abutment from the cheek plates, and a lever extension removably secured to the lever block and extending from the opposite end of the lever block from the gauge pin.

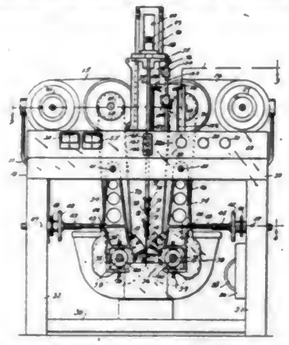


2,452,861
CURRENT CONVERTING TUBE
Johannes Gijsbertus Wilhelm Mulder, Eindhoven, Netherlands, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee
Application February 27, 1947, Serial No. 731,289
In the Netherlands October 17, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires October 17, 1961
4 Claims. (Cl. 250—27.5)

1. A rectifier tube, particularly for service in circuits involving potentials in excess of 100 volts and currents in excess of 10 amperes, comprising an envelope and within said envelope a gaseous filling at a pressure in excess of 0.3 millimeter of mercury, an oxide cathode, an anode having an active surface and an inactive surface, a first screening member surrounding the inactive surface of said anode, and a second screening member interposed between said cathode and the

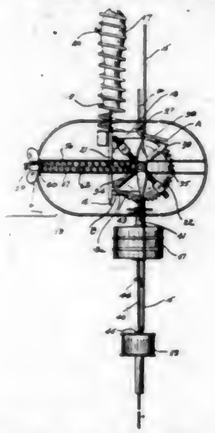
active surface of said anode, said screening members being so cooperatively arranged with respect to said cathode and said anode that electrons emitted from said cathode are prevented from directly passing to the active surface of said anode thereby preventing arc-back at lower than normal cathode temperatures.

2,452,862
ELECTRIC GAUGING HEAD
Joseph J. Neff, South Euclid, Ohio, assignor, by mesne assignments, to Jack & Heintz Precision Industries, Inc., Cleveland, Ohio, a corporation of Delaware
Application October 19, 1945, Serial No. 623,342
3 Claims. (Cl. 171—119)



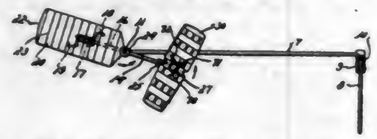
1. In an electrical displacement pickup mechanism, a pair of longitudinally arranged contiguous pickup coils of uniform outside diameters and coaxial windings, a driving coil disposed concentrically with respect to said pickup coils, an armature arranged concentrically within all of said coils and attached to one or more of said coils, said driving coil and said pickup coils being mounted to be relatively movable longitudinally of each other.

2,452,863
POLISHING MACHINE
Herbert T. Nicholas, Huron, Ohio, assignor to Nicholas Equipment Company, a partnership
Application September 29, 1945, Serial No. 619,367
11 Claims. (Cl. 51—85)



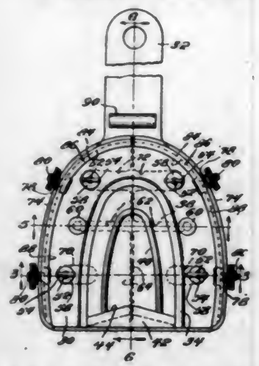
6. A polishing apparatus comprising a pair of polishing rolls, an operating member, a work-holder, a pair of parallel links pivotally interconnected between said member and said work holder, a fluid pressure system for moving the operating member to cause the movement of the

workholder to and from the bite of said rolls to move a workpiece between the coacting faces of the rolls, independent motors for driving said rolls, means for swinging the parallel links about their pivotal connection with the operating member to move the workholder in a direction sub-



stantially parallel to the axes of the rolls, whereby a vibratory movement is imparted of the workholder in a direction transverse to the direction of reciprocation of the workholder, and an independent motor for actuating said last-named means.

2,452,864
MOTOR MECHANISM
Hans E. Nietsche, Detroit, Mich.
Application August 18, 1944, Serial No. 550,086
9 Claims. (Cl. 74—60)

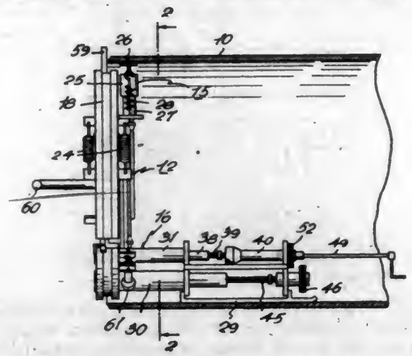


1. A power translating device of the class described, comprising: a rotatable shaft; a gear fixedly mounted on said shaft; reciprocating means for rocking said gear alternately in opposite directions; a crank shaft having a crank intermediate its ends; a pair of arms projecting diametrically outwardly from the crank of said crank shaft intermediate its ends at substantially right angles thereto; a yoke for connecting said arms to said gear bearing shaft; a stud projecting outwardly from the juncture of said arms and said crank at substantially right angles to the axes of both said arms and said crank; a supporting member for supporting said first-named shaft; a spring connected at one end of said stud and at the opposite end to said supporting member.

2,452,865
TOY
Hans E. Nietsche, Detroit, Mich.
Application October 22, 1945, Serial No. 623,690
7 Claims. (Cl. 46—58)

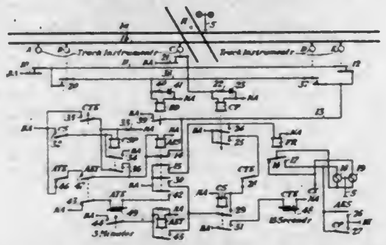
1. A toy of the class described comprising a supporting member; an angularly turned handle forming end on said member; a thumb-piece on said angularly turned end engaging the end of said member and non-rotatable relatively to said angularly turned end; an angularly turned portion on the opposite end of said member; a blade supporting member rotatably mounted on said second mentioned angularly turned end; and a plurality of rotatable blades carried by said blade supporting member.

2,452,866
COLLOID DENTAL TRAY
Carl H. Oertel, Baltimore, Md.
Application September 26, 1945, Serial No. 618,737
5 Claims. (Cl. 32—17)



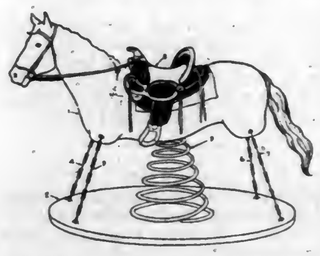
1. A device of the character described, comprising a base, a semi-elliptical groove surrounding the medial portion of said base, a palatal section having a flanged edge, which is receivable in said groove, component side sections adjustably mounted on said base for relative movement to effect contraction or expansion for width and height after placement in a human mouth, and means for retaining the sections in fixed relation to each other after they have been properly adjusted to conform to the human mouth.

2,452,867
HYDRAULIC INTERNAL LINE-UP CLAMP
Harold C. Price and Bernard V. Elliott, Bartlesville, Okla., assignors, by mesne assignments, to H. C. Price Co., Bartlesville, Okla., a corporation of California
Application July 12, 1945, Serial No. 604,586
2 Claims. (Cl. 113—103)



1. An internal line-up clamp comprising a supporting frame member, a stationary ring section rigidly mounted on said frame member, a movable ring section carried by said stationary ring section, hydraulic means on said stationary ring section for moving said movable ring section

outwardly, a hydraulic jack carried by said frame member, a pump mounted on said frame member, said pump comprising a fluid cylinder connected to the jack hydraulic means, a second fluid cylinder connected to the ring section hydraulic means, a piston within each of the cylinders, a



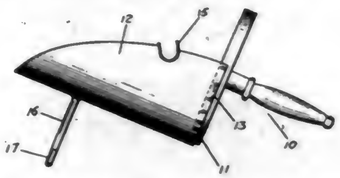
threaded shaft mounted on each piston, and a longitudinally movable shaft carried by said frame, said shaft being movable inwardly to engage and operate one of said threaded shafts, and movable outwardly to engage and operate the other of said threaded shafts.

2,452,868
DIRECTIONAL CONTROL MEANS FOR HIGHWAY CROSSING SIGNALS
Joseph A. Quinlan, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania
Application November 22, 1946, Serial No. 711,586
6 Claims. (Cl. 246—125)

1. In combination, a stretch of railway track intersected by a highway, a highway crossing signal located at the intersection, a first track instrument located at a selected point to one side of the intersection, said track instrument having a contact biased to a closed position and opened by a train passing over the instrument, a master relay having a stick circuit completed through said contact of the first track instrument, operating circuit means having a first path governed by said master relay to operate said signal when the master relay is deenergized, a second track instrument located adjacent said intersection and having a contact biased to an open position and closed when a train passes over that instrument, a slow release relay energized through said contact of the second track instrument, a second circuit path of said operating circuit means governed by a contact of said slow release relay to operate the signal when the slow release relay is picked up, a first restoring circuit means including a time element relay having a contact closed in a preselected relatively short period of time and governed by said slow release relay when picked up, a second restoring circuit means including a time element relay having a contact closed in a preselected relatively long period of time and governed by said master relay when released, and a pick-up circuit means for said master relay and made effective when the contact of either of said time element relays is closed.

2,452,869
HOBBYHORSE
Donald L. Richards, Portland, Oreg.
Application May 3, 1947, Serial No. 745,819
6 Claims. (Cl. 272—52)

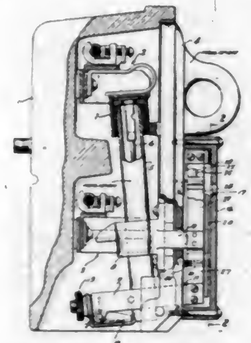
2. A hobby toy comprising a base, a compression spring in erect position normal to the median area of said base, a body having a seat thereon mounted over the spring and at least four chains fastened to both the said body and the said base, in tensioned spaced relationship, which, owing to correct spacing and tension hold the spring in compression, preventing the body from being moved in any direction without further compression of the spring.



2,452,870
REACTION PRODUCT OF ROSIN AND COPOLYMER OF VINYL ACETATE AND AN ALPHA-UNSATURATED CARBOXYLIC ACID ESTER AND PROCESS OF MAKING SAME
John B. Rust, West Orange, and William B. Canfield, Montclair, N. J., assignors, by direct and mesne assignments, of one-half to Montclair Research Corporation, a corporation of New Jersey, and one-half to Ellis-Foster Company, a corporation of New Jersey
No Drawing. Application July 21, 1944, Serial No. 546,050
8 Claims. (Cl. 260—27)

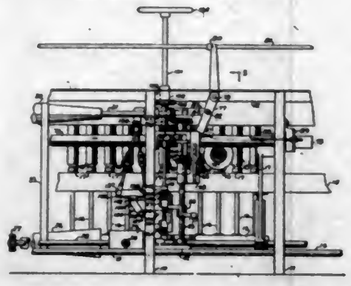
1. An oil-soluble resin of low acid number comprising the heat-reaction product of rosin and a copolymer of from 1 to 5 parts of vinyl acetate with 1 part of an alpha-unsaturated carboxylic acid ester containing more than 5 carbon atoms, the rosin being in amount of from 100 to 300 parts to 30 to 100.7 parts by weight of copolymer sufficient to furnish rosin acids substantially equivalent to the acetic acid radicals of the copolymer, the acid number of said heat-reaction product being below 40.

2,452,871
ASH TRAY
Frederick Valentine Schnepel, Middle River, Md.
Application March 26, 1947, Serial No. 737,262
3 Claims. (Cl. 131—241)



1. An ash tray for cigars and the like comprising in combination, a shovel plate of semi-circular form curved and tapered towards its front end,

holders for cigars supported on the edges of said plate and arranged to assume a horizontal position when said plate is normally placed, a back of disc-like contour having its peripheral surface partly encompassed by said plate and secured thereto, a handle extending rearwardly from said

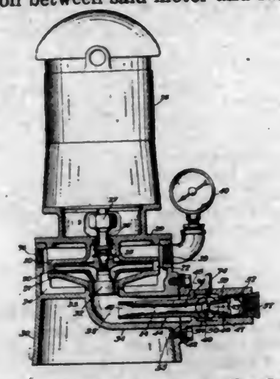


back with its end portion adapted to rest on a horizontal surface when aligned with the edge of said back resting thereon, and a support on the underside of said shovel plate for supporting the latter in a tilted position with said edge and end portion also in contact with said surface.

2,452,872
COMBINED FUSE AND DEMAND METER
William O. Schultz, South Milwaukee, Wis., assignor to Line Material Company, Milwaukee, Wis., a corporation of Delaware
Application August 5, 1947, Serial No. 766,300
5 Claims. (Cl. 171—34)

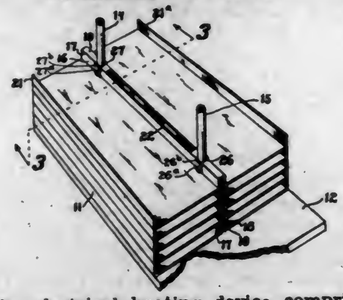
1. In a device of the class described, a housing having an upper and a lower stationary contact, said housing having means for removably receiving doors provided with fuses, a door arranged to be received by said housing, a fuse tube carried on the inner side of said door and having an upper, a lower, and an intermediate contact with the upper and intermediate contacts arranged to respectively engage the upper and lower stationary contacts when the door is in closed position, a fuse link within said fuse tube electrically connecting the upper and lower contacts of said fuse tube, a demand meter located on the outer side of said door and including a bimetal strip and a yielding conducting strip having free ends electrically connected together, the intermediate contact of said fuse tube having a portion projecting through said door and constituting a rigid support for the other end of said yielding conducting strip, the other end of said bimetal strip being rigidly held and being electrically connected to the lower contact of said fuse tube, and registering means actuated by said bimetal strip.

2,452,873
AUTOMATIC BUILDER MOTION KNOCKOFF FOR ROVING FRAMES
Johnnie J. Seawright, Goldville, S. C.
Application April 4, 1947, Serial No. 739,346
5 Claims. (Cl. 57—79)



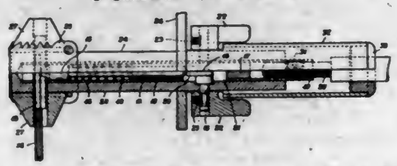
1. In a roving frame having a bolster rail which is moved up and down by a conventional builder motion, said frame having a member carried by the bolster rail and having a rotatable shaft carried thereby and said shaft having oppositely threaded portions thereon and a pair of brackets mounted on the threaded portions, said frame having driven means for imparting rotation to the shaft to move the two brackets incrementally towards each other during the placing of roving on the conventional bobbins of the machine, said frame having a second rotatable shaft provided with a pair of arms disposed 180° apart and due to the rotation of the second shaft being adapted to pass below and above said brackets during their normal up and down movement, said frame also having a stop motion lever and means connected thereto for holding the stop motion lever in running position, an outwardly projecting tongue adjustably mounted on each of the brackets, an oscillatable member having a connection with the member for holding the stop motion lever in running position and also having a portion projecting into the path of the tongues mounted on the two brackets, whereby when the brackets move below or above a predetermined point, one of the tongues adjustably mounted thereon will engage the portion projecting into the paths of the tongue mounted on the brackets to move the stop motion lever to a position to stop the frame.

2,452,874
PUMPING SYSTEM
Walter Shallenberg, Salem, Ohio, assignor to The Deming Company, Salem, Ohio, a corporation of Ohio
Application October 24, 1945, Serial No. 624,269
8 Claims. (Cl. 103—5)



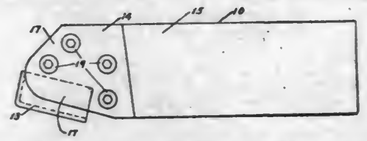
1. A pumping system having a fluid service line, a rotary pump having a suction inlet, a discharge chamber surrounding said pump, a pressure tank having an inlet and an outlet, a discharge conduit from the discharge chamber to the inlet of the pressure tank, a manifold, a jet pump carried by said manifold and discharging into the inlet of the pressure pump, a connection between the outlet of the pressure tank and said manifold, a connection between said manifold and the fluid service line, whereby a portion of the fluid supplied to the pressure tank returns to the jet pump to supply energy thereto and another portion flows to the fluid service line, a suction line connected to said manifold, a check valve in said suction line closely adjacent to the jet pump,

a motor adapted for intermittent operation, a connection between said motor and said pressure



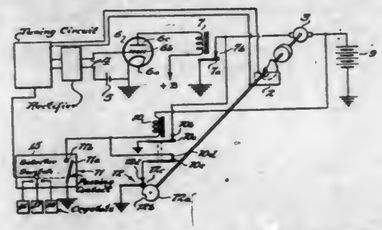
pump, and means responsive to the fluid pressure in said tank to control the operation of said motor.

2,452,875
CONVECTION TYPE ELECTRICAL HEATING DEVICE
Robert B. Shannon, Akron, Ohio
Application November 7, 1945, Serial No. 627,123
6 Claims. (Cl. 219—38)



1. An electrical heating device comprising a unit including a plurality of separate vanes, each of said vanes being formed of heat-conducting sheet material to provide a channel-shaped rib extending completely across the vane and defining an open-ended groove, said ribs of the vanes being slotted along the outer web portion thereof, means for securing said vanes in spaced relation with said slots in alignment, and an elongated electrical heating element received through said slots of said ribs.

2,452,876
WELDING ROD AND ELECTRODE HOLDER
Henry Shaw, Bessacarr, Doncaster, England
Application September 4, 1945, Serial No. 614,388
In Great Britain September 4, 1944
5 Claims. (Cl. 219—8)



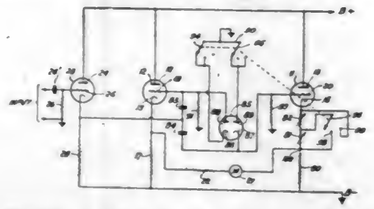
1. In a holder for a welding rod, the combination with an insulated, electric-cable-receiving, tubular body carrying an insulated, welding-rod-receiving head in which a welding rod is holdable in a guideway therein by a plunger in said body, of oppositely disposed separately renewable insulating cover members for said head insulatingly extending about and enclosing the guideway therein, and means detachably securing said cover members to said head.

2,452,877
TOOL BIT AND HOLDER THEREFOR
Henry M. Sheridan, Erie, Pa., assignor to Apex Tool & Cutter Company, Shelton, Conn., a corporation of Connecticut
Application June 2, 1945, Serial No. 597,274
1 Claim. (Cl. 29—96)

A tool holder comprising a shank having an extended portion providing a flat seat with a terminal wall extending in a single plane from said seat, said plane being inclined rearwardly from the plane of the seat and also extending diagonally across said seat, a bit clamp mounted over said seat having a rear wall snugly embracing and conforming to said terminal wall and having an open sided bit receiving recess therein extending inwardly in the direction of said diagonal wall and forming in combination with said seat a bit pocket having a top, bottom, inner end and side wall, and means for forcing said clamp toward said seat, the inner end and side wall of the bit pocket being at right angles to each other, the end wall slanting inwardly at an angle to a perpendicular transverse plane through the shank axis and the side wall slanting longitudinally towards said axis.

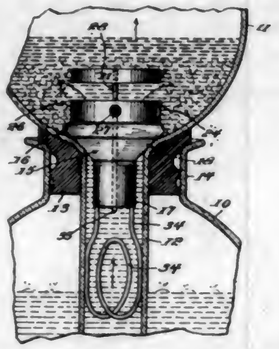
2,452,878
AUTOMATIC TUNING CONTROL CIRCUIT
Hulburt C. Tittle, Cheektowaga, N. Y., assignor to Colonial Radio Corporation, Buffalo, N. Y.
Application February 8, 1944, Serial No. 521,512
9 Claims. (Cl. 250—40)

1. In automatic tuning apparatus, in combination, a frequency determining element, a work circuit including a power source for delivering energy limited to a frequency determined by said element, said work circuit having a variable tuning instrumentality, power means for varying said tuning instrumentality, energy responsive means for interrupting operation of said power means in response to delivery by said work circuit of a predetermined level of energy, said last mentioned means being operatively associated with said work circuit and means for causing op-



eration of said power means to move said tuning instrumentality through completion of one tuning cycle irrespective of the level of energy delivered by said work circuit.

2,452,879
APPARATUS FOR IMMERSING EDGE PORTIONS OF BLACK PLATE IN SUCCESSIVE TREATING BATHS
Walter M. Tomkins and Albert C. Larkin, Pointe St. Charles, Montreal, Quebec, and John C. Anthony and Oakland K. Ross, St. Laurent, Quebec, Canada, and Ralph M. Mero, Chicago, Ill., assignors to Continental Can Company, Inc., New York, N. Y., a corporation of New York
Application August 9, 1943, Serial No. 497,982
In Canada August 3, 1943
7 Claims. (Cl. 134—67)

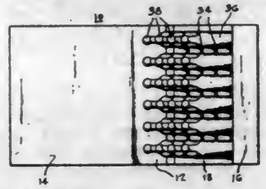


1. In apparatus for preparing a plate blank for forming a can body, treating bath means; conveyor means; means carried on said conveyor means for gripping an upper portiton of a blank and holding the blank suspended from said gripping means with a first edge portion of said blank spaced below and completely exposed and unencumbered by said gripping means; means for reversing the gripping of said blank on the conveyor means whereby when reversed the blank will be held by said gripping means and suspended therefrom with a second edge portion of said blank spaced below and being completely exposed and unencumbered by said gripping means; means for driving said conveyor means; and means mounting the conveyor means to move a blank being conveyed in a path such that said first edge portion of the blank while completely exposed will be projected into said treating bath means and removed therefrom prior to reversal of said blank, and said second edge portion while completely exposed will be projected into said treating bath means and removed therefrom after said reversal.

2,452,880
ELECTRONIC VOLTMETER
John M. van Beuren, Morristown, N. J., assignor to Measurements Corporation, Boonton, N. J., a corporation of New Jersey
Application July 8, 1944, Serial No. 544,123
6 Claims. (Cl. 171—95)

1. Electronic alternating current voltmeter including an input filter circuit for removing direct current components from the voltage to be measured, an input coupling tube, means connecting the output of said filter circuit to the input of said tube, a diode rectifier, means capacitatively connecting said diode to the output circuit of said tube, a balanced electronic direct current indicator including two tubes connected as cathode followers and a direct current meter connected between the cathodes of said indicator tubes, means connecting the input grid of one indicator tube to the output of said diode whereby rectified voltage is fed to said direct current indicator, a capacitative connection from the input grid of the other indicator tube to the output circuit of said input tube, and a resistance connected between said last mentioned grid and ground, whereby alternating voltage components are impressed in identical phase upon the respective tubes of said indicator and thereby maintain said indicator in balance with respect to said alternating voltage components.

2,452,881
SAFETY VALVE COFFEE MAKER
Leo W. Vezie, Phoenix, Ariz.
Application June 27, 1947, Serial No. 757,519
4 Claims. (Cl. 210—162)



4. A filter unit for a coffee maker of the kind having upper and lower bowls and a spout establishing communication between the bowls, said unit comprising a hollow body having open upper and lower ends and a conical enlargement, said body being adapted to be arranged in the bottom of the upper bowl with its lower and upper ends communicating respectively with the spout and upper bowl and with its conical portion seated on the bottom of the upper bowl, the upper end of the body constituting a valve seat, the upper end of the body having a groove and lateral openings communicating with the groove and with the upper bowl and the interior of the body, a filter in the groove, a gravity seating valve on said seat adapted to be unseated by and during the flow of the water upwardly from the lower to the upper bowl through the body and adapted to seat when said upward flow ceases so as to cause the infusion to flow through the filter during its downward passage from the upper to the lower bowl, means connecting the valve to the body to maintain the valve in longitudinal alignment with the body and to guide the valve onto its seat when flow from the lower to the upper bowl ceases, and means releasably securing the body within the upper bowl.

2,452,882
FOLDING MATCH BOOK
August Visco, Philadelphia, Pa.
Application May 9, 1945, Serial No. 592,741
1 Claim. (Cl. 206—29)

A folding match book comprising a blank formed of two hinged portions foldable one upon

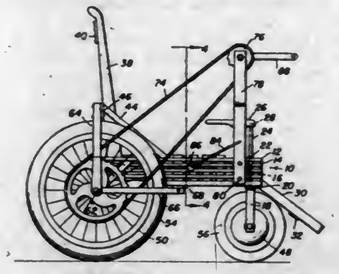
the other so that one of said portions constitutes a base and the other of said portions constitutes a cover, a marginal strip hingedly connected to, and foldable upon, the end of said base remote from said cover, a false cover overlying said base and having tabs at opposite ends thereof, means securing the tab on one end of said false cover to said marginal strip, means connecting the tab on the other end of said false cover to said base, said tabs being hinged to said false cover in such a manner that when said marginal strip is folded upon the adjacent end of said base, said false cover lies substantially flat against said base and

when said strip is positioned at an angle to the plane of said base, said false cover will be spaced from said base, said false cover having at least one slot therein extending substantially parallel to said strip, a bank of matches having hinged portions at the untreated ends thereof, and means securing said hinged portions to said base, the shanks of said matches extending through said slot whereby, when said false cover lies flat against said base, said matches are disposed substantially parallel to said base and, when said false cover is spaced from said base, said matches are disposed substantially normal to said base.

2,452,883
ANTISPLASH HEEL
Curry Ora Walper, Kitchener, Ontario, Canada
Application January 30, 1946, Serial No. 644,373
7 Claims. (Cl, 36—70)

1. In a heel for an article of footwear including a tread body, the tread body having a cavity formed in the inner forward corner portion thereof, said cavity being produced by forming a substantially vertical wall partially across the body from the inner side and back from the breast thereof and forming a ceiling extending from the height of the wall downwardly and forwardly and terminating at the lower margin of the breast at an acute angle thereto, the breast being uninterrupted.

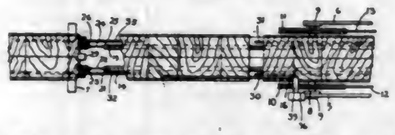
2,452,884
METHOD AND DEVICE FOR MOLDING
Richard D. Werner, New York, N. Y., assignor to R. D. Werner Co., Inc., New York, N. Y., a corporation of New York
Application July 7, 1945, Serial No. 603,697
15 Claims. (Cl. 18—1)



1. A molding device adapted to receive material from a hot extrusion die, comprising the combination of a cooled coil supporting the extruded material, a tank for liquid into which the extruded material passes from the coil to be cooled in the tank, and a jig in the tank adapted to be submerged by the liquid through which the extruded material is drawn.

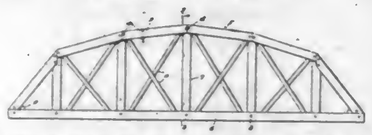
2,452,885
HYDRAULIC SHOCK ABSORBER
Louis E. Willard, New York, N. Y.
Application February 8, 1946, Serial No. 646,231
2 Claims. (Cl. 188—88)

1. A shock absorber of the kind described, comprising a dash-pot, closed at its bottom and open at the top thereof, a bellows-like head covering the open top, a tubiform body depending within the pot and attached to the head, a piston cylinder rising within the body and fixed at the bottom of the latter, a piston working within the cylinder and joined with the closed bottom of the pot, the bottom of the cylinder being ported to the body and the pot, check valves controlling said ports and a check valved vent leading from the upper portion of the cylinder to the body.



2,452,886
WHEEL CHAIR
Frank E. Wood, Sturgis, S. Dak.
Application December 15, 1947, Serial No. 791,834
1 Claim. (Cl. 280—250)

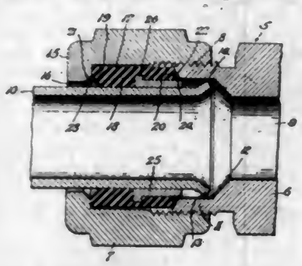
A wheel chair including a combination horizontal frame and seat, a pair of hind wheels mounted on the sides adjacent the rear edge of said frame, a pair of transversely spaced vertical forks pivoted on the forward portion of said frame, an axis member of one fork extending upwardly through said frame and having a steering handle thereon, a pair of front wheels freely rotatively mounted in the forks, and a back for the chair, said frame comprising a plurality of



layers of longitudinally disposed members and interspaced transversely disposed members and said axis member extending through overlapping portions of said members.

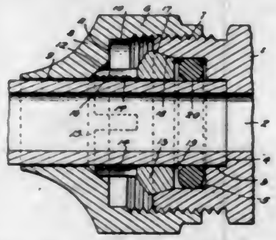
2,452,887
MACHINE FOR MAKING WIRE-BOUND BOXES
Glen P. Woodbury, Mountain Lakes, N. J., assignor to Stapling Machines Co., a corporation of Delaware
Application May 23, 1945, Serial No. 595,372
9 Claims. (Cl. 140—93)

1. The combination with the delivery end of a box-blank stapling machine and the receiving end of a box-blank bight-forming machine, of a flexible band pivotally connected to the delivery end of the stapling machine and adapted to support box blanks delivered from the stapling machine, a guide mounted on the receiving end of the bight-forming machine, a flexible cable connected with the band and movable on the guide, and a weight connected with the flexible cable, whereby a lifting action will be maintained on the flexible band and the box blanks being transferred from the stapling machine to the bight-forming machine.



2,452,888
TOY RAILWAY BRIDGE
Ernest M. Woodward, McDonald, Ohio
Application February 21, 1945, Serial No. 579,088
1 Claim. (Cl. 46—17)

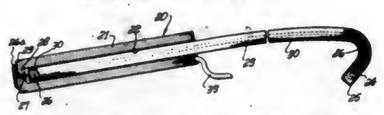
A toy railway bridge comprising a pair of side frame members, each including a lower girder of channel shape in cross-section, and upper sectional girders also of channel shape in cross-section, said upper girders being inverted, posts having their ends secured in the channels of said upper and lower girders, crossed braces connecting adjacent posts, blocks in the channels of the lower girders adjacent the ends thereof to reinforce the sides of the girders, a cross-brace connecting the upper edges of the side frames in spaced apart relation, and a rail bed secured to the inner sides of the lower girders comprising flat side bars secured edgewise to said lower girders, and cross ties secured to the underside of said flat bars.



2,452,889
FLEXIBLE COUPLING
John N. Wolfram, Cleveland, Ohio, assignor to The Parker Appliance Company, Cleveland, Ohio, a corporation of Ohio
Application November 20, 1944, Serial No. 564,259
4 Claims. (Cl. 285—90)

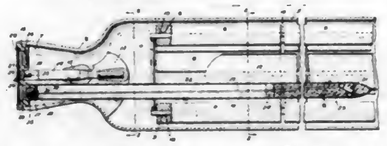
1. A coupling for tubes comprising a threadedly engaged body member and nut defining therebetween an annular chamber, said body member being counterbored for receiving one end of the tube, a sleeve surrounding said tube and

telescoping within said counterbore, and a deformable packing disposed within said annular chamber and around a portion only of said sleeve for sealing said tube within said coupling.



2,452,890
COUPLING FOR TUBES
John N. Wolfram, Cleveland, Ohio, assignor to The Parker Appliance Company, Cleveland, Ohio, a corporation of Ohio
Application January 24, 1945, Serial No. 574,266
1 Claim. (Cl. 285—123)

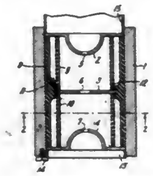
A coupling for tubes comprising a body member, a nut having a threaded engagement therewith, said nut having an inwardly extending flange provided with an inclined camming face at the inner side thereof, said body member having a counterbore providing an annular recess surrounding the tube, said counterbore terminating in an inclined face at the outer end thereof, a sleeve disposed within said nut and body member, said sleeve having spaced gripping fingers at the outer end portion thereof adapted to be engaged by the inclined camming face of the nut for contracting the same into gripping engagement with the tube when the nut is turned on to the body member, said gripping fingers having teeth biting into said tube, said sleeve at the inner end thereof having a solid head provided with an inclined face adapted to wedgingly engage the inclined face of the body member whereby the inner end portion of the sleeve is contracted into light engagement with the tube and said sleeve is held from rotation during the turning of the nut, said sleeve head closing the counterbore in the body member and forming a closed chamber for a sealing gasket and a deformable ring sealing gasket disposed in said chamber, said gasket being dimensioned so as to make sealing contact with the tube and the outer wall of the bore of the body member, said gasket being free to move longitudinally in said chamber whereby fluid pressure on the line will



force the gasket against the solid head of the sleeve and cause the gasket to be expanded into tighter sealing contact with the tube and the body member.

2,452,891
GARMENT CLAMP
Yervant Amber, Los Angeles, Calif.
Application February 13, 1945, Serial No. 577,700
6 Claims. (Cl. 38—108)

1. A clamping device for use with an ironing board or the like; said device comprising a hollow handle member, a hook member fixed on said handle member, a second hook member having a movable relation to said first named hook member, a rod integrally joined to said second named hook and extending therefrom to said handle to be telescoped therein, and a tensile spring disposed around said rod and having one end fastened to said handle and the other end to said second named hook.

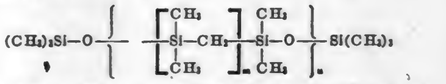


2,452,892
IGNITER FOR ROCKETS
Robert A. Appleton, Inyokern, Calif., Clarence N. Hickman, Jackson Heights, N. Y., and Carold F. Bjork, Luke, Md., assignors to the United States of America as represented by the Secretary of War
Application May 7, 1947, Serial No. 746,548
3 Claims. (Cl. 102—49)

3. In combination a rocket motor chamber adapted to contain a propellent material combustible to generate a fluid under pressure, a constricted Venturi-like orifice for the high velocity discharge of said fluid and an envelope for containing an igniter composition for said propellant, said envelope having a generally elliptical cross-section permitting flexibility in the direction of its minor axis only whereby said envelope may be inserted into said chamber through said orifice.

2,452,893
ELECTRON LENS ASSEMBLY
Charles H. Bachman, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Application May 31, 1946, Serial No. 673,218
4 Claims. (Cl. 250—162)

1. An electrostatic electron lens structure comprising a supporting cylinder, three circular electrodes arranged coaxially within said cylinder and provided with central apertures, the outer of said electrodes being supported directly by said cylinder and having their apertures aligned thereby, first insulating means of accurately dimensioned thickness for supporting the intermediate of said electrodes within said cylinder and for aligning the apertures thereof with the apertures of said outer electrodes, and additional insulating means of accurately dimensioned



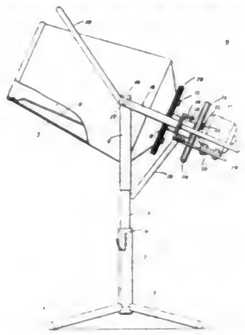
length positioned between said outer electrodes and said intermediate electrode for spacing said outer electrodes axially within said cylinder.

2,452,894
PROCESS FOR PRODUCING MAGNESIUM-ZIRCONIUM ALLOYS
Charles J. P. Ball, London, Alfred Claude Jessup and Edward Frederick Emley, Clifton Junction Works, near Manchester, and Joseph Beattie Wilson, Swinton, Manchester, England, assignors to Magnesium Elektron Limited, London, England, a British company
No Drawing. Application July 17, 1946, Serial No. 684,263. In Great Britain July 24, 1945
3 Claims. (Cl. 75—168)

1. A process for producing magnesium base alloys containing zirconium wherein alloying is effected by reacting the magnesium with at least one substance selected from the group consisting of double compounds and mixtures of fluorides of the elements potassium and zirconium, the ratio of zirconium fluoride to potassium fluoride exceeding that in K_2ZrF_6, and subsequently agitating the melt.

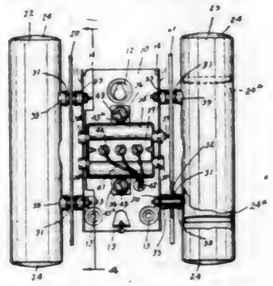
2,452,895
LINEAR SILMETHYLENESILOXANE
Ben A. Bluestein, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
No Drawing. Application January 22, 1948, Serial No. 3,812
4 Claims. (Cl. 260—448.2)

1. Chemical compounds corresponding to the general formula



where m and n are each a whole number equal to from 1 to 2.

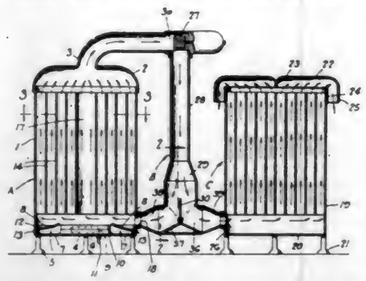
2,452,896
CEMENT MIXER
Homer W. Bonney and Mahlon Bonney, Roseville, Calif.
Application September 1, 1945, Serial No. 613,988
4 Claims. (Cl. 259—177)



1. A cement mixer comprising a pedestal including a vertical tubular standard, a vertical post seated in the standard and turnable therein about a vertical axis, an upwardly opening yoke on the upper end of the post, a mixing drum extending through the yoke, a frame structure on which the drum is journaled, means mounting the frame structure on the yoke for independent vertical tilting of the drum on a horizontal axis between loading and discharging positions at any point to

which the yoke may be turned about such vertical axis, and drive means mounted in unitary

relation on the frame structure and connected in driving relation to the drum.



2,452,897
MOUNTING FOR ELECTRIC CHIME SIGNAL DEVICES
Gisbert L. Bossard, Cleveland, Ohio
Application November 22, 1946, Serial No. 711,641
4 Claims. (Cl. 177—7)

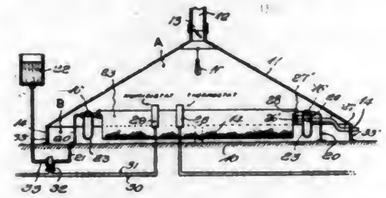
1. A signal device including a back plate, webs extending forwardly from each side of said plate at right angles thereto, said webs being cut away throughout the central portions thereof, resonator tubes mounted on said webs in lateral spaced and parallel relation thereto, tone bars supported by said webs between and in spaced relation to said tubes, respectively, and an electromagnetic actuating unit secured to said back plate having laterally operating strikers for selectively striking said tone bars substantially centrally thereof to set up sound waves opposite the cut away portion of said webs, whereby said webs will not interfere with said sound waves and the tonal quality and volume of said bars and resonator tubes.

2,452,898
INTERNAL HEAT INTENSIFIER
Earl C. Bourdette, Chickasaw, Ala.
Application May 3, 1945, Serial No. 591,819
1 Claim. (Cl. 237—50)

A heating radiating recirculating and distributing apparatus comprising a heating unit having a cylindrical casing, spaced vertically arranged concentric corrugated baffles within the cylindrical casing of said heating unit, spaced cylindrical concentric inner walls within said cylindrical casing, said inner walls relatively spacing said baffles, a supporting base for said cylindrical casing, a heating element below the baffle on the support for said casing and an air outlet above the baffles, a distributing unit having a cylindrical casing, spaced vertically arranged concentric, corrugated baffles, cylindrical concentric inner walls within said cylindrical casing for said distributing unit, said inner walls adapted to relatively space said baffles, a supporting base for the cylindrical casing of said distributing unit and a hot air intake below the baffles on the supporting base of

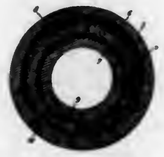
said distributing unit, a hood over the distributing unit and spaced therefrom to distribute heated air rising between the baffles, a conduit connecting the heating unit with the distributing unit, a blower interpolated in said conduit, a second conduit leading back into the heating unit from the first conduit and a valve for diverting air from the first conduit into the second conduit for recirculation through the heating unit, said valve being pivoted above a baffle in the distributing chamber interpolated in the first conduit having connection with the second conduit.

2,452,899
SLIDE FASTENER
Alexander M. Brown, Ocean Grove, N. J., assignor of forty per cent to Madison Dallas Pickens, New York, N. Y.
Application May 20, 1942, Serial No. 443,788
13 Claims. (Cl. 24—205.1)



1. In a slide fastener, a plurality of continuous runways relatively inflexible transversely thereof but relatively flexible longitudinally thereof, one of said runways having spaced shoulders thereon to receive the other runway therebetween, said other runway carrying a strip of resilient material of less transverse rigidity projecting beyond one edge thereof only, the combined width of said other runway and strip being greater than the distance between said shoulders, and a slider slidable on said runways for compressing said strip to reduce said combined width and permit engagement of said other runway with said shoulders.

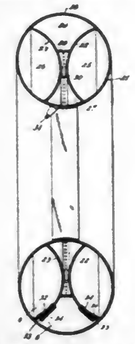
2,452,900
BROODER
John David Burkholder, Jr., Harrisonburg, Va.
Application July 31, 1944, Serial No. 547,340
12 Claims. (Cl. 119—34)



1. In a brooder, a hover, tubular flexible side curtain means arranged beneath the hover and defining the side of a zone, the curtain means

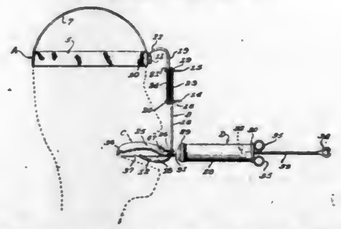
being closed so that a pressure may be built up therein in excess of atmospheric pressure, and

means to supply air under pressure to the tubular curtain means.



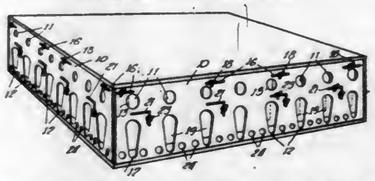
2,452,901
ELECTROMAGNETIC INDUCTION APPARATUS
Guglielmo Camilli, Pittsfield, Mass., assignor to General Electric Company, a corporation of New York
Application August 16, 1944, Serial No. 549,779
6 Claims. (Cl. 175—358)

6. A transformer comprising, in combination, a pair of linked rings which are narrow in comparison with their outside diameter, one of said rings being an insulated conductive winding, the other of said rings being a core on which is wound an insulated conductive winding, said last-mentioned winding being concentrated in the vicinity of the first-mentioned winding but extending over substantially all of said core, said core having a removable joint remote from said first-mentioned winding whereby said rings can be separately preconstructed and subsequently linked together.



2,452,902
SAFETY INNER TUBE FOR PNEUMATIC TIRES
Bernard Carlin, Orange, Tex., assignor of forty-nine one hundredths to W. O. Hailip and Richard B. Cammack, both of Nederland, Tex., and Joe Ener, Jr. and Lester De Cordova, both of Beaumont, Tex.
Substituted for application Serial No. 293,599, September 6, 1939. This application December 7, 1945, Serial No. 633,414
3 Claims. (Cl. 152—342)

1. A safety pneumatic inner tube of the class described comprising a main tube; a pair of arcuate webs within the tube each extending from one side of the rim portion to a side of the tread portion and dividing the tube into three chambers, one in each side and one extending through the middle from the rim portion to the tread portion; reinforcing rubberized ribs connecting said webs together near the center of the tube; an inflating valve connected to the middle chamber; double acting check valves on opposite sides of the walls between the middle chamber and the side chambers connected to permit inflation of the side chambers through the middle chamber but preventing escape of air from the middle



chamber through a side chamber after either side chamber blows out.

2,452,903
IMPRESSION TAKING MEANS
Earl G. Coffey, Sioux City, Iowa
Original application February 18, 1946, Serial No. 648,220. Divided and this application February 21, 1946, Serial No. 649,199
6 Claims. (Cl. 32—17)

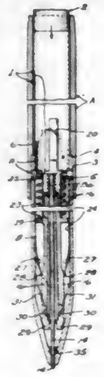
1. An impression taking device including a tray for use in taking impressions of the gums in producing complete upper dentures, said tray being provided at the bottom with a transverse groove, and means for securing the tray within the patient's mouth and yieldingly pressing said tray against the gums, said means comprising a head band and a spring clamp suspended from the front of said head band and having a rearwardly extending lower jaw spring-pressed upwardly and embodying a transverse part adapted to seat in said transverse groove of the tray.

2,452,904
BROODER
Monroe C. Cole, Dallas, Tex.
Application February 16, 1945, Serial No. 578,305
7 Claims. (Cl. 119—31)

1. In a brooder, a wall having a plurality of horizontally spaced, vertically elongated openings therein, closures for each of said openings, suspended from a common mounting, said wall hav-

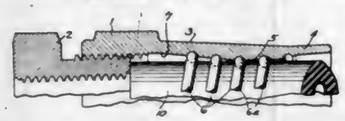
ing substantially L-shaped slots at spaced intervals the length thereof, threaded studs on said mounting receivable in said slots, and means mounted on said studs for moving said mounting vertically and horizontally to correspondingly move said plates relative to their respective openings.

2,452,905
PUSH-BUTTON TYPE PENCIL
Francesco Collura, New York, N. Y.
Application April 16, 1946, Serial No. 662,472
3 Claims. (Cl. 120—17)



1. In a magazine pencil, a casing, a magazine section telescoping therein, jaw members carried with said magazine section and extending to the lower end of the pencil casing, a cam ring fixed within the pencil casing toward the lower end thereof, outer cam faces on said jaw members adapted to cooperate with said cam ring to hold the jaws locked in writing position, a cam projecting from each jaw member, fixed cams mounted within the casing cooperating with said jaw cams to hold the jaws locked against the lead on downward movement of the jaws and free from the lead during the upward movement thereof.

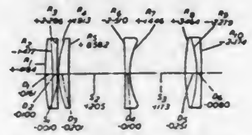
2,452,906
MECHANICAL PENCIL OF THE PUSH-BUTTON TYPE
Francesco Collura, New York, N. Y.
Application June 7, 1946, Serial No. 675,004
2 Claims. (Cl. 120—17)



1. In a magazine pencil, a casing, a magazine cylinder telescoping therein, feed jaws carried with said magazine cylinder within said casing at its lower end, said jaws having normally light frictional contact with the lead stick, cam wings carried by said jaws, holding jaws pivoted within said casing, cam studs on said holding jaws between their pivots and the lower jaw faces thereof, said cam wings and cam studs cooperating on the downward movement of the feed jaws to release the holding jaws and to increase the pressure upon the lead of the feed jaws and upon the upward movement of said feed jaws to force the holding jaws against the lead and to relieve any contact of the feed jaws with the lead, a wedge-shaped flange carried with said reciprocable magazine cylinder the inner upper ends of said holding jaws being inclined to cooperate with said wedged-shaped flange.

2,452,907
MAGAZINE PENCIL OF THE PUSH-BUTTON TYPE
Francesco Collura, New York, N. Y.
Application July 1, 1946, Serial No. 680,577
7 Claims. (Cl. 120—17)

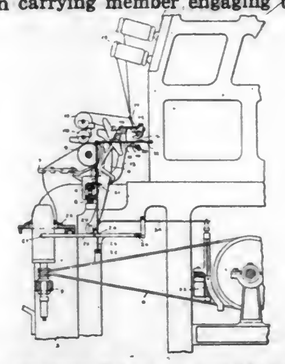
1. In combination, a pencil casing, a reciprocable push button within the upper end thereof, lead feed jaws within the casing, a connection between said push button and said feed jaws embodying a spring, such connection comprising means whereby, upon depression of the push button, the feed jaws are raised to a higher point within the casing, this movement also acting to compress the spring, which spring upon release of the push button pressure will return the lead feed jaws to a position toward the pencil tip.



2,452,908
DETACHABLE HOSE COUPLING
Irving Cowles, Chicago, Ill.
Application June 21, 1946, Serial No. 678,466
7 Claims. (Cl. 285—86)

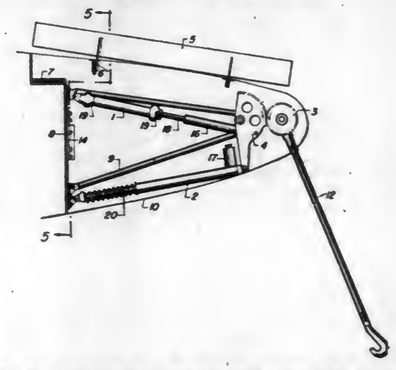
1. A coupling including a shell equipped with a mouth portion bordering an inner threaded wall portion of said shell of inner diameter intermediate of its end portions appreciably smaller than the smallest diameter portion of said mouth portion, said thread being spiro-

helical and of greatest diameter at its inner end, said thread being spaced from the inner end of said shell, an axial stem having a frusto-conical outer surface portion opposed to and cooperating with said threaded wall portion of said shell to provide an annular space of progressively increasing diameter from its outer to its inner end, the greatest diameter portion of said stem being opposed and cooperating with the greatest inner diameter portion of said shell to provide an inner chamber having an outer wall surface of length approximately equal to or greater than a complete turn of said thread, the depth of the latter being equal approximately to one-fifth of the annular space between said surface and the said stem and presenting an arcuate crown throughout substantially its entire length.



2,452,909
THREE-COMPONENT TELEPHOTO TYPE OPTICAL OBJECTIVE
Arthur Cox, Leicester, England, assignor to Taylor, Taylor & Hobson Limited, Leicester, England, a company of Great Britain
Application April 18, 1946, Serial No. 663,088
In Great Britain March 13, 1946
12 Claims. (Cl. 88—57)

1. An optical objective corrected for spherical and chromatic aberrations, coma, astigmatism, field curvature and distortion, and comprising a simple divergent member, a front convergent member consisting of a cemented convergent doublet disposed in front of and slightly separated from a simple convergent component whose rear surface is axially separated from the front surface of the divergent member by an air space lying between .09 and .15 times the equivalent focal length of the objective, and a rear convergent member in the form of a doublet having a biconvex convergent element cemented in front of a meniscus divergent element made of a material having mean refractive index higher than and Abbé V number at least 10 higher than those of the material of the associated convergent element, the axial air separation between the divergent middle member and the convergent rear member being not less than half and not more than twice that between the divergent middle member and the convergent front member, the overall length from the front surface of the front member to the rear focal plane being less than the equivalent focal length of the objective.

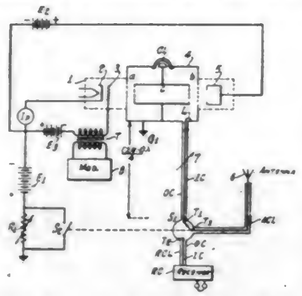


2,452,910
AUTOMATIC KNOCKOFF DEVICE FOR RING TWISTING AND SPINNING MACHINES
James Davidson, Toronto, Ontario, Canada, assignor to Toronto Carpet Manufacturing Co. Limited, Toronto, Ontario, Canada
Application December 6, 1946, Serial No. 714,450
6 Claims. (Cl. 57—78)

1. In a ring type yarn twisting or spinning machine, the combination of the "feeler knock-off mechanism," the reciprocating cam and the bobbin being wound, of a member extending between the aforesaid cam and "feeler knock-off mechanism" and having an obstructing member to transmit the movement of the cam to the "knock-off" device, and means connected with said obstruction carrying member engaging the perim-

eter of the yarn wound on the bobbin to move the obstruction between the cam and the "knock-off."

2,452,911
ARRESTING HOOK
Fred N. Dickerman, Nichols, Conn., assignor to United Aircraft Corporation, East Hartford, Conn., a corporation of Delaware
Application January 8, 1946, Serial No. 639,887
8 Claims. (Cl. 244—110)



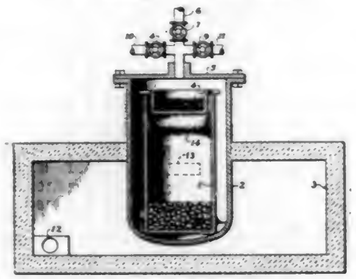
4. An arresting hook mechanism for airplanes comprising a frame member adapted to be attached to an airplane, a ring gear, supporting means interposed between said frame member and said ring gear, an arresting hook keyed to said ring gear, a gear sector in engagement with said ring gear, a hydraulic actuating strut pivotally attached to said frame member and to said gear sector, and a damping strut, said damping strut comprising a piston pivotally attached to said frame member, a cylinder member attached to said gear sector, and a spring so placed around said piston as to be compressed by movement of said piston.

2,452,912
CIRCUIT FOR IMPROVING OSCILLATOR STABILITY
Orville E. Dow, Port Jefferson, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application June 10, 1942, Serial No. 446,457
13 Claims. (Cl. 250—36)

1. High frequency apparatus comprising a multi-electrode electron discharge device and a res-

onator circuit therefor electrically and thermally connected thereto, a section of transmission line coupled to said resonator, means for applying a potential to a pair of electrodes of said device to cause sustained oscillations in said resonator circuit with said section of line coupled thereto at a resonant frequency dependent on the thermal condition of said resonator circuit, and means simultaneously to terminate said section of trans-

mission line with an impedance and at a point chosen to load said resonator circuit to non-resonance to prevent oscillations therein and to apply a potential to said pair of electrodes to improve the stability of the thermal condition of said resonator circuit whereby the frequency stability of said apparatus upon the generation of oscillations immediately after periods of non-oscillation is improved.



2,452,913

METHOD OF PRODUCING CALCIUM HYDRIDES BY DISTILLATION

Dick Duffey, La Fontaine, Ind., assignor to the United States of America as represented by the United States Atomic Energy Commission

Application April 11, 1944, Serial No. 530,516

6 Claims. (Cl. 23—204)

6. The method of producing calcium hydride of high purity which comprises heating calcium contaminated with a pyrophoric metal impurity of lower boiling point in the absence of air to a temperature at which the metal impurity is distilled, selectively oxidizing the resulting metal impurity by reaction with a refractory metallic oxide, collecting the oxidized metal impurity as a solid separate from the calcium, distilling the calcium, condensing the resulting calcium vapor as a solid separate from the oxidized metal impurity and calcium residues, introducing carbon dioxide gas into reactive contact with the calcium distillate to provide an inert coating thereon and render the same substantially non-pyrophoric in air, recovering and redistilling said calcium distillate, condensing said redistilled calcium vapor as a solid separate from impurity and alkaline earth metal residues, cooling the condensed redistilled calcium to a temperature at which it reacts with hydrogen, bringing hydrogen into reactive contact with the redistilled calcium until it is converted into the alkaline earth metal hydride, and recovering the resulting pure calcium hydride.

2,452,914

PROCESS AND COMPOSITION FOR PRODUCING MAGNESIUM-ZIRCONIUM ALLOYS

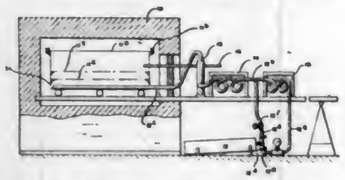
Edward Frederick Emley, Clifton Junction Works, near Manchester, England, assignor to Magnesium Elektron Limited, London, England, a British company

No Drawing. Application July 17, 1946, Serial No. 684,262. In Great Britain August 14, 1945

8 Claims. (Cl. 75—168)

1. A composition for introducing zirconium into magnesium and magnesium base alloys consisting essentially of a fused mixture of at least one of the alkali metal chlorides, zirconium fluoride, and at least one of the fluorides of the group consisting of potassium fluoride and sodium fluoride.

5. A method of preparing a composition for introducing zirconium into magnesium and magnesium base alloys consisting in fusing together at least one chloride selected from the group consisting of the chlorides of the metals calcium, barium, strontium, magnesium, and alkali metals, with at least one substance selected from the group consisting of mixtures and compound salts of zirconium fluoride with at least one of the fluorides of potassium and sodium.



2,452,915

NITRIDING PROCESS

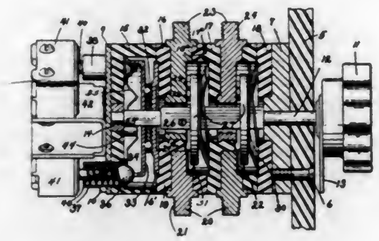
Alexander L. Feild, Baltimore, Md., assignor to Armco Steel Corporation, a corporation of Ohio

Application June 27, 1947, Serial No. 757,426

4 Claims. (Cl. 148—16.6)

1. In a method of nitriding stainless steel, the art which includes cracking ammonia gas, mixing uncracked ammonia gas therewith to give a mixture consisting of about 15% to 85% by volume of cracked ammonia and about 85% to 15% by volume of uncracked ammonia, heating the mixture of cracked ammonia and uncracked ammonia so as to form moisture from any available oxygen present with the ammonia, removing this moisture by a drying operation, then passing the preheated and predried mixture of gases over the stainless steel while held at nitriding temperature for some 30 to 90 hours to nitride the same.

2,452,916



ROTARY TAP SWITCH

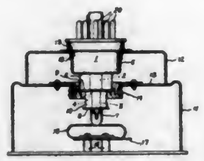
Rudolf A. K. Fleischmann, Philadelphia, Pa., assignor to The Eastern Specialty Company, Philadelphia, Pa., a corporation of Pennsylvania

Application October 7, 1947, Serial No. 778,340

7 Claims. (Cl. 200—4)

1. A rotary tap switch comprising a manually operable rotative shaft, an operating handle carried thereby, a plurality of radial contacts disposed around said shaft, a wiper actuated by said shaft to move over said contacts, a precision, snap action switch including an operating plunger movable endwise and in substantial parallelism with said shaft, a cam element carried by said shaft comprising a cup-like body rotated by said shaft in a plane transverse to the shaft and having upon its free edge a plurality of cam forming

notches, a cup in which said plunger is disposed, a spring in said cup about said plunger, and a ball in said cup against which the spring bears, said ball being positioned and dimensioned to be engaged by said cam forming notches and to thrust against said plunger against the action of said spring to thereby actuate the switch in synchronism with the movement of the wiper over said radial contacts.



2,452,917

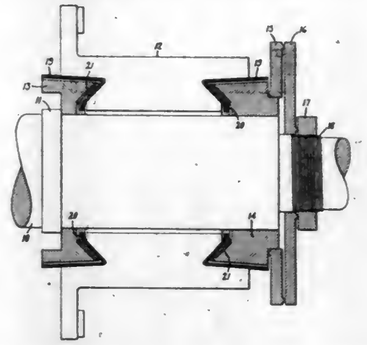
ELECTRODE CONTACT

Edward W. Forstrom, Stratford, Conn., assignor to General Electric Company, a corporation of New York

Application June 26, 1944, Serial No. 542,119

7 Claims. (Cl. 173—328)

5. A resilient supporting and contact-making arrangement for an electron discharge device of the type having a disk electrode and a tubular electrode spaced apart along the axis of said device comprising, a tubular conductive member, a plurality of resilient contacts conductively attached to the inner surface of said tubular member and extending inwardly therefrom, said contacts being adapted to engage said disk electrode and having innermost edges lying substantially on a circle of a diameter such that said contacts are compressed when said disk electrode is inserted therein, a contact for said tubular electrode including a plurality of resilient fingers adapted to engage said tubular electrode, means supporting said tubular member and said contact in spaced relation, means supporting adjacent edges of said resilient contacts and said contact in spaced relation, and resilient means supporting said contact whereby said contact may be moved longitudinally and laterally.



2,452,918

COMMUTATOR FOR DYNAMOELECTRIC MACHINES

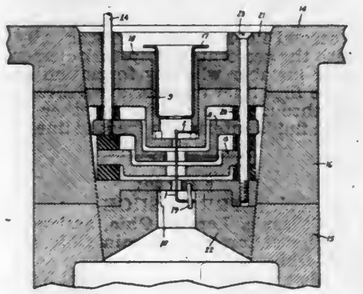
Raymond F. Franklin, Scotia, N. Y., assignor to General Electric Company, a corporation of New York

Application December 12, 1947, Serial No. 791,316

3 Claims. (Cl. 171—321)

1. A dynamoelectric machine commutator assembly comprising a plurality of copper commutator segments having V-shaped grooves in their ends, annular metallic clamping V-rings arranged to cooperate with said V-shaped grooves to retain said commutator segments, means including at least one spring ring arranged to yieldingly restrain said clamping rings, mica insulation interposed between the V of each clamping ring and the cooperating V at the respective end of the commutator segments, and a metal shim fastened as by cementing to one side of said mica insulation whereby relative movement between each clamping ring and the commutator segment assembly will take place between said metal shim and one of said metallic parts.

2,452,919

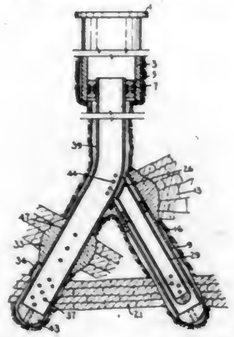


ELECTRON OPTICAL SYSTEM

Dennis Gabor, Rugby, England, assignor to General Electric Company, a corporation of New York

Application May 9, 1946, Serial No. 668,613

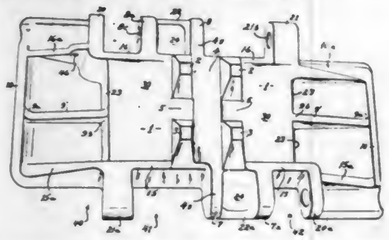
In Great Britain August 28, 1945



8 Claims. (Cl. 250—49.5)

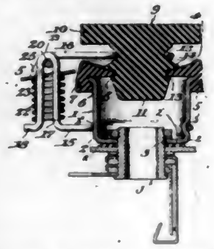
1. An electron lens comprising a disk-like electrode having a central aperture therein along which an electron beam is adapted to be projected, and a conductive member transverse to said electrode and extending substantially axial-

ly of said aperture, said conductive member being maintained at a potential difference with respect to said electrode to correct the spherical aberration of said beam caused by said electrode.



2,452,920
METHOD AND APPARATUS FOR DRILLING AND PRODUCING WELLS
Walton E. Gilbert, Los Angeles, Calif., assignor to Shell Development Company, San Francisco, Calif., a corporation of Delaware
Application July 2, 1945, Serial No. 602,832
2 Claims. (Cl. 255—1.6)

2. For use in a well having a casing set in its upper portion and a plurality of feeder boreholes branching therebelow transversely to each other, a liner system comprising a first liner member positioned in a feeder borehole opening to the well below the lower end of said casing, said liner having openings at its lower end for admitting formation fluids thereinto, a perforated whipstock element closing the upper end of the liner member along a surface transverse to the axis of the liner member, means anchoring said liner member in the feeder borehole with said perforated whipstock element substantially aligned with the walls of the well to form a deflecting surface masking the mouth of the feeder borehole at its junction with the well, a second liner member positioned in the well with an intermediate tubular portion thereof substantially in abutment with the perforated whipstock element of the first liner, said second liner member having openings at its lower end for admitting formation fluids thereinto, means anchoring the upper end of the second liner member to the lower end of the casing, and radial perforations in the intermediate tubular portion of the second liner member substantially in register with the perforated whipstock element of the first liner member whereby formation fluids entering the first liner member are delivered to the surface through the casing together with the formation fluids entering the second liner member.



2,452,921
TREAD SHOE
Alex J. Gillespie, Lorain, Ohio, assignor to The Thew Shovel Company, Lorain, Ohio, a corporation of Ohio
Application October 30, 1946, Serial No. 706,587
7 Claims. (Cl. 305—10)

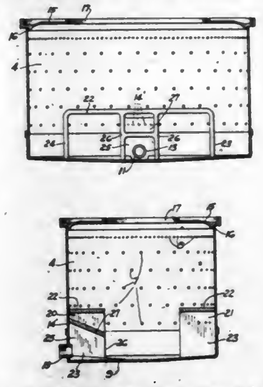
1. A tread shoe for an articulated endless track consisting of a unitary steel forging comprising a relatively elevated substantial rectangular platform portion, said portion having a pair of obtusely converging upper surface portions and a plane sprocket and idler roller track portion interposed therebetween, and extending between the front and rear ends of the platform, said upper surface portion comprising a top wall of a downwardly open box-like structure, having two side walls extending parallel with said track between the front and rear walls, a set of traction lugs extending outwardly of each said front and rear walls, a pair of ground engaging laterally extending flanges each based in and extending outwardly from the lowermost portion of a different one of said side walls, a rib extending in the fore-and-aft direction within said box-like structure and disposed below and upwardly merged with said roller track, a transverse rib also disposed within said box and mergingly intersecting the first said rib, the ends of both said ribs being merged with the inner surface of opposite of said walls, said box walls and said ribs together, providing the interior of said box structure into four downwardly facing substantially dome shaped recesses.

2. The tread shoe substantially as set forth in claim 1 characterized by the provision of at least three upstanding rib elements based in and extending upwardly from the upper side of each said laterally extending flanges and being aligned and merged at their inner ends with the ends of said front and rear walls and the first said rib being in an interconnecting relationship with, and substantially aligned with, pairs of forwardly and rearwardly extending of said sets of traction lugs to afford draw-bar connections therebetween.

2,452,922
WATERPROOF COVER FOR RADIO JACKS AND THE LIKE
Robert R. Gonsett and Faust R. Gonsett, Los Angeles, Calif.
Application October 11, 1944, Serial No. 558,182
9 Claims. (Cl. 174—67)

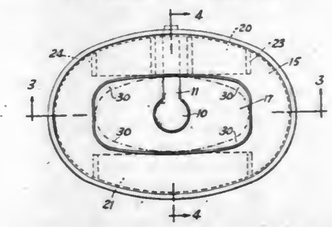
1. A protective waterproof cover for electrical circuit maker and breaker elements, such as a "radio jack" or the like, said cover comprising two members one member comprising a composite structure having a comparatively rigid tubular portion having an out turned flange on one of its ends and an inturned flange on its other end, said inturned flange defining an apertured base

to receive a threaded end of an electrical element to which it is adapted to be secured by a threaded nut, said out turned end being embraced by a flanged apertured flexible diaphragm which is secured on said out turned flange by a clampband, said other member comprising a yieldable plug member having a yieldable plug to closely fit said apertured diaphragm, said rigid tubular portion having a groove intermediate its ends and substantially parallel to said ends, said tubular portion and said plug member being connected to each other by a hinge construction, one portion of said hinge construction embracing the grooved portion of said tubular member and the other portion of said hinge construction loosely embracing said plug member.



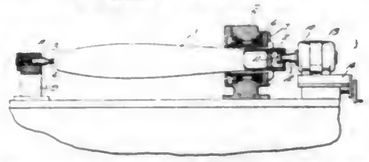
2,452,923
MECHANICAL STIRRER
Morris M. Graff, New Orleans, La.
Application November 26, 1946, Serial No. 712,336
10 Claims. (Cl. 259—133)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A stirrer for liquids and liquid-solid suspensions comprising a rotatable shaft, a member movable along said shaft and rotatable about the axis of said shaft, a number of stirring blades having their lower ends operably connected to the lower end of the shaft and having their upper ends operably connected to the lower end of said member, and means for securing the said member at a selected position along said shaft and in which each blade is operably connected, at its upper end, to the lower end of said member, as recited, through a ball and socket joint the upper end of each blade being free to pivot in the socket in a plane longitudinal to the axis of the shaft upon lowering the movable member to bow the stirring blades outwardly, and being free to pivot in the socket about an axis longitudinal to the upper end of the blade upon turning the movable member about the axis of the shaft to twist the blades.



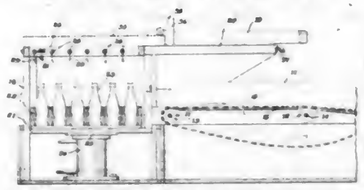
2,452,924
POT BURNER HAVING SEGMENTAL AIR DIRECTING MEANS
Carl S. Greer, Jr., Albion, Mich., assignor to Lonergan Manufacturing Company, Albion, Mich., a corporation of Michigan
Application July 5, 1947, Serial No. 759,193
8 Claims. (Cl. 158—91)

1. A liquid fuel burner comprising, in combination, an elongated fire pot having a bottom wall and a side wall, a flame plate at the top of said pot having an elongated flame opening therein, a plurality of air inlet openings disposed circumferentially about said side wall, fuel supply means for delivering a regulatable quantity of fuel to the bottom of said pot, and spaced segments disposed one on each side of the major axis of said pot substantially against said side wall and adjacent said bottom wall, said segments extending inwardly toward said major axis of



said pot and defining an upper and laterally confined area, said segments being open at their inner portions and their front edge being substantially parallel with the major axis of the pot and spaced from the opposing segment whereby the air directed by each segment into the space between said segments opposes the air directed into said space by the opposite segment to establish a mixing and a combustion zone at said space beginning at said bottom wall at low fire and extending to said flame opening at high fire.

2,452,925
ELONGATED POT BURNER AND FLAME RING
Carl S. Greer, Jr., Albion, Mich., assignor to Lonergan Manufacturing Company, Albion, Mich., a corporation of Michigan
Application July 5, 1947, Serial No. 759,194
3 Claims. (Cl. 158—91)

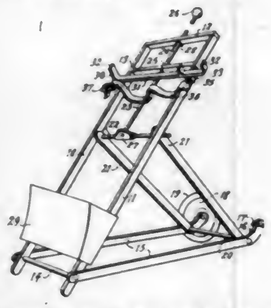


1. A liquid fuel burner comprising an open topped burner pot of elliptical shape cross-sectionally having a bottom wall, a side wall and a series of upper and lower air inlet openings circumferentially disposed in said side wall to give a substantially uniform supply of air to the pot, fuel supply means for delivering a regulatable quantity of fuel to said pot, and a flame plate at the top of said pot having an elongated flame opening therein, said flame opening being disposed centrally in said flame plate and having its ends on opposite sides of its longitudinal axis a distance closer to the side wall of said pot than other portions of said flame opening.

2,452,926
METHOD OF GRINDING PROPELLER SHANKS
Frederick A. Gruetjen, Milwaukee, Wis., assignor to A. O. Smith Corporation, Milwaukee, Wis., a corporation of New York
Application July 13, 1945, Serial No. 604,771
2 Claims. (Cl. 51—290)

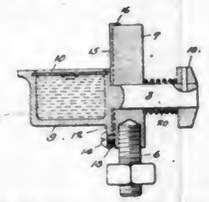
1. The method of grinding hollow propeller blade shanks, comprising mounting the blade in a hollow spindle grinder with a chuck or collet gripping the shank at about its mid-portion, centering the blade in the spindle by applying an index holder to the tip of the blade, grinding the inside contour of the shank to finished dimensions, removing the blade and mounting the same upon an expansible rotary mandrel engaging the accurately ground inside surface of the shank, and then grinding the outside of the shank to accurate dimensions.

2,452,927
BOTTLE HANDLING APPARATUS
Russell F. Hammen, Canton, Ohio
Application February 18, 1946, Serial No. 648,422
13 Claims. (Cl. 214—1.1)



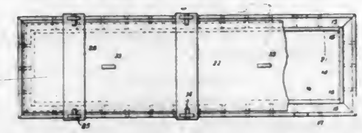
9. Bottle handling apparatus for removing bottles from cases and depositing them in a bottle washing machine and the like, comprising in combination with a plurality of endless conveyors at the loading end of the bottle washing machine, a vertically movable support for a case of bottles, means for raising said support with the case of bottles thereon, a horizontally movable frame spaced above the support, a plurality of rotatable shafts in the frame, spaced pairs of hook fingers upon said shafts, means for rotating said shafts to raise each pair of hook fingers into supporting engagement with one of the bottles in the case, means for lowering the case, means for moving the frame horizontally to position the bottles above the endless conveyors and means operated by the movement of the frame to this position for rotating the shafts to lower the hooks to release the bottles and deposit them upon the endless conveyors.

2,452,928
TREATMENT OF WATER
Clifford A. Hampel, Harvey, Ill., assignor to Mathieson Chemical Corporation, a corporation of Virginia
No Drawing. Application May 23, 1945,
Serial No. 595,489
7 Claims. (Cl. 210—28)



1. In the disinfecting of water by chlornation, the improvement which comprises improving the taste and odor of the resultant water by concurrently adding to the water chlorine in amount at least sufficient to disinfect the water to render it potable and chlorine dioxide in amount such that the ratio of dissolved chlorine to dissolved chlorine dioxide is within the range of about 1:1 to about 10:1.

2,452,929
FOLDING GOLF CART
Harry F. Holcomb, Dallas, Tex.
Application August 19, 1946, Serial No. 691,521
7 Claims. (Cl. 280—36)

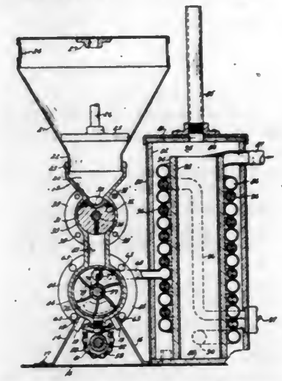


1. A collapsible golf cart including, an elongate carrying frame having means for retaining golf clubs thereon, a pair of connecting members pivoted at their forward ends to the forward end of the frame, a single pair of ground wheels journaled on the rear ends of the members, a pair of props having their lower ends pivoted to the members adjacent the ground wheels, a connection at the upper ends of the props slidably engaging the medial portion of the frame, and means carried by the frame flexibly attached to the connecting means for fastening the prop connection in position.

2,452,930
ANGLE INDICATOR
Julius C. Ivey, Cincinnati, Ohio
Application June 1, 1945, Serial No. 597,065
1 Claim. (Cl. 33—214)

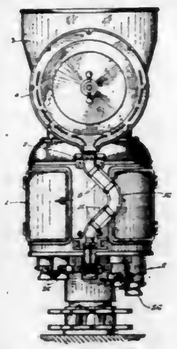
An angle indicating device adapted to be secured to a power drill, comprising a body portion embodying a circular member having graduations on the edge thereof, a bolt extending from the edge of the body portion and adapted to be positioned in an opening of the drill, securing the body portion to the drill, a spirit level, a spring tensioned bolt extending from the spirit level mounted in an opening of the body portion, adjustably securing the spirit level to the body portion, a depending flange formed on the spirit level, said flange having an arcuate shaped opening, an indicator pivotally mounted on one end of the body and being adjusted with respect to the spirit level, a set screw extending through the arcuate opening and having connection with said indicator, adjustably connecting the indicator and spirit level, said indicator cooperating with the graduations in indicating angles, and a bolt extending into the edge of the body portion and engaging the bolt extending from the spirit level and securing the spirit level in various positions of adjustment with respect to the body portion.

2,452,931
ANNEALING BOX
Morris L. Jacob, Pittsburgh, Pa., assignor to Pittsburgh Annealing Box Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application September 13, 1945, Serial No. 616,108
6 Claims. (Cl. 263—49)



1. In an annealing box the combination of, a box having a bottom with side and end walls to provide a chamber and a top rim disposed in a single plane, a perimetral reenforcing member having two flanges, one flange being disposed normal to the walls of the box and secured to the outer surface below the rim, the other flange extending upwardly to form a perimetral trough with walls of the box, upwardly projecting lugs extending above the rim and secured at oppositely disposed positions in said other flange, a lid covering the rim of the box and disposed between said lugs, a flat batten bar having openings adjacent its ends to receive the upwardly projecting lugs, and means to removably secure the batten to the lugs to tightly clamp the lid on the box rim and retain the opposed walls of the box against distortion due to heat.

2,452,932
ELECTRICAL CONNECTOR
James O. Johnson, Lewisberry, Pa., assignor to Aircraft-Marine Products Inc., Harrisburg, Pa., a corporation of New Jersey
Application April 10, 1944, Serial No. 530,313
2 Claims. (Cl. 29—155.55)



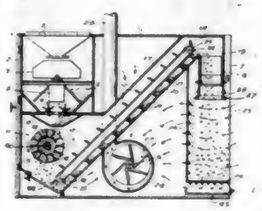
1. In the art of attaching an electrical connector to the stripped end of an insulation sheathed electrical conductor, that improvement which includes the steps of: forming from a flat blank a connector having a tubular ferrule for receiving the stripped conductor end, said tubular ferrule having a closed longitudinal seam, said connector having upstanding, open U-shaped jaws for embracing the insulation sheath adjacent the stripped end and having a substantially straight, narrow intermediate neck integrally connecting the ferrule and jaws; positioning the connector ferrule over the stripped end of the conductor; positioning the upstanding jaws around the insulation sheath adjacent its end, the bight of the U-shaped portion, the neck, and the portion of the ferrule opposite the longitudinal seam being in alignment; and then while the aforesaid portions are in alignment, bending the jaws around and onto the insulation sheath while simultaneously offsetting the neck to bring the insulation sheath and the ferrule into coaxial alignment; and then crimping the ferrule onto the stripped conductor; said bending, offsetting and crimping steps being performed as a part of a single operation.

2,452,933
BEVERAGE MIXING AND DISPENSING DEVICE
Max A. Joppich and Wallace Joure, Detroit, Mich.
Application September 20, 1946, Serial No. 698,206
15 Claims. (Cl. 225—26)

1. A beverage mixing and dispensing device comprising a storage bin, a housing having a mixing chamber adapted for communication therewith and having fluid inlet and discharge openings therein, a substance measuring device interposed between said bin and said housing, and valve means in said housing having a plurality of openings therein adapted for successive independent registry with said measuring device, said fluid inlet and said fluid discharge openings.

2,452,934
MECHANISM FOR APPLYING PLASTIC CROWNS TO CONTAINERS
James Kantor, Chicago, Ill., assignor to The Liquid Carbonic Corporation, Chicago, Ill., a corporation of Delaware
Original application January 11, 1943, Serial No. 471,986. Divided and this application February 7, 1944, Serial No. 521,321
4 Claims. (Cl. 226—86)

1. In a receptacle crowning apparatus, in combination, a crowning throat comprising a plural-



ity of elongated segments arranged about a common axis, each rockable on a horizontal axis to move the lower ends of said segments toward and away from said common axis and each of said segments having an inturned lip at its lower end and thus providing a capping throat for receiving the neck of a container expandible and contractible at its lower end, said throat and receptacle being reciprocable relatively to one another, a plunger reciprocable in said throat and engageable with a crown on a receptacle, means on said plunger for normally maintaining said throat in its expanded condition and movable with said plunger as it moves relatively to said throat to release said segments to permit said throat to contract, and means for contracting said throat after said segments have been released.

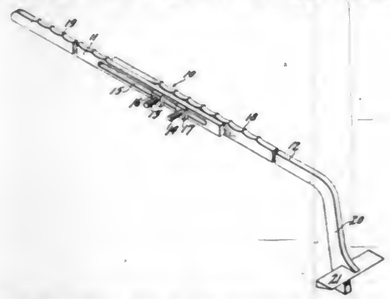
2,452,935

APPARATUS FOR TREATING SEEDS WITH CHEMICAL DUST AND BAGGING THE SEEDS

Harold Jesse Kemp, Swift Current, Saskatchewan, Canada

Application April 21, 1944, Serial No. 532,188
In Canada June 7, 1943
2 Claims. (Cl. 226—58)

1. In apparatus for treating and bagging seeds including a cabinet, means in one portion of the cabinet for mixing seed and dust, and means in a second portion of the cabinet for depositing the mixed seed and dust in a bag in said second portion, means for conveying mixed seed and dust from the first portion to the second portion, a partition dividing said portions of the cabinet, said second portion being open to permit insertion and removal of bags, means providing an exhaust passage leading from said first portion of the cabinet, said partition having openings therein providing a plurality of air passages leading from the space surrounding the bag in the second portion to the exhaust passage in the first portion of the cabinet, and suction means in the exhaust passage for creating a plurality of air streams flowing through said air passages to collect in said streams the dust-laden air surrounding the bag in said second portion of the cabinet.



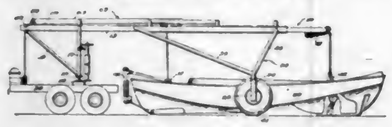
2,452,936

ADJUSTABLE BAFFLE HOLDING DEVICE

George H. Knobloch, Keyport, N. J.

Application May 22, 1945, Serial No. 595,203
3 Claims. (Cl. 248—200)

1. In apparatus of the class described, in combination, a plurality of longitudinal elements adapted to support a suspended means, means to secure at least two of said elements in a relatively predetermined overlapping locked position as to length, serrated engaging means on each of said elements to prevent slipping of the suspended means, a lower offset portion forming a leg on one



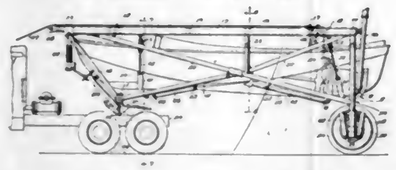
of said elements, and a transversely disposed foot forming a base support.

2,452,937

BOAT-CARRYING TRAILER AND THE LIKE

Foster Krake, Coloma, Mich., assignor to Sporting Specialties Company, Coloma, Mich., a corporation of Michigan

Application January 19, 1946, Serial No. 642,225
10 Claims. (Cl. 214—65)



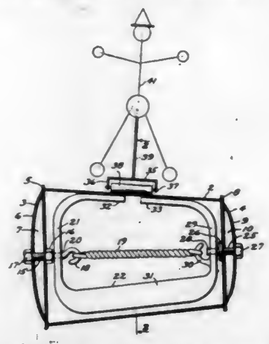
1. A carrier embodying a main wheel supported frame, towing means at an end of said frame, a carrying frame supported on said main frame and projectable thereon from a retracted carrying position to an extended loading and unloading position, hoisting means on said carrying frame and operable when the same is in extended position to raise or lower a transportable object to or from carrying position on the carrying frame, and suspension means on said carrier frame, separate from said hoisting means, and to which suspension means the object on the carrying frame is attached to be supported thereby.

2,452,938

BOAT-CARRYING TRAILER

Foster Krake, Coloma, Mich., assignor to Sporting Specialties Company, Coloma, Mich, a corporation of Michigan

Application January 19, 1946, Serial No. 642,226
16 Claims. (Cl. 214—65)



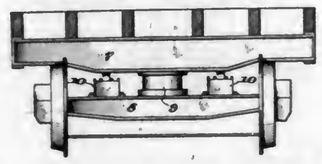
1. A carrier embodying a main non-collapsible frame, towing means at an end of said frame for detachable connection with a tractor, including rockable support means and bracing means, both pivoted on the frame and also on the towing means, for supporting the frame, selectively, in carrying position with the end thereof overlying said towing means, and in extended position offset with respect to said towing means, whereby to allow a transportable object to be loaded and unloaded from said frame when in extended position, said supporting means and said bracing means being foldable towards and away from each other.

2,452,939

ROLLER TOY

James L. La Forge, Caruthersville, Mo.

Application December 13, 1946, Serial No. 716,084
4 Claims. (Cl. 46—45)



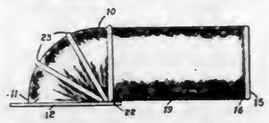
1. A roller toy comprising a drum, and a truck; said drum comprising a circularly formed wall of non-magnetic material, oppositely disposed heads, a substantially U-shaped magnet rotatably supported on axially aligned bolts rigidly mounted centrally of said heads, said bolts penetrating the branches of said magnet well above its center of mass whereby to create an unbalanced condition of weight between the magnet portions respectively above and below the axis of said bolts, the magnet portion above the axis being the lighter and comprising the poles which are disposed contiguous to the drum wall, and a rubber band interposed between the branches of said magnet with the ends of said band attached respectively to one of said bolts and to one of the magnet branches; said truck comprising a platform, a pin extending upwardly therefrom for supporting a toy member, and rollers of magnetic material revolvably supported from said platform and adapted for traction on the outer surface of said drum wall, said truck being movably held against the upper portion of the drum surface by magnetic attraction between said magnet and said rollers.

2,452,940

RAILWAY CAR SIDE BEARING

Noah F. Lane, Arkansas City, Kans.

Application December 14, 1945, Serial No. 634,907
6 Claims. (Cl. 308—226)



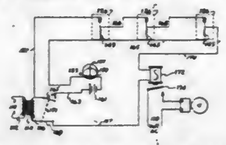
1. A side bearing assembly for a railway car, comprising a casing including sides and partitions spaced from the sides and from each other, said partitions having elongated generally vertical slots closed at their tops, one side having an opening, spaced lower wedges arranged within the casing, upper adjustable wedges arranged within the casing and supported by the lower wedges, substantially horizontal pins having screw threaded engagement with the casing, self adjusting means connecting the adjustable wedges and pins so that the pins may shift such wedges longitudinally and the wedges may move vertically with respect to the pins, a roller arranged between the partitions and having an opening, a shaft removably mounted within the opening and adapted to be arranged inwardly of the sides, the shaft being passed endwise through the opening in the side and held against endwise displacement when it is eccentric with respect to such opening.

2,452,941

VENTILATOR

Howard W. Little, near Canton, Ohio

Application November 29, 1945, Serial No. 631,612
5 Claims. (Cl. 98—68)



1. A ventilator comprising a flexible tube, a horizontal collar attached to one end of the tube for attachment to the roof portion of a building, means for extending the outer end portion of the tube diametrically and longitudinally, and spaced rings between said longitudinally extended portion and the collar for extending the remaining portion of the tube diametrically only, so that it may collapse on one side to assume an elbow shape with the longitudinally extended portion located in horizontal position, whereby when the tube is caused to swing about its vertical axis the extended outer end portion of the tube will roll on the axis of said extended outer end portion and said spaced rings will roll upon the collar.

2,452,942

TEMPERATURE ALARM SYSTEM

Kenneth M. Lord, Canandaigua, and Glenn E. Warren, Honeoye Falls, N. Y., assignors to Protect-O-Farm Company, Kenosha, Wis., a partnership

Application February 26, 1945, Serial No. 579,740
5 Claims. (Cl. 177—311)

2. In a temperature signalling system for indicating at a central station the occurrence, at any one of a plurality of remote locations, of a predetermined temperature condition, the combination of an alarm mechanism at said central station including a relay, an alarm device, an energizing circuit for said alarm including a contact for said relay, and means operative upon release of said relay for placing said contact in closed position, a first source of current connected in series with said relay, a contact device at each location including a normally closed contact adapted to open upon occurrence of said predetermined temperature condition at its location and a permanent and constant connection

from each location to circuits connecting said permanent connections parallel to each other across a switch, an ammeter and a second source of current of constant voltage, said closed contacts being connected in series across said first source of current and relay to keep the latter normally energized, each of said circuits having a predetermined resistance different from those of all other parallel circuits, and means under the control of the operator for closing said ammeter switch and opening the series circuit through said locations and said first source of current.

2,452,943

CATALYZED SULFAMIC ACID SULFATION

John David Malkemus, Allendale, John Ross, Ramsay, and Dwight James Potter, Ridgewood, N. J., assignors to Colgate-Palmolive-Peet Company, Jersey City, N. J., a corporation of Delaware

No Drawing. Application May 18, 1946, Serial No. 670,856
8 Claims. (Cl. 260—400)

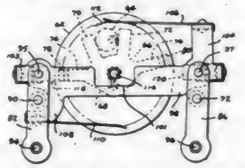
1. In the method of forming a sulphate wherein sulphamic acid is reacted with an organic compound consisting of C, H and O atoms and containing at least one functional group selected from the class consisting of ethers, carboxylic acid esters and alcohols, said organic compound containing at least one alcoholic-OH group capable of sulphation, there being present in the said organic compound no oxygen other than in the form of ethereal oxygen, carboxylic acid ester oxygen or alcoholic oxygen, the step that comprises carrying out the sulphation reaction in the presence of an amide as catalyst.

2,452,944

FLUORINATED ETHERS

Earl T. McBee, West Lafayette, Ind., and William E. Weesner, Richmond Heights, Mo., assignors to Purdue Research Foundation, West Lafayette, Ind., a corporation of Indiana

No Drawing. Application November 28, 1944, Serial No. 565,566
4 Claims. (Cl. 260—614)



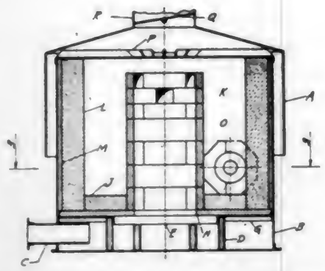
1. The compound represented by the formula $CF_3CH_2OC_2H_5$.

2,452,945

SEALED ELECTRIC MOTOR AND TRANSMISSION

Ira E. McCabe, Chicago, Ill.

Application May 9, 1945, Serial No. 592,820
6 Claims. (Cl. 172—36)



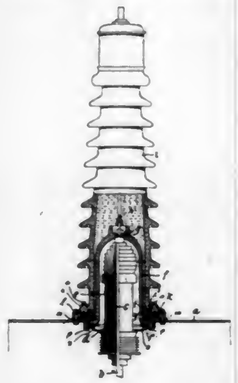
1. In a synchronous motor, the combination of a field structure, an armature associated with said field structure, means driven by said armature, an housing providing an hermetically sealed enclosure for said armature and said driven means, said driven means including a gear train, a cam member operated by said gear train, and an actuator oscillatably operated by said cam member, means mounted for oscillation exteriorly of said housing, and means for operating said last-named means in accordance with the movement of said actuator.

2,452,946

DIRECT FUEL FIRED UNIT AIR HEATER

Leslie F. McConnell, Birmingham, Ala., assignor to McConnell Sales and Engineering Corporation, a corporation of Alabama

Application June 14, 1945, Serial No. 599,443
6 Claims. (Cl. 263—19)



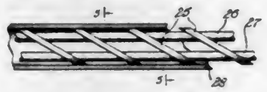
1. In a furnace of the character described, a circular wall forming a combustion chamber, a circular duct disposed concentrically within the combustion chamber and spaced from the walls thereof, said combustion chamber having an inlet opening at one end for air to be heated in alignment with the circular duct, means in the inlet opening to impart centrifugal movement to the air, and a fuel burner disposed tangentially of the combustion chamber at the other end thereof through the combustion chamber wall, and disposed to impart a centrifugal movement to the products of combustion in a direction counter to the movement of the air to be heated.

2,452,947

BUSHING FOR OIL-FILLED ELECTRICAL APPARATUS

August Meyerhans, Rieden, near Baden, Switzerland, assignor to Aktiengesellshaft Brown, Boveri & Cie, Baden, Switzerland

Application November 14, 1945, Serial No. 628,526
In Switzerland November 16, 1944
2 Claims. (Cl. 174—31)



1. In a bushing structure for leading a conductor through an opening in an oil filled tank for connection to electrical apparatus such as transformers and the like enclosed within the tank, in combination, an annular disc secured to the outside of the tank adjacent to and concentric with the tank opening, the inner diameter of said disc being less than that of the tank opening, an outer hollow insulator secured to said disc and extending outwardly of the tank, a conductor extending through the tank opening, a multi-layered insulating sheath having spread end flanges surrounding the conductor at the tank opening, a bell-shaped insulating shed surrounding a portion of said insulating sheath and extending through said disc into said outer insulator, said shed being provided with a sealed terminal extending through its upper wall and a flanged portion at its lower end extending beneath and adjacent to said disc, and means securing the flanged portion of said shed to said disc.

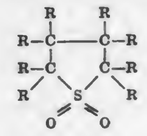
2,452,948

COAXIAL CABLE

Louis H. Morin, Bronx, N. Y., assignor of one-half to Davis Marinsky, Bronx, N. Y.

Application May 13, 1944, Serial No. 535,405
4 Claims. (Cl. 174—27)

3. In flexible coaxial cable comprising a pair of inner conductors and a tubular jacket in spaced relation thereto, the combination therewith of die cast insulators on the inner conductors spaced longitudinally thereof and adapted to position said inner conductors within said tubular jacket, said insulators comprising discs arranged at an inclination to said inner conductor, each disc being parallel to adjacent discs, the extremity of each disc at one inner side of the tubular conductor being in overlapping relation to the other extremity of an adjacent disc at the opposite inner side of said tubular conductor.



2,452,949

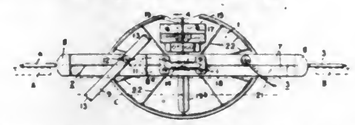
SULFOLANYL SULFONES

Rupert C. Morris, Berkeley, and Edward C. Shokal, Oakland, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware

No Drawing. Application October 22, 1945, Serial No. 623,865
10 Claims. (Cl. 260—329)

10. A polysulfone of the structural formula

wherein at least one of the R's is a radical of the structure



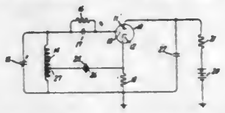
in which R_1 is a monovalent hydrocarbon radical of not more than 20 carbon atoms, and wherein the remaining R's each represents a member of the group consisting of the hydrogen atom and the lower alkyl radicals.

2,452,950

WINDOW FAN

Hackley Morrison, Houston, Tex., assignor to Texfan Company, Houston, Tex., a copartnership

Application February 6, 1947, Serial No. 726,827
12 Claims. (Cl. 98—94)



1. A window fan comprising a base member of substantial width adapted to rest on a window sill, a panel structure carried by and extending vertically above said base member and having a central opening, a motor driven fan, means mounting said fan directly on said base member in a position to force air through said opening, the end portions of said panel structure having flat faces on both sides constructed to overlap and engage the window frame, whereby said base member and panel structure as a whole is reversible with respect to the window opening, and the fan may be caused to blow air either in or out, as desired, and sash engaging means for holding the panel structure in position.

2,452,951

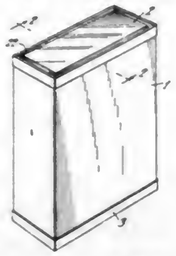
CRYSTAL OSCILLATOR CIRCUITS

Donald E. Norgaard, Scotia, N. Y., assignor to General Electric Company, a corporation of New York

Application April 27, 1943, Serial No. 484,733
18 Claims. (Cl. 250—36)

1. An oscillatory circuit comprising an electron discharge device having an anode, a cathode, and a control electrode, a tuned circuit connected to said control electrode, an impedance connected between said tuned circuit and said cathode, and feedback means comprising a piezo-electric crystal connected between said cathode and a fixed point on said tuned circuit, said tuned circuit being tuned substantially to the series resonance frequency of said crystal.

2,452,952



CARTON

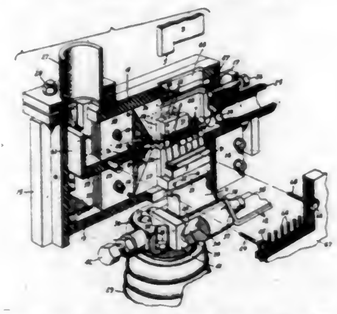
Frank D. Palmer, Chicago, Ill., assignor to F. D. Palmer, Inc., Chicago, Ill., a corporation of Illinois

Application July 3, 1944, Serial No. 543,312
3 Claims. (Cl. 229—5.5)

1. A paperboard container having a plurality of side walls joined at their edges to form a tubular body, an end closure within said body, said end closure embodying a panel disposed substantially flush with the end of said body and provided with a peripheral flange having inner portions respectively corresponding to the walls of said body and extending inwardly of the latter, intermediate portions extending outwardly from said inner portions, outer portions refolded relative to said intermediate portions so as to be disposed outside of the body, marginal end portions of said body walls being disposed between and adhesively secured in face-to-face relation to said interme-

diate and outer flange portions, said closure also having web portions integrally connecting the adjacent ends of said inner flange portions, said web portions being normally foldable to out-

wardly projecting position between the adjacent ends of said intermediate flange portions, and said web portions being cramped into the corners of said body to thereby form sift-proof corner seals.



2,452,953

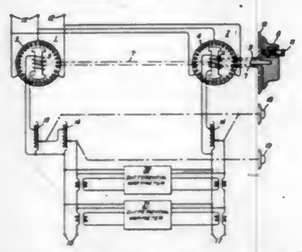
CIRCUIT INTERRUPTING APPARATUS

William E. Paul, Schenectady, N. Y., and Julius W. Timmerman, Jr., Springfield, and Ralph E. Bold, Drexel Hill, Pa., assignors to General Electric Company, a corporation of New York

Application April 6, 1945, Serial No. 586,892

7 Claims. (Cl. 200—148)

1. An electric circuit breaker of the fluid blast type comprising a pair of relatively movable contacts, a source of fluid under pressure, means for supplying a blast of fluid from said source substantially at right angles to the path of contact movement whereby the blast is directed transversely to the arc gap formed between the contacts upon separation thereof, an arc chute into which an arc drawn between said contacts is directed by the blast, a pair of electrodes defining a fixed gap associated with said contacts for maintaining the arc gap length constant following a predetermined separation of said contacts, a divergent expansion space within said chute immediately adjacent to and downstream from said gap, a partition of insulating material in said arc chute dividing said arc chute including said expansion space into two passages, said partition having its transverse insulating edge portion closely adjacent to said fixed gap, an electrode within said chute and spaced from said contacts to provide a break-down spark gap, a resistance associated with said chute connected to one of said contacts and to said electrode, said electrode and the internal chute electrical connection thereto being embedded substantially along their entire length within said insulating partition.



2,452,954

NETWORK ANALYZER APPARATUS

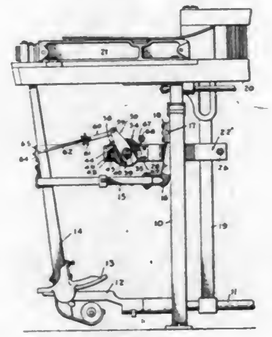
Harold A. Peterson, Madison, Wis., assignor to General Electric Company, a corporation of New York

Application October 3, 1947, Serial No. 777,720

5 Claims. (Cl. 171—97)

4. Apparatus for use in a network analyser comprising two pairs of electric terminals, two Selsyn generators each having rotor and stator elements including respectively a three-phase winding and a single-phase winding, means to rotate one Selsyn rotor relative to the other Selsyn rotor, a differential wattmeter responsive to a difference between the real power input flowing into one pair of the electric terminals and the real power output flowing out of the other pair of the electric terminals, a follow-up mechanism responsive to the action of such wattmeter adapted to rotate both Selsyn rotors simultaneously by equal amounts until said real power input equals said real power output, means to excite the two three-phase windings from a common three-phase electric source so that voltages are induced in the two single-phase windings having phase relationships determined by the respective angular positions of the two Selsyn rotors, means to provide an alternating terminal voltage across one pair of the electric terminals having a fixed phase relationship to the voltage induced in one single phase winding, means to provide an alternating terminal voltage across the other pair of the electric terminals having a fixed phase relationship to the voltage induced in the other single-phase winding, voltage transforming means to vary the relative amplitudes of the two terminal voltages one to the other, a differential varmeter responsive to a difference betwen the reactive power input flowing into one pair of the electric terminals and the reactive power output flowing out of the other pair of the electric terminals, and voltage transforming means cooperating with a follow-up mechanism responsive to the action of such varmeter adapted to vary the absolute amplitudes of both terminal voltages simultaneously by equal ratios until said reactive power input equals said reactive power output.

2,452,955



CHECK FOR PICKER STICK OF LOOMS

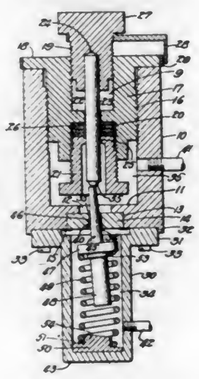
Felix H. Pressley, Piedmont, S. C.

Application March 14, 1946, Serial No. 654,452

8 Claims. (Cl. 139—162)

1. A picker stick check for use upon a loom having a sword, pick arm and picker stick, said check comprising a bracket mounted upon the sword near its longitudinal center, a brake drum rotatably mounted upon the bracket and having internal ratchet-teeth, a brake band mounted upon the bracket and surrounding the brake drum, a pivoted lever arranged near the brake drum, pawl means carried by the lever and engaging the ratchet-teeth, a plate secured to the picker stick and having openings, and a yoke re-

ceiving the picker stick and connected with the lever and including arms slideable within the openings of the plate.



2,452,956

VALVE

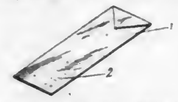
John W. Robins, Westwood, Mass., assignor to Mason-Neilan Regulator Company, Boston, Mass., a voluntary association of Massachusetts

Application April 3, 1946, Serial No. 659,173

10 Claims. (Cl. 251—34)

1. In a valve for varying fluid flow, comprising a body having a fluid chamber, an orifice and a fluid connection communicating with said chamber, the combination with a tapered valve plug extending through the orifice to cooperate therewith, and inclined to said orifice to make contact with opposite sides and ends thereof, of means for moving said plug axially of said orifice and for guiding said plug against the said opposite sides and ends of the orifice throughout the said movement.

2,452,957



MOISTURE CONTROL DEVICE

Archie R. Sabin, Alexandria, Va.

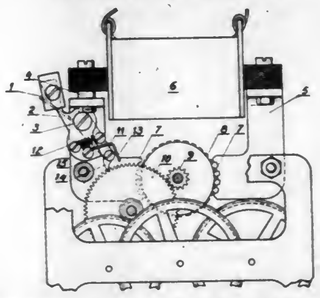
Application January 4, 1944, Serial No. 516,977

1 Claim. (Cl. 299—24)

A moisture-controlling device comprising a quantity of efflorescent material encased in a container formed of regenerated cellulose film

which is waterproof but permeable to water vapor.

2,452,958



SYNCHRONOUS ELECTRIC MOTOR WITH AUTOMATIC STARTER

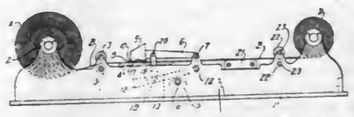
Otto Schild, La Chaux-de-Fonds, Switzerland

Application December 17, 1946, Serial No. 716,826

In Switzerland October 21, 1946

2 Claims. (Cl. 172—279)

1. In a synchronous electric motor with automatic starter, in particular for clockworks, a frame, a rotor mounted rotatively in said frame, a driving pinion centered on said rotor, a first driven gear mounted rotatively in said frame, in mesh with said pinion, two pole pieces of unequal lengths secured on said frame in space relation with said rotor, a yoke bridging said pole pieces and secured thereon, a non-magnetic spacer inserted between said yoke and the shorter one of said pole pieces, in order to produce a gap across the entire section of the main magnetic flux path, a magnetic armature mounted pivotally on said shorter pole piece in such a way as to be apt to bridge said gap and thereby restore the entire section of the main magnetic flux path, and operative means of transmission of movement between said armature and said first driven gear.



2,452,959

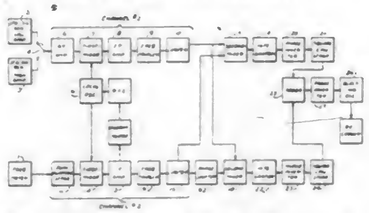
MACHINE FOR THERMOPLASTICALLY TREATING MATERIALS

Melvin H. Sidebotham, Newton, Mass.

Application August 23, 1945, Serial No. 612,170

3 Claims. (Cl. 101—114)

1. In a machine for treating surface areas of web material with powdered thermoplastic substance, comprising, rollers for advancing the web material, a hopper for holding a supply of powdered thermoplastic substance and having its bottom portion formed to provide an opening of the pattern of the area of the web desired to be treated, a fine meshed screen positioned over the bottom opening of the hopper, means for causing



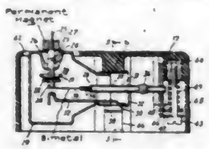
the hopper to shake a film of powdered thermoplastic material upon the web, a heating device for applying heat to the web, a cam for moving the hopper and the heating device into and out of engagement with the web, and a cooling plate adjacent to the advancing web for driving off the heat from the web.

2,452,960

METHOD AND APPARATUS FOR INDICATING FREQUENCY COINCIDENCE BETWEEN ALTERNATING CURRENTS OR VOLTAGES

David B. Smith, Flourtown, Pa., assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa., a corporation of Pennsylvania

Application December 30, 1944, Serial No. 570,714
24 Claims. (Cl. 250—39)



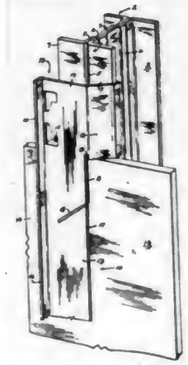
3. The method of indicating frequency coincidence which comprises combining two signal waves to produce a first beat wave which passes through zero frequency, simultaneously combining said signal waves to produce a second beat wave which is approximately ninety degrees phase-displaced from said first beat wave and which passes through zero frequency coinstantaneously with said first beat wave, utilizing said beat waves, separately and concurrently, each to produce, individually, a wave characterized by a pronounced amplitude change marking the occurrence of zero frequency, and combining the last-mentioned waves to produce a voltage pulse.

2,452,961

PROTECTIVE SWITCH

Sidney R. Smith, Jr., Pittsfield, Mass., assignor to General Electric Company, a corporation of New York

Application November 27, 1945, Serial No. 631,165
2 Claims. (Cl. 200—113)



1. A protective switching device for use in high voltage electrical apparatus where the protective function must occur either upon attainment of excessive temperature of the apparatus or upon excessive current loading of the apparatus, said device comprising an evacuated envelope having conductive terminals for connecting the device in a circuit transmitting current representative of the loading of the apparatus, provisions associated with the envelope for mounting the envelope in heat-exchanging relation with a component of the apparatus, relatively movable contacts within the envelope respectively connected with said terminals, said contacts being co-operatively formed to assure low voltage gradients at the surfaces of the contacts upon separation of the contacts, a thermally deflectable member within the envelope supporting one of the contacts, and effective in deflected position to separate the contacts, said member being constituted of a metal which can be heated to the deflection point either by the passage of excessive current through it or by receipt of external heat corresponding to objectionable overheating of the apparatus component with which the envelope is to be associated, and means for assuring that both opening and closing of said contacts shall occur with a snap action.

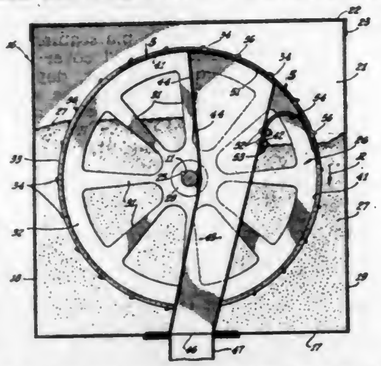
2,452,962

LINE MARKING TOOL

George E. Snethen, Oklahoma City, Okla.

Application August 26, 1946, Serial No. 693,040
5 Claims. (Cl. 33—107)

5. A line marking tool for the purposes set forth, including: a flat strip; a widened portion at one end of said strip; a hook formed along one edge of said widened portion for engaging one edge of an I-beam flange; a wedge-shaped projection adjacent the other edge of said widened portion for contacting the other edge of said flange and drawing the hook into positive engagement with the first mentioned flange edge; and a straight edge carried by said strip and along which a mark may be made, said edge lying parallel to the flange edges when the device is installed upon the I-beam.



2,452,963

SEED PLANTER

Emile A. Sommer, North Hollywood, Calif.

Application February 1, 1946, Serial No. 644,697
3 Claims. (Cl. 222—367)

1. A seeder comprising a hopper adapted to contain a supply of seeds, a wheel revolubly mounted therein and comprising a rim partly immersed in said supply with the remainder of said rim extending thereabove, said rim having a plurality of circumferentially spaced holes therethrough, both lateral edges of said rim being uninterruptedly smooth throughout their entire extent and both the inner and outer peripheral faces of said rim being uninterruptedly smooth except for said holes whereby damaging of seeds within said hopper by rotation of said rim through said seeds is minimized, means for turning said wheel and thereby causing said holes successively to pass through said supply of seeds and then to be raised out of said supply, means pressing resiliently against one face of said rim and closing one end of each of said holes until that hole arrives at a predetermined position within said hopper and for thereupon opening

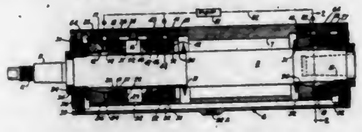
said end of that hole to release that hole's contents, and seed-conveying means for receiving seeds from said holes as said ends thereof are opened.

2,452,964

VIOLIN PEG

Eugene R. Stone, Washington, D. C.

Application June 19, 1946, Serial No. 677,801
12 Claims. (Cl. 84—304)



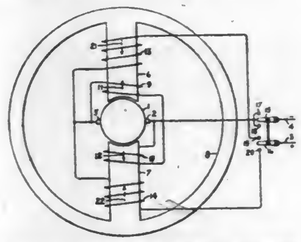
1. A tuning peg for violins and other stringed instruments and which consists of a peg or shaft having a finger grip at one end, said finger grip comprising flat web-like axially adjacent portions spaced angularly about the axis of said peg, whereby to provide a readily accessible and conveniently located finger grip regardless of the angular position of said peg and while said instrument is in playing position.

2,452,965

BEARING FOR SPINDLES AND THE LIKE

Deuta Sulprizio, Oakland, Calif.

Application April 12, 1945, Serial No. 587,956
6 Claims. (Cl. 308—70)



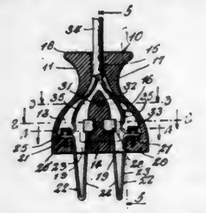
1. In combination, a shaft, a pair of conical bearing members positioned adjacent each other on said shaft and each having a conical bearing face thereon extending at an angle to the other conical bearing face of the other member and to the longitudinal axis of said shaft, a first bearing member cooperatively positioned with respect to one of said conical bearing members, a second bearing member cooperatively positioned with respect to the other of said conical bearing members and slideably mounted in substantially fluid-tight engagement with said first bearing member, means for limiting sliding movement of said second member in said first member, means positively urging said first and second bearing members to engage said conical bearing members, and means for admitting fluid under pressure between said first and said second bearing members to oppose the positive urging means and to slide said second member with respect to said first member to control the engagement between said first and second members and said conical bearing members.

2,452,966

DYNAMOELECTRIC MACHINE

Charles A. Thomas, Fort Wayne, Ind., assignor to General Electric Company, a corporation of New York

Application December 29, 1945, Serial No. 638,059
10 Claims. (Cl. 318—297)



1. A dynamoelectric machine having a rotatable member with a winding, a field member having pole pieces and a main field exciting winding on said pole pieces comprising two parts arranged to provide a like polarity to all of said pole pieces, means including a second field exciting winding on said pole pieces comprising two parts respectively arranged in opposition to said two parts of said main field exciting winding and arranged to provide substantially one-half the excitation of either of said two main field exciting winding parts to each of said pole pieces, and means for selectively energizing one or the other of said two parts of said main field exciting winding for providing excitation of opposite polarity to adjacent of said pole pieces and for selectively reversing the polarity of said pole pieces for operation of the rotatable member of the machine in opposite directions.

2,452,967

CONNECTOR PLUG

Orrin H. Thomas, Williamsport, Pa.

Application December 29, 1944, Serial No. 570,355
2 Claims. (Cl. 173—361)

1. An electrical attachment plug comprising a body member of insulating material consisting of two separable sections, said sections having a conductor inlet and one of said sections having an

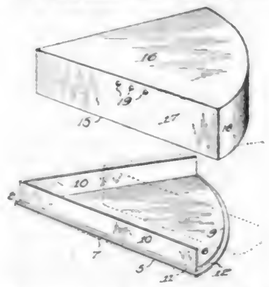
interior passage, an abutment on said section extended inwardly upon said passage and stopping short of the conductor inlet, a pair of openings being formed in the base of said section, positioned on opposite sides of the abutment, a shoulder inwardly of each opening, a contact prong disposed within each opening, said contact prongs comprising a pair of divergent blade members, one of said blades being bent to form a base mounting for seating engagement with respective shoulders, said base mounting and said shoulders being apertured for reception of a binding screw, the other blade of said prongs extending inwardly adjacent respective sides of said abutment, a pair of spring clips, one of which is mounted on each side of said abutment having a portion adapted to overlie respective terminal ends of said blades, said other section having recessed portions complemental to a portion of said spring clip members and said sections being provided with transverse aligned openings and an assembly bolt engaged therethrough.

2,452,968

METHOD OF STABILIZING BEER AGAINST RADIATION DETERIORATION

Erwin C. Uihlein, Grafton, and James W. Lawrie, Milwaukee, Wis., assignors to Jos. Schlitz Brewing Company, Milwaukee, Wis., a corporation of Wisconsin

No Drawing. Application March 11, 1946, Serial No. 653,702
8 Claims. (Cl. 99—48)



1. A beverage preserving method, consisting in confining a beverage containing proteins in a light absorbing vessel transmitting long light waves of an order above five thousand six hundred (5600) angstrom units to said beverage and excluding from said beverage by said vessel the approximate intensity of short light waves of an order below five thousand six hundred (5600) angstrom units and to a substantial extent light waves of a wave length longer than about 7,000 to 10,000 angstrom units.

2,452,969

PIE CONTAINER

Eva G. Victor, Mansfield, Ohio

Application April 30, 1946, Serial No. 666,050
3 Claims. (Cl. 206—4)

1. In containers for housing pie segments for transportation purposes and the like, a container formed of plastic material and comprising a base member having a bottom the contour of which is of sector form with the radius length together with the length of the arcuate end greater than the similar length of the pie segment to be housed, said member having vertical side walls extending parallel with and spaced from the radical side walls of the bottom, the bottom having a marginal zone depressed with respect to the top plane of the bottom positioned outside such side walls and with the arcuate end formed with a similar depressed marginal zone, whereby the arcuate end of the member is free from a confining wall and the area within the side walls is sufficient to accommodate a pie segment, and a cover for the base member, said cover having a top also sector-shaped in contour, depending side walls and an arcuate end wall, the vertical dimensions of said vertical walls being materially greater than those of the side walls of the base member and with the internal dimensions of the cover sufficient to receive the side walls of the base member with an approximate fit, the lower edge of the side and arcuate end walls of the cover extending on a common plane and being completely seatable on the depressed marginal zone of the base member throughout the perimeter of the latter, the lower marginal zone of the cover arcuate wall co-operating with the complemental portion of the depressed marginal zone to produce a step closure effect active in preventing escape of pie content from the container interior at the arcuate end of the container.

2,452,970

TREATMENT OF WATER

George P. Vincent, Briarcliff Manor, and James Douglas MacMahon, Niagara Falls, N. Y., and John F. Synan, Fall River, Mass., assignors to Mathieson Chemical Corporation, a corporation of Virginia

No Drawing. Application January 22, 1945, Serial No. 574,028
9 Claims. (Cl. 210—28)

1. A method of improving the taste and odor of contaminated water supplies which have been chlorinated with chlorine which comprises contacting the chlorinated water with chlorine dioxide in such manner as to dissolve therein from 0.1 to 10 parts of chlorine dioxide per million parts of water, said amount of chlorine dioxide being at least sufficient to reduce the mal-taste and mal-odor developed in the chlorinated water and thereby produce a potable water substantially free from objectionable taste and odor.

2,452,971

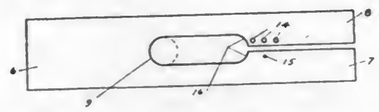
TREATMENT OF WATER

George P. Vincent, Briarcliff Manor, and James Douglas MacMahon, Niagara Falls, N. Y., and John Francis Synan, Fall River, Mass., assignors to Mathieson Chemical Corporation, a corporation of Virginia

No Drawing. Application May 23, 1945, Serial No. 595,490
6 Claims. (Cl. 210—28)

1. In the disinfecting of water by chlorination, the improvement which comprises improving the taste and odor of the resultant water by contacting the water with chlorine dioxide in such manner as to dissolve therein from about 0.1 to about 10 parts of chlorine dioxide per million parts of water, and thereafter adding to the thus-treated water an amount of chlorine at least sufficient to disinfect the water to render it potable.

2,452,972



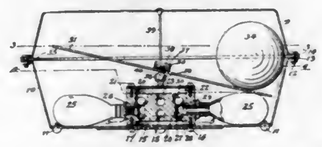
MUFFLER

Karl von Rodenstein, Baltimore, Md.

Application January 30, 1945, Serial No. 575,244
1 Claim. (Cl. 2—91)

A muffler or the like comprising a rectangular piece of material having a longitudinal cut-out

portion of substantial width positioned therein for fitting around the neck of the user, said cut-out portion extending approximately one third the length of the muffler and being located centrally thereof, said portion having one of its ends rounded and the other end similarly rounded and terminating in a longitudinal slit of narrow width forming widened strap portions of substantial length for folding over the chest, a front plate



formed at the end of said muffler opposite to the longitudinal slit to cover the widened straps and a plurality of fastening means for adjustably securing the widened strap portions of the muffler behind the front plate, said front plate being of such width and said straps of such length that when the straps are secured behind the front plate, the front plate only appears when worn by the user.

2,452,973

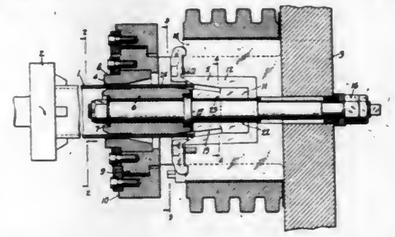
BILGE WATER PUMPING APPARATUS

Chester I. Weir, Buffalo, N. Y.

Application January 24, 1947, Serial No. 723,960
1 Claim. (Cl. 103—71)

A pumping apparatus for removing water from the hold of a boat comprising a casing having a stationary annular side wall and a flat bottom, a block mounted on the central part of said bottom and provided with a water inlet chamber and a water outlet chamber, a plurality of expansible and compressible pump bulbs arranged in an annular row around said block and resting on the bottom of said casing and each having its inner end connected with said inlet chamber by an inwardly opening check valve, a wobble plate arranged within the wall of said casing and universally pivoted on the top of said block to permit any part of its edge to be depressed relative to the wall of said casing, and a ball resting with its underside on said wobble plate and its lateral side against said casing wall and rollable in a circular path on said plate and wall around said axis of said plate.

2,452,974



ELECTRIC UPSETTING AND FORMING

Sven Westin, West Allis, and Axel Westin, Milwaukee, Wis., assignors, by mesne assignments, to Federal Machine & Welder Co., Warren, Ohio, a corporation of Ohio

Application July 3, 1944, Serial No. 543,230
16 Claims. (Cl. 219—3)

1. In a device of the class described for upsetting and forming the hot end of an otherwise cold tubular blank, an upsetting die adapted to receive and upset the end of the blank, means to effect relative rotation between the blank and die during the upsetting operation, and a straightening die mounted at the mouth of the upsetting die and free to rotate with the blank relative to the upsetting die during upsetting of the blank, said straightening die being adapted to engage the upset end of the blank as the latter is withdrawn from the die and to straighten the same.

15. In the upsetting of the end of a tubular blank in electrode forming dies of the class described, the initial spreading of the heated metal

at the end of the blank as the same rotates relative to the upsetting die by reducing the frictional engagement of the end edge of the blank with the bottom end of the die cavity and engaging said end edge with die faces of limited circumferential extent to effect a progressive forming of the metal in spaced areas traveling circumferentially of the blank.

2,452,975

PRODUCTION OF ORGANIC FLUORINE COMPOUNDS

William Basil Whalley, Liverpool, England, assignor to Imperial Chemical Industries Limited, a corporation of Great Britain

No Drawing. Application January 22, 1947, Serial No. 723,676
9 Claims. (Cl. 260—653)

1. The process which comprises heating a polychlorinated ethane containing at least two chlorine atoms attached to the same carbon atom with from 1 to about 3.58 stoichiometric equivalents of anhydrous hydrogen fluoride in the presence of at least 2.5% by weight of stannic chloride based on the polychlorinated ethane at a temperature of from about 50° C. to about 150° C.

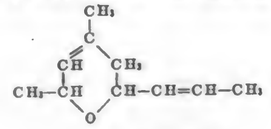
2,452,976

ROLL ADJUSTING MECHANISM

Forrest R. Whitcomb, Worcester, Mass.

Application February 26, 1947, Serial No. 731,147
5 Claims. (Cl. 51—80)

1. In a glazing and polishing machine, a pair of coacting polishing rolls, self-aligning bearings for said rolls, supporting arms for said bearings, rock shafts on which said supporting arms are mounted for movement by said rock shafts toward and away from each other, and separate means to shift one of said arms and bearings angularly relative to the rock shaft on which it is mounted to change the axial relation of said rolls to each other.



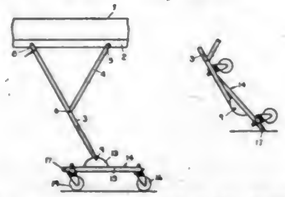
2,452,977

PRODUCTION OF CYCLIC ETHERS

Paul H. Williams, Berkeley, and Seaver A. Ballard, Oakland, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware

No Drawing. Application December 28, 1944, Serial No. 570,513
9 Claims. (Cl. 260—333)

1. 2,4-dimethyl - 6 - (1 propenyl) -5,6-dihydro-1,2-pyran, a compound of the formula



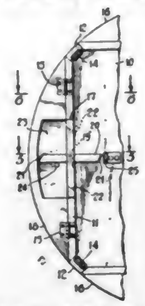
2,452,978

DOLLY STRUCTURE FOR CONVEYERS

Bert Woldring, Grand Rapids, Mich., assignor to The Rapids-Standard Company, Grand Rapids, Mich., a corporation of Michigan

Application February 14, 1945, Serial No. 577,793
14 Claims. (Cl. 198—233)

2. In a conveyor construction the improvement in the means supporting the conveyor with reference to a surface; comprising: a support member supporting at least partially the said conveyor at its upper end and positioned at an angle to said supporting surface; a U-shaped member of tubular material having a plug inserted into each end of said tube; a pair of pivot plates affixed on the upper side of said U-shaped member, a swivel caster at each end of said U and a swivel caster in the middle of the curved portion of said U-shaped member; said support member being pivoted to said pivot plates in a plane above said U-shaped member; the whole being so arranged that when the U-shaped member is moved pivotally with respect to the support member its full distance in the direction of maximum pivoting movement, the point of application of the downward thrust of said support member to the U-shaped member will be between the extremities of said U-shaped member, said extremities being taken in a direction parallel to said support member.



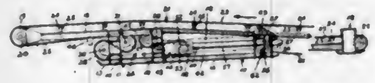
2,452,979

EXTENSION TABLE

Emil Zuckerman, Stamford, Conn.

Application February 15, 1945, Serial No. 577,949
3 Claims. (Cl. 311—62)

1. In a table top, a central main portion having a periphery comprising a series of straight edges, a series of leaves each having an outer peripheral curved edge and an inner straight edge with said inner straight edges hinged to the straight edges of the said central main portion for movement into position to form an extension of said main portion and for hinged movement to lie retracted adjacent the under surface of said central main portion whereby substantially not to obstruct the space under the table top, the said straight edges of said central main portion having each an opening exposed over the straight edge of each of said leaves when said leaves lie retracted, a supporting detent pivoted for rotation in each of said openings for movement of a part thereof under said leaves when



said leaves are extended whereby to support the said leaves in a horizontal table extending position, and said detents having each a surface for flush alignment with the surfaces of the straight edges of said central main portion when said detents are rotated relatively to said openings for withdrawing said detent parts from under said leaves and into said openings.

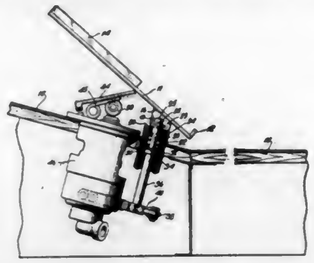
2,452,980

BELT TENSIONING MECHANISM FOR CONVEYERS

John S. Beltz, Columbus, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company, a corporation of Ohio

Application July 20, 1945, Serial No. 606,237
4 Claims. (Cl. 198—208)

1. A head section for a conveyor including a main frame having a belt receiving pulley over which material is to be discharged, a pair of power driven belt driving pulleys mounted in said main frame rearwardly of said discharge pulley, another pair of belt receiving pulleys mounted in said main frame and located rearwardly of said power driven pulleys, a frame within said main frame mounting one of said last named pulleys for rectilinear movement in a limited range, fluid pressure means carried by said frame for urging said movable pulley in a belt tensioning direction, said pairs of pulleys all being located below the top of said head section main frame and between the sides thereof, and means for manually adjusting rectilinearly the position of said frame independently of said fluid pressure means for positioning it within the operating range of rectilinear movement of said pulley.



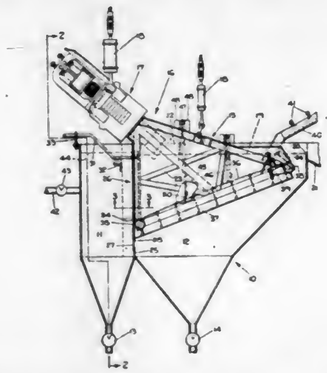
2,452,981

COMBINED THROTTLE AND BRAKE PEDAL

Walter F. Benning, Toledo, Ohio, assignor to Mack Manufacturing Corporation, New York, N. Y., a corporation of Delaware

Application December 30, 1944, Serial No. 570,702
14 Claims. (Cl. 192—3)

1. A dual-control foot accelerator and brake pedal associated with the floor of an automotive vehicle, comprising a pedal, means for supporting and pivoting said pedal in a direction toward and away from the floor of said vehicle, rotatable shaft means interconnected with said supporting means for pivoting said pedal in a direction substantially parallel to the floor of said ve-



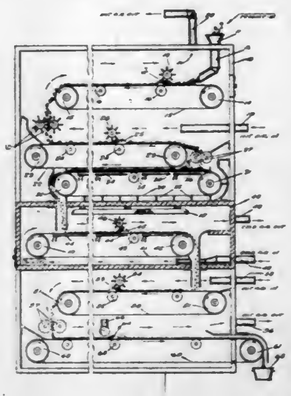
hicle, clutch means interconnecting said shaft to an accelerator mechanism, said clutch being constructed and arranged to be disengaged by the pivoting movement of said pedal in the direction toward said floor irrespective of the relative position of said pedal.

2,452,982

SUBMERGED RECIPROCATING SCREEN

Byron M. Bird, Columbus, Ohio, assignor to The Jeffrey Company, a corporation of Ohio

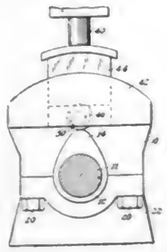
Application June 25, 1945, Serial No. 601,397
1 Claim. (Cl. 209—269)



Material screening apparatus of the submerged in fluid medium type adapted to screen fine particles of material from a mixture of various sizes of particles of material wherein the fine particles to be screened are of such character as to permit them to become at least partially suspended in a fluid medium, said screening apparatus including a fluid container having partition means including an opening therein dividing said container into sections, one for receiving screened fine particles and one for receiving oversize particles of material, a screen in said fine particle receiving section having closed sides flexibly connected to said dividing partition about the opening therein and extending upwardly therefrom, a plurality of partitions depending to said screen crosswise thereof dividing said screen into compartments said partitions having flexible bottom edges positioned adjacent to said screen, fluid inlet means for supplying fluid to said oversize particle section, overflow fluid outlet means associated with said fine particle section, said overflow fluid outlet means being positioned to determine the level of the fluid above the screen in the fine particle section of said container, means for depositing material to be screened in the uppermost compartment of said screen, means for wetting the material prior to its being deposited therein, jet means adapted to inject fluid into the fluid above said screen and adjacent the partitions therein to cause precipitation of fine particles of material in said fluid and to cause a flow of fluid through said screen into said fine particle section of said container thereby carrying precipitated fine particles of material thereinto, and motor means for imparting vibratory motion to said screen at an acute angle with respect thereto, said screen thereby imparting conveying motion components to material thereon and conveying material from one particle section to the next particle section beyond said flexible means on the dividing partitions, the fluid entering said oversize particle container section flowing through said opening in the container dividing partition into said fine particle section counter-current to the flow of oversize particles passing through said opening thereby washing the fine from said oversize particles, and said fluid then flowing from said fine particle section through said screen thereby tending to carry fine particles of material present from the fine particle section to and through the screen and thence into said fine particle receiving section of the fine particle section.

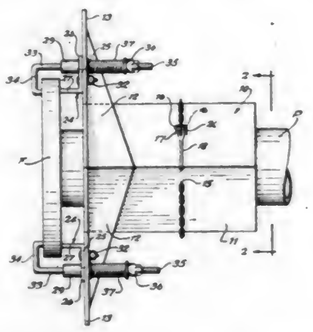
2,452,983

PROCESS OF DESICCATING FOOD PRODUCTS



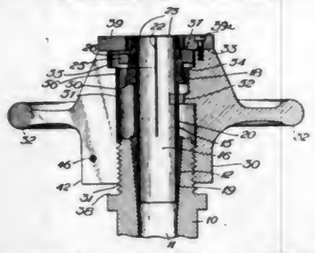
Clarence Birdseye, Gloucester, Mass., assignor to Dehydration, Inc., Gloucester, Mass., a corporation of Massachusetts

Application December 29, 1941, Serial No. 424,834
4 Claims. (Cl. 99—204)



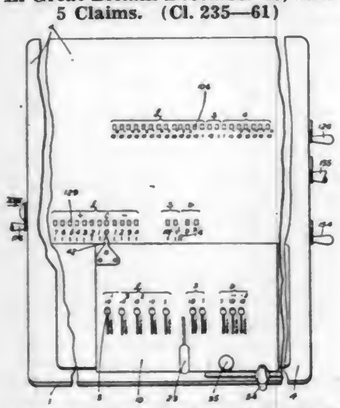
1. The process of dehydrating a mass of moisture-containing food units, which consists in extracting moisture from the food units by contact of a gas therewith, simultaneously fluffing the units to facilitate the gas contact therewith and subdividing the food units into lesser units having varying specific gravity and thereafter moving the units of less specific gravity at an increased rate during the dehydration thereof.

2,452,984
ADVANCE AND RETARD INJECTION MECHANISM FOR DIESEL ENGINES
Øyvind Blom, Brooklyn, N. Y.
Application September 14, 1946, Serial No. 697,132
3 Claims. (Cl. 74—569)



3. In a means for supplying fuel to an engine of the class described comprising a pair of reciprocable plungers, a revolvable shaft, a housing having spaced bearings on the shaft, a fixed support, adjustable means connecting the housing with the support, shaft bearings on said support disposed in the space between the first mentioned bearings, vertically movable plunger actuators, guide means in the housing for said actuators, said actuators having follower rollers thereon, cam means on said shaft, and lobes carried by said cam means for engaging said roller whereby to elevate and lower said actuators.

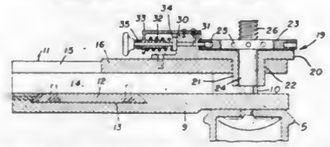
2,452,985
ADJUSTABLE FLANGE JIG
Earl C. Bourdette, Chickasaw, Ala.
Application July 23, 1945, Serial No. 606,573
2 Claims. (Cl. 113—102)



1. A jig adapted temporarily to hold a coupling flange in position to be welded adjacent the end of a length of pipe which includes a V-shaped saddle for engaging the periphery of the pipe, a pair of divergent arms adjacent one end of the saddle, said arms extending outwardly from the saddle beyond the side edges thereof, a stop mounted on each arm for adjustment longitudinally thereof, means to hold the stops in spaced parallel relation on opposite sides of the apex of the saddle and a clamp hook carried by each stop for engaging the flange and clamping it against an adjacent stop.

2,452,986
COLLET AND COLLET CHUCK THEREFOR
Ronald F. Brennen, Valley Stream, N. Y., assignor to General Die-Stamping Tool Company, New York, N. Y., a partnership comprised of Richard F. Matshak and David M. Kasson
Application September 2, 1943, Serial No. 500,927
8 Claims. (Cl. 279—53)

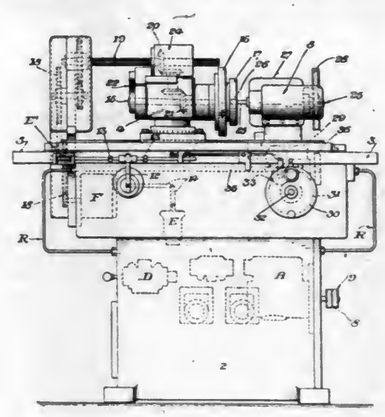
8. An assembly comprising a collet having an outwardly pointed outer end cone; an exteriorly threaded live spindle into the outer end of which the collet is fitted; a cone collar fitted on said outer end cone; a closing sleeve screwed without looseness upon the threads of the spindle with the inner ends short of the inner ends of the threads and the outer end face of its outer end disposed adjacent to the outer end face of the collar the outer end face of the sleeve being accurately so machined that when the spindle is rotated, the outer end face of the sleeve will be flush with the outer end face of the collar and always in a single plane perpendicular to the axis of rotation of the spindle; said actuating ring being mounted on the machined end face of the sleeve in position to engage with the outer face of the collar; whereby after removal and replacement of the sleeve with the ring against the collar, the ring will accurately take its position perpendicular to the axis of the spindle.



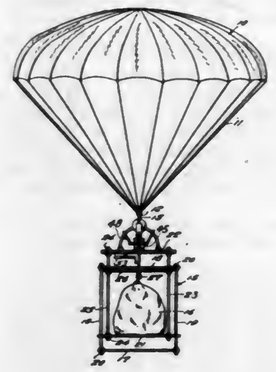
2,452,987
CALCULATING MACHINE
Daniel Broido, Cockfosters, near Barnet, England
Application December 9, 1944, Serial No. 567,347
In Great Britain December 10, 1943
5 Claims. (Cl. 235—61)

1. In a calculating machine for non-uniform first factors comprising interrelated sets of units, the highest set of units being in the decimal notation, and for decimal second factors, and conversely for decimal first factors and non-uniform second factors, a products register, a sensing

mechanism operatively associated with the said register, and means for operating the said sensing mechanism, in combination, a conversion mechanism comprising a plurality of groups of members, each group being associated with a denomination of a non-uniform first factor and each member within a group being associated with a digital value of the respective denomination, each of said members associated with the highest set of units comprising representations of the respective digit, of products formed by multiplying the respective digit by $1/10$, $1/100$, and so forth, and of products formed by multiplying the respective digit by the unit value of each non-decimal denomination of a non-uniform second factor, whilst each of said members associated with a lower set of units comprises only representations of products formed by multiplying the respective digital value by the digit 1 of each denomination of a decimal second factor, all said products being expressed in the interrelated sets of units, a first set-up mechanism for operatively associating with the said sensing mechanism those members which are associated with digital values and denominatons of the first factor, and a second set-up mechanism for operatively associating with the said sensing mechanism those representations which correspond to the denominations of the second factor.



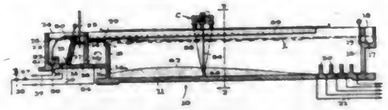
2,452,988
WORK INDEXING ATTACHMENT FOR LATHES
John D. Brown, Enid, Okla.
Application February 20, 1947, Serial No. 729,739
3 Claims. (Cl. 51—216)



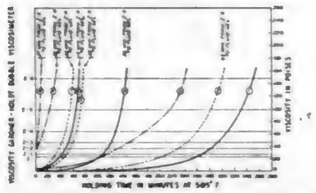
1. A work indexing attachment for a wood lathe including a longitudinally slotted bed and having a sanding disk secured on the head stock spindle thereof, comprising an elongated main base plate, a nutted bolt extending through an end portion of said main base plate and the slot of said bed for rigidly securing said base plate to and upon the lathe bed adjacent the sanding disk so that said main base plate projects laterally from said bed, a slide movable transversely of the other end portion of said base plate, and parallel with said bed manually operable adjusting means for said slide, a second slide mounted on the first named slide for movement in a direction at right angles to the direction of movement of said first named slide and parallel with the plane of the sanding disk, a work holder carried by the second named slide and including a horizontal index disk mounted for rotation about a vertical axis and having means for securing a piece of work thereon, and manually releasable means for securing said index disk in different positions of rotary adjustment.

2,452,989
CAM GRINDING MACHINE
Harry W. Brown, Cleveland, Ohio, assignor to The National Acme Company, Cleveland, Ohio, a corporation of Ohio
Application December 18, 1943, Serial No. 514,806
13 Claims. (Cl. 51—101)

1. A cam grinding machine having a reciprocating work carrier rotatable about its longitudinal axis for varying the angle of the work, means for rapidly reciprocating said carrier, a rotatable work spindle carried by said carrier, means for rotating said spindle, a reciprocating tool carrier reciprocal transversely of said work carrier, means for reciprocating it, a rotatable spindle carried by said tool carrier, means for rotating it, and means for adjusting the position of said tool carrier transversely of said work carrier.

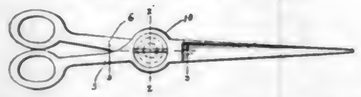


2,452,990
PARACHUTE RELEASE
Homer H. Bush, Atlanta, Ga.
Application October 1, 1945, Serial No. 619,625
4 Claims. (Cl. 244—138)



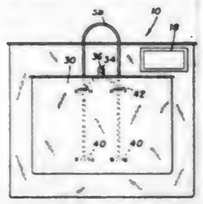
1. In a release device, a parachute, a cord secured thereto, a ball secured to the cord of said parachute, a load-carrying cage, a pair of hemispherical members pivotally secured to said cage adapted to encompass said ball, a latch securing said members about said ball, and an impact-operated trigger rod for releasing said latch, said cage including an inner frame having a top plate and an outer frame having a top plate beneath said inner-frame top plate and an impact plate, in said outer frame, the impact of said impact plate causing said top plate of the inner frame to actuate said trigger rod.

2,452,991
LIQUID CLARIFYING APPARATUS
Alfred Butcher, Pittsburgh, Pa., assignor to Gulf Oil Corporation, Pittsburgh, Pa., a corporation of Pennsylvania
Application June 19, 1945, Serial No. 600,275
7 Claims. (Cl. 210—16)



1. Liquid clarifying apparatus comprising an elongated tank having side and end walls and a bottom wall, an overflow sluice positioned a substantial distance above said bottom wall and at one of said end walls, means adapted to control the rate of outflow of liquid from the tank and adapted to establish a normal liquid level in the tank, means outwardly of the other end wall defining with the latter a receiving chamber for the liquid to be treated, said other end wall being apertured at its bottom to provide an outlet from said chamber to said tank, said chamber being of sufficient volume to permit floc formation therein, means for introducing liquid to be treated into said receiving chamber, a weir extending between the side walls adjacent said other end wall and terminating upwardly at a point which is below said level established by said means for controlling rate of outflow, said weir serving to deflect upwardly the outflow from said chamber whereby said outflow is substantially rolled on itself before passing beyond said weir, the portion of said tank between said one of said end walls and said weir constituting a settling chamber, a sludge chamber outwardly of said receiving chamber having an overflow sluice to said receiving chamber above said level, means for delivering sludge from the settling chamber to the sludge chamber, and means for controllably withdrawing sludge from the bottom of said sludge chamber.

2,452,992
COATING COMPOSITION OF FATTY DRYING OILS REACTED WITH FATTY ACID MODIFIED POLYHYDRIC ALCOHOL ESTERS OF CYCLOPENTADIENE MALEIC ADDUCT
William H. Butler, Bloomfield, N. J., assignor to Bakelite Corporation, a corporation of New Jersey
Application May 29, 1943, Serial No. 489,062
10 Claims. (Cl. 260—22)



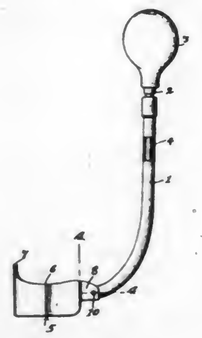
1. Composition useful for coatings comprising the reaction product of a fatty drying oil with a polyhydric alcohol ester of a cyclopentadiene-maleic adduct and a reactant in amount sufficient to impart to the ester solubility in fatty drying oils, said reactant selected from the group consisting of monobasic fatty acids having 5 to 22 carbon atoms in the chain and their partial esterification products with a polyhydric alcohol, the fatty drying oil constituting at least 10% of the reaction product, and the product being characterized by polymerizing and increasing its viscosity upon heating more rapidly than the fatty drying oil alone.

2,452,993
SCREW PIVOT FOR SHEARS
Gaither Dewitt Calloway, Elkin, N. C.
Application October 23, 1944, Serial No. 559,936
1 Claim. (Cl. 30—266)

Means for pivotally connecting a pair of cutting blades and comprising a screw threadedly engaged with one of the blades and free of the other of said blades, said last-named blade having a countersink therein and said screw having an enlarged head positioned in said countersink, said countersink having an annular groove therein at its outer edge and an annular rib formed on the underside of the head at the peripheral edge thereof conformably seated in said groove.

2,452,994
SHOPPING BAG
Bernard Chodak, Brooklyn, N. Y.
Application January 21, 1947, Serial No. 723,441
1 Claim. (Cl. 150—1.7)

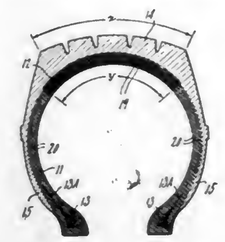
A shoppers' bag including a main compartment of flexible sheet material having side walls and handles thereon, a pair of auxiliary compartments each consisting of a unitary piece of flexible sheet material secured at its side edges and bottom to the outer surface of a side wall to form an open pocket, auxiliary handles secured to the interior surface of the outer wall of each of said auxiliary compartments, means for selectively collapsing and retaining said auxiliary compartments in folded position upon said side walls, said last mentioned means including snap fastener elements secured to the outer surface of said side walls and to the inner surface of the outer walls of said auxiliary compartments, said auxiliary handles being slidably connected to the inner surface of the outer walls of said auxiliary compartments and being selectively extended from and retracted into said auxiliary compartments.



2,452,995
SOLDERING, BRAZING, AND WELDING FLUXES
Lionel Cinamon, New York, N. Y.
No Drawing. Application September 29, 1944, Serial No. 556,497
4 Claims. (Cl. 148—26)

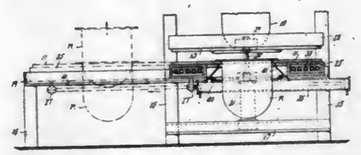
2. In a flux embodying boric acid and an alkali fluorine compound the improvement which comprises: the combination with said flux of a member of the group consisting of an acid of pentavalent phosphorus and the alkali metal salts thereof which imparts a phosphorus content to the flux of approximately 0.65% to 9.2%.

2,452,996
PROCESS FOR REFINING COPPER AND ITS ALLOYS
Michael George Corson, New York, N. Y., assignor to The Linde Air Products Company, a corporation of Ohio
No Drawing. Application June 15, 1946, Serial No. 677,102
4 Claims. (Cl. 75—76)



1. The process of treating copper and copper alloys to improve their soundness and other physical characteristics when used as sand castings and the like which comprises forming a melt of the metal to be cast, superheating the melt and, while the melt is maintained in a superheated state, successively blowing carbon monoxide and nitrogen into and through the melt, the duration of the treatment with carbon monoxide being sufficient to insure substantially complete deoxidation of the metal and the nitrogen treatment being continued until substantially all hydrogen, sulphur dioxide and dissolved carbon monoxide are removed from the melt.

2,452,997
RECTAL SPRAY DEPURATOR
William Jennings Coward, Lakeland, Fla.
Application February 26, 1946, Serial No. 650,343
2 Claims. (Cl. 128—231)

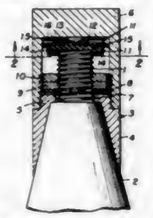


1. In a rectal spray depurator, the combination of a horizontal substantially U-shape guard open at its top and bottom and provided with vertical sides only and with parallel vertical lips at one end, a hood provided with a vertical elongated slot at its outer end, said hood positioned between said parallel lips, a hollow arm provided with V-shape slots in its inner end, said hollow arm extending into said guard parallel with said lips, means fastening said lips, guard, and hollow arm together, a tubing in said hollow arm and being capable of slight movement within said V-shape slots, said tubing extending at its inner end into said hood, a nozzle within said horizontal guard, and attached through said elongated slot to the inner end of said tubing, whereby said tubing and nozzle is permitted to have a slight movement within said guard, and a bulb connected to the outer end of said tubing.

2,452,998
PNEUMATIC TIRE
George R. Cuthbertson, Detroit, Mich., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
Application August 1, 1944, Serial No. 547,543
3 Claims. (Cl. 152—354)

1. A pneumatic tire comprising a plurality of plies of strain resisting elements forming a carcass, substantially inextensible bead wires, a tread portion, sidewall portions, and a layer of plastic composition encasing each of said plies, the plastic material of the layers encasing at least some of the plies in the region of the crown of the tire being formed of a natural rubber composition having good resistance to flexing fatigue at temperatures of at least 275° Fahrenheit and the plastic material of the layers of the remaining side-wall portions of the carcass being formed of a synthetic rubber-like composition.

2,452,999
METHOD OF MAKING CELLULAR THERMOPLASTIC RECEPTACLES
Lawrence E. Daly, Osceola, and John F. Schott, Mishawaka, Ind., assignors to United States Rubber Company, New York, N. Y., a corporation of New Jersey
Application June 28, 1944, Serial No. 542,452
4 Claims. (Cl. 18—56)

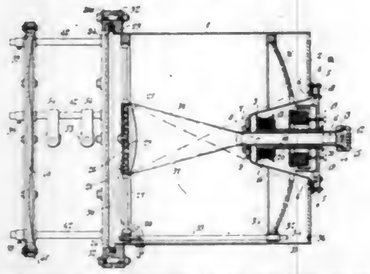


4. The method of making a cellular, hard, tough, slightly elastic thermoplastic receptacle, which comprises the steps of mixing rubber having good elastic properties when vulcanized with a resin selected from the class of hard thermoplastic resin of cyclized rubbers, hard thermoplastic resinous polymerization product of butadiene-1, 3 with styrene, hard thermoplastic resinous polymerization product of butadiene-1, 3 with acrylonitrile, in substantial amounts of the resin and rubber but considerably more resin by weight than rubber to provide a composition having a wide plastic range and which contains a vulcanizing agent and chemical blowing agent, sheeting this mix, heating the sheet to partly vulcanize the rubber and soften the resin and blow the agent to form numerous cells of gas sealed in the sheet and held by the resin from rupturing, then drawing and molding the cellular sheet while hot into a receptacle.

2,453,000
METHOD OF MANUFACTURING AUGER BITS
Benjamin H. Daulton, Wilmington, Ohio, assignor to The Irwin Auger Bit Company, Wilmington, Ohio, a corporation
Application September 17, 1946, Serial No. 697,510
8 Claims. (Cl. 76—102)

1. The process of manufacturing an auger bit which consists in drop forging an auger bit in a single drop forging operation to provide a tang, shank, spiral and head, with excess stock attached to the spiral and head, removing the excess from the spiral and head, machining and providing upon the head spurs, lip and lead screw, and subsequently machining and finishing the auger bit shank and spiral.

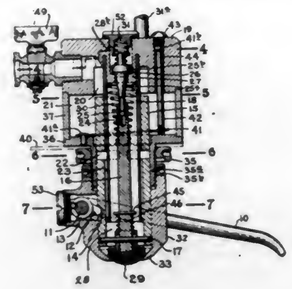
2,453,001
COMBINATION DUST CAP AND VALVE CAP LOCK FOR TIRE VALVES
John De Stefano, Long Island City, N. Y.
Application May 9, 1947, Serial No. 747,074
6 Claims. (Cl. 138—89.1)



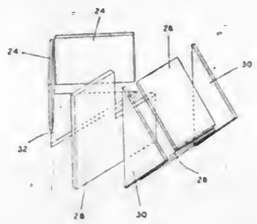
1. A tire valve stem, a dust cap comprising a sleeve section surrounding said stem and a hollow section detachably threaded onto said sleeve section and enclosing the outer end of said stem, means for rotatably securing the sleeve section on said stem against displacement, and a closure cap in said detachable section for closing said stem, said means imposing tension against said sleeve section to cause the same to frictionally resist rotation.

2,453,002
ARTICLE OF FOOTWEAR AND HEEL THEREFOR
Alexander J. Dunbrook, Kitchener, Ontario, Canada, assignor to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
Application December 11, 1946, Serial No. 715,566
14 Claims. (Cl. 36—70)

14. An article of footwear having a raised shank and a heel adapted to directionally discharge water from its surface against said shank, said heel comprising a tread member having a generally arcuate channal extending from the inner edge to the breast of the heel defining a generally tear-drop shaped corner portion, said corner portion having incurvate vertical walls with the angular tip of the portion forming the forward inner corner of the member, the rearward wall of the channel being overcut adjacent the inner edge of the heel and undercut adjacent the breast of the heel and converging with said inner edge and breast respectively in sharply defined corners, said raised shank being disposed forwardly from the breast of the heel.



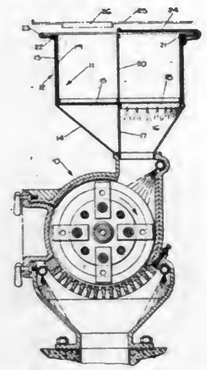
2,453,003
TELEVISION PROJECTION TUBE
Baden John Edwards, Cambridge, England, assignor to Pye Limited, Cambridge, England, a British company
Application March 20, 1947, Serial No. 735,894
In Great Britain March 7, 1946
13 Claims. (Cl. 178—7.5)



1. Television projection tube comprising an envelope having a transparent wall portion, a fluorescent screen positioned within said envelope and directed away from said transparent wall portion, a Schmidt mirror having an aperture in the centre thereof positioned within the envelope to reflect light from the fluorescent screen through the transparent wall portion, a re-entrant portion of said envelope which passes through the aperture in the centre of the Schmidt mirror, a neck portion extending outwardly from the inner end of the re-entrant portion, said neck portion being aligned with the fluorescent screen and enclosing an electron gun positioned to scan said fluorecsent screen, and focussing and deflecting means disposed around the said neck portion and within said reentrant portion.

2,453,004
LIQUID MIXING AND DISPENSING APPARATUS
Oscar L. Engstrom, New York, N. Y.
Application February 24, 1947, Serial No. 730,426
11 Claims. (Cl. 222—133)

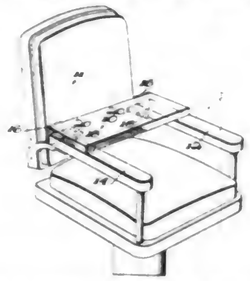
1. In an apparatus for mixing syrup with soda water, a vertical casing having separate syrup and soda water supply inlets at the upper end thereof, an annular syrup measuring chamber below said syrup supply inlet, a slidable water valve, and a central sliding valve for controlling the flow of syrup from its inlet to said measuring chamber, a manually slidable vertical operating rod located within the central portion of said casing, said rod having its upper end engageable with said water valve to lift it from its seat when said rod is operated, said casing having a mixing chamber at the bottom thereof, a discharge outlet below said mixing chamber, said rod having on its lower end a discharge plug engaging said discharge outlet, means to conduct syrup from said measuring chamber to said mixing chamber, and a passage to conduct soda water from said water inlet to said mixing chamber.



2,453,005
MOLD FOR FORMING PORRO PRISMS
Murry N. Fairbank, Weston, Mass., assignor to Polaroid Corporation, Cambridge, Mass., a corporation of Delaware
Application December 31, 1943, Serial No. 516,416
5 Claims. (Cl. 18—39)

4. A mold for the formation of a Porro prism comprising a pair of right-angle isosceles prisms having portions of their hypotenuse faces integrally secured together by a connecting portion, said mold comprising a pair of members having optically smooth molding surfaces for defining the isosceles sides of one of said triangular prisms, a second pair of members having optically smooth molding surfaces for defining the isosceles sides of the other of said triangular prisms, and a plate having a pair of parallel, optically smooth surfaces, one of the latter surfaces defining a portion of the hypotenuse side of one of said triangular prisms and the other of said latter surfaces defining a portion of the hypotenuse side of the other of said triangular prisms, edge portions of said plate defining an aperture interconnecting the mold chamber formed by said first-named pair of members with the mold chamber formed by the second of said pair of mold members and for defining the portion of said Porro prism which interconnects said triangular prisms.

2,453,006
BATCH FEED HOPPER FOR GARBAGE GRINDERS
Oscar J. Feight, Columbus, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company, a corporation of Ohio
Application November 19, 1945, Serial No. 629,609
1 Claim. (Cl. 241—101)

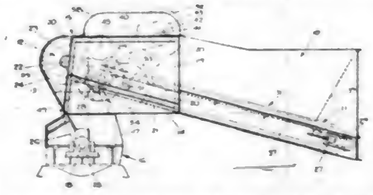


In combination, a garbage grinder, a feed hopper therefor comprising a main hopper having an upwardly extending cylindrical upper portion having an open top, a bottom in said upper portion having an opening on one side of a diameter thereof, a grinder chute below said opening adapted to receive garbage passing through said opening and direct it to said grinder, a cylindrical wall drum mounted for rotation on an upright axis and within the cylindrical portion of said main hopper and having both its top and bottom completely open, an upright diametrical partition in said drum extending between opposite positions of said cylindrical drum and connected thereto, top cover means for the portion of both the main hopper and said drum directly above said grinder chute and said opening therefor extending over half of the open tops of said main hopper and drum thereby covering said half and leaving the other half of each open to receive garbage which is there supported on the above described main hopper bottom for inspection and removal of silverware or the like, and means comprising a hand operable exposed ring carried by said drum for rotating said drum on its axis and thereby delivering the garbage to said grinder chute, the construction acting to prevent a person extending his hand into said grinder chute or into said grinder while providing for inspection of garbage and removal of silverware or the like as aforesaid.

2,453,007
BRACKET FOR ARMCHAIR ACCESSORY SEATS
William O. Flatt, Fort Worth, Tex.
Application May 31, 1944, Serial No. 538,167
3 Claims. (Cl. 248—300)

1. A stabilizing bracket adapted for use with a flat seat element in the manner described comprising a main guide wing, a secondary guide wing extending at right angles thereto and having a margin in common with a portion only of a margin of the main guide wing to thereby leave a projecting portion of the main wing, and a supporting wing extending away from the secondary wing in a plane normal to those in which the main and secondary guide wings lie, said supporting wing lying outside the angle included between said

guide wings and being spaced from the margin of the projecting portion of the main wing a dis-



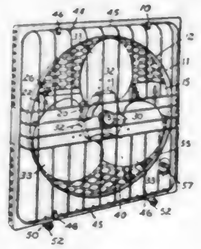
tance approximately the width of the seat element.

2,453,008

MATERIAL REDUCING APPARATUS PARTICULARLY ADAPTED TO REDUCE METAL TURNINGS

John T. Fowler, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, a corporation of Ohio

Application October 14, 1946, Serial No. 703,199
1 Claim. (Cl. 241—152)



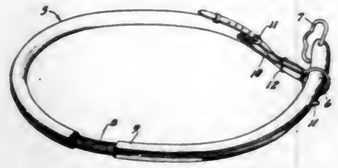
A reducing apparatus particularly adapted to reduce metal turnings including a secondary grinder having a housing providing a top feed opening, a power driven shaft having a secondary grinding rotor thereon carried in said housing, a primary reducer including a housing carried by said secondary grinder housing and connected to discharge into the top feed opening of said secondary grinder, a primary metal turnings reducing drum element carried within said primary reducer housing above said secondary grinding rotor and driven at a lower speed from the latter, a hopper, conveyer means forming a tapering maw for conveying and compressing loose metal turnings received from said hopper and extruding them directly substantially radially to the working periphery of said primary metal turnings reducing drum element in a compressed sponge-like condition, said conveyer means including an upper and a lower driven endless belt each having a discharge end disposed closely adjacent the working periphery of said primary metal turnings reducing drum element, said primary metal turnings reducing drum element rotating in a direction to work the metal turnings directly downwardly over the discharge end of said lower endless belt, means pivotally mounting the upper belt for generally vertical movement of its discharge end, and means including a clutch connecting said primary metal turnings reducing drum element and said belts for driving the latter at reduced but equal speeds whereby said metal turnings will be extruded slowly directly and generally radially to the working periphery of said primary metal turnings reducing drum element and held in a compressed sponge-like condition by said belts while said primary metal turnings reducing drum element works and tears the end of said compressed metal turnings directly over the end of the lower belt and feeds the shredded and torn metal turnings downwardly through the top feed opening of said secondary grinder to said secondary grinder rotor at a speed proportional to the speed of the latter.

2,453,009

VENTILATING DEVICE

Karl M. Ganger and John B. Burrowes, Dayton, Ohio, assignors to The Lau Blower Company, Dayton, Ohio, a corporation of Ohio

Application March 10, 1947, Serial No. 733,494
10 Claims. (Cl. 230—259)



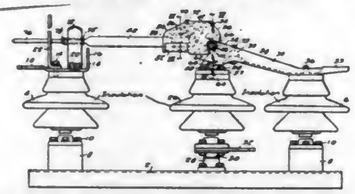
1. A portable ventilating fan of the character described comprising a main panel having a central opening, a relatively narrow supplemental panel overlying said opening, means securing said supplemental panel to said main panel in spaced and parallel relation, a motor having a shaft, fan blades on said shaft of said motor, means mounting said motor on said supplemental panel with said fan blades positioned substantially centrally of said opening in said main panel, and means connected with both of said panels and constructed both to form supporting legs for said fan and to brace said panels relative to each other.

2,453,010

DOG COLLAR

John T. Graffin, Lima, Peru

Application April 25, 1946, Serial No. 664,862
2 Claims. (Cl. 119—109)



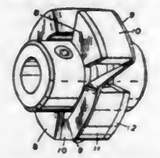
1. A dog collar including an elongated substantially C-shaped resilient neck-encircling member, an eye member connected to one end of said neck-encircling member and through which the other end portion of said neck-encircling member slidably extends, and a second eye member attached to the other end of said neck-encircling member for connection with a leash, said neck-encircling member comprising an elongated helical spring having the second named eye member directly attached to one end thereof, and a flexible sheath closed at said ends and completely enclosing said spring.

2,453,011

HIGH-PRESSURE CONTACT SWITCH

Howard W. Graybill, Pittsburgh, Pa., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa., a corporation of Pennsylvania

Application January 10, 1945, Serial No. 572,183
10 Claims. (Cl. 200—48)



1. In a switch of the type having a switch blade movably mounted on substantially its longitudinal axis on a blade support, which in turn is pivotally mounted on a line terminal for movement of said blade to and away from a position in proximity with a line contact spaced from said line terminal, and actuating means operable in a circuit opening operation to first move said blade relative to said support out of high pressure engagement with said line contact and to thereafter pivotally move said blade to a position spaced away from said line contact, the combination of means for conducting current from said line terminal to said blade comprising permanent low resistance connections between said blade and blade support, and between said blade support and line terminal, the connection and pivotal mounting of said blade support and terminal comprising rigid portions spaced apart a fixed distance on one member for receiving therebetween another rigid portion on the other member, pivot means mounted on each of said spaced portions to be engageable with pivot means at each side of said other rigid portion, said pivot means comprising at least one bearing member mounted for adjustment along the pivot axis on one of said members and having a contact surface engageable with a contact surface on the other of said members, and said contact surfaces being configurated so as to engage only substantially on an annular line.

2,453,012

FLEXIBLE ROTARY COUPLING

James Claude Hickman, Colne, England, assignor to J. H. Fenner and Company Limited, Colne, England, a British company

Application February 4, 1947, Serial No. 726,313
In Great Britain February 20, 1946
6 Claims. (Cl. 64—11)

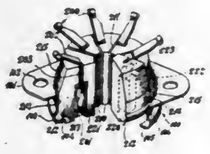
5. A coupling for power transmission comprising a driving member, an intermediate member, a driven member, and a plurality of resilient elements forming the effective power transmitting connection between said members, said intermediate member being formed as a waved disc with segments between the waves to which said resilient elements are affixed at alternate sides so as to extend in opposite directions therefrom alternately, said resilient elements which extend in one direction from said intermediate member being affixed at their outer faces to said driving member, and said resilient elements which extend in the other direction from said intermediate member being affixed at their outer faces to said driven member.

2,453,013

TREATMENT OF YARNS OR CORDS COMPRISING CELLULOSE FILAMENTS

James William Illingworth, Little Acton, Sutton Coldfield, and Leslie Fielden Pickup, Rochdale, England, assignors to Dunlop Tire & Rubber Corporation, Buffalo, N. Y., a corporation of New York

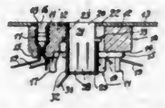
No Drawing. Application November 13, 1945, Serial No. 628,364. In Great Britain December 23, 1944
2 Claims. (Cl. 28—59.5)



1. A process for treating yarns consisting of cotton filaments which comprises wetting said yarn, elongating the wetted yarn by a tension load while subjecting said yarn to the action of steam and thereafter subjecting the elongated yarn to steam while applying a load substantially less than the elongating load of the prior steaming operation.

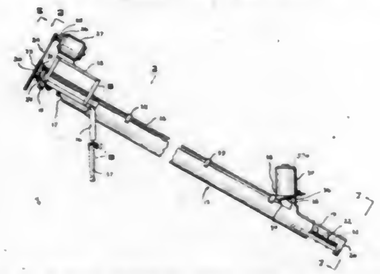
2,453,014

SOCKET PRIMARILY FOR RADIO TUBES AND THE LIKE



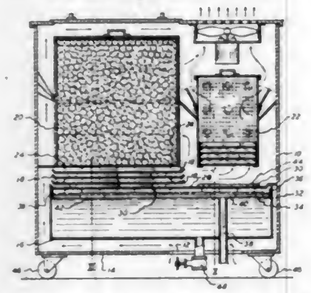
Donald Jackson, Cambridge, England, assignor to Pye Limited, Cambridge, England, a British company

Application April 4, 1945, Serial No. 586,608
In Great Britain April 1, 1944
7 Claims. (Cl. 173—328)



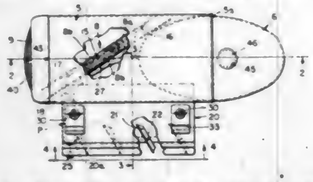
5. In a socket, a rigid support ring, a composite disc-like insulating body arranged loosely within said ring and composed of an assembly of individual complementary segments of insulation, a plurality of said segments each having an axially extending recess in one and the same side thereof and each carrying an individual contact element held in said recess so as to be bodily movable with its segment, the recess in each segment being laterally closed by the adjacent side of the adjoining segment in the assembly, said segments exteriorly having peripheral interlocking engagement with said ring for supporting the segments against axial displacement, said segment assembly having an axial aperture extending substantially centrally through said assembly and defined by inner peripheral walls of the segments, a loose retainer member axially arranged within said aperture and supported by the inner peripheral portions of said segments to loosely hold the segments against disengagement from said ring while allowing each segment a limited freedom of independent movement in the annular space between said support ring and said retainer member, and means to hold the segment assembly against rotational bodily displacement within said ring.

2,453,015
SOCKET PRIMARILY FOR RADIO VALVES AND THE LIKE
Donald Jackson, Cambridge, England, assignor to Pye Limited, Cambridge, England, a British company
Application September 25, 1946, Serial No. 699,238
In Great Britain August 23, 1945
2 Claims. (Cl. 173—328)



2. A socket installation comprising, in combination, a metallic supporting plate having a series of contact apertures in an annular array around a guide aperture, a one-piece body of insulating material applied to one side of said plate and having a series of contact apertures and a guide aperture registering respectively with said contact apertures and said guide aperture in said plate, a series of pin-receiving contact elements mounted within said contact apertures in said body and having pin-receiving portions disposed to receive co-operating contact pins inserted through said contact apertures in said plate, said body having on the side thereof adjacent said plate a series of bosses through which said contact apertures in said body extend and which project into said contact apertures in said plate to locate said body against rotation relatively to said plate, whereby said bosses provide insulation between said contact elements and the adjacent surrounding metal of said plate and said plate forms an electrostatic screen extending over the entire adjacent side of said body and between adjacent contact elements, a hollow metal guide member in said registering guide apertures for guidably receiving a spigot inserted in said member through said guide aperture in said plate, said guide member comprising a rivet portion securing said body directly to said plate, whereby said guide member is in direct electrical engagement with said plate and forms a continuation extending longitudinally between said contact elements of the electrostatic screen formed by said plate and a resilient portion at the end of said rivet portion remote from said plate forming a spring clip adapted for resiliently and electrically engaging such spigot.

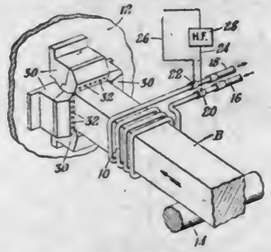
2,453,016
GRAIN ELEVATOR AND TREATING APPARATUS
Edwin T. Johnson and Albin E. Johnson, Walcott, N. Dak.
Application October 4, 1945, Serial No. 620,330
3 Claims. (Cl. 259—22)



1. A grain elevator and treating apparatus comprising an inclined sleeve having inlet and outlet openings therein, a helical feed screw in said sleeve, a container for treating material mounted on said sleeve, a passage connecting said container with said sleeve, an agitator in said container, means for rotating said screw, a lay shaft mounted upon said sleeve and connected with said feed screw adjacent said means, and gearing positioned between the base of said container and said sleeve for connecting said lay shaft and said agitator, said sleeve being open at its lower end to constitute said inlet, a bearing for said feed screw positioned externally of said inlet end and an open-sided support cage for securing said bearing to said sleeve.

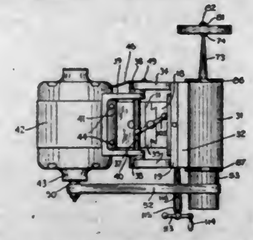
2,453,017
ICE AIR COOLING APPARATUS HAVING ANTISPLASH MEANS
Hiram Joseph Kaufman, Detroit, Mich.
Original application February 23, 1942, Serial No. 432,014. Divided and this application October 26, 1945, Serial No. 624,800
3 Claims. (Cl. 62—133)

1. An air conditioning apparatus of portable construction and adapted to be moved about while in service, comprising an air conditioning unit, a waste tank supported as a unit in the apparatus and movable therewith, a discharge for waste liquid flowing by gravity from said air conditioning unit, an intake in said tank for waste liquid from said discharge, and an anti-splash and silencing means located in said tank in vertical alignment with said discharge and said intake to silence the liquid discharged in said tank and to minimize splashing of waste liquid in said tank outwardly through such intake, against the normal flow of discharge liquid, upon movement of said apparatus in service.



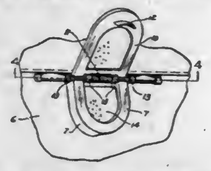
2,453,018
CAR COOLER
James E. Kercheval, San Gabriel, Calif., assignor to General Air Conditioning Corporation, Los Angeles, Calif., a corporation of California
Application March 22, 1948, Serial No. 16,159
4 Claims. (Cl. 261—34)

1. In a car cooler, a tubular casing having an air inlet in its front end, a rectangular air outlet neck projecting laterally from its side and a



closed water tank at its rear end, a humidifying pad stationarily mounted in the casing between the inlet and outlet neck, manually actuated pressure generating means mounted in the neck for withdrawing water from the tank and forcing it under pressure onto the humidifying pad, and means for mounting the casing on a car with its inlet facing the direction of travel of the car and with its outlet neck projecting into the car through a window thereof; said cooler being further characterized by the pressure generating means having a manually operated actuating member projecting from the discharge end of the outlet neck in position to be accessible to an occupant of the car.

2,453,019
METAL SURFACE CONDITIONING PROCESS
Barnwell R. King, Flushing, N. Y., assignor to The Linde Air Products Company, a corporation of Ohio
Application April 30, 1947, Serial No. 744,814
2 Claims. (Cl. 148—9.5)

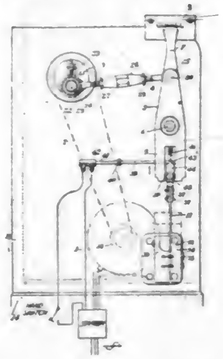


1. The method of eliminating defects in the surface of a ferrous metal body which comprises inducing in the skin of such body a high-frequency heating current to heat the surface metal to a sufficient depth to cause the surface metal at least in the zone of the defects to reach the ignition temperature with oxygen, and applying a stream of oxygen against such heated metal to remove the same thermochemically, thereby eliminating such defects.

2,453,020
LATHE GRINDING DEVICE
Joseph B. Koett, Oneonta, N. Y., assignor, by mesne assignments, to Koett Universal, Inc., Oneonta, N. Y., a corporation of New York
Application March 4, 1946, Serial No. 651,724
1 Claim. (Cl. 51—259)

A grinder for attachment to a lathe comprising an L-shaped member having one side thereof horizontal and the other side thereof vertical, a vertical guide carried by one face of said vertical side, a carriage engaging said guide, means for vertically adjusting said carriage relative to said guide, said carriage having a circular channel in the outer face thereof formed T-shaped in transverse section, a second guide, means engaging in said channel securing said second guide to said carriage, whereby said second guide may be angularly adjusted about a horizontal axis, a second carriage engaging said second guide, means adjusting said second carriage lengthwise of said second guide, a mandrel journalled in said second carriage, a pulley secured to one end of said mandrel, a pair of brackets fixed to said second guide and projecting rearwardly of the latter, a motor pivotally secured between said brackets, a holding link secured between said second guide and said motor, and endless driving means between said motor and pulley, said pulley having substantial width whereby said second carriage may be lengthwise adjusted without breaking the driving connection between said motor and said pulley.

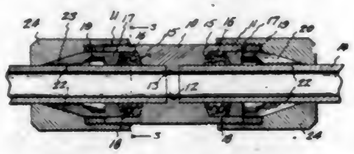
2,453,021
HANDBAG LOCK
Anna Konelsky, New York, N. Y.
Application November 27, 1946, Serial No. 712,702
6 Claims. (Cl. 292—1)



1. A lock for handbags of the envelope type including a bag body and a downwardly swinging closure flap, said lock comprising a permanent magnet mounted on the front of the bag body and a magnetic keeper mounted on the lower edge of the cover flap in position for attraction by and cooperative engagement with said magnet, said keeper being in two parts, including a magnetic bar at the top and a dependent swinging keeper element below the same.

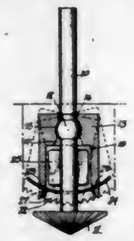
2,453,022
AGENT FOR REDUCING THE SURFACE TENSIONS OF LIQUIDS
Lee Leiserson, Chapel Hill, N. C., assignor to Virginia Smelting Company, West Norfolk, Va., a corporation of Maine
Original application April 28, 1943, Serial No. 484,923, now Patent No. 2,404,913, dated July 30, 1946. Divided and this application May 14, 1946, Serial No. 669,500
4 Caims. (Cl. 252—353)

EX. NO.	THE CONTROL	LIFTING AGENT ADDED	LIFTING AGENT CONCENTRATION	DRAINING TIME IN SECONDS	AVERAGE DRAINING TIME
0	SODIUM BUTYL NAPHTHALENE SULFONATE-0.5 GRAMS PER LITER	NONE	—	64, 60, 65	63 SECONDS
1		CAMPHOR	0.6 GRAMS/LITER	37, 37, 39, 39	38 SECONDS
2		1,1,3— TRIMETHYLCYCLOHEXANONE—3	0.6 CC. LITER	39, 44, 41	41 SECONDS
3		ISOPHORONE	0.6 CC. LITER	51, 47, 48	49 SECONDS
4		CYCLOHEXANONE	0.5 CC. LITER	54, 50, 52	54 SECONDS



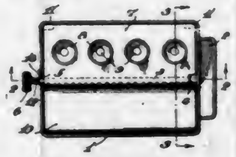
1. A liquid, the surface activity of which has been changed, consisting of a solution of a sodium alkyl naphthalene sulfonate and a cyclic ketone selected from the group consisting of camphor, isophorone, cyclohexanone and 1,1,3 trimethylcyclohexanone.

2,453,023
MACHINE FOR TESTING MATERIALS CONSTRAINED TO ALTERNATE FLEXURE
Robert L'Hermite, Clermont-Ferrand, France, assignor to Fondation dite: Groupement Francais Pour Le Developpement des Recherches Aeronautiques, Clermont-Ferrand, France
Application March 3, 1945, Serial No. 580,773
In France May 22, 1942
Section 1, Public Law 690, August 8, 1946
Patent expires May 22, 1962
4 Claims. (Cl. 73—100)



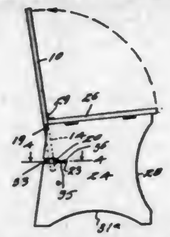
1. A machine for testing materials constrained to alternate flexure comprising jaw members adapted to grip firmly one end of a test-piece, a motor, a crank plate of variable eccentricity, means connecting said motor with said crank-plate to rotate the latter, a beam oscillatable about an axis parallel to the axis of flexure of the test-piece and provided with a bifurcated portion on one side of said axis of oscillation, a longitudinally adjustable connecting rod connecting said crank plate with a point of said beam on the other side of said axis of oscillation, a member secured to the free end of the test-piece, a spindle supported in said member, a roller rotatable on said spindle, bifurcated portion of said beam engaging said roller, and a device for comparing the amplitude of displacement of the free end of said test-piece with that of the displacement caused by a stress of definite intensity, said device comprising a scale member and an indicating member, one of said members being fixed and the other of said members being movable with said beam.

2,453,024
COUPLING
George Freeman Lomelino, Olney, Ill., assignor of one-half to Lawrence E. Ostrom, Olney, Ill.
Application April 24, 1946, Serial No. 664,511
1 Claim. (Cl. 285—123)



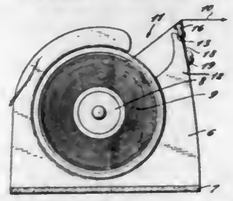
A coupling of the class described comprising a body having a bore to receive a connecting element, said body having a packing receiving recess, a compressible packing fitted in said recess, a thimble slidably engaging the packing and having a thickened packing engaging end for compressing the packing and sealing the areas around said element, said thimble having a split tapering opposite end defining a plurality of gripping jaws, said thimble also having a cut-away cavity in its inner face intermediate the gripping jaws and the thickened packing engaging end to provide relatively thin spring-like connecting portions between the thickened end and the gripping jaws, the split defining the jaws extending from the outer end of the jaws across the cut-away cavity to the thickened end, a wedging element surrounding the thimble and engaging the tapering jaws for clamping the jaws in locked engagement with a connecting element to be received by said body, and gripping teeth formed upon the inner face of said jaws for biting into the connecting element, the inner faces of the spring-like connecting portions being spaced radially from the connecting element which is to be received by said body.

2,453,025
DEVICE FOR CUTTING NONCIRCULAR HOLES
Pai Yen Loung, New York, N. Y.
Application March 25, 1948, Serial No. 16,965
7 Claims. (Cl. 77—61)



1. A drilling device which includes a rotatable shaft having a circular drill at its lower end, an oscillatable hollow block mounted on the shaft, and means on the shaft and within the block to oscillate the block as the shaft is turned, and cutting teeth on the lower face of the block.

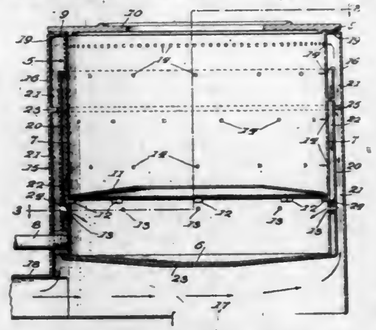
2,453,026
CIGARETTE EXTINGUISHER AND ASH TRAY
Robert M. Maney, Oklahoma City, Okla.
Application February 26, 1945, Serial No. 579,778
4 Claims. (Cl. 231—235)



1. In an ash tray and cigarette extinguisher, the combination with a receptacle, of a one piece cover therefor pivotally supported to swing about a horizontal axis extending across the middle thereof, and a vertically disposed funnel carried by said cover at one side of said axis and having its lower open end substantially smaller than the diameter of a cigarette, so that when a lighted cigarette is placed therein, it will be supported and extinguished, and the ashes only will pass through.

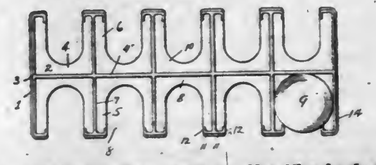
2,453,027
HINGED BACK COLLAPSIBLE CHAIR
Arthur A. Marks, Portland, Oreg.
Application April 8, 1946, Serial No. 660,368
4 Claims. (Cl. 155—148)

4. In combination a seat having a pair of supporting panels arranged at opposite sides thereof, said panels formed with horizontal recesses upon their rear edges, a back rest panel having its major length extending above said seat in hinged relation and having a minor portion extending slidably between said supporting panels, oppositely arranged studs carried by the minor portion of said back rest panel designed to move into said recesses, and means on said seat supporting panels engaging said studs to hold the back rest panel in rigid upright position relatively to said seat.



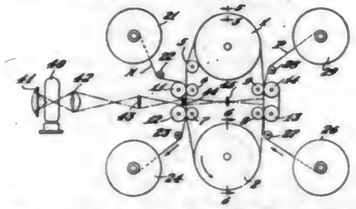
2,453,028
TAPE DISPENSER
Edwin W. Mason, Wyckoff, N. J.
Application May 25, 1946, Serial No. 672,191
1 Claim. (Cl. 164—84.5)

In a device for dispensing pressure-sensitive adhesive tape, a support for a roll of tape, a frame in which said roll of tape is rotatably mounted upon said support, a standard formed on said frame spaced from said roll of tape and having a cam surface at the upper extremity thereof, a spring knife structure secured to the front surface of said standard and extending upwardly beyond said cam surface, and a cradle structure constituting a movable support for the tape extending from said roll over the cutting edge of the spring knife structure, whereby the knife is flexed forwardly of the cam surface while the tape is being severed by the cutting edge.



2,453,029
OPEN POT OIL BURNER WITH UNBALANCED AIR SUPPLY
Leon D. Mills, Tacoma, Wash.
Application June 30, 1947, Serial No. 758,075
5 Claims. (Cl. 158—91)

1. An oil burner comprising a pot having an oil inlet, said pot comprising a bottom and a side wall, said side wall having a series of primary air inlet openings in its lower portion and having secondary air inlet perforations above said primary air inlet openings, an air supply jacket enclosing said pot, said jacket having a side wall surrounding and spaced from said pot side wall and having a bottom spaced downwardly from said pot bottom, said jacket having an inlet in its lower portion for admitting air under pressure and being closed at its upper end, a continuous shield wall in the space between said side walls of said pot and jacket and dividing said space into an up-flow passage adjacent said jacket side wall and a down-flow passage adjacent said pot side wall, the lower end of said up-flow passage being open to receive air from the lower portion of said jacket, the lower end of said shield cooperating with said pot to close the lower end of said down-flow passage, the upper ends of said up-flow and down-flow passages being in communication with



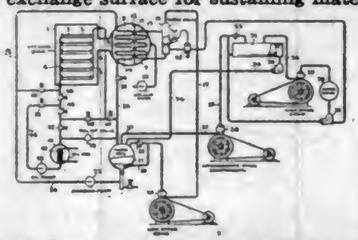
each other, primary air conducting means placing said up-flow passage in communication with said primary air inlet openings and segregating these openings from said down-flow passage, and air-flow restricting means above said air-conducting means and so associated with said up-flow passage as to cause lower air pressure in the upper portion of said jacket than in the lower portion thereof when air is supplied to said jacket under relatively high pressure; whereby, while the air and oil supplies remain adjusted for high-flame, sufficient air will be forced through said primary air inlet openings to insure combustion of all oil then entering the pot, thereby preventing a pool of oil from being left in said pot when the supplies of air and oil are reduced for low flame.

2,453,030
RACK FOR POKER CHIPS AND THE LIKE
Irving I. Newman, Leominster, Mass., assignor to Reliance Molded Plastics, Inc., Providence, R. I.
Application October 7, 1946, Serial No. 701,790
3 Claims. (Cl. 211—49)

1. A rack for poker chips or the like including a body closed at the bottom and ends and open at the top, a series of angularly-related partitions in the body defining a plurality of chip-receiving compartments, the compartments being sized to more or less snugly receive the chips to prevent their movement in each of at least two directions, certain of the partitions having lateral end projections with inwardly-extending end flanges to prevent movement of the chips in another direction.

2,453,031
CINEMATOGRAPHIC APPARATUS
Earl M. Olds, Jr., Van Nuys, Calif., assignor to Technicolor Motion Picture Corporation, Hollywood, Calif., a corporation of Maine
Application August 2, 1946, Serial No. 687,888
14 Claims. (Cl. 271—2.3)

1. For handling cinematographic film having a row of sprocket holes along each margin, apparatus comprising two carriers movable independently of each other along parallel paths, each carrier having teeth engageable in the sprocket holes of one of said rows, means for driving one carrier, and means for synchronizing the other carrier with the driven carrier, the synchronizing means having a row of sprocket holes for each of said rows of teeth, the holes of the row for the driven carrier being enlarged in the direction opposite to the direction of film travel and the holes of the other row being enlarged in the direction of film travel.



2,453,032
EMERGENCY TELEPHONE CALL AND CIRCUIT THEREFOR
Joseph Palumbo, Bronx, N. Y.
Application May 1, 1945, Serial No. 591,274
5 Claims. (Cl. 179—81)

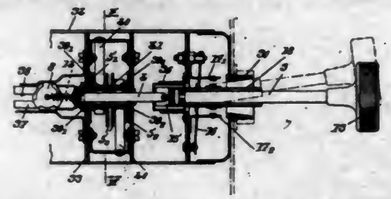
1. The combination with a telephone receiver having a calling circuit and a calling bell energized thereby and a talking circuit with a switch operated by the withdrawal of the receiver therefrom, of means for supplying current to the calling circuit to energize the calling bell or to the talking circuit when the receiver is disengaged from said switch, and connections between the calling circuit and the talking circuit for energizing the calling bell when the receiver is disengaged from the said switch, said connections including means for supplying excess current to said talking circuit and a switch arranged to close the calling circuit when said excess current is supplied to the talking circuit.

2,453,033
VACUUM DRYING APPARATUS USING A REFRIGERANT SYSTEM FOR HEATING AND COOLING
Veit C. Patterson, York, Pa., assignor to York Corporation, York, Pa., a corporation of Delaware
Application March 8, 1945, Serial No. 581,645
6 Claims. (Cl. 34—76)

1. A plant for drying from the frozen state, comprising a closed drying chamber; a mechanical refrigerative circuit containing a volatile refrigerant and having a high side, and a low side, the latter of which includes low temperature refrigerative evaporator means having heat exchange surface exposed to vapors evolved in said chamber; evacuating means for withdrawing noncondensible gases from said chamber; a heat exchanger affording within said chamber at least one heat exchange surface for sustaining material to

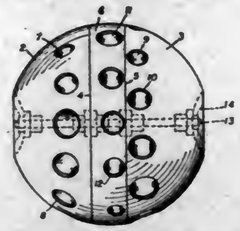
be dried; means for circulating a heat conveying liquid, said liquid being compatible with the refrigerant used in said refrigerating circuit; and valve means operable to connect the last named heat exchanger selectively in circuit with said circulating means, or in said refrigerative circuit as a portion of the low side thereof, and alternatively to interrupt said connections and drain said heat exchanger.

2,453,034
FASTENING MEANS
Ernest Pizzarelli, New York, N. Y.
Application November 23, 1945, Serial No. 630,214
3 Claims. (Cl. 24—12)



1. Fastening means for a tubular instrument comprising the combination of: the wall of the instrument; a clip attached to the wall; a spring extending upwardly within the instrument in the line of the clip and attached at its base to the aforesaid wall; means at the upper free end of the spring extending through and beyond an orifice in the wall and above the point of attachment of the clip thereto whereby the spring may be actuated; and a pin attached to the spring extending through and beyond an orifice in the wall at a point between the lower end of the clip and the point of its attachment to the wall.

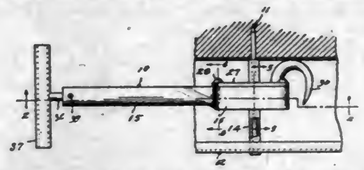
2,453,035
MULTIPLE FUNCTION SWITCH
Louis Emile Ponsy, Clichy, France, assignor to "Silto S. A.," Paris, France, a society of France
Application April 9, 1947, Serial No. 740,415
In France January 4, 1947
9 Claims. (Cl. 200—4)



1. A multiple function switch which comprises, in combination, a frame, a plurality of contact

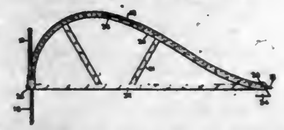
elements carried by said frame, a spindle movable with respect to said frame with both rotary displacements about its axis and translatory displacements along said axis, contact elements carried by said spindle adapted to cooperate with said first mentioned contact elements, respectively, in different ways according to the position

of said spindle with respect to said frame, a member for controlling said spindle, said control member being connected with said spindle so as to be movable transversely to the axis thereof, and supplementary contacts carried by said frame operative by said control member in response to transverse displacements thereof with respect to said axis.



2,453,036
GRIP MEASURING BALL FOR BOWLERS
Henry Reitsma, Hackensack, N. J., assignor of one-half to Jack G. Hunter, Ridgewood, N. J.
Application March 6, 1947, Serial No. 732,839
2 Claims. (Cl. 33—174)

1. A grip measuring device for bowlers comprising a ball including a pair of side segmental sections with flat sides facing, a diametrical flat sided intermediate section interposed between said side sections, a bolt extending axially through said sections with end nuts thereon and upon which said sections are relatively rotatable into different set positions established by tightening of said nuts, one of said side sections being provided with a circular series of thumb grip holes therein, the other side section and said intermediate section having respectively a circular series of finger grip holes therein, the holes in said series being of different diameters in each series to accommodate thumbs and fingers of different sizes and the series of holes in the side sections being differently spaced from the sides of said intermediate section, whereby in different set positions of said sections plural hole combination grips may be attained with finger grip holes therein spaced closer together laterally than to a thumb grip hole and the holes in each combination varying in size relatively.

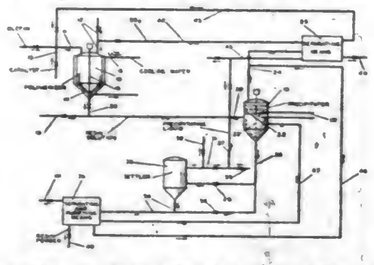


2,453,037
NAIL PULLER
Carl W. Reynolds, Barboursville, W. Va.
Application April 29, 1946, Serial No. 665,826
3 Claims. (Cl. 254—21)

1. A nail puller comprising a tubular handle, an enlarged side opening puller head at one end of said handle, said head formed with a recess opening through the bottom thereof, a side on said head having a rabbeted guide formed thereon, the lower end of said head providing a fixed clamping jaw, an upwardly extending lug on said lower end on the open side thereof, a U-shaped cover plate for said head for covering said recess, the leg of said cover plate overlapping the lower end of said head being formed with a knife edge,

a sliding jaw in said head, slidable between said upper and lower ends and between said rabbeted guide and said cover plate for clamping a nail between said fixed and movable jaws and said knife edge, a screw rotatably secured to said sliding jaw and extending through said handle, cooperating threads on said screw and said handle for moving said screw and said sliding jaw, and a transverse handle fixed to said screw extending from said handle for rotating said screw.

2,453,038
ONE-PIECE SUCKER ROD
Peter F. Rossmann, Morristown, N. J.
Application May 5, 1945, Serial No. 592,229
2 Claims. (Cl. 255—11)

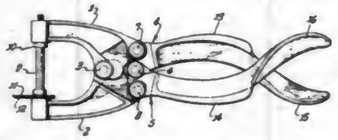


1. Apparatus for guiding a long continuous sucker rod from a horizontal position on the ground into its operative position depending vertically in a well, comprising a cradle having a horizontally disposed intake end for receiving the rod and a vertically disposed discharge end for guiding the rod into the well, and cradle portion between said intake and discharge ends defining a continuous curve gradually curving upward from its intake end to a point of maximum elevation and curving from said point of maximum elevation downwardly to its discharge end, said downward curve being more sharply defined than its upward curve end within the elastic limit of said rod, said downwardly curved end of the cradle being pivotally mounted to rock about a horizontal axis to reciprocate said end and that part of the rod carried thereby to cause said sucker rod to function, and means for rocking said cradle.

2,453,039
MANUFACTURE OF RESINS FROM SULFUR DIOXIDE AND UNSATURATED ORGANIC COMPOUNDS
Allison K. Scribner and Frank W. Wilder, Portsmouth, Va., assignors, by mesne assignments, to Phillips Petroleum Company, a corporation of Delaware
Application August 23, 1943, Serial No. 499,713
5 Claims. (Cl. 260—94.5)

1. The process of making a sulfur dioxide-olefin resin in the form of a finely divided powder suitable for molding, without mechanical grinding, which comprises reacting a mixture of 50 weight

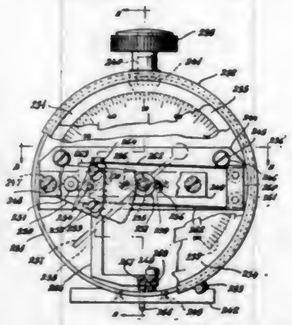
per cent of propylene, 33 weight per cent of butene-2 and 17 weight per cent of butene-1 with liquid anhydrous sulfur dioxide, sulfur dioxide being present in an amount ranging from 15 to 20 times by weight the amount of said olefins at a temperature of from 80° F. to 105° F. and under pressure until 75 per cent of said olefins have reacted with sulfur dioxide to form a heteropolymeric resin dissolved in the excess of liquid sulfur dioxide, the solution being a free-flowing liquid having a viscosity similar to that of SAE 30 lubricating oil, withdrawing said solution from the reaction zone, rapidly and intimately and with vigorous agitation mixing a stream of said solu-



tion with a mechanically vigorously agitated body of water maintained at a temperature of from 90 to 120° F. and of a volume sufficiently large that the resin is precipitated in finely divided solid form to form a pumpable mobile slurry, effecting said mixing at substantially atmospheric pressure such that a major portion of the sulfur dioxide is vaporized and immediately removed from the resulting slurry of water and precipitated resin, settling said slurry and thereby separating same into the bulk of the water and relatively concentrated slurry, and subjecting said concentrated slurry to drying to produce a dry finely divided powdered resin as the final product of the process.

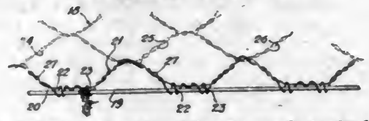
2,453,040
ART OF TREATING LEAFY VEGETABLES
Jagan N. Sharma, Los Angeles, Calif., assignor of 9/100 to William H. Wilson, 9/100 to Annetta E. Wilson, 9/100 to Nancy J. Doyle, 9/100 to William H. Wilson, Jr., 9/100 to Robert M. Wilson, and 5/100 to A. H. Wilson
No Drawing. Application April 9, 1945, Serial No. 587,440
11 Claims. (Cl. 99—193)

1. In a method of inhibiting the discoloration of butt ends of lettuce during shipment and the development of detrimental plasmolysis after the lettuce is unpacked at its destination, the step of: subjecting the butts of lettuce to contact with a substantially neutral aqueous solution containing from about 0.04% to 1.0% of formaldehyde, during shipment under refrigerated conditions.



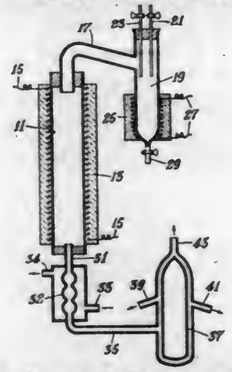
2,453,041
SELF-LOCKING PLIERS WITH CROSSED HANDLES
William A. Sharp, National City, Calif., assignor to Solar Aircraft Company, San Diego, Calif., a corporation of California
Application June 7, 1944, Serial No. 539,145
2 Claims. (Cl. 81—46)

1. A self-locking plier comprising: a pair of jaw members and means hingedly connecting them together for opening and closing movement; a pair of handles and means connecting them to each other for swinging movement between open and closed positions; means coupling said handles to said jaw members for closing the jaw members in response to squeezing of said handles together, said means being so constructed and arranged that squeezing of said handles together into a predetermined position locks the handles against opening movement by an opening force applied to said jaw members;



and said handles having extensions thereon constituting auxiliary hand grips, said extensions being of shape such that they cross each other and separate when said handles are squeezed together into said predetermined position, whereby said handles can be moved out of fully closed position and unlocked by squeezing said hand grips together.

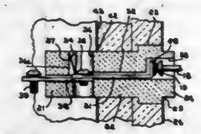
2,453,042
GAUGE FOR MEASURING AND INDICATING THE HARDNESS OF VARIOUS SUBSTANCES
William F. Shore, Freeport, N. Y.
Application February 27, 1946, Serial No. 650,449
7 Claims. (Cl. 73—81)



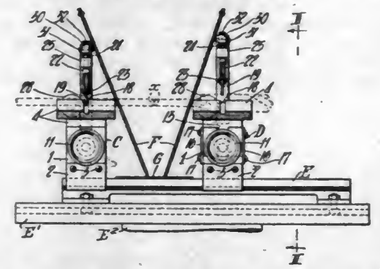
1. In a gauge for measuring the hardness of substances, a support, a leaf spring member anchored at one end on the support, a member mounted on the free end of the spring member, a penetrator mounted on the member and urged by the spring member to predetermined position with the penetrator extending in a direction transversely and intermediate the ends of the spring member, a graduated dial fixed on the support, a pointer rotatable relative to the dial and yieldingly urged to zero position, said support adapted to forcibly impress the penetrator against the substance the hardness of which is to be tested, the penetrator having movement relative to the support against the tension of and increase the tension of the spring member proportional to the resistance of said substance to the penetration thereof by the penetrator and the support having movement relative to the penetrator toward the substance, and means to actuate the pointer relative to the dial from and in predetermined ratio to the movement of the penetrator and support relative to each other and indicate on the dial the pressure resisted by the substance to the penetration thereof by the penetrator.

2,453,043
HAIR NET
Nathan L. Solomon, Englewood, N. J.
Application November 15, 1945, Serial No. 628,810
3 Claims. (Cl. 87—2)

1. A hair net comprising a mesh body having scalloped-like edge portions forming boundary side edges of the resulting net, extensible strands arranged along said boundary edges, said mesh body being composed of warp and bobbin strands, and said boundary edges including bobbin strands having reinforcing characteristics looped around said extensible strands a plurality of times at each scallop of the edge portions in supporting said extensible strands at the boundary edges of said net.



2,453,044
PROCESS FOR PRODUCING CYCLOPENTADIENE AND ITS HOMOLOGUES
Charles Eugene Staff, Charleston, W. Va., assignor to Carbide and Carbon Chemicals Corporation, a corporation of New York
Application August 11, 1939, Serial No. 289,590
15 Claims. (Cl. 260—666)



8. Process for producing a cyclopentadiene, which comprises continuously dispersing a flowing stream of superheated vapors of a dicyclopentadiene in a non-liquid fluid inert thereto, while at a temperature below that at which substantial polymerization of the dicyclopentadiene occurs, rapidly conducting a flowing stream of the dispersed superheated dicyclopentadiene vapors through a depolymerization zone maintained at a high temperature within the range between around 200° C. and 800° C., thereby depolymerizing the dicyclopentadiene and forming the corresponding monomer, and immediately thereafter cooling said stream of vapors and isolating said monomer, thereby inhibiting further polymerization of the dicyclopentadiene and substantial further cracking of said monomer.

2,453,045
ELECTRIC TERMINAL RECEPTACLE
Ernest E. Sutherland, Mansfield, Ohio, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa., a corporation of Pennsylvania
Application September 30, 1943, Serial No. 504,371
5 Claims. (Cl. 173—332)

5. A terminal receptacle comprising a block of insulating material having an opening therethrough, a rigid conductor slidably received in said opening, a contact carried by said conductor adjacent one end of said opening, and a spring member detachably secured to said conductor adjacent the other end of said opening, said spring member engaging said block to bias said conductor in a direction to yieldingly resist movement by a terminal moved into engagement with said contact to provide suitable pressure between the terminal and said contact, said contact and said conductor being removable from said opening at said one end, and said spring member being accessible from said other end of said opening.

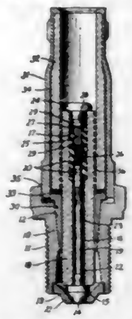
2,453,046
WELDING JIG FOR BROKEN DRILLS
Willard J. Sutton, Gary, Ind.
Application April 5, 1946, Serial No. 659,935
2 Claims. (Cl. 113—99)

1. A jig for holding metal work pieces in alignment for welding comprising a bed, a first upright stand fixed to said bed, a second upright stand slidably carried by said bed and being freely movable toward and away from said first stand, a jaw fixed to one of said stands and having a work receiving notch, a jaw carried by the other stand for vertical adjustment and having a work receiving notch, rack and pinion means and clamp means carried by the stand having the adjustable jaw for effecting adjustment of this jaw and fixing its position, posts carried by each of said stands for vertical adjustment and having arms overhanging the work receiving notches of said jaws, work clamps carried by said arms and being cooperable with said jaws for clamping work pieces, and fingers fulcrumed to said arms for engaging and releasing said work clamps from the work piece.

2,453,047
SHEET MATERIAL DISPLAY DEVICE
John Austin Taylor, Elmhurst, N. Y., assignor to Heinz Art Service, New York, N. Y.
Application May 4, 1946, Serial No. 667,455
3 Claims. (Cl. 40—126)

1. A display device which comprises a sheet foldable along a vertical central line at a divergent angle to form side walls, a central portion thereof bendable forward at a convergent angle to form intermediate walls, tongue and slit means on the sheet to hold the portions in their folded position, a bracing member foldable in a zig-zag

manner and disposed along the lower portion of the sheet extending between the side walls thereof and tongue and slit connections for connect-



ing the ends of the bracing member to the side walls and its middle to one of the intermediate walls.

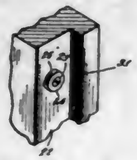
2,453,048

SPARK PLUG AND METHOD OF MAKING THE SAME

Tullio Tognola and Louis H. Segall, Sidney, N. Y., assignor to Bendix Aviation Corporation, New York, N. Y., a corporation of Delaware

Application July 13, 1943, Serial No. 494,516
17 Claims. (Cl. 123—169)

1. A spark plug comprising a cylinder engaging shell, a ground electrode secured in said shell, a center electrode assembly comprising a rigid tubular insulator, a metallic conducting spindle in said insulator, said spindle terminating at one end intermediate the ends of said insulator and having an enlarged head portion at the other end thereof in spark gap relation with said ground electrode and in engagement with a laterally extending surface of said insulator, radially yieldable means, such as a plurality of layers of metallic sheet material, surrounding a portion of said spindle for centering the same in the bore of said insulator, a metallic terminal extending into the bore of said insulator, a rigid mass of non-conducting filling material comprising aluminum oxide and lead oxide in the bore of said insulator between said terminal and spindle, said mass having interlocking relation with said terminal and spindle, conducting means embedded in said mass for electrically connecting said terminal and spindle, said conducting means including an electrical resistor having a resistance in excess of 75 ohms and a wire of small diameter, a tapered sleeve of deformable metal wedged between said insulator and a tapered internal wall of said shell for supporting said electrode assembly in said shell, and means secured in said shell for holding said sleeve against movement out of said shell, said last-named means comprising a metallic shielding barrel and an insulating liner therefor, said liner including a rigid insulating tube placed end to end with at least one slightly yieldable insulating washer and a filling of sheet material for centering said rigid tube in said barrel.



15. The method of making a spark plug which includes the steps of molding a tubular insulator, making a metallic electrode having a spindle, wrapping a plurality of layers of metallic sheet material around at least a portion of said spindle, securing a fine, electrically conductive wire to one end of said spindle, inserting said spindle in the bore of said insulator with said sheet material in close contact with the walls of said bore and with said wire extending from one end of said bore, filling the bore of said insulator around said wire and a portion of said spindle with a powdered mixture of insulating materials having different melting temperatures, heating said mixture to a temperature equal to at least the melting temperature of the component of said mixture having the lowest melting temperature, and inserting electrically conductive terminal means into said bore in contact with said wire to embed at least a portion of said terminal means in said insulating mixture, and thereafter permitting said mixture to cool and solidify.

2,453,049

DOOR-SAG CORRECTING MECHANISM

David P. Triller, Indianapolis, Ind.

Application April 22, 1947, Serial No. 743,142
14 Claims. (Cl. 16—82)

1. A door guide for use with a door and its frame comprising an element mounted on the free vertical edge of such door and an element mounted on the associated edge of the door frame in position to be engaged by said door-mounted element, as the door approaches closed position, one of said elements being adjustably mounted upon an eccentric horizontal axis.

2,453,050

PROCESS OF SMELTING TITANIFEROUS ORE

Forrest L. Turbett, Joplin, Mo., assignor to The Eagle-Picher Company, a corporation of Ohio

No Drawing. Application February 25, 1944, Serial No. 523,931
6 Claims. (Cl. 75—30)

1. The process of smelting titaniferous iron ore which comprises subdividing the ore, mixing therewith finely-divided coking coal and a minor proportion of a solid, non-siliceous alkali-metal compound giving a fusible slag, then reducing the ore and coking the coal to form an iron sodium titanate dispersion in a mechanically strong form of carbon, adding a substantial proportion of a flux consisting essentially of an alkaline-earth-metal compound, then separating the iron from the coke by burning out the latter thereby reaching a temperature above the melting point of the iron, and then separating the molten iron from the generated slag.

2,453,051

BATHING TRUNKS

Umberto Vacca, Brooklyn, N. Y.

Application September 25, 1946, Serial No. 699,247
5 Claims. (Cl. 2—67)

5. A pants form of garment comprising a back panel, a front panel of approximately the same width as the back panel and a crotch portion connecting the front and back panels, a relatively long triangular member upon each side of the back panel, each member being secured along the base edge of the triangle to a side edge of the back panel with the back edge of the triangle forming a continuation of the top edge of the back panel, said triangular members being of substantial length whereby they are adapted to be disposed one over the other across the front side of the front panel, means for attaching the triangular members to the front panel, and means for securing the triangular members one to the other.

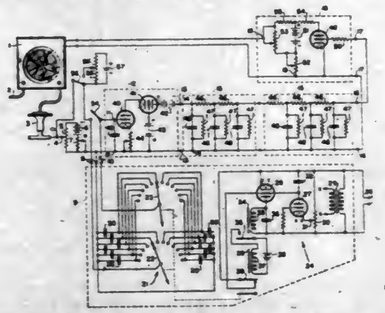
2,453,052

STAIN RESISTANT PLASTICIZED POLYVINYL CHLORIDE RESIN COATINGS

Howard A. Van Etten, Newburgh, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

Application July 3, 1946, Serial No. 681,407
7 Claims. (Cl. 117—76)

1. A supple stratified film comprising a plurality of strata each containing a polyvinyl chloride resin, one of the said strata containing polypropylene glycol sebacate as a plasticizer for the resin, and the other strata containing chlorinated paraffin as a plasticizer for the resin.



2,453,053

ANALYZING APPARATUS

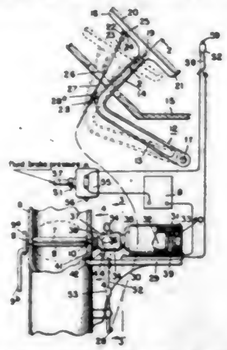
William H. Wannamaker, Jr., Flourtown, Pa., assignor to The Brown Instrument Company, Philadelphia, Pa., a corporation of Pennsylvania

Application March 27, 1945, Serial No. 585,125
3 Claims. (Cl. 320—1)

1. Means operable after the lapse of an adjustable time interval to transfer a voltage from a first pair of terminals in an electrical network to a second pair of terminals therein comprising a plurality of condensers having a common terminal, a multiple contact switch having two sections each provided with a switch arm and an associated plurality of contact points each of which is connected to an individual one of the other terminals of said condensers, means connecting said first pair of terminals between one of said switch arms and said common terminal of said condensers, means connecting said second pair of terminals to the other switch arm and said common terminal of said condensers, said switch arms being so arranged with respect to each other and their associated switch sections that said one switch arm connects said first pair of terminals to each of said condensers before said second switch arm connects each of said condensers to said second pair of terminals, and means to cause said switch arms to successively engage each of the contact points on their associated switch sections comprising a plurality of electronic valves, each of said valves having an input circuit and an output circuit, a source of

power for supplying alternating current to said electronic valves, means for so connecting said electronic valves to said source that one of said valves is operative on only one half cycle of said alternating current while another of said valves is operative on only the alternate half cycles, adjustable bias means connected in the input circuit of said one valve, a condenser connected in the output circuit of said one valve, the input circuit of said other valve being connected across said condenser, a relay having an operating winding connected in the output circuit of said other valve, a movable member actuable from one position to another and operative when actuated to advance each of said switch arms from one contact point on its associated switch section to an adjacent contact point, a second relay controlled by said first mentioned relay to actuate said movable member, and switch means operated in unison with said armature to shunt the condenser in the output circuit of said one device when said movable member is in one of said positions.

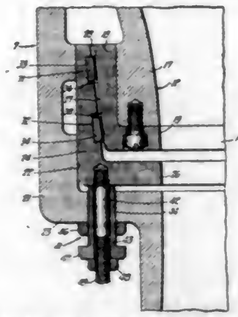
2,453,054



COMBINATION BRAKE PEDAL AND THROTTLE

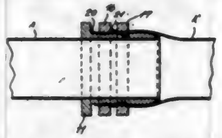
Richard Eldridge Whiffen, Hammonton, N. J.

Application July 18, 1947, Serial No. 761,824
7 Claims. (Cl. 192—3)



7. In a motor vehicle control device, a throttle valve, a brake lever, a foot pedal pivotally mounted on said brake lever, a solenoid having a rotatable and slidable core, clutch means having a driving and a driven element, the driving element of said clutch means and the core of said solenoid being formed as a unit, a Bowden wire motion transmitting device, one end of said Bowden wire being connected to said brake lever and said foot pedal so that pivotal movement of said

foot pedal with respect to said brake lever will transmit motion to the other end of said Bowden wire, means to connect said other end of said Bowden wire to the driving element of said clutch means so as to rotate said driving element, means operatively connecting the driven element of said clutch means and said throttle valve, resilient means normally urging said clutch means into engagement, said solenoid arranged to oppose the resilient means when energized to disengage the



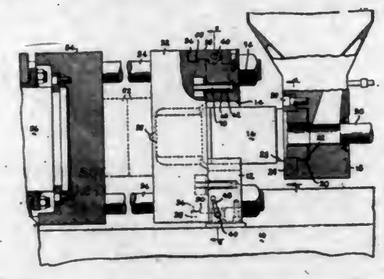
clutch, an electric circuit including a source of electricity, a foot switch, and a hand switch connected to said solenoid, said foot switch being arranged so as to be responsive to application of the vehicle brakes to cause said solenoid to be energized to disengage said clutch means, said hand switch thereafter being operable to de-energize said solenoid to permit re-engagement of said clutch means while said brakes are applied.

2,453,055
TURBINE SEAL
Ira Morgan White, Walnut Creek, and Hilding E. Nelson, San Francisco, Calif., assignors to The Pelton Water Wheel Company, San Francisco, Calif., a corporation of California
Application July 29, 1946, Serial No. 686,998
1 Claim. (Cl. 286—7)

A hydraulic turbine seal comprising a turbine casing having a cylindrical inner wall and an adjacent radial wall merging with a smaller cylindrical wall, a sealing annulus in said casing slidable on said inner wall and having a radial flange adjacent said radial wall and terminating in registry with said smaller cylindrical wall, said annulus having a conical inner surface, a turbine runner in said casing having a cylindrical outer surface and an inner surface in registry with said smaller cylindrical wall, a second annulus engaging said runner outer surface and having a radial flange terminating in registry with said smaller cylindrical surface, said second annulus having a conical outer surface, and means extending through said radial wall of said casing and engaging said sealing annulus for sliding said sealing annulus toward and away from said second annulus in response to manipulation outside said casing.

2,453,056
SURGICAL ANASTOMOSIS APPARATUS AND METHOD
William Edwin Zack, Berwyn, Ill.
Application March 12, 1947, Serial No. 734,032
12 Claims. (Cl. 128—334)

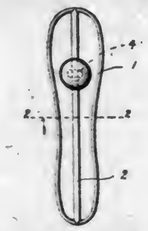
1. In a device of the character described, an anastomosis tube having a pair of annular spaced-apart peripheral grooves, a ring-like clamping member movable onto said tube and admeasured to be moved into and retained in one of said grooves, and a second ring-like clamping member movable onto said tube and admeasured to be moved into and retained in the other of said grooves.



2,453,057
N-MONOFORMYL-N,N'-DISUBSTITUTED ETHYLENEDIAMINES
Ferdinand B. Zienty, St. Louis, Mo., assignor to Monsanto Chemical Company, St. Louis, Mo., a corporation of Delaware
No Drawing. Application June 11, 1945, Serial No. 598,923
12 Claims. (Cl. 260—561)

1. A method of preparing an N-monoformyl derivative of an N,N'-di-substituted ethylenediamine comprising heating in a reaction zone formic acid and an ethylenediamine selected from the group consisting of N,N'-dialkyl ethylenediamines, N,N' - diaralkyl ethylenediamines, N,N'-diaryl ethylenediamines and N,N'-dicycloalkyl ethylenediamines at a temperature at which substantially one mole of water splits off from the reactants for each mole of said ethylenediamine, retaining said water in said reaction zone during the course of the reaction and subsequently recovering said N-formyl derivative from the reaction mixture.

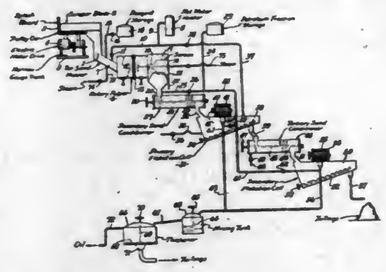
7. As a new composition of matter an N-monoformyl derivative of an N,N'-di-substituted ethylenediamine selected from the group consisting of N,N'-dialkyl ethylenediamines, N,N'-diaralkyl ethylenediamines, N,N'-diaryl ethylenediamines and N,N'-dicycloalkyl ethylene diamines.



2,453,058
INJECTION MACHINE
Bernard D. Ashbaugh, Mount Gilead, Ohio, assignor to H-P-M Development Corporation, Wilmington, Del., a corporation of Delaware
Application April 13, 1945, Serial No. 588,128
6 Claims. (Cl. 18—30)

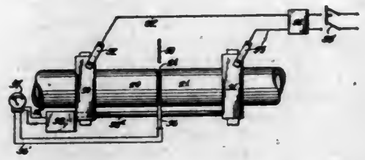
2. The combination in an injection molding machine of a bed, a stationary bolster plate mounted on said bed, a transverse notch in said bolster plate, a mold carrying plate adjacent said bolster plate having a recess therein; a heating chamber detachably carried by said injection machine and extending into said notch and recess; telescoping plunger means carried by said bolster plate and abutting said mold carrying plate and operable by pressure fluid for urging said plates apart; means carried by said bolster plate and

in engagement with said mold carrying plate for limiting the spacing movement of said plates; and means for disengaging said last mentioned means whereby said mold carrying plate may be spaced away from said bolster plate and beyond the end of said heating chamber.



2,453,059
STOCKING STRETCHER
Walter L. Bannister, Fort William, Ontario, Canada, assignor to Leonard W. Bennett, Port Arthur, Ontario, Canada
Application January 25, 1947, Serial No. 724,417
4 Claims. (Cl. 223—75)

1. A device for drying and stretching a stocking comprising: an elongated substantially oval shaped body portion, an axially disposed sustaining member fixed to said body portion longitudinally thereof, and a heel engaging ball slidably carried on said sustaining member and adapted to be frictionally held in place thereon by said stocking when it is stretched thereon.



2,453,060
PROCESS AND APPARATUS FOR TREATING BITUMINOUS SANDS
Robert F. Bauer and Harold J. Matthews, Los Angeles, Calif., assignors to Union Oil Company of California, Los Angeles, Calif., a corporation of California
Application August 26, 1944, Serial No. 551,364
2 Claims. (Cl. 196—14)

2. A process for treating bituminous sands to separately recover the bitumen and the bitumen-free sand therefrom which comprises introducing bituminous sands, conditioning reagent, hot water and steam into a rotary pulper and sand conditioner having means for agitating and pulverizing said bituminous sands, disintegrating said bituminous sands therein and thereby forming a pulp comprising disintegrated bituminous sands and water; segregating foreign matter from said pulp and cascading said pulp into a secondary sand conditioner having means for agitating said pulp, introducing into said secondary sand conditioner a solvent adapted to dissolve bitumen, agitating and aerating the mixture of pulp and solvent; cascading the agitated and aerated mixture of pulp and solvent into a primary flotation cell containing water; skimming a froth comprising bitumen and solvent from the surface of the water in said primary flotation cell; cascading bituminous sand slurry from the bottom of said pri-

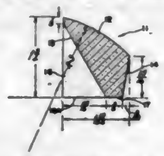
mary flotation cell into a tertiary sand conditioner, and agitating and aerating said sand slurry; cascading the aerated bituminous sand slurry into a secondary flotation cell containing water; skimming a froth comprising bitumen and solvent from the surface of the water in said secondary flotation cell and removing clean sand particles from the bottom of said secondary flotation cell.

2,453,061
ELECTRIC RESISTANCE AND FILLER METAL BUTT WELDING
Herbert A. Bissout, Merchantville, N. J., and William Y. Borresen, Philadelphia, Pa., assignors to W. K. Mitchell & Company, Inc., Philadelphia, Pa., a corporation of Pennsylvania
Application May 27, 1943, Serial No. 488,658
2 Claims. (Cl. 219—10)

1. The process of butt welding transverse joints in metallic tubular members, which consists in forming thin opposing lips at the extreme inner circumferential edge of a transverse joint and cutting away outer metal adjacent these lips to form the bottom of a weld groove about the weld edges of the members, placing said lips in opposed contact, passing electric current across the joint to heat the lips to welding temperature, pressing the lips one against the other beginning when they are at welding temperature, to pressure weld them, and filling in the circumferential space about the pipe with added weld metal while keeping the lips intact at the inside of the weld and continuing to pass electric current through the lips and the accumulating filling within the circumferential space while further filling said space.

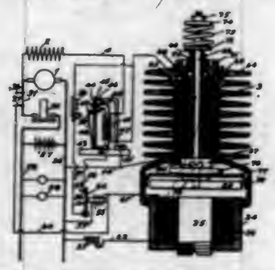
2,453,062
PRODUCTION OF ALKYLENE CYANOHYDRINS
Erwin L. Carpenter, Stamford, Conn., assignor to American Cyanamid Company, New York, N. Y., a corporation of Maine
Application June 4, 1946, Serial No. 674,199
8 Claims. (Cl. 260—465.6)

1. A method of producing an alkylene cyanohydrin which includes the steps of reacting together an alkylene oxide and hydrocyanic acid in aqueous solution in the presence of a sterically hindered amine catalyst, simultaneously removing the amine catalyst and water, and subsequently recovering the thus formed alkylene cyanohydrin.



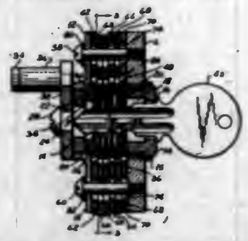
2,453,063
UNDERGARMENT
Frank A. Cohen, Brooklyn, N. Y.
Application February 15, 1946, Serial No. 647,948
1 Claim. (Cl. 2—38)

A fig leaf pantie girdle comprising a tubular form shaping and constricting portion with a deep central convex notch at the lower edge of the front of said portion and a similar notch at the lower edge of the back of said portion, a crotch element of soft material adapted to extend from the front to the back of the girdle in the form of an arch at the crotch, with the opposite edges of the element at said notches, a pair of completely separable slide fasteners to connect the mentioned edges of said elements to the edges of said notches, each of said slide fasteners including a slider and a pair of stringers, one of the stringers being attached to the crotch element and the other to the form shaping and constricting portion, the sliders being captively secured to the form shaping and constricting portion, means to cover the surfaces of each of the slide fasteners at the inside of the girdle, said last named means including two pairs of overlapping tapes, one tape of each pair being attached to the crotch element and the other tape of each pair being attached to the form shaping and constricting portion, both tapes of each pair being disposed alongside the associated slide fastener, and snap fastener means on tapes of each pair to detachably connect said tapes to one another, said snap fastener means being located adjacent the end of each slide fastener where interlocking starts.



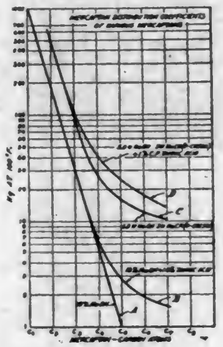
2,453,064
MAGNIFYING READING UNIT
George M. Cressaty, New York, N. Y.
Application February 5, 1945, Serial No. 576,178
6 Claims. (Cl. 88—39)

6. A reading lens comprising a supporting surface elongated from side to side, adapted to rest on a reading plane forward of the reading matter, a planar surface extending upwardly and rearwardly from the rear edge of the supporting surface for refracting light rays received from the reading matter, a second obturating surface extending upwardly from the forward edge of said supporting surface, a curved upper surface extending downwardly and forwardly between said two upwardly directed surfaces for magifying the reading matter, and triangular lugs formed



at the sides of said supporting surface in continuation thereof rearwardly over the reading matter and extending upwardly to said planar surface to prevent tilting of the lens with respect to the reading plane.

2,453,065
ELECTRIC REGULATION
John L. Creveling, near Tucson, Ariz.
Application November 15, 1944, Serial No. 563,502
22 Claims. (Cl. 322—82)



1. Regulating means including a regulating element, means tending to decrease the resistance of said element, automatic electromagnetic means having an air gap for moving said element and the resistance decreasing means a predetermined distance functionally to affect the automatic means by changing the length of the air gap without materially affecting the resistance of said element and means whereby further movement of a portion of the resistance decreasing means increases the resistance of said element.

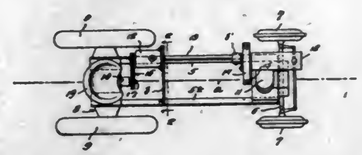
2,453,066
CHANGEABLE KEY CYLINDER LOCK
Christian Gabrielsen, Whippany, N. J., assignor to The Rowe Manufacturing Co., Inc., Whippany, N. J., a corporation of New York
Application February 21, 1947, Serial No. 730,057
12 Claims. (Cl. 70—385)

1. A lock, including in combination a body member, a cylinder rotatably mounted in said body member, a bore formed in said cylinder extending transversely of its axis of rotation, a plurality of tumblers movably mounted in said bore, a corresponding plurality of locking plates, means for releaseably securing said locking plates to said body member, each of said locking plates being formed with an opening, said cylinder being positioned to extend through the locking plate openings, said tumblers and said plates having coacting inter-engaging portions, biasing means normally urging said coacting portions into engagement whereby to immobilize said cylinder, said tumblers being formed with key engaging means permitting a key of predetermined contour to move said tumblers against the action of said biasing means to free said coacting means whereby said cylinder may be rotated.

2,453,067
METHOD FOR REDUCING THE MERCAPTAN SULFUR CONTENT OF HYDROCARBON OILS
John Happel, Brooklyn, and Stephen P. Cauley, Jackson Heights, N. Y., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
Application June 11, 1943, Serial No. 490,492
5 Claims. (Cl. 196—30)

1. That method of treating a light petroleum fraction to reduce the mercaptan sulfur content thereof comprising contacting the petroleum fraction with an aqueous alkali metal hydroxide to which there has been added a solubility promoter other than tannic acid capable of increasing the ability of the hydroxide to dissolve mercaptans, and to which there has also been added a small amount of tannic acid sufficient to further increase the mercaptan removal ability of the hydroxide more than additive and separating the oil from the mercaptan containing reagent

---



2,453,068
APPARATUS FOR DEPOSITING MATERIAL IN WELL HOLES
James D. Haynes, Kilgore, Tex., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Delaware
Application January 8, 1945, Serial No. 571,738
11 Claims. (Cl. 166—19)

1. A bailer for depositing a liquid in a well comprising in combination a container for the liquid, said container having a discharge port in the bottom; a piston operable in the container for expelling the liquid therefrom; a piston rod having one end attached to the piston to operate the same; latch means adapted to engage the piston rod to prevent longitudinal outward movement of the piston rod relative to the container; latch release means adapted to disengage the latch means from the piston rod; a tail pipe adapted to receive and discharge liquid from the container; and a discharge valve linked to the tail pipe and

adapted to control the flow of fluid from the cylinder to the tail pipe through said discharge port, said discharge valve being operable by longitudinal movement of the said ~~tail~~ pipe relative to the container.

2,453,069
POWER PLANT AND TRANSMISSION ARRANGEMENT FOR AGRICULTURAL TRACTORS
Herschel Hutchings, Lubbock, Tex.
Application December 9, 1946, Serial No. 714,954
1 Claim. (Cl. 180—1)

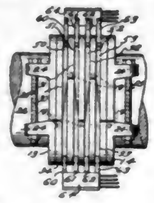
An agricultural tractor including an open frame having side rails and provided with front steering and supporting wheels, a power plant supported by the forward end of the frame centrally between said wheels and having a drive shaft located substantially at the longitudinal center of the tractor, a rear axle structure supporting the rear end of the frame and including rear drive wheels and a differential assembly having a drive shaft located substantially at the longitudinal center of the tractor, a propeller shaft assembly and a transmission assembly directly connected together and supported by and above one of said side rails to one side of said center, a gearing connecting the propeller shaft assembly with the drive shaft of said power plant, a second gearing connecting the transmission assembly with the differential assembly, a transverse supporting bracket secured on said side rails and having an upward extension at one end disposed above said one side rail and fixed to the front of said transmission assembly, and a driver's seat supported on the differential assembly between the drive wheels.

2,453,070
ORGANIC PEROXIDE COMPOSITION
Harlow G. Hyatt, Buffalo, and Edward S. Shanley, Kenmore, N. Y., assignors to Buffalo Electro-Chemical Company, Inc., Tonawanda, N. Y.
No Drawing. Application August 23, 1944, Serial No. 550,846
10 Claims. (Cl. 260—610)

1. A solid organic peroxide desensitized against mechanical and thermal shock by addition thereto of 2 to 10% of a relatively water insoluble aliphatic fatty carboxylic acid.

2,453,071
DESENSITIZATION OF SOLID ORGANIC PEROXIDES
Harlow G. Hyatt, Buffalo, and Edward S. Shanley, Kenmore, N. Y., assignors to Buffalo Electro-Chemical Company, Inc., Tonawanda, N. Y.
No Drawing. Application January 27, 1945, Serial No. 574,971
8 Claims. (Cl. 260—610)

1. The method of reducing the impact sensitivity of a solid organic peroxide with calcium sulfate desensitizer which comprises suspending the peroxide in a solution of a soluble calcium salt and adding thereto a soluble sulfate to form insoluble calcium sulfate which mingles with and coats the peroxide, the amount of desensitizer being very substantially less than that required to effect a like desensitizing action when milled with the peroxide.

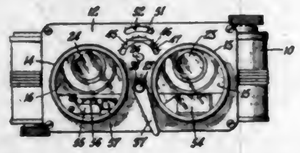


2,453,072
ADJUSTABLE ECCENTRIC
Ralph E. Johnson, Rahway, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a corporation of New Jersey
Application April 24, 1947, Serial No. 743,583
10 Claims. (Cl. 74—571)

1. In a sewing machine having a frame, a shaft rotatably mounted in said frame, and mechanism adapted to be actuated by said shaft; an adjustable eccentric unit comprising a plurality of eccentrically apertured cylindrical elements fitted one within the other upon said shaft, releasable means for holding said shaft and cylindrical elements in fixed angular relation, and unitary adjusting mechanism for said eccentric unit comprising motion-modifying driving linkage operatively associated with said cylindrical elements.

2,453,073
SLIP-RING STRUCTURE
Edgar J. Jones, Cambridge, Mass., assignor to The Baldwin Locomotive Works, a corporation of Pennsylvania
Application November 13, 1945, Serial No. 628,189
10 Claims. (Cl. 173—324)

1. A split slip ring assembly comprising a plurality of segmental slip ring elements each having laterally tapered substantially planar-surfaced portions and whose peripheral surfaces within the last half of their length are bevelled radially inwardly of the ring, and the adjacent ends of said tapered portions being disposed in laterally abutting juxtaposition whereby the bevelled peripheral surfaces of said adjacent ends extend away from each other to assure smooth

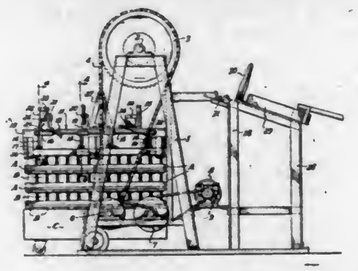


transition from one segment to the other along their periphery.

2,453,074
APRON
Marie J. Kraft, Three Oaks, Mich., assignor to The Warren Featherbone Co., Three Oaks, Mich., a corporation of Michigan
Application September 24, 1947, Serial No. 775,934
1 Claim. (Cl. 2—48)

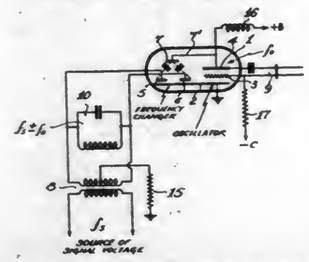
A neckless and strapless apron comprising a lower apron portion and an upper bib and bust covering portion including a central panel and side panels secured thereto in the bust covering portion, flexible rigidifying means secured substantially at the connection between each side panel and the central panel and providing for general and relatively loose conformation with the bust of the wearer, and interconnectible attaching means substantially at the waistline of the wearer for securing the apron around the waist of the wearer.

2,453,075
STEREO CAMERA RANGE FINDER SYSTEM
Edwin H. Land, Cambridge, Albert J. Bachelder, Lexington, and Otto E. Wolff, Cambridge, Mass., assignors to Polaroid Corporation, Cambridge, Mass., a corporation of Delaware
Application November 9, 1945, Serial No. 627,744
4 Claims. (Cl. 95—18)



1. In a stereoscopic camera, a pair of laterally spaced similar ray deflecting and converging elements positioned in the forward part of said camera, objective lens means mounted rearwardly of said elements and optically associated therewith for the reception of stereoscopic images, said ray deflecting elements converging the axial rays traversing said lenses at a point in a forward plane, means for adjusting simultaneously and symmetrically said elements to vary the position in space of said plane of convergence, means for adjusting the focus of said lens means, range finder means including a reflector mounted rearwardly of each of said elements and adapted to receive rays from the respective said element corresponding to the convergence adjustment of said elements, and an operative connection between said two adjusting means whereby adjustment of one effects a consonant adjustment of the other for focusing in the image field of the respective images as determinable from said range finder means.

2,453,076
CRYSTALLIZATION OF DDT
Kenneth B. Little and John J. Burton, Easton, Pa., assignors to J. T. Baker Chemical Co., Phillipsburg, N. J., a corporation of New Jersey
No Drawing. Application June 25, 1947, Serial No. 757,052
2 Claims. (Cl. 260—649)

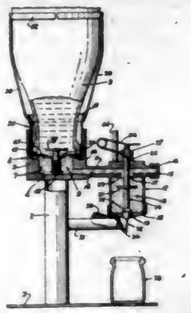


1. The process of solidifying DDT (dichlorodiphenyl trichloroethane) in hard crystalline form which includes cooling molten DDT to a temperature not above about 60° C. without solidification, whereby a supercooled liquid is obtained, and permitting the supercooled liquid to crystallize.

2,453,077
CAN DUMPING MACHINE
Robert J. Newton, Honolulu, Territory of Hawaii, assignor to California Packing Corporation, San Francisco, Calif., a corporation of New York
Application September 14, 1945, Serial No. 616,176
10 Claims. (Cl. 214—1.1)

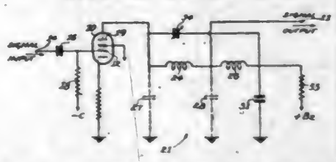
2. A can dumping machine, comprising: a frame structure; dumping wheels journaled at the upper part of said frame structure; flexible means rising substantially vertically and passing over said dumping wheels; an elevator suspended between and carried by said flexible means, said elevator adapted to be raised, and inverted to inclined position by movement about the axis of said dumping wheels; means under said elevator for engaging and carrying a tray loaded with a layer of cans for inversion with said elevator thereby to dispose the layer of cans below said tray; and means for releasing said tray and cans for discharge from said elevator when said elevator is inverted and inclined.

2,453,078
DEVICE FOR WAVE LENGTH TRANSFORMATION OF VERY SHORT WAVES
Klaas Posthumus, Eindhoven, Netherlands, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee
Application March 17, 1943, Serial No. 479,468
In the Netherlands December 5, 1940
Section 1, Public Law 690, August 8, 1946
Patent expires December 5, 1960
7 Claims. (Cl. 250—20.33)



1. A frequency-changing network adapted to mix a voltage of locally generated oscillations with a signal voltage particularly for use in signalling by means of short waves, comprising a bridge connection constituted by a diode in each of two branches of the bridge connection and a capacity in each of the two remaining branches, characterized in that the voltage of locally-generated oscillations is supplied across that diagonal of the bridge across which the dissimilar branches are in series and the signal voltage is applied across the other diagonal across which the similar branches are in series.

2,453,079
PRESTRESSED SUCKER ROD
Peter F. Rossmann, Morristown, N. J.
Application August 5, 1944, Serial No. 548,291
2 Claims. (Cl. 255—28)

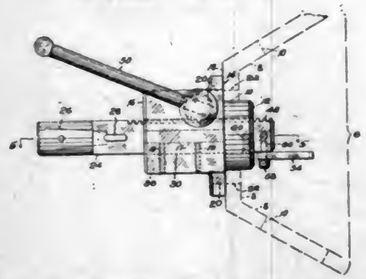


1. A sucker rod section provided at opposite ends with elements of fastening means for securing the section to other similar sections to form a complete sucker rod, said section including a pair of elongated telescoped elements permanently secured together, each element formed integrally as one piece, one constituting a solid core element defined at opposite end portions with enlarged heads and forming therebetween a shank portion integral with the heads and of less cross section than its headed end portions, said shank portion forming with the said headed end portions a pair of inwardly facing non-rotative stop shoulders, said core element in the portion thereof between the shoulders being deformed under a preimposed tension and with the headed end portion not necessarily stressed, the other element constituting a retaining sleeve deformed under compression, fitting between the shoulders with its ends in fixed bearing engagement against the shoulders and acting resiliently in a tendency to spread them apart, and the said two elements at all times reacting on each other to maintain the elements so formed into their respective compressed and tensioned stress conditions and thus each acting to resist the return of the other to its initial length before it was deformed.

2,453,080
LIQUID MEASURING AND DISPENSING APPARATUS
William A. Shimp, Minneapolis, Minn.
Application September 24, 1945, Serial No. 618,261
3 Claims. (Cl. 222—453)

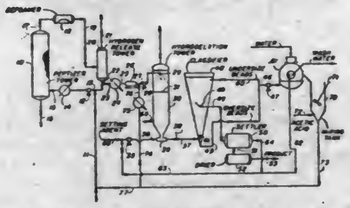
1. In a liquid measuring and dispensing apparatus, an upright post having a suitable base, a bottle supporting cup fixed to the upper end of the post adapted to receive the open top of a bottle whereby a portion of the contents of the bottle may enter the cup, a tubular neck laterally extending from said cup and in communication with the lower interior portion thereof, a measuring cup secured to and depending from the outer end of said tubular neck and having an intake connecting it to the interior of said tubular neck, a removable cap secured to the lower end of the measuring cup and having a tapered valve seat therein, a valve stem movably mounted within the measuring cup and having a valve head at its lower end normally engaged with said valve seat, said valve stem having a second valve element secured thereto and normaly spaced from said intake, and means exteriorly of the measuring cup for manually actuating the valve stem to momentarily open the discharge valve and close the intake and thereby permit the contents of the measuring cup to discharge therefrom into a suitable receiving means, said valve stem returning to its normal valve seating position when released, thereby to permit the measuring cup to automatically receive another charge from the bottle.

2,453,081
WIDE BAND AMPLIFIER
George C. Szikiai, Princeton, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application December 29, 1944, Serial No. 570,295
3 Claims. (Cl. 179—171)



2. A video amplifier employing a bridged-T network for high frequency correction, the network comprising a pair of series inductances, shunt capacitances in said network effectively at the input and output ends of said inductances and at their mid-connection, an output connection provided across the capacitance at the mid-connection, and a capacitance bridging said inductances.

2,453,082
HOISTING APPARATUS
Pierre Jean-Marie Théodore Allard, Chantilly, France, assignor to Societe Francaise de Construction de Bennes Automatiques, Persan (Seine-et-Oise), France
Application May 15, 1945, Serial No. 593,827
In France February 4, 1944
2 Claims. (Cl. 212—93)



1. A hoisting device comprising a stationary structure embodying a substantially horizontal runway, a trolley movable along said runway, a grab bucket carried by said trolley, a hoisting cable connected to said bucket, guiding means for the hoisting cable on said trolley whereby said hoisting cable is adapted to draw the trolley from the dumping to the filling point, a recall cable attached to the trolley, a counterweight attached to said recall cable, means for guiding said recall cable on said stationary structure whereby the recall cable is adapted to draw the trolley from the filling to the dumping point, an abutment carried by said stationary structure for stopping the movement of said trolley under the action of said recall cable, two springs of different yielding resistances operatively connected with said abutment, the lighter spring being adapted to start the reverse movement of the trolley and means for preventing any further action of the hoisting cable when the heavier spring is compressed.

2,453,083
TOOLHOLDING ATTACHMENT FOR MACHINE TOOL TURRETS
Hercules N. Bourque, Hudson, Mass.
Application September 8, 1944, Serial No. 553,175
5 Claims. (Cl. 29—57)

1. In a tool-holding attachment for a turret of a machine tool, the combination of a guide-block having a face to be placed against a face of the turret and a boss to be fitted into an opening of the turret to locate said guide-block with reference to said turret, said guide-block having a tool-carrying slide passage extending through said boss and through the body of said guide-block, said guide-block having a chamber intersecting said passage and having a bearing coaxial with said chamber, a tool-carrying slide arranged to slide lengthwise within said passage and having at the outer end a receiving formation for the tool, said slide having gear teeth constituting a rack extending into said chamber, a shaft mounted for rotation in said bearing and having a pinion within said chamber meshing with said rack, and a handle secured to said shaft for manual rotation of the latter and consequent sliding of said slide through said boss.

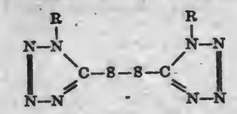
2,453,084
MANUFACTURE OF BEAD-FORM CATALYST
Henry Trucheart Brown, Dallas, Tex., assignor, by mesne assignments, to Socony-Vacuum Oil Company, Incorporated, New York, N. Y., a corporation of New York
Application May 24, 1946, Serial No. 671,975
7 Claims. (Cl. 252—259.2)

1. In a continuous process for the manufacture of inorganic oxide spheroidal particles of a desired size range having adsorbent and catalytic properties the steps which comprise (1) continuously forming a hydrosol of at least one normally solid inorganic oxide characterized by an inherent capacity to set to a hydrogel, (2) continuously introducing said hydrosol into a body of a liquid in which said hydrosol is immiscible to form a multiplicity of spheroidal particles of different sizes, (3) continuously converting said particles of hydrosol to particles of hydrogel, (4) continuously classifying the hydrogel particles of step 3 to separate undersize and oversize particles of hydrogel from hydrogel particles of the size desired, (5) continuously reconverting the undersize and oversize hydrogel particles of step 4 to hydrosol, (6) continuously recycling the hydrosol of step 5 to step 2, and (7) drying the hydrogel particles of the desired size recovered from step 4.

2,453,085
THIOPHENE-ALDEHYDE SYNTHETIC RESINS
Philip D. Caesar, Champaign, Ill., and Alexander N. Sachanen, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application November 28, 1947, Serial No. 788,650
6 Claims. (Cl. 260—57)

1. The method of preparing synthetic products, which comprises reacting thiophene with an aldehyde selected from the group consisting of formaldehyde and paraldehyde, in a molar ratio corresponding to at least one mole of aldehyde for each mole of thiophene, in the presence of sulfuric acid in amounts of at least 0.1% based on the weight of thiophene, and of water to produce an aqueous solution of sulfuric acid of less than 80% concentration, at temperatures varying between 20° C. and 120° C., and for a period of time sufficient to effect resinification.

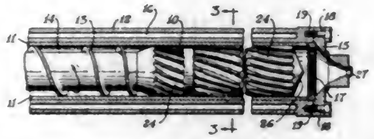
3. The method of preparing synthetic products, which comprises reacting a mixture of thiophene and phenol wherein the molar ratio of thiophene to phenol varies between 6:1 and 1:1, with an aldehyde selected from the group consisting of formaldehyde and paraldehyde, in a molar ratio corresponding to at least one mole of aldehyde for each mole of thiophene and at least one mole of aldehyde for each mole of phenol in said mixture, in the presence of sulfuric acid in amounts of at least 0.1% based on the weight of thiophene in said mixture, and of water to produce an aqueous solution of sulfuric acid of less than 80% concentration, at temperatures varying between 20° C. and 120° C., and for a period of time sufficient to effect resinification.



2,453,086
ALKYL THIOPHENE-ALDEHYDE SYNTHETIC RESINS
Philip D. Caesar, Champaign, Ill., assignor to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application December 18, 1947, Serial No. 792,620
12 Claims. (Cl. 260—57)

1. The method of preparing synthetic products, which comprises reacting an alkyl thiophene selected from the group consisting of monoalkyl thiophene, dialkyl thiophene, and trialkyl thiophene, with an aldehyde selected from the group consisting of formaldehyde and paraldehyde, in a molar ratio corresponding to at least one mole of aldehyde for each mole of alkyl thiophene, in the presence of sulfuric acid in amounts of at least 0.1% based on the weight of alkyl thiophene, and of water to produce an aqueous solution of sulfuric acid of less than 80% concentration, at temperatures varying between 20° C. and 120° C., and for a period of time sufficient to effect resinification.

4. The method of preparing synthetic products, which comprises reacting a mixture of phenol and an alkyl thiophene selected from the group consisting of monoalkyl thiophene, dialkyl thiophene, and trialkyl thiophene, wherein the molar ratio of alkyl thiophene to phenol varies between 6:1 and 1:1, with an aldehyde selected from the group consisting of formaldehyde and paraldehyde, in a molar ratio corresponding to at least one mole of aldehyde for each mole of alkyl thiophene and at least one mole of aldehyde for each mole of phenol in said mixture, in the presence of sulfuric acid in amounts of at least 0.1% based on the weight of alkyl thiophene in said mixture, and of water to produce an aqueous solution of sulfuric acid of less than 80% concentration, at temperatures varying between 20° C. and 120° C., and for a period of time sufficient to effect resinification.

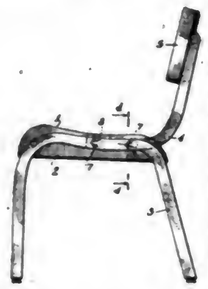


2,453,087
PHOTOGRAPHIC DEVELOPERS CONTAINING TETRAZOLYL DISULFIDES AS ANTIFOGGING AGENTS
Fritz Dersch and Robert H. Clark, Binghamton, N. Y., assignors to General Aniline & Film Corporation, New York, N. Y., a corporation of Delaware
No Drawing. Application November 7, 1946, Serial No. 708,474
16 Claims. (Cl. 95—88)

1. A photographic developer containing a developing agent and a fog inhibiting amount of a tetrazolyl disulfide having the general formula:

where R represents a hydrocarbon radical.

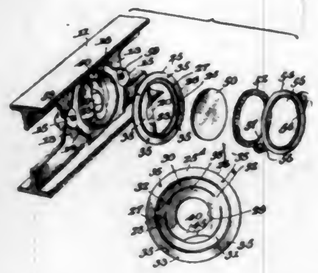
2,453,088
MIXING TORPEDO FOR PLASTICS EXTRUDERS
Frederick E. Dulmage, Saginaw, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Delaware
Application December 26, 1945, Serial No. 637,274
3 Claims. (Cl. 18—12)



1. In an extruder, in combination with a screw for advancing plastic feed along a cylindrical barrel: a cylindrical mixing torpedo beyond the screw, coaxial and continuous therewith, rotatable within the barrel with a clearance therebetween of the order of 0.010 to 0.020 inch insufficient to admit a plastic layer which would shear under the tangential stress caused by rotation of the torpedo; a plurality of evenly spaced helically disposed grooves of constant radius running the length of said torpedo having the same hand as the said screw and a lead of from ½ to 2 times the length of the torpedo, the combined delivery capacities of the helical grooves being at least as great as the delivery capacity of the coaxial feed worm; and, at intervals along the torpedo, circumferentially disposed neck-like constrictions of a depth equal to that of the said helical grooves, being bevelled at their discharge ends from the lesser diameter of the necks to the greater diameter of the lands of the torpedo.

2,453,089
PROCESS FOR PRODUCTION OF HALOGENATED OLEFINS
Glen H. Morey and Robert F. Taylor, Terre Haute, Ind., assignors to Commercial Solvents Corporation, Terre Haute, Ind., a corporation of Maryland
No Drawing. Application October 9, 1943, Serial No. 505,666
7 Claims. (Cl. 260—654)

1. In the halogenation of diolefins, the process which comprises intimately mixing a gaseous halogen and a gaseous conjugated diene in an unpacked reaction zone having a sufficiently large diameter to prevent appreciable contact of free halogen with the walls of said chamber, the gases being passed into said chamber in the ratio of from about 0.8 to 1.3 moles of halogen per mole of diene, the temperature within the reaction zone being maintained within a range extending from about 60° *C.* to a temperature slightly below the boiling point of the lowest boiling halogenated product produced in the process, and recovering the dihaloolefins produced in the process.

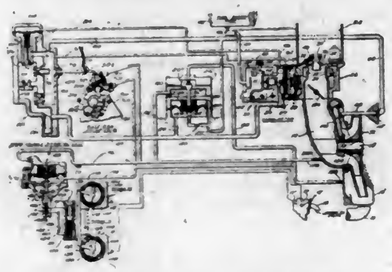


2,453,090
ARTICLE OF FURNITURE
Lurelle Guild, New York, N. Y., and Carlton G. Towne, Pittsburgh, Pa., assignors to The Aluminum Cooking Utensil Company, New Kensington, Pa., a corporation of Pennsylvania
Application May 22, 1946, Serial No. 671,421
1 Claim. (Cl. 155—196)

An article of furniture comprising a seat having a downwardly extending flange, a back support, part of said back support extending through an aperture in said seat and into alignment with said flange, a leg having a portion thereof aligned with the said part of the back support and said

flange, and means extending through said flange for fastening together the aligned portions of said leg and said support.

2,453,091
SPIRIT LEVEL
Frank M. Holloway and William P. Holloway, Austin, Tex.
Application March 27, 1947, Serial No. 737,528
16 Claims. (Cl. 33—211)

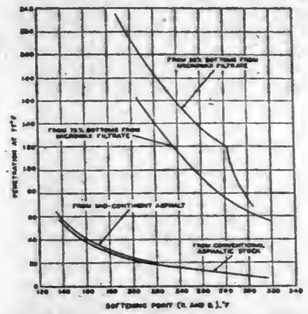


1. A level of the class described comprising in combination, a stock, means on said stock for receiving a bubble-vial and its holder, a bubble-vial, a holder for said vial comprising a substantially circular disk having medially disposed means thereon retaining said vial and substantially circular marginal portions lying against a surface of said stock, substantially annular means for covering said holder and vial and frictionally clamping said marginal portions of the holder against the stock with varying degrees of pressure, and peripheral portions on said holder disk projecting radially outwardly beyond said annular means for manipulating the disk, whereby said support may be shifted for adjustment of the vial to a proper zero position while under less than maximum pressure and may be securely held in operative position by the application of greater clamping pressure.

7. A blank for producing a bubble-vial holder for spirit levels and the like comprising a semi-rigid disk, having a continuous annular rim portion, a pair of arcuate slits inwardly of the rim portion, the two slits together forming a complete circle but for short gaps of uncut metal at the ends of the slits, and a substantially circular hole in the center of the disk.

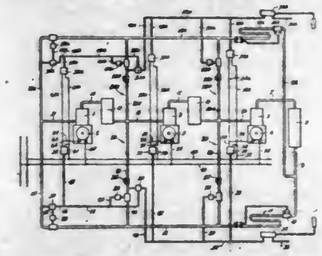
2,453,092
METHOD OF POLYMERIZING ORGANOSILOXANES
James Franklin Hyde and Oscar Kenneth Johannson, Corning, N. Y., assignors to Corning Glass Works, Corning, N. Y., a corporation of New York
No Drawing. Application August 5, 1947, Serial No. 766,460
8 Claims. (Cl. 260—448.2)

1. The method of polymerizing cyclic diorganosiloxane to higher molecular weight polymers which comprises reacting at least one cyclic diorganosiloxane selected from the group consisting of dialkylsiloxanes and alkylarylsiloxanes with an alkali metal salt of a triorgano silanol until polymerization of the cyclic siloxane is effected.



2,453,093
FUEL AND IGNITION CONTROL
Harold T. Jarvis, Manchester, Conn., assignor to United Aircraft Corporation, East Hartford, Conn., a corporation of Delaware
Application June 25, 1945, Serial No. 601,438
16 Claims. (Cl. 123—117)

1. In an aircraft engine, a carburetor having metering means including a supplemental fuel jet for establishing predetermined normal fuel-air ratios, means for controlling the flow of fuel through said supplemental jet to decrease said normal fuel-air ratios, fluid pressure responsive means for actuating said controlling means to fully open said supplemental jet at a predetermined point within the intermediate portion of the engine power output range, and an engine control device actuated by said fluid pressure responsive means.

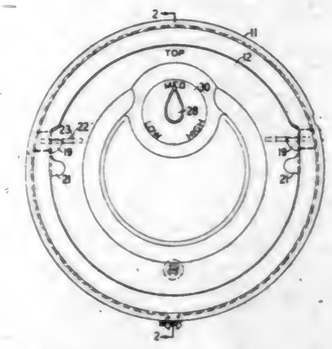


2,453,094
OXIDIZED ASPHALT PRODUCT AND METHOD OF MAKING SAME
Robert B. Killingsworth, Douglaston, Harry T. Van Horn, Kew Gardens, and Wallace E. Spelshouse, Roslyn Heights, N. Y., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
Application December 18, 1945, Serial No. 635,758
2 Claims. (Cl. 196—74)

1. That method of making an asphalt of softening-point-penetration-temperature index of 0.0075 or less which comprises: subjecting a petroleum fraction containing microcrystalline wax to separation of oil and wax to produce therefrom a crude petrolatum, separating the crude petrolatum into microcrystalline wax and an oily fraction by treating with a selective solvent for said oily fraction, and recovering the oily fraction from said separation, removing the lower boiling fractions of said oily material by distillation, and blowing the distillation residue to pro-

duce therefrom by oxidation an asphaltic material of at least 130–140 soft point grade.

2,453,095
PLURAL STAGE REFRIGERATION SYSTEM AND CONTROL THEREFOR
William L. McGrath, Philadelphia, Pa., assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn., a corporation of Delaware
Application July 19, 1943, Serial No. 495,246
20 Claims. (Cl. 62—115)



1. In a refrigeration system, first and second compressors, means connecting the discharge means of the first compressor with the suction means of the second, conduit means connecting the discharge means of the second compressor to a condenser, expansion valve and an evaporator, main suction means connecting the outlet of the evaporator to the suction means of the first compressor; by-pass means including a throttling valve connected between the main suction means and the means connecting the discharge means of the first compressor and the suction of the second compressor; control means for starting the second compressor, upon an initial demand for refrigeration, and for opening said throttling valve increasingly as the demand upon the second compressor increases, said control means starting said first compressor when the load demand exceeds the capacity of the second compressor, and means restricting return flow through said by-pass means toward said main suction means.

2,453,096
DRAFT REGULATOR
John W. Miller and Basil D. Figg, Lansing, Mich., assignors to Motor Wheel Corporation, Lansing, Mich., a corporation of Michigan
Application July 2, 1945, Serial No. 602,882
4 Claims. (Cl. 236—45)

2. A draft regulator comprising a one piece annular frame having a circumferentially continu-

ous substantially plane portion provided with a central opening, said plane portion having a pair of axially inwardly extending depressions therein offset radially from the center of said frame, the radially inner sides of said depressions being defined by axially outwardly extending shoulders, said shoulders having aligned openings therein,

a damper blade substantially filling said opening, pivot shaft means attached to said damper blade and received in the openings in said shoulders for pivotally mounting said damper blade in said frame, and stop means integral with said frame for limiting the pivotal movement of said blade in both directions from said plane portion.

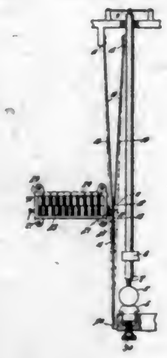
2,453,097

SOLUTION CONSISTING OF A POLYMERIC N-VINYL PYRROLE COMPOUND AND CHLOROFORM

Michael T. Orinik, Binghamton, N. Y., assignor to General Aniline & Film Corporation, New York, N. Y., a corporation of Delaware

No Drawing. Application November 8, 1945, Serial No. 627,529
4 Claims. (Cl. 260—33.8)

1. A solution, which upon being cast, yields foils and films of polymeric N-vinyl pyrrole compounds of improved stripping properties consisting of 3 to 8 parts by weight of a polymeric N-vinyl pyrrole compound in 135 to 145 parts by weight of chloroform.



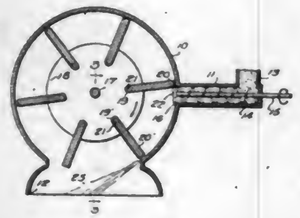
2,453,098

SYSTEM FOR TRANSMITTING MOTION FROM A MOVABLE MEASURING ELEMENT TO A MOVABLE INFORMING ELEMENT

Walter P. Powers, Spring Lake, N. J., assignor to Associated Patentees, Inc., Ampere, N. J., a corporation of New Jersey

Original application February 24, 1943, Serial No. 476,987. Divided and this application March 15, 1945, Serial No. 582,830
7 Claims. (Cl. 33—147)

1. An instrument of the character disclosed, comprising convergently related lengths of flexible strip, connected together at their convergent ends and supported at their separated ends, means connected with said convergent connected ends and applying longitudinal tension to said lengths of strip, sensing means connected to impart longitudinal movement to at least one of said longitudinally tensioned lengths of strip and thereby to create lateral displacement of the tensioned convergent connected ends of said lengths of strip and a movable informing element operable by



the lateral displacement of said tensioned convergent connected ends of the strip.

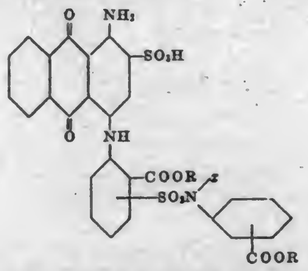
2,453,099

TREATMENT OF CALCIUM SULFITE

Harold R. Rafton, Andover, Mass., assignor to Raffold Process Corporation, a corporation of Massachusetts

Application October 4, 1943, Serial No. 504,921
14 Claims. (Cl. 23—129)

1. In the treatment of calcium sulphite, the method of modifying said calcium sulphite to effect an improvement in at least one of the properties of adhesive requirement, oil absorption and gloss-imparting quality of said calcium sulphite, which comprises directing said calcium sulphite in association with water into the path of travel of a percussive member of a rotor element, subjecting said calcium sulphite to a percussion from said percussive member, said percussive member having a velocity of not less than 30 feet per second at the point of said percussion, said rotor element at the time of subjecting said calcium sulphite to the action of said percussive member being free from contact with said calcium sulphite except in respect to said percussive member, said calcium sulphite being free for movement upon, and at the point of, said percussion, said calcium sulphite being propelled by said percussive member away from and out of the path of travel of said percussive member.



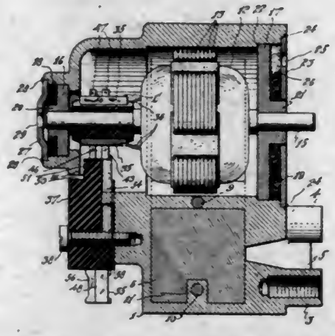
2,453,100

CARBALKOXY AMINOANTHRAQUINONE SULFONAMIDES

Edgar E. Renfrew, Jr., Phillipsburg, N. J., assignor to General Aniline & Film Corporation, New York, N. Y., a corporation of Delaware

No Drawing. Application June 21, 1946, Serial No. 678,357
3 Claims. (Cl. 260—372)

1. An aminoanthraquinone compound of the general formula:



wherein R represents the same lower alkyl radical and x represents a radical selected from the group consisting of hydrogen and lower alkyl.

2,453,101

MINIATURE PERMANENT MAGNET MOTOR

Fred R. Schulz, Scotch Plains, N. J., assignor to Essell Corporation, Newark, N. J., a corporation of New Jersey; Bernard Verney, trustee in bankruptcy of said Essell Corporation

Application September 20, 1947, Serial No. 775,339
10 Claims. (Cl. 172—36)

1. An electric motor including a moulded frame housing carrying a magnetic field unit composed of a permanent magnet having upwardly extending pole pieces arcuately formed to operatively cooperate with a rotor structure, bearings capable of picking up lubricant positioned in opposite end of the frame, each bearing having outwardly extending centrally located hubs, washers capable of carrying a supply of lubricant and passing it to said bearings located around said hubs, circular discs for closing the bearing ends of the frame adjacent said washers, a rotor having a shaft extending between said bearings and outside the frame at one end, said shaft carrying an armature located between said arcuately formed pole pieces, a commutator for the armature carried by the shaft on the end opposite the extending end, and means for passing current to said commutator.

2,453,102

3,4-DIHYDROXYTHIOPHENE-2,5-DICARBOXYLIC ACID PRODUCTION

Stockton Graeme Turnbull, Jr., Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

No Drawing. Application February 25, 1944, Serial No. 523,914
2 Claims. (Cl. 260—329)

1. A process for producing 3,4-dihydroxythiophene-2,5-dicarboxylic acid, which comprises fusing 3,4-dihydroxy-2,5-dicarbethoxythiophene with sodium hydroxide in sodium acetate at temperatures between about 90° and about 120° C.

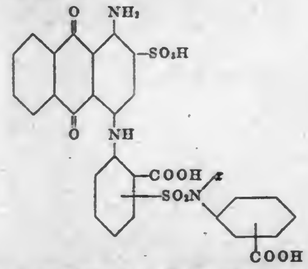
2,453,103

DECARBOXYLATION OF 3,4-DIHYDROXY-2,5-DICARBOXYTHIOPHENE

Stockton Graeme Turnbull, Jr., Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

No Drawing. Application February 25, 1944, Serial No. 523,915
2 Claims. (Cl. 260—329)

2. A process which comprises reacting 3,4-dihydroxy-2,5-dicarboxythiophene with an anhydrous heterocyclic amine selected from the group consisting of pyridine and quinoline.



2,453,104

AMINOANTHRAQUINONE SULFONAMIDES

Curt G. Vogt, Union, N. J., assignor to General Aniline & Film Corporation, New York, N. Y., a corporation of Delaware

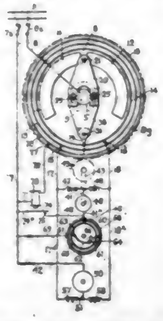
No Drawing. Application June 21, 1946, Serial No. 678,356
3 Claims. (Cl. 260—372)

1. An aminoanthraquinone compound of the general formula:

wherein x represents a radical selected from the group consisting of hydrogen and lower alkyl.

2,453,105

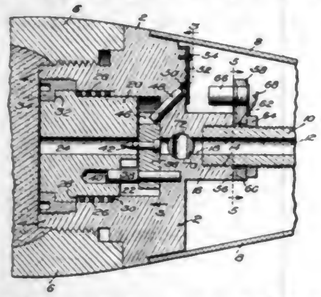
PREPARATION OF HYDROXY AROMATIC CARBOXYLIC ACIDS



Enno Wolthuis, Cranford, and Henry M. Shafer, Westfield, N. J., assignors to General Aniline & Film Corporation, New York, N. Y., a corporation of Delaware

No Drawing. Application November 15, 1945, Serial No. 628,986
14 Claims. (Cl. 260—315)

14. A process of preparing a 2,3-hydroxy aromatic carboxylic acid from a phenol which by carboxylation yields a mixture of the isomeric 2,1- and 2,3-hydroxy aromatic carboxylic acids which comprises carboxylating the phenol by subjecting it as the potassium phenolate suspended

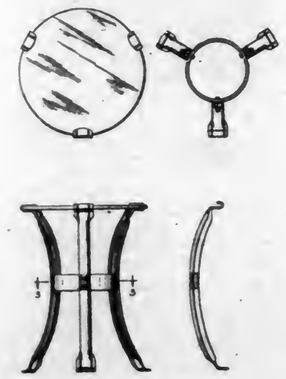


in a halogenated benzene to reaction with carbon dioxide, removing the halogenated benzene from the reaction mixture by steam distillation leaving an aqueous mixture of the potassium salts of the isomeric 2,1- and 2,3-hydroxy aromatic carboxylic acids and separating therefrom the potassium salt of the 2,3-hydroxy aromatic carboxylic acid by salting out with potassium carbonate.

2,453,106
REMOTE-CONTROL APPARATUS WITH ADJUSTABLE GAP
Michel N. Yardeny and Robert Bernas, New York, N. Y.; said Bernas assignor to said Yardeny
Application August 22, 1945, Serial No. 612,042
7 Claims. (Cl. 200—11)

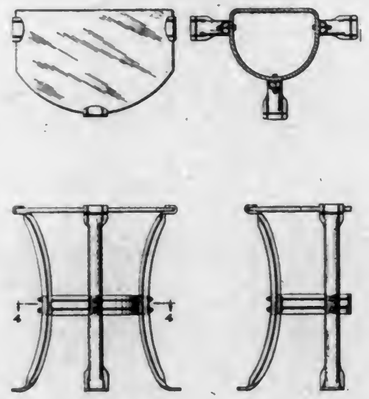
1. A control device comprising a pair of electrically conducting segments separated by a gap having a varying width; a spindle rotatively supported in a fixed relation to the segments and concentrically therewith; a contact arm slidably engaging the segments; a means to support the proximal end of the contact arm on the spindle; and a means to vary the radial length of the contact arm for causing the contact arm to engage the gap at a point of selected width.

2,453,107
FUSE
John C. Gillette, Washington, D. C., and Braxton H. Tabb, Jr., Arlington, Va.
Application September 1, 1944, Serial No. 552,352
5 Claims. (Cl. 102—79)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



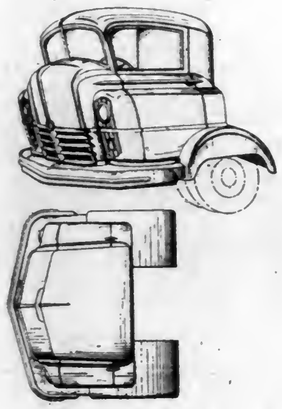
1. In a fuze for attachment to a shell containing an explosive charge, a delay arming mechanism comprising a body, a plunger mounted in said body and adapted for forward movement upon impact of said shell with a target, a rotor mounted on said body and carrying a firing pin, said rotor being proportioned and pivoted so as to be operable by centrifugal force and having a normal unarmed position blocking said plunger against movement, said rotor having an alternate armed position with the firing pin spaced before the plunger, a detonator assembly mounted in the plunger aligned with the armed position of the firing pin, means responsive to the movement of said shell upon being fired from a gun to unlock the rotor and to permit the rotor, under influence of centrifugal force, to move to armed position with its firing pin in axial alignment with said detonator assembly to function said assembly upon the forward movement of said plunger.

DESIGNS

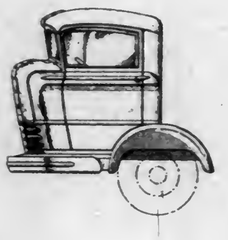


NOVEMBER 2, 1948

151,578
DESIGN FOR AN OCCASIONAL TABLE
Lewis Appell and Nathaniel Appell, New York, N. Y.
Application March 30, 1946, Serial No. 128,105
Term of patent 3½ years
(Cl. D33—14)

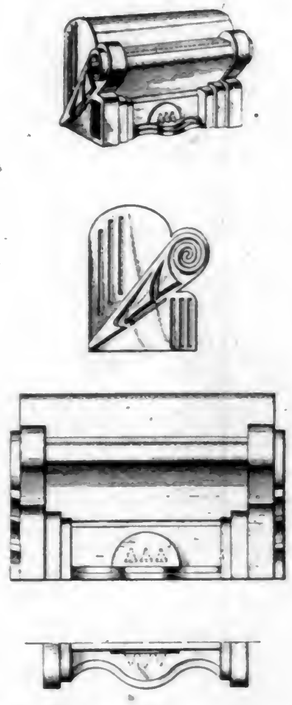


The ornamental design for an occasional table, substantially as shown.

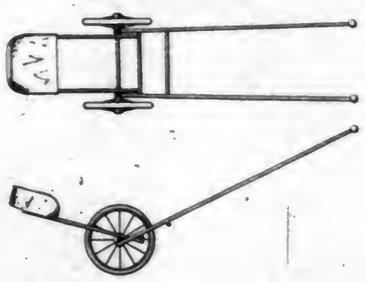


151,579
DESIGN FOR AN OCCASIONAL TABLE
Lewis Appell and Nathaniel Appell, New York, N. Y.
Application March 30, 1946, Serial No. 128,106
Term of patent 3½ years
(Cl. D33—14)

The ornamental design for an occasional table, substantially as shown.

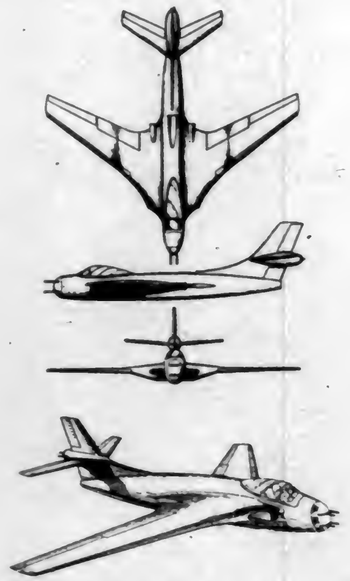


151,580
DESIGN FOR A MOTOR VEHICLE CAB
Charles S. Ash, Milford, Mich.
Application December 29, 1945, Serial No. 125,197
Term of patent 7 years
(Cl. D14—3)



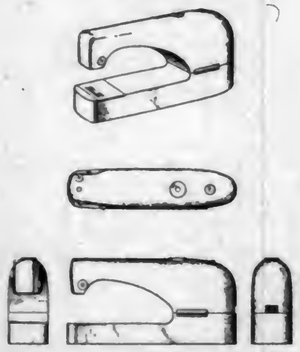
The ornamental design for a motor vehicle cab, as shown and described.

151,581
DESIGN FOR A CASING FOR A PIANO OR SIMILAR ARTICLE
Jack Barofsky, Los Angeles, Calif.
Application January 28, 1947, Serial No. 136,465
Term of patent 14 years
(Cl. D56—9)



The ornamental design for a casing for a piano or similar article, as shown and described.

151,582
DESIGN FOR A CHILD'S CART
Jesse H. Bates, Wauwatosa, Wis.
Application August 7, 1946, Serial No. 132,347
Term of patent 7 years
(Cl. D34—15)



The ornamental design for a child's cart, substantially as shown.

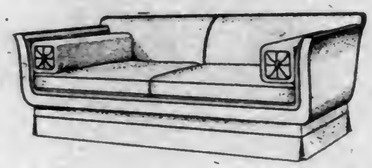
151,583
DESIGN FOR AN AIRPLANE
Derwood A. Beck, Seville, Ohio, assignor to Goodyear Aircraft Corporation, Akron, Ohio, a corporation of Delaware
Application October 8, 1946, Serial No. 133,829
Term of patent 14 years
(Cl. D71—1)

The ornamental design for an airplane, as shown.

151,584
DESIGN FOR A HEAD FOR A PORTABLE SEWING MACHINE
Sidney R. Bell, Stamford, Conn., assignor, by direct and mesne assignments, to Irving J. Moritt, Brooklyn, N. Y.
Application May 25, 1948, Serial No. 146,569
Term of patent 14 years
(Cl. D70—1)

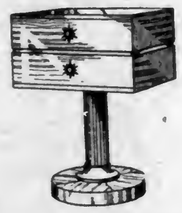
The ornamental design for a head for a portable sewing machine, substantially as shown.

151,585
DESIGN FOR A PIANO
Louis Bromberg, Rockaway Park, N. Y.
Application March 17, 1947, Serial No. 137,691
Term of patent 14 years
(Cl. D56—9)



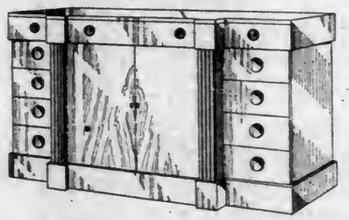
The ornamental design for a piano, as shown and described.

151,586
DESIGN FOR A TABLE
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application April 30, 1947, Serial No. 138,704
Term of patent 7 years
(Cl. D33—14)



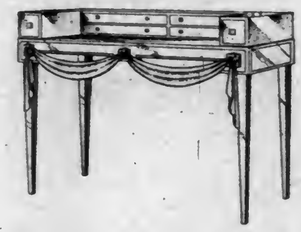
The ornamental design for a table, substantially as shown and described.

151,587
DESIGN FOR A SOFA
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application April 30, 1947, Serial No. 138,705
Term of patent 7 years
(Cl. D15—11)



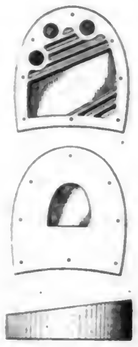
The ornamental design for a sofa, substantially as shown and described.

151,588
DESIGN FOR A NIGHT TABLE
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application April 30, 1947, Serial No. 138,706
Term of patent 7 years
(Cl. D33—14)



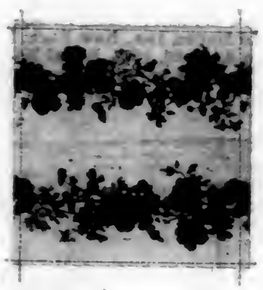
The ornamental design for a night table, substantially as shown and described.

151,589
DESIGN FOR A DRESSER
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application April 30, 1947, Serial No. 138,707
Term of patent 7 years
(Cl. D33—6)



The ornamental design for a dresser, substantially as shown and described.

151,590
DESIGN FOR A DRESSING TABLE
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application April 30, 1947, Serial No. 138,708
Term of patent 7 years
(Cl. D33—6)

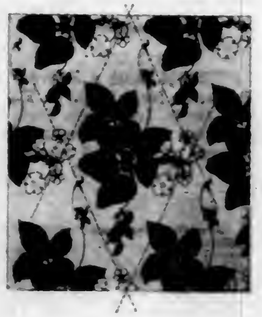


The ornamental design for a dressing table, substantially as shown and described.

151,591
DESIGN FOR A SHOE HEEL
Robert D. Bunn and Bernard L. Hayes, Asheville, N. C.
Application February 11, 1948, Serial No. 144,398
Term of patent 14 years
(Cl. D7—5)

The ornamental design for a shoe heel, as shown.

151,592
DESIGN FOR A WALLPAPER OR THE LIKE
William Burton, River Forest, Ill., assignor to United Wallpaper, Inc., Chicago, Ill., a corporation of Delaware
Application November 28, 1947, Serial No. 142,867
Term of patent 3½ years
(Cl. D59—10)

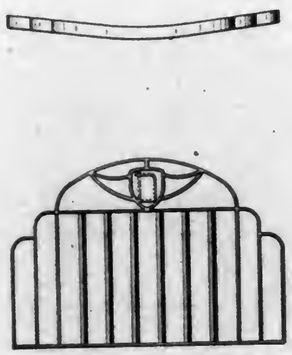


The ornamental design for a wallpaper or the like, substantially as shown and described.

151,593
DESIGN FOR A WALLPAPER OR THE LIKE
William Burton, River Forest, Ill., assignor to United Wallpaper, Inc., Chicago, Ill., a corporation of Delaware
Application November 28, 1947, Serial No. 142,868
Term of patent 3½ years
(Cl. D59—10)

The ornamental design for a wallpaper or the like, substantially as shown and described.

151,594
DESIGN FOR A WALLPAPER OR THE LIKE
William Burton, River Forest, Ill., assignor to United Wallpaper, Inc., Chicago, Ill., a corporation of Delaware
Application November 28, 1947, Serial No. 142,869
Term of patent 3½ years
(Cl. D59—10)

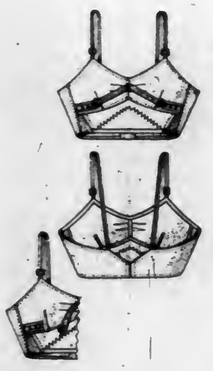


The ornamental design for a wallpaper or the like, substatially as shown and described.

151,595
DESIGN FOR A WALLPAPER OR THE LIKE
William Burton, River Forest, Ill., assignor to United Wallpaper, Inc., Chicago, Ill., a corporation of Delaware
Application November 28, 1947, Serial No. 142,870
Term of patent 3½ years
(Cl. D59—10)

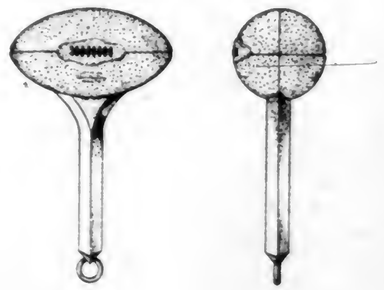
The ornamental design for a wallpaper or the like, substantially as shown and described.

151,596
DESIGN FOR AN AUTOMOBILE RADIATOR GUARD
Leopold Bustin, Mamaroneck, N. Y.
Application October 1, 1946, Serial No. 133,686
Term of patent 3½ years
(Cl. D14—6)



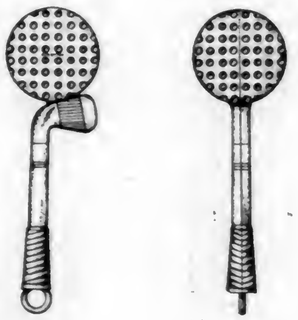
The ornamental design for an automobile radiator guard, substantially as shown.

151,597
DESIGN FOR A CLIP FOR MIRRORS OR GLASS PANELS
Earle W. Clark, Grand Rapids, Mich., assignor to Keeler Brass Company, Grand Rapids, Mich., a corporation of Michigan
Application May 16, 1947, Serial No. 139,078
Term of patent 14 years
(Cl. D54—9)



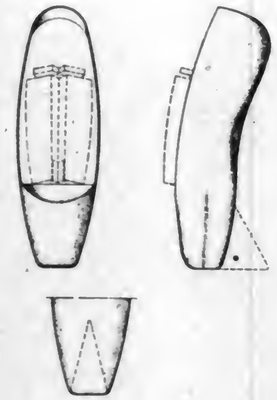
The ornamental design for a clip for mirrors or glass panels, as shown and described.

151,598
DESIGN FOR AN ADJUSTABLE BRASSIÈRE
Julius Cohn, New York, N. Y.
Application November 25, 1947, Serial No. 142,796
Term of patent 7 years
(Cl. D20—4)



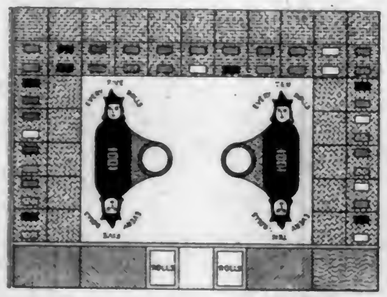
The ornamental design for an adjustable brassière, substantially as shown and described.

151,599
DESIGN FOR A TOY RATTLE OR SIMILAR ARTICLE
Jack Colm, New York, N. Y.
Application July 14, 1948, Serial No. 147,562
Term of patent 7 years
(Cl. D34—15)



The ornamental design for a toy rattle or similar article, substantially as shown.

151,600
DESIGN FOR A TOY RATTLE OR SIMILAR ARTICLE
Jack Colm, New York, N. Y.
Application July 14, 1948, Serial No. 147,563
Term of patent 7 years
(Cl. D34—15)

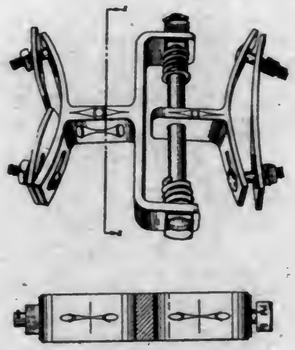


The ornamental design for a toy rattle or similar article, substantially as shown.

151,601
DESIGN FOR A PERFUME BOTTLE HOLDER OR SIMILAR ARTICLE
Leon Cotnareanu, New York, N. Y., assignor to Coty, Inc., a corporation of Delaware
Application July 8, 1946, Serial No. 131,360
Term of patent 14 years
(Cl. D80—9)

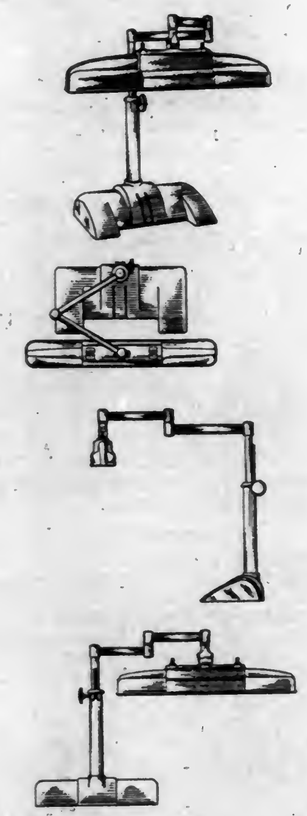
The ornamental design for a perfume bottle holder or similar article, substantially as shown and described.

151,602
DESIGN FOR A GAME BOARD
Carl V. De Mattio, Rockford, Ill.
Application January 9, 1947, Serial No. 136,016
Term of patent 14 years
(Cl. D34—5)



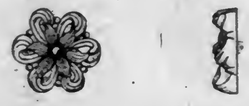
The ornamental design for a game board, substantially as shown and described.

151,603
DESIGN FOR A BRACELET
Eugene Demmler, Providence, R. I., assignor to Carl-Art, Inc., a corporation of Rhode Island
Application January 14, 1948, Serial No. 143,730
Term of patent 7 years
(Cl. D45—4)



The ornamental design for a bracelet, substantially as shown and described.

151,604
DESIGN FOR A COUPLER FOR TOWING VEHICLES
Alfred Denney, Los Angeles, Calif.
Application July 22, 1947, Serial No. 140,449
Term of patent 14 years
(Cl. D14—23)



The ornamental design for a coupler for towing vehicles, substantially as shown.

151,605
DESIGN FOR A DESK LAMP
Tom Dolan, Berwyn, Ill., assignor to Standard Business Machines Company, Chicago, Ill., a corporation of Illinois
Application January 15, 1947, Serial No. 136,155
Term of patent 7 years
(Cl. D48—20)

The ornamental design for a desk lamp, as shown and described.

151,606
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application July 10, 1947, Serial No. 140,191
Term of patent 3½ years
(Cl. D17—2)

The ornamental design for a button or similar article, substantially as shown.

151,607
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application July 10, 1947, Serial No. 140,192
Term of patent 3½ years
(Cl. D17—2)

The ornamental design for a button or similar article, substantially as shown.

151,608
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application July 10, 1947, Serial No. 140,193
Term of patent 3½ years
(Cl. D17—2)

The ornamental design for a button or similar article, substantially as shown.

151,609
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application July 10, 1947, Serial No. 140,194
Term of patent 3½ years
(Cl. D17—2)

The ornamental design for a button or similar article, substantially as shown.

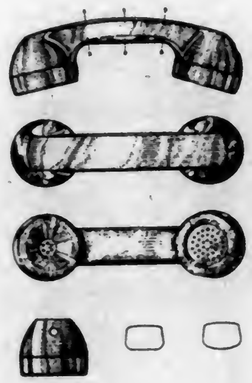
151,610
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application October 16, 1947, Serial No. 141,950
Term of patent 3½ years
(Cl. D17—2)

The ornamental design for a button or similar article, substantially as shown.

151,611
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application October 16, 1947, Serial No. 141,951
Term of patent 3½ years
(Cl. D17—2)

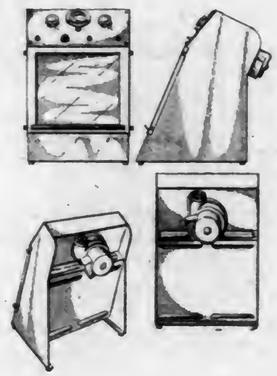
The ornamental design for a button or similar article, substantially as shown.

151,612
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application October 21, 1947, Serial No. 142,047
Term of patent 3½ years
(Cl. D17—2)



The ornamental design for a button or similar article, substantially as shown.

151,613
DESIGN FOR A BUTTON OR SIMILAR ARTICLE
William Drell, New York, N. Y.
Application November 28, 1947, Serial No. 142,837
Term of patent 3½ years
(Cl. D17—2)

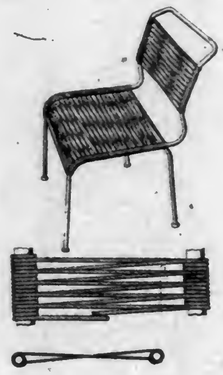


The ornamental design for a button or similar article, substantially as shown.

151,614
DESIGN FOR A HAND TELEPHONE
Henry Dreyfuss, Pasadena, Calif., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application June 24, 1947, Serial No. 139,889
Term of patent 14 years
(Cl. D26—14)

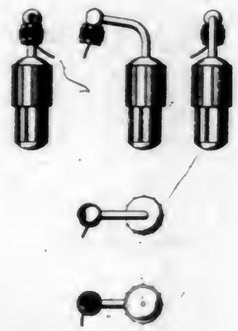
The ornamental design for a hand telephone, as shown.

151,615
DESIGN FOR A PHOTOGRAPHIC COLOR-TRANSPARENCY ANALYSIS MACHINE
Iredell Eachus, Wayne, Pa., and Norman Macbeth, Jr., New York, N. Y.
Application February 26, 1948, Serial No. 144,754
Term of patent 7 years
(Cl. D61—1)



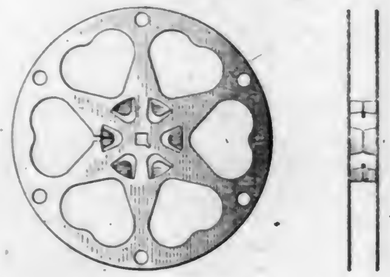
The ornamental design for a photographic color-transparency analysis machine, substantially as shown.

151,616
DESIGN FOR A PIN OR SIMILAR ARTICLE
Aaron Elkonin, Brooklyn, N. Y.
Application June 24, 1948, Serial No. 147,166
Term of patent 14 years
(Cl. D45—19)



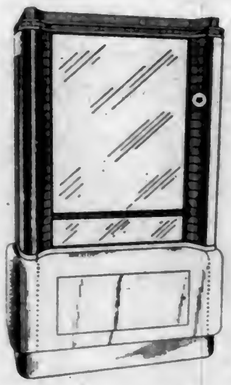
The ornamental design for a pin or similar article, substantially as shown.

151,617
DESIGN FOR A CHAIR OR THE LIKE
Roger Féraud, Neuilly-sur-Seine, France
Application February 27, 1946, Serial No. 126,967
Term of patent 7 years
(Cl. D15—1)

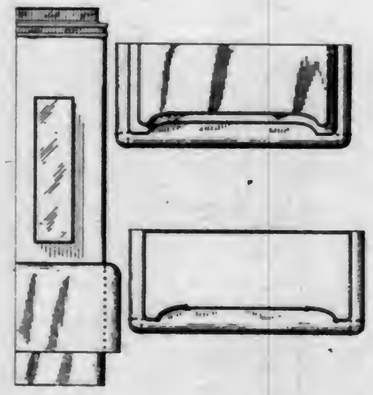


The ornamental design for a chair or the like, as shown and described.

151,618
DESIGN FOR AN ATOMIZER SPRAY ATTACHMENT FOR A CONTAINER
Samuel Gimelli, Bern, Switzerland, assignor to Drugs Limited, London N., England
Application December 9, 1946, Serial No. 135,349
In Great Britain June 12, 1946
Term of patent 14 years
(Cl. D83—1)



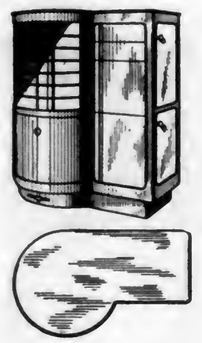
The ornamental design for an atomizer spray attachment for a container, as shown.



151,619
DESIGN FOR A FILM REEL
Jack M. Goldmann, New York, N. Y., assignor to Amereel Corporation, New York, N. Y., a corporation of New York
Application April 3, 1947, Serial No. 138,131
Term of patent 3½ years
(Cl. D61—1)

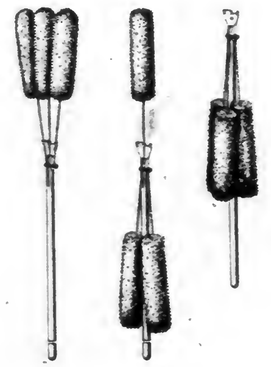
The ornamental design for a film reel, substantially as shown and described.

151,620
DESIGN FOR A MUSIC CABINET
Stanley F. Grabowski, San Mateo, and Joseph M. Sawaya, San Anselmo, Calif.
Application April 25, 1947, Serial No. 138,617
Term of patent 3½ years
(Cl. D56—4)



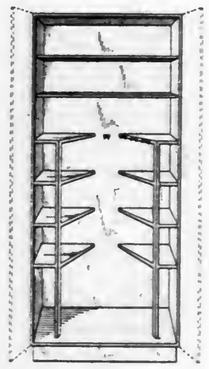
The ornamental design for a music cabinet, as shown.

151,621
DESIGN FOR A COMBINED NUTCRACKER AND TRAY
Irwin W. Green, Bell Gardens, Calif.
Application March 26, 1946, Serial No. 127,950
Term of patent 3½ years
(Cl. D44—1)



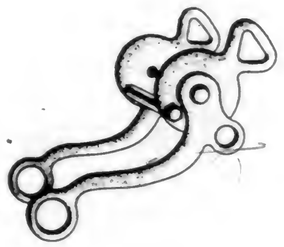
The ornamental design for a combined nutcracker and tray, substantially as shown and described.

151,622
DESIGN FOR A CHEST FOR STORING AND DISPLAYING SURGICAL INSTRUMENTS
André Haller, Zurich, Switzerland
Application February 4, 1947, Serial No. 136,671
In Switzerland January 18, 1944
Section 1, Public Law 690, August 8, 1946
Term of patent 14 years
(Cl. D33—19)



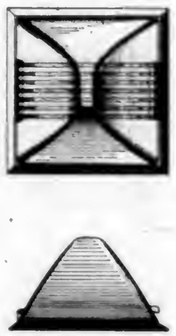
The ornamental design for chest for storing and displaying surgical instruments, substantially as shown.

151,623
DESIGN FOR A HOUSEHOLD DUSTER
David Heller, New York, N. Y.
Application December 10, 1946, Serial No. 135,383
Term of patent 14 years
(Cl. D9—2)



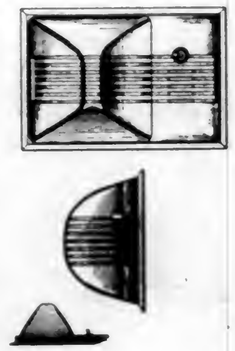
The ornamental design for a household duster, substantially as shown.

151,624
DESIGN FOR A UTILITY CABINET
Roy C. Ingersoll, Winnetka, Ill., assignor to Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois
Application February 20, 1947, Serial No. 137,036
Term of patent 7 years
(Cl. D33—19)



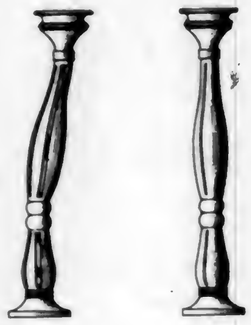
The ornamental design for a utility cabinet, as shown and described.

151,625
DESIGN FOR A BRIDLE BIT
Pascal M. Kelly, El Paso, Tex.
Application May 7, 1947, Serial No. 138,864
Term of patent 7 years
(Cl. D38—2)



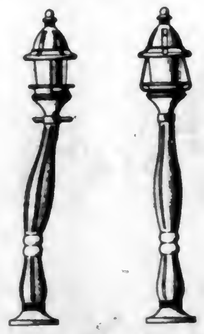
The ornamental design for a bridle bit, as shown and described.

151,626
DESIGN FOR A HOSPITAL PATIENT'S CALL LIGHT
George H. Kress, Vestal, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application July 30, 1946, Serial No. 132,115
Term of patent 14 years
(Cl. D72—1)



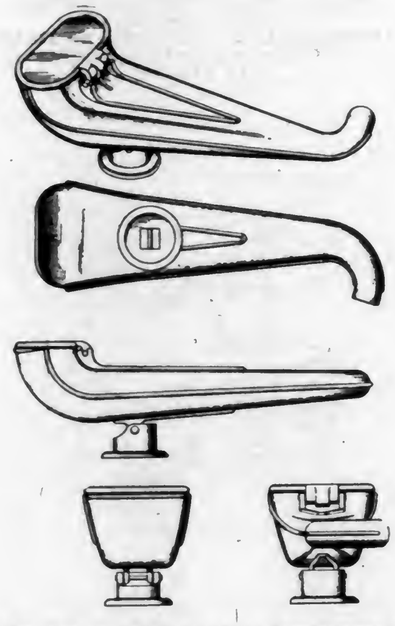
The ornamental design for a hospital patient's call light, substantially as shown and described.

151,627
DESIGN FOR A COMBINED PILOT AND BUZZER STATION
George H. Kress, Vestal, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application July 30, 1946, Serial No. 132,116
Term of patent 14 years
(Cl. D72—1)



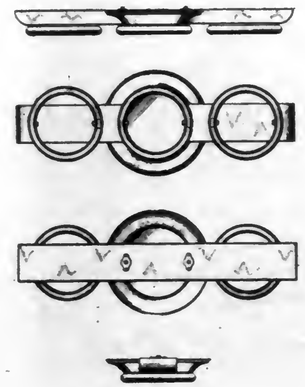
The ornamental design for a combined pilot and buzzer station, as shown and described.

151,628
DESIGN FOR A LAMPPOST
Eddy Lamb and Clair D. Freeman, Los Angeles, Calif.
Application January 3, 1947, Serial No. 135,933
Term of patent 7 years
(Cl. D48—31)



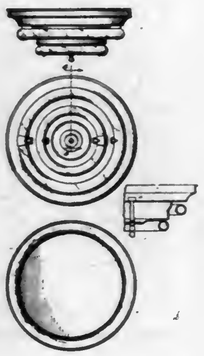
The ornamental design for a lamppost, substantially as shown.

151,629
DESIGN FOR A COMBINED LAMPPOST AND LAMP
Eddy Lamb and Clair D. Freeman, Los Angeles, Calif.
Application January 3, 1947, Serial No. 135,934
Term of patent 7 years
(Cl. D48—31)



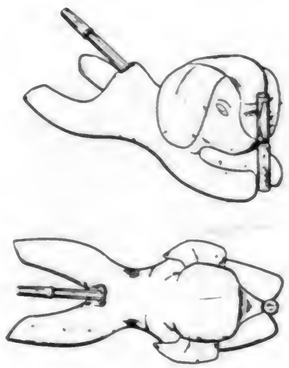
The ornamental design for a combined lamppost and lamp substantially as shown.

151,630
DESIGN FOR A PHONOGRAPH TONE ARM
Charles A. Geib, Chicago, Ill., assignor to The Norwood Company, Chicago, Ill., a corporation of Illinois
Application September 13, 1947, Serial No. 141,378
Term of patent 14 years
(Cl. D26—14)



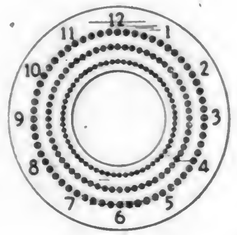
The ornamental design for a phonograph tone arm, substantially as shown.

151,631
DESIGN FOR A MULTIPLE FLUORESCENT LIGHTING UNIT
George Gomberg, Chicago, Ill.
Application August 2, 1947, Serial No. 140,681
Term of patent 3½ years
(Cl. D48—23)



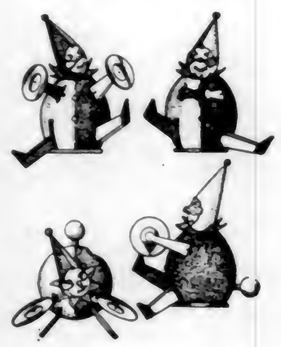
The ornamental design for a multiple fluorescent lighting unit, substantially as shown.

151,632
DESIGN FOR A FLUORESCENT LIGHTING UNIT
George Gomberg, Chicago, Ill.
Application August 2, 1947, Serial No. 140,682
Term of patent 3½ years
(Cl. D48—23)



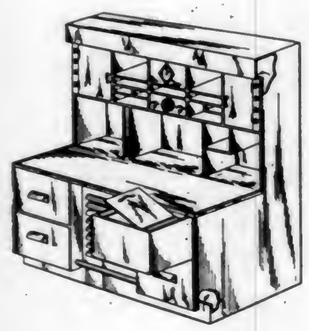
The ornamental design for a fluorescent lighting unit, substantially as shown.

151,633
DESIGN FOR A THERMOMETER CASING AND MINUTE GLASS UNIT
Michael Grabol, New York, N. Y.
Application October 8, 1947, Serial No. 141,805
Term of patent 3½ years
(Cl. D83—1)



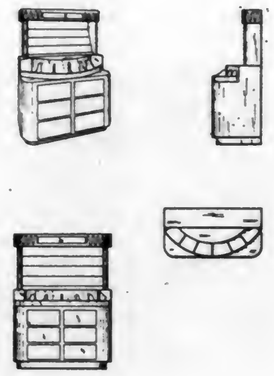
The ornamental design for a thermometer casing and minute glass unit, substantially as shown and described.

151,634
DESIGN FOR A CLOCK DIAL OR SIMILAR ARTICLE
Jay Hanna, New York, N. Y.
Application December 9, 1947, Serial No. 143,069
Term of patent 3½ years
(Cl. D42—10)



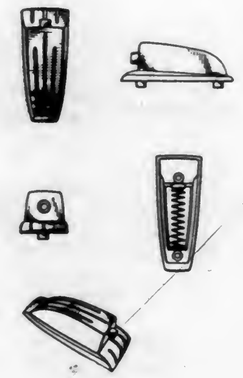
The ornamental design for a clock dial or similar article, substantially as shown and described.

151,635
DESIGN FOR A TOY CLOWN
Gotthilf Lehmann, New York, N. Y.
Application January 17, 1947, Serial No. 136,198
Term of patent 14 years
(Cl. D34—15)



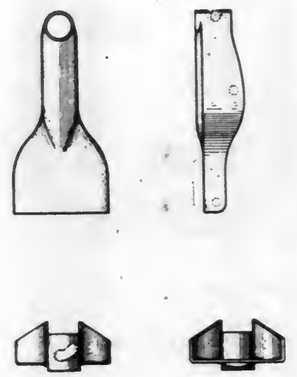
The ornamental design for a toy clown, as shown.

151,636
DESIGN FOR A KITCHEN CABINET
Nena Lewis, Campbell, Ohio
Application April 2, 1947, Serial No. 138,109
Term of patent 14 years
(Cl. D33—19)



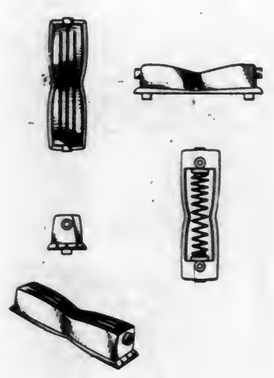
The ornamental design for a kitchen cabinet, as shown.

151,637
DESIGN FOR A DISPLAY CABINET FOR GREETING CARDS
Henry J. Loosley, St. Louis, Mo.
Application June 14, 1947, Serial No. 139,690
Term of patent 14 years
(Cl. D80—11)



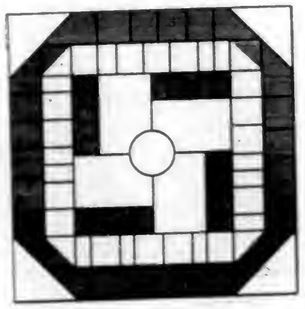
The ornamental design for a display cabinet for greeting cards, as shown.

151,638
DESIGN FOR A DRUMHEAD TENSIONING LUG FOR DRUMS
William F. Ludwig, Chicago, Ill.
Application May 16, 1947, Serial No. 139,073
Term of patent 3½ years
(Cl. D56—1)



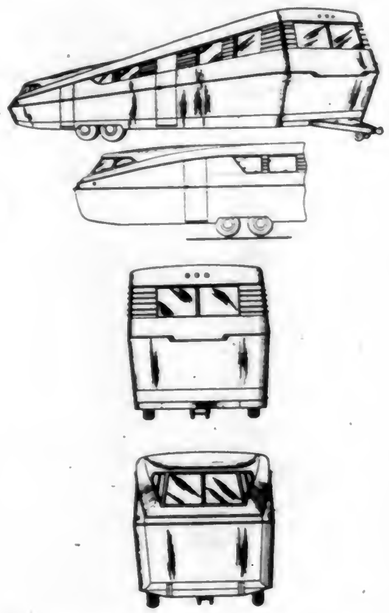
The ornamental design for a drumhead tensioning lug for drums, as shown.

151,639
DESIGN FOR A LEVER OF A DRUM SNARE TENSIONING MECHANISM
William F. Ludwig, Chicago, Ill.
Application May 16, 1947, Serial No. 139,074
Term of patent 3½ years
(Cl. D56—1)



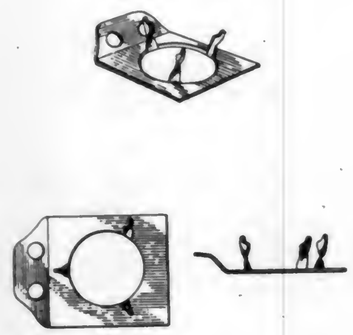
The ornamental design for a lever of a drum snare tensioning mechanism, as shown.

151,640
DESIGN FOR A TWIN DRUMHEAD TENSIONING LUG FOR DRUMS
William F. Ludwig, Chicago, Ill.
Application May 16, 1947, Serial No. 139,075
Term of patent 3½ years
(Cl. D56—1)



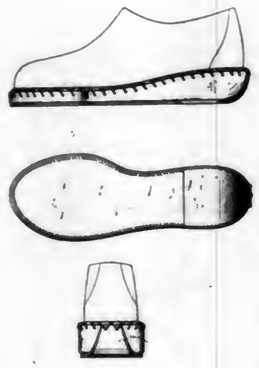
The ornamental design for a twin drumhead tensioning lug for drums, as shown.

151,641
DESIGN FOR A GAME BOARD
Wilber B. Mabry, Kansas City, Mo.
Application June 9, 1947, Serial No. 139,537
Term of patent 7 years
(Cl. D34—5)



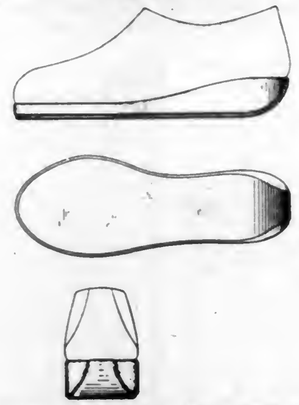
The ornamental design for a game board, as shown and described.

151,642
DESIGN FOR A VEHICLE TRAILER
William B. MacDonald, Jr., Chicago, Ill.
Application May 1, 1946, Serial No. 129,188
Term of patent 3½ years
(Cl. D14—3)



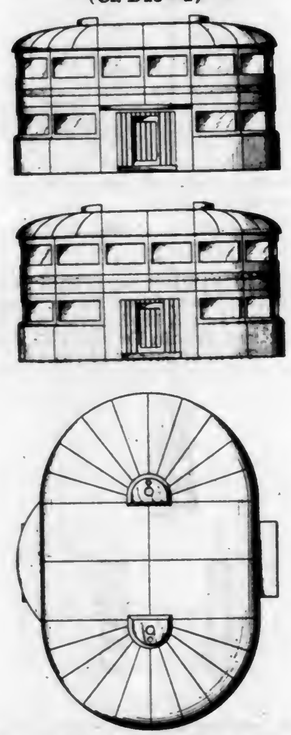
The ornamental design for a vehicle trailer as shown and described.

151,643
DESIGN FOR A HANDLING SUPPORT FOR TREATING LENSES
Donald M. Mackenzie, Reading, Pa., assignor to Willson Products, Inc., Reading, Pa., a corporation of Pennsylvania
Application September 5, 1946, Serial No. 133,072
Term of patent 14 years
(Cl. D57—1)



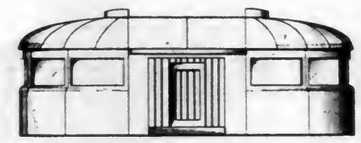
The ornamental design for a handling support for treating lenses, substantially as shown.

151,644
DESIGN FOR A SHOE
Roy Maling, Chestnut Hill, Mass.
Application March 6, 1948, Serial No. 144,948
Term of patent 14 years
(Cl. D7—7)

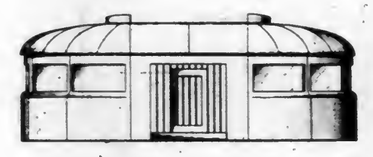


The ornamental design for a shoe, as shown.

151,645
DESIGN FOR A SHOE
Roy Maling, Chestnut Hill, Mass.
Application July 29, 1948, Serial No. 147,822
Term of patent 14 years
(Cl. D7—7)

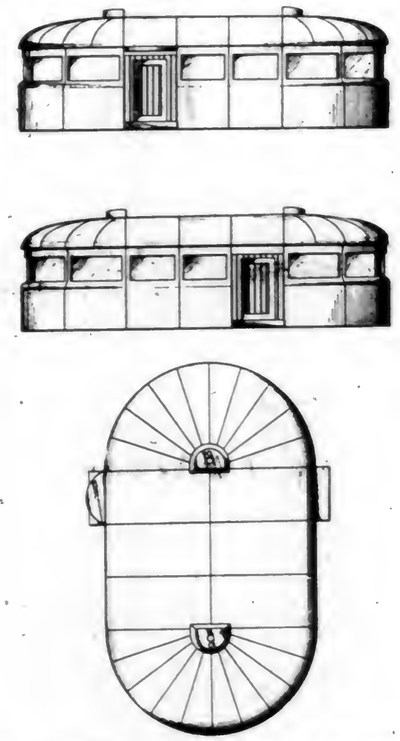


The ornamental design for a shoe, as shown.

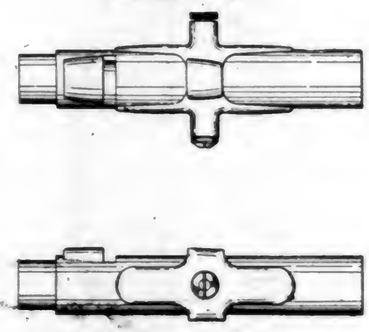


151,646
DESIGN FOR A HOUSE
George M. Marrow, Brattleboro, Vt.
Application September 26, 1947, Serial No. 141,594
Term of patent 14 years
(Cl. D13—1)

The ornamental design for a house, as shown.

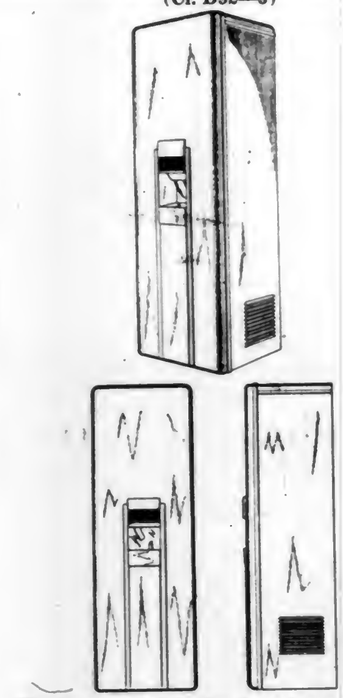


151,647
DESIGN FOR A HOUSE
George M. Marrow, Brattleboro, Vt.
Application September 26, 1947, Serial No. 141,595
Term of patent 14 years
(Cl. D13—1)



The ornamental design for a house, as shown.

151,648
DESIGN FOR A HOUSE
George M. Marrow, Brattleboro, Vt.
Application September 26, 1947, Serial No. 141,596
Term of patent 14 years
(Cl. D13—1)

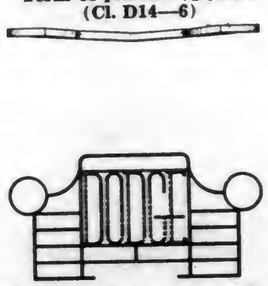


The ornamental design for a house, as shown.

151,649
DESIGN FOR AN ADJUSTABLE FISHING REEL SEAT
Charles H. Matson, New York, N. Y.
Application January 17, 1947, Serial No. 136,215
Term of patent 14 years
(Cl. D31—4)

The ornamental design for an adjustable fishing reel seat, as shown.

151,650
DESIGN FOR A BEVERAGE DISPENSER
Anthony Naiden, Southwick, Mass., assignor, by mesne assignments, to The Coca-Cola Company, Wilmington, Del., a corporation of Delaware
Application January 31, 1947, Serial No. 136,577
Term of patent 14 years
(Cl. D52—3)

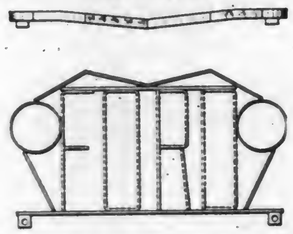


The ornamental design for a beverage dispenser, substantially as shown.

151,651
DESIGN FOR A CLOTHES PEG
Douglas Nield, Dinas Powis, Wales
Application July 2, 1947, Serial No. 140,480
In Great Britain February 14, 1947
Term of patent 14 years
(Cl. D17—6)

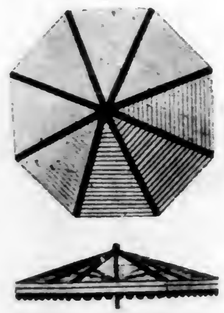
The ornamental design for a clothes peg, as shown.

151,652
DESIGN FOR A GRILLE GUARD FOR AUTOMOBILE RADIATORS
Harry Phillips, New York, N. Y., assignor to State Welding Works, Inc., New York, N. Y.
Application April 14, 1947, Serial No. 138,345
Term of patent 3½ years
(Cl. D14—6)



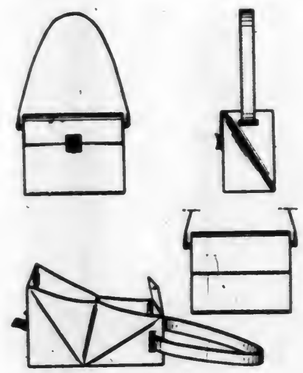
The ornamental design for a grille guard for automobile radiators, substantially as shown and described.

151,653
DESIGN FOR A GRILLE GUARD FOR AUTOMOBILE RADIATORS
Harry Phillips, New York, N. Y., assignor to State Welding Works, Inc., New York, N. Y.
Application April 14, 1947, Serial No. 138,346
Term of patent 3½ years
(Cl. D14—6)



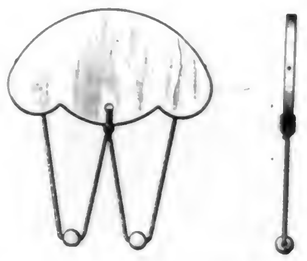
The ornamental design for a grille guard for automobile radiators, substantially as shown and described.

151,654
DESIGN FOR A GRILLE GUARD FOR AUTOMOBILE RADIATORS
Harry Phillips, New York, N. Y., assignor to State Welding Works, Inc., New York, N. Y.
Application April 14, 1947, Serial No. 138,348
Term of patent 3½ years
(Cl. D14—6)



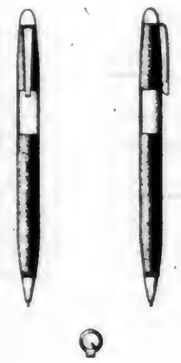
The ornamental design for a grille guard for automobile radiators, substantially as shown and described.

151,655
DESIGN FOR AN UMBRELLA
Charles M. Preaus, Tulsa, Okla., assignor of one-half to Charles E. Ross, Tulsa, Okla.
Application January 9, 1947, Serial No. 136,026
Term of patent 14 years
(Cl. D88—3)



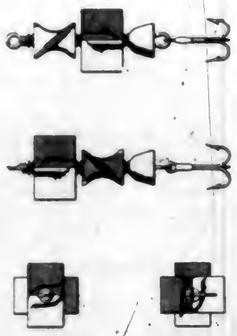
The ornamental design for an umbrella, as shown.

151,656
DESIGN FOR A HANDBAG
Frank H. Rath, Garden City, N. Y.
Application January 30, 1948, Serial No. 144,156
Term of patent 3½ years
(Cl. D87—3)



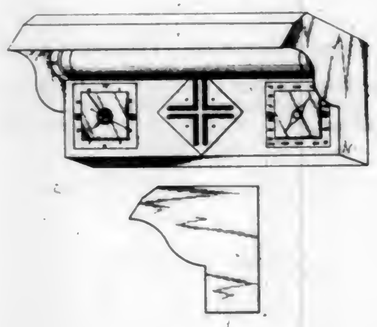
The ornamental design for a handbag, substantially as shown and described.

151,657
DESIGN FOR A PUZZLE OR SIMILAR ARTICLE
Anita M. Renault, Chicago, Ill.
Application July 27, 1946, Serial No. 132,030
Term of patent 7 years
(Cl. D34—15)



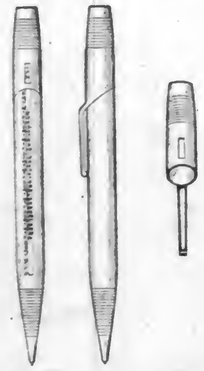
The ornamental design for a puzzle or similar article, substantially as shown.

151,658
DESIGN FOR A MECHANICAL PENCIL
Herbert W. Sams, Atlanta, Ga., assignor to Scripto, Inc., a corporation of Georgia
Application August 28, 1947, Serial No. 141,094
Term of patent 14 years
(Cl. D74—24)



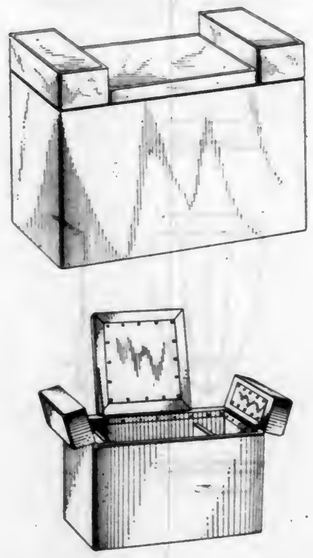
The ornamental design for a mechanical pencil, as shown.

151,659
DESIGN FOR A FISHING LURE
Oscar C. Schaefer, Racine, Wis.
Application February 26, 1947, Serial No. 137,192
Term of patent 14 years
(Cl. D31—4)



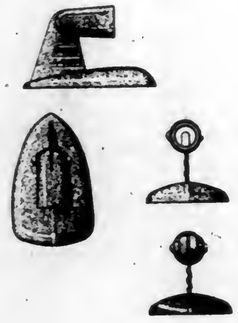
The ornamental design for a fishing lure, as shown.

151,660
DESIGN FOR A COMBINATION CLOCK, RADIO, AND LAMP
Abraham I. Shapiro, Boston, Mass.
Application December 26, 1946, Serial No. 135,759
Term of patent 7 years
(Cl. D56—4)



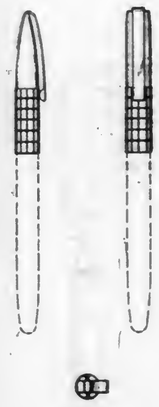
The ornamental design for a combination clock, radio, and lamp, as shown.

151,661
DESIGN FOR A CALENDAR PENCIL
John M. Sherrer, Wauconda, Ill., assignor of one-half to Donald L. Skene, Joliet, Ill., and one-half to Arlo S. Stoops, Galesburg, Ill.
Application February 14, 1947, Serial No. 136,906
Term of patent 3½ years
(Cl. D74—24)



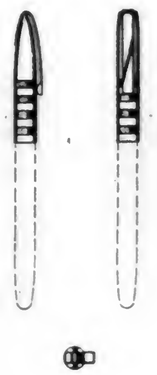
The ornamental design for a calendar pencil, substantially as shown and described.

151,662
DESIGN FOR A COMBINED STORAGE CABINET AND BENCH
Frank F. Smead, Chicago, Ill., assignor to Shawnee Manufacturing Company, Chicago, Ill., a corporation of Illinois
Application May 9, 1947, Serial No. 138,947
Term of patent 14 years
(Cl. D15—8)



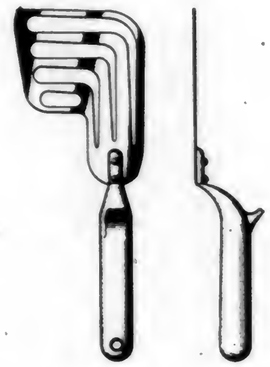
The ornamental design for a combined storage cabinet and bench, as shown.

151,663
DESIGN FOR A LAMP
Clifford Brooks Stevens, Milwaukee, Wis., assignor to Moe Brothers Manufacturing Company, Fort Atkinson, Wis., a corporation of Wisconsin
Application April 30, 1947, Serial No. 138,699
Term of patent 7 years
(Cl. D48—20)



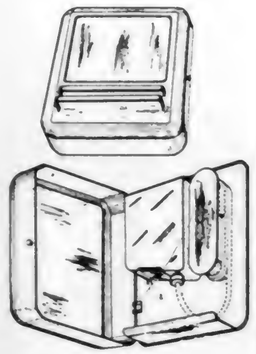
The ornamental design for a lamp, as shown.

151,664
DESIGN FOR A FOUNTAIN PEN OR SIMILAR ARTICLE
Walter Dorwin Teague, Annandale, N. J., and Robert J. Harper, Scarsdale, N. Y., assignors to Scripto, Inc., a corporation of Georgia
Application October 15, 1947, Serial No. 141,926
Term of patent 14 years
(Cl. D74—1)



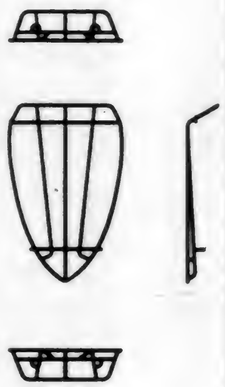
The ornamental design for a fountain pen or similar article, substantially as shown and described.

151,665
DESIGN FOR A FOUNTAIN PEN OR SIMILAR ARTICLE
Walter Dorwin Teague, Annandale, N. J., and Robert J. Harper, Scarsdale, N. Y., assignors to Scripto, Inc., a corporation of Georgia
Application October 16, 1947, Serial No. 141,952
Term of patent 14 years
(Cl. D74—1)



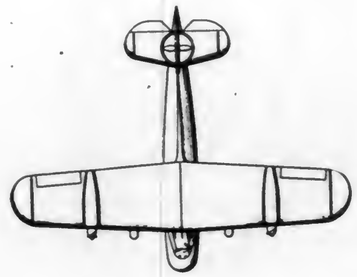
The ornamental design for a fountain pen or similar article, substantially as shown and described.

151,666
DESIGN FOR A PANCAKE TURNER OR SIMILAR ARTICLE
Robert H. Wendt, Evanston, Ill.
Application September 20, 1946, Serial No. 133,452
Term of patent 14 years
(Cl. D44—29)



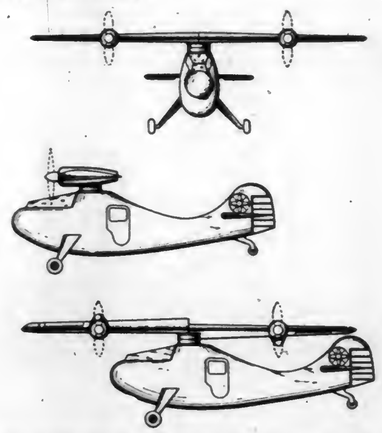
The ornamental design for a pancake turner or similar article, as shown.

151,667
DESIGN FOR A COMBINED CABINET AND DOUCHE TANK
Chesley L. Wolfe, Richmond, Calif.
Application September 20, 1946, Serial No. 133,462
Term of patent 14 years
(Cl. D33—19)



The ornamental design for a combined cabinet and douche tank, substantially as shown and described.

151,668
DESIGN FOR AN IRON STAND
Philip P. Wriede, New York, and Herbert Pike, Brooklyn, N. Y.
Application December 3, 1947, Serial No. 142,942
Term of patent 14 years
(Cl. D49—6)



The ornamental design for an iron stand, substantially as shown.

151,669
DESIGN FOR A ROTOR PLANE
Joseph Youhouse, Fairfield, Conn.
Application October 7, 1946, Serial No. 133,806
Term of patent 7 years
(Cl. D71—1)

151,669—Continued

The ornamental design for a rotor plane, substantially as shown.

Condition of Applications Under Examination at Close of Business Oct. 22, 1948

Total number of patent applications awaiting action, 154,474. Date of oldest new application, October 4, 1946; date of oldest amended application, April 16, 1946.

PATENT EXAMINING DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
1. GOLDBERG, A. J., Closure Operators; Fences; Gates; Planters; Plows; Harrows and Diggers; Plant Husbandry; Scattering Unloaders; Baths, Closets, Sinks, and Spittoons; Sewerage.	5-14-47	4-23-47	2829
2. HERRMANN, D., Fishing, Trapping and Vermin Destroying; Presses; Tobacco; Textile Wringers	2-27-47	9-19-46	2975
3. MARMELSTEIN, N., Metal Founding and Treatment; Metallurgy (Process and Apparatus)	1-19-48	1- 8-48	1363
4. BISHOP, WALTER C., Conveyors; Hoists; Handling Apparatus; Excavating; Elevators; Fire Escapes; Ladders; Scaffolds; Pneumatic Dispatch; Store Service; Mining, Quarrying, and Ice Harvesting.	3-14-47	2- 8-47	4126
5. ROBINSON, C. W., Harvesters; Bee Culture; Dairy; Knotters; Animal Husbandry; Butchering	5- 2-47	11- 5-46	1743
6. SURLE, H., Carbon Chemistry (part)	11- 6-47	10-11-47	1793
7. HANLIN, GEORGE, Optics; Photographic Apparatus	1-24-48	10-23-47	1648
8. LEWIS, R. O., (Acting), Furniture; Racks and Cabinets	2- 3-47	10- 2-46	4406
9. BENSON, R. B., Pumps and Fans; Fluid and Fluid-Current Motors	6-30-47	2- 6-47	2312
10. ANDRUS, L. M., Radiant Energy (part, e. g., Portable Radio Sets, Radio Accessories, Detectors, Oscillation Generators, Wave Meters, Tuners); Music; Modulators; Piezo-electric Crystals.	2-14-48	12-12-48	1603
11. BENHAM, E. V., Boots, Shoes, and Leggings, Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whip Apparatus.	12-10-47	2- 7-48	790
12. SPINTMAN, S., Machine Elements (part); Engine Starters; Motor Control with Clutch or Brake; Transmission with Clutch or Brake.	11-17-47	9-14-46	2246
13. BEALL, T. E., Gear Cutting, Milling, Planing, Metal Working (part); Needle and Pin Making; Turning	10- 4-46	10-29-46	2400
14. FREEHOF, H. B., Metal Working (Bending; Sheet-Metal; Wire; Misc. Processes); Wire Fabrics; Farriery	1-21-48	10-22-47	1348
15. HENKIN, B., Plastics; Plastic Block and Earthenware Apparatus; Glass	7-22-47	5-21-47	2145
16. LOVEWELL, N. N., Television; Telephony	1- 7-48	8- 5-47	1508
17. HABECKER, LEON B., Paper Manufactures; Typewriters; Printing; Type Casting and Setting; Sheet Material Associating or Folding; Sheet or Web Feeding.	4-19-47	11-12-46	2074
18. KURZ, J. A., Motors, Expansible-Chamber Type; Power Plants; Speed Responsive Devices; Rotary Internal-Combustion Engines.	7-15-47	8- 2-46	2016
19. PATRICK, P. L., Liquid and Gaseous Fuel Burners; Stoves and Furnaces	9-26-47	2- 1-47	1880
20. BROWN, L. M., Miscellaneous Hardware; Closure Fasteners; Locks; Undertaking; Bread, Pastry, and Confection Making; Bank Protection; Safes; Tents, Canopies, Umbrellas and Canes.	3-10-47	1-17-47	2049
21. MADER, R. C., Textiles	11-18-47	8-28-47	1246
22. CARPENTER, B. H., Aeronautics; Firearms; Ordnance	11-14-47	1- 3-47	1671
23. LEWIS, J. B., Cash Registers; Calculators and Counters; Education	11- 7-47	12-13-46	1193
24. LUSBY, CHARLES, Apparel; Apparel Apparatus; Package and Article Carriers; Sewing Machines	10- 9-47	9- 9-47	2828
25. BLAKELY, C. F., Classifying Solids; Centrifugal-Bowl Separators; Mills; Threshing; Vegetable and Meat Cutters and Comminutors; Distillation.	12-17-47	2-27-47	1764
26. YOUNG, R. R., Electricity—Generation and Motive Power	1-29-48	1-13-47	1208
27. JAMES, S., Brushing, Scrubbing; Fluid Treatment of Textiles (Apparatus); Liquid Treatment of Solids; General Cleaning; Ironing; Brush, Broom and Mop Making.	7-12-47	12-30-46	3607
28. SOLYOM, H. L., Internal-Combustion Engines (part); Cylinders; Pistons; Spring, Weight and Horsepower Motors; Land Vehicles, Dumping, Wheel Substitutes; Railway Wheels and Axles.	10- 2-47	9- 3-47	980
29. SKLARIN, J. B., Baggage; Cloth, Leather, and Rubber Receptacles; Button Making; Woodworking; Tools	3-28-47	2-27-47	3200
30. BISHOFF, A., Automatic Temperature and Humidity Regulation; Thermostats and Humidostats; Heating and Heating Systems; Illuminating Burners; Ammunition and Explosive Devices.	1- 5-48	10-15-47	1568
31. DUNCOMBE, C. S., Mineral Oils; Carbocyclic or Acyclic Carbon Compounds (part)—e. g., Ketones, Aldehydes, Ethers, Hydroxy Compounds, Hydrocarbons, Halogenated Hydrocarbons.	2-10-48	2- 6-48	2154
32. LESH, KARL R., Gas and Liquid Contact Apparatus; Heat Exchange; Gas Separation; Agitating; Wells; Earth Boring.	4- 1-47	11- 5-46	3238
33. KAUFFMAN, H. E., Bridges; Hydraulic and Earth Engineering; Building Structures; Roads and Pavements	2-24-47	10-28-46	3566
34. SAPERSTEIN, S., Electricity—Transmission of Vehicles; Railways; Track Sanders; Signals and Indicators	3-15-47	11-27-46	1508
35. BROMLEY, E. D., Card and Sign Exhibiting; Dispensing; Filling and Closing Portable Receptacles; Ammunition and Explosive Charge Making.	6- 2-47	11-15-46	3374
36. McFADYEN, A. D., Automatic Weighers; Measuring and Testing; Force Measuring	11- 4-46	10- 9-46	1996
37. WEAVER, M. E., Electricity, Circuit Makers and Breakers	1-26-48	3-21-47	1344
38. ARNOLD, D., Coating Processes and Apparatus; Coating or Plastic Compositions (part); Rubber	7- 8-47	7- 3-47	1733
39. WHITNEY, F. I., Fluid-Pressure Regulators; Valves; Water Distribution	5-15-47	9-13-46	3031
40. DRUMMOND, E. J., Receptacles (part); Packages	12- 5-47	12-18-46	3286
41. HERTZ, M., Check-controlled Apparatus; Coin Handling; Article Dispensing Cabinets; Deposit Receptacles; Buckles, Buttons, Clasps.	1-22-48	10-25-46	2334
42. MARANS, H., Telegraphy (part); Electric Signaling; Electricity, Voltage Magnitude and Phase Control Systems; Variable Transformer and Reactor Structure.	2-12-48	1-27-48	1206
43. STONE, I. G., Medicines, Poisons and Cosmetics; Explosive Compositions; Sugar and Starch; Bleaching and Dyeing; Fluid Treatment of Textiles; Hides, Skins and Leathers.	1- 2-48	10-23-47	1270
44. HARVEY, L. P., Refrigeration; Preserving	10-28-46	9-27-46	1105
45. MANTER, W. B., Shafting and Flexible Shaft Couplings; Wheels, Tires and Axles; Lubrication; Bearings and Guides; Belt and Sprocket Gearing; Spring Devices; Animal Draft Appliances; Vehicle Fenders.	4- 7-47	10-16-46	2582
46. MUSHAKE, W. I., Concentrating Evaporators; Fluid Sprinkling, Spraying and Diffusing; Fire Extinguishers; Liquid Heaters and Vaporizers; Kitchen and Table Articles.	7-25-47	10-25-46	1822

Total number of patent applications awaiting action, 154,474. Date of oldest new application, October 4, 1946; date of oldest amended application, April 16, 1946.

PATENT EXAMINING DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
47. KANOF, WM. J., Motor Vehicles; Land Vehicles (part); Fluid Pressure Brakes	12- 9-47	7-21-47	2188
48. BERNSTEIN, S., Electricity, General Applications; Electric Igniters	1-20-48	4- 9-47	1504
49. SHEFFIELD, E. L., Drying and Gas or Vapor Contact with Solids; Ventilation; Liquid Separation or Purification.	10-17-47	8-30-47	1576
50. LEVIN, SAMUEL, Synthetic Resins	1-26-48	11- 8-47	2249
51. FRIEDMAN, M. H., Radiant Energy (part, e. g., Radio Transmission and Reception, Transmitters, Receivers, Antennae); Radiant Energy Communications.	1-21-48	8-26-47	1770
52. KNOTTS, M. K., Supports; Chucks; Joint Packing; Pipe and Rod Joints or Couplings; Tool-Handle Fastenings; Pipes and Tubular Conduits.	10-13-47	1- 6-47	3895
53. BRINDISI, M. V., Label Pasting and Paper Hanging; Book Making; Manifolding; Printed Matter, Stationery; Paper Files and Binders; Cutlery; Closures, Partitions and Panels, Flexible and Portable.	5- 8-47	10- 1-46	3567
54. STRACHAN, O. W., Electric Lamp and Discharge Devices, Systems, Structure, Manufacture and Repair; Light Sensitive Circuits; Ray Energy Applications.	1-28-48	7-18-47	1705
55. BOWEN, S. T., Artificial Body Members; Dentistry; Surgery; Toilet	10-23-47	10-22-47	1889
56. COCKERILL, S., Electrical and Wave Energy Chemistry; Paper Making; Heating and Illuminating Gas	12-16-47	11- 7-47	1073
57. MILLER, A. B., Cutting and Punching; Bolt, Nut, Rivet, Nail, Screw, Chain, and Horseshoe Making; Driven and Screw Fastenings; Nut and Bolt Locks; Jewelry; Toys	5-19-47	1-22-47	3578
58. DOWELL, E. F., Abrading; Food Apparatus; Bottles and Jars; Stone Working; Making Metal Tools and Implements.	12-31-46	3- 3-47	2135
59. SHEPARD, P. W., Chemistry; Fertilizers; Gas, Heating and Illuminating; Heterocyclic Compounds (part)	9-19-47	4-25-47	2020
60. GLASS, R. L., Electricity—Heating; Welding; Furnaces; Battery Charging and Discharging; Consumable Electrode Lamp and Discharge Devices; Resistances and Rheostats; Prime Mover Dynamo Plants.	2-25-48	7-24-47	1415
61. LANNAN, J., Winding and Reeling; Pushing and Pulling; Horology; Time-Controlling Apparatus; Railway Mail Delivery; Boats, Buoys, Ships and Marine Propulsion.	12- 3-46	8- 5-46	3760
62. PUGH, E. C., Games; Tables; Amusement and Exercising Devices; Mechanical Guns and Projectors	6-14-47	9-17-46	1855
63. WINKELSTEIN, A. H., Fermentation; Foods and Beverages; Heterocyclic Compounds (part); Oils and Fats.	9-30-47	9-13-47	1328
64. NASH, P. M., Compositions—Coating or Plastic (part); Fuel and Miscellaneous	3-17-48	3-19-48	1589

Ointment. McKesson & Robbins, Incorporated. 246,194, renewed Sept. 4, 1948. O. G. Nov. 9.
Ointment. McKesson & Robbins, Incorporated. 246,196, renewed Sept. 4, 1948. O. G. Nov. 9.
Ointment, Antiseptic. McKesson & Robbins, Incorporated. 246,230, renewed Sept. 4, 1948. O. G. Nov. 9.
Ointment, Mustard. McKesson & Robbins, Incorporated. 246,504, renewed Sept. 11, 1948. O. G. Nov. 9.
Perfume, toilet water, and cologne. E. Westall. 402,138, June 29, 1943. Republished Nov. 9.
Perfume, toilet water, skin creams, etc. Elizabeth Arden, Inc. 249,444, renewed Nov. 13, 1948. O. G. Nov. 9.
Perfumes, essences of perfumes, essences for perfumery materials, etc. A. L. van Ameringen. 245,404, Aug. 14, 1928. Republished Nov. 9.
Phosphate, Defluorinated. International Minerals and Chemical Croporation. 503,786, Nov. 9; Serial No. 540,191, published July 27, 1948.
Powder, Flea. Polk Miller Products Corporation. 331,354, Jan. 7, 1936. Republished Nov. 9.
Powder, Flea. Polk Miller Products Corporation. 331,357, Jan. 7, 1936. Republished Nov. 9.
Powder, Flea. Polk Miller Products Corporation. 331,533, Jan. 14, 1936. Republished Nov. 9.
Powder, Flea. Polk Miller Products Corp. 362,260–1, Nov. 15, 1938. Republished Nov. 9.
Powder, Flea or insect. Polk Miller Products Corporation. 217,083, Aug. 24, 1926. Republished Nov. 9.
Preparation for the relief of indigestion. McKesson & Robbins, Incorporated. 246,398, renewed Sept. 4, 1948. O. G. Nov. 9.
Preparation for use in the treatment of headache, backache, and toothache. Marswell, Incorporated. 249,830, renewed Nov. 20, 1948. O. G. Nov. 9.
Preparation in powdered form for administration to and application to racing and homing pigeons, poultry, fowl, etc. Fast Flight Company. 441,258, Nov. 9; Serial No. 508,840, published Aug. 10, 1948.
Preparation used in the treatment of cardiovascular disease. G. D. Searle & Co. 503,797, Nov. 9; Serial No. 548,764, published July 27, 1948.
Preparations containing active hormonal compounds in the form of tablets, etc. Ciba Pharmaceutical Products, Inc. 503,794–5, Nov. 9; Serial Nos. 545,952–3, published July 27, 1948.
Preparations for the treatment of chronic rheumatism, gout, pimples, etc. S. B. Leonardi & Co., Inc. 253,557, renewed Feb. 26, 1949. O. G. Nov. 9.
Product phenyl-azo-alpha-alpha-diamino-pyridine hydrochloride and base. Mallinckrodt Chemical Works. 503,734, Nov. 9; Serial No. 526,934, published Aug. 10, 1948.
Remedies, Eye. Murine Company, Inc. 240,437, Mar. 27, 1928. Republished Nov. 9.
Remedy for dandruff, Liquid. J. L. Needham. 93,012, Aug. 12, 1913. Republished Nov. 9.
Repellent and preparation, Insect. Chemical Research Products, Inc. 441,265, Nov. 9; Serial No. 512,640, published Aug. 10, 1948.
Resin compositions, Synthetic. Monsanto Chemical Company. 503,718, Nov. 9; Serial No. 513,671, published July 27, 1948.
Rouge and lipstick. Richard Hudnut. 441,251, Nov. 9; Serial No. 507,855, published Aug. 10, 1948.
Shampoo. McKesson & Robbins, Incorporated. 246,013, renewed Aug. 28, 1948. O. G. Nov. 9.
Softener, Water, talcum powder, cologne, and bath oil. Bathasweet Corporation. 503,799, Nov. 9; Serial No. 549,046, published Aug. 10, 1948.
Solution for the relief of congestion of the mucous membranes of the nose and throat. Parke, Davis & Company. 503,760, Nov. 9; Serial No. 532,336, published Aug. 10, 1948.
Spirits of ammonia, Aromatic, castor oil, carbolated petrolatum, etc. Kendall Company. 300,569, Jan. 24, 1933. Republished Nov. 9.
Spray materials. United Co-Operatives, Inc. 384,494, Jan. 21, 1941. Republished Nov. 9.
Sulphonates, Petroleum. Griffin Chemical Company. 503,758, Nov. 9; Serial No. 531,792, published Aug. 3, 1948.
Sulphur, insecticides, and fungicides. Stauffer Chemical Company. 503,796, Nov. 9; Serial No. 547,785, published July 27, 1948.
Toilet preparations. G. C. Wilson. 216,967, Aug. 24, 1926. Republished Nov. 9.
Tonic, General. McKesson & Robbins, Incorporated. 246,745, renewed Sept. 11, 1948. O. G. Nov. 9.
Tonics and laxatives, Alternative general. McKesson & Robbins, Incorporated. 245,986, renewed Aug. 28, 1948. O. G. Nov. 9.
Vitamin B preparation. R. I. Guy. 503,792, Nov. 9; Serial No. 543,707, published Aug. 10, 1948.
Vitamin preparation, Multiple. Abbott Laboratories. 503,756, Nov. 9; Serial No. 531,572, published Mar. 2, 1948.
Vitamin products and a bulk laxative preparation. P. C. Bragg. 503,774, Nov. 9; Serial No. 536,871, published Aug. 10, 1948.
Waterproofing compound, Liquid chemical. Empire Varnish Company. 503,717, Nov. 9; Serial No. 512,901, published Aug. 3, 1948.

CLASS 8

Ash trays. Victory Plastics Co. 441,256, Nov. 9; Serial No. 508,458, published Aug. 10, 1948.
Cases, Cigarette. Pioneer Suspender Company. 503,716, Nov. 9; Serial No. 511,288, published Aug. 10, 1948.

CLASS 9

Caps for toy pistols. J. Halpern Company. 313,889, June 12, 1934. Republished Nov. 9.
Fuses. Bolser Corporation. 381,487, Sept. 24, 1940. Republished Nov. 9.
Matches. Rival Foods, Inc. 419,636, Feb. 26, 1946. Republished Nov. 9.
Powder, Smokeless. Laflin & Rand Powder Company. 72,658, re-renewed Feb. 9, 1949. O. G. Nov. 9.

CLASS 10

Fertilizer and soil conditioner, Combination. Atkins & Durbrow, Inc. 417,642, Nov. 6, 1945. Republished Nov. 9.
Fertilizer, Complete, mixed. Fidelity Chemical Corporation. 390,192, Sept. 9, 1941. Republished Nov. 9.
Fertilizer, Prepared. Fort Smith Cotton Oil Co. 340,427, Nov. 10, 1936. Republished Nov. 9.

CLASS 11

Typewriter ribbons and carbon paper. Codo Manufacturing Corporation. 410,438, Nov. 28, 1944. Republished Nov. 9.

CLASS 12

Asphaltic compounds, Plastic. Permaflex Products Co. 441,277, Nov. 9; Serial No. 521,463, published July 27, 1948.
Bricks, Refractory, blocks, and shapes, etc. Joseph Dixon Crucible Company. 441,263, Nov. 9; Serial No. 511,800, published July 13, 1948.
Cement preparation, Asbestos and asphalt. Rutland Fibre Clay Company. 503,778, Nov. 9; Serial No. 537,734, published July 27, 1948.
Cement product. Bird-Archer Company. 315,338, July 24, 1934. Republished Nov. 9.
Culverts and parts therefor, Ferrous metal. American Rolling Mill Company. 503,740, Nov. 9; Serial No. 527,910, published July 27, 1948.

Fibre board, thermal insulating board; composite board, etc. Masonite Corporation. 252,120, renewed Jan. 22, 1949. O. G. Nov. 9.
Filler, Plastic. Evans Chemical Corporation. 441,236, Nov. 9; Serial No. 482,792, published July 20, 1948.
Flooring and interior wood trim, Oak and maple. Harris Manufacturing Company. 290,424, Jan. 5, 1932. Republished Nov. 9.
Guard rails, Ferrous metal. American Rolling Mill Company. 503,738, Nov. 9; Serial No. 527,730, published July 13, 1948.
Head-walls, arches, back walls, Corrugated ferrous metal, etc. American Rolling Mill Company. 503,737, Nov. 9; Serial No. 527,663, published July 13, 1948.
Insulation material, Thermal and acoustical. Kimberly-Clark Corporation. 503,745, Nov. 9; Serial No. 528,933, published July 27, 1948.
Joists, Metal. Davisbilt Steel Joist, Inc. 503,812, Nov. 9; Serial No. 512,110.
Plywood covered with stainless steel, Laminated, etc. Met-L-Wood Corporation. 503,757, Nov. 9; Serial No. 531,613, published July 13, 1948.
Roof cement, Asbestos. J. F. Kurfees Paint Company. 503,769, Nov. 9; Serial No. 535,541, published July 27, 1948.
Roof cement, Asbestos. J. F. Kurfees Paint Company. 503,770, Nov. 9; Serial No. 535,558, published July 27, 1948.
Roof cement, Asbestos. J. F. Kurfees Paint Company. 503,771, Nov. 9; Serial No. 535,566, published July 27, 1948.
Ties, Railroad, dressed timbers and poles. McCormick & Baxter Creosoting Co. 441,253, Nov. 9; Serial No. 507,988, published July 27, 1948.
Tiles and foundation sheets. Porcelain Tile Company. 246,871, renewed Sept. 18, 1948. O. G. Nov. 9.
Weather strips, Metal. Andersen Corporation. 362,372, Nov. 15, 1938. Republished Nov. 9.

CLASS 13

Assemblies, Roller wheel. Woodmark Industries Incorporated. 503,746, Nov. 9; Serial No. 529,122, published July 20, 1948.
Bellows of metal. Cook Electric Company. 503,715, Nov. 9; Serial No. 508,894, published July 27, 1948.
Bulbs, Tank-valve. J. A. Sexauer Manufacturing Co., Inc. 246,286, renewed Sept. 4, 1948. O. G. Nov. 9.
Clamps and parts thereof, Industrial pressure. Band-It Company. 441,272. Nov. 9; Serial No. 518,650, published July 27, 1948.
Fastening elements in the nature of nails. Spotnails, Inc. 413,423, Apr. 24, 1945. Republished Nov. 9.
Fastening elements in the nature of nails. Spotnails, Inc. 413,687, May 8, 1945. Republished Nov. 9.
Faucets and parts thereof. Chicago Faucet Company. 503,711, Nov. 9; Serial No. 494,027, published July 27, 1948.
Faucets, Beverage dispensing. Wooster Brass Company. 503,751, Nov. 9; Serial No. 529,517, published July 27, 1948.
Governors, Constant pressure pump; excess or differential pump governors; boiler gas fuel governors, etc. Fisher Governor Company. 418,084, Dec. 4, 1945. Republished Nov. 9.
Hinges, hinge straps, corner irons, etc. McKinney Manufacturing Company. 249,498, renewed Nov. 13, 1948. O. G. Nov. 9.
Hollow ware, Base metal cooking and table. Club Aluminum Products Co. 441,242, Nov. 9; Serial No. 495,272, published Feb. 10, 1948.
Paper, Adding machine, address books, arch files, etc. Stationers' Guild of America. 387,699, May 27, 1941. Republished Nov. 9.
Pilot mechanism for valves, Liquid level responsive pressure actuated. Fisher Governor Company. 398,790, Nov. 24, 1942. Republished Nov. 9.
Pipe and fittings, Cast iron soil. G. W. Vandervort Company. 441,268, Nov. 9; Serial No. 516,745, published July 27, 1948.
Screws, bolts, nuts, etc. Pheoll Manufacturing Company. 503,741, Nov. 9; Serial No. 528,227, published July 27, 1948.
Staples. Boston Wire Stitcher Company. 226,587, Apr. 12, 1927. Republished Nov. 9.
Staples, Machine. Speed Products Co., Inc. 503,743, Nov. 9; Serial No. 528,525, published July 20, 1948.
Tubing, Metal, and shaped metal tube lengths. Bundy Tubing Company. 503,732, Nov. 9; Serial No. 526,717, published Aug. 3, 1948.
Utensils, Cooking. Traubee Products, Inc. 441,267, Nov. 9; Serial No. 516,742, published Aug. 3. 1948.
Valve stems, Pneumatic tire, pneumatic tire valves, valve cores, etc. Dill Manufacturing Company. 503,752, Nov. 9; Serial No. 529,971, published Aug. 3, 1948.
Valves. W. Powell Company. 441,285, Nov. 9; Serial No. 523,536, published July 27, 1948.
Valves, Spring controlled. Fisher Governor Company. 394,809, Apr. 28, 1942. Republished Nov. 9.

CLASS 14

Alloys, Vanadium Corporation of America. 244,654, July 24, 1928. Republished Nov. 9.
Alloys, Base metal. Ellicott Machine Corporation. 182,112, Apr. 1, 1924. Republished Nov. 9.
Babbitt metal. More-Jones Brass & Metal Company. 145,156, July 26, 1921. Republished Nov. 9.
Babbitt metal. More-Jones Brass & Metal Company. 145,158–9, July 26, 1921. Republished Nov. 9.
Babbitt metal; unfinished cored and solid bars of non-ferrous metals; unfinished driving box bearing castings, etc. American Brake Shoe Company. 419,140, Feb. 5, 1946. Republished Nov. 9.
Bearing metal. More-Jones Brass & Metal Company. 145,160, July 26, 1921. Republished Nov. 9.
Castings and forgings. American Brake Shoe Company. 404,752, Dec. 21, 1943. Republished Nov. 9.
Forgings, Upset. American Forge Company. 192,921, Dec. 16, 1924. Republished Nov. 9.
Forgings, Upset and drop. American Brake Shoe Company. 404,891–2, Dec. 28, 1943. Republished Nov. 9.
Frogs, Track, crossings, guard rails, etc. Ramapo Ajax Corporation. 160,851, July 3, 1923. Republished Nov. 9.
Reenforcements, Preformed ferrous. American Brake Shoe Company. 405,790–1, Feb. 22, 1944. Republished Nov. 9.

CLASS 15

Oil for hand cream separators, Lubricating. Pure Oil Company. 503,736, Nov. 9; Serial No. 527,279, published Aug. 3, 1948.
Oil having adhesive characteristics, Machinery lubricating. Sun Oil Company. 441,257, Nov. 9; Serial No. 508,624, published Aug. 3, 1948.
Oils and greases, Lubricating. W. H. Barber Company. 503,759, Nov. 9; Serial No. 532,201, published Aug. 3, 1948.
Oils and greases, Lubricating. Fiske Brothers Refining Co. 503,750, Nov. 9; Serial No. 529,447, published Aug. 3, 1948.
Oils and greases, Lubricating. Fiske Brothers Refining Co. 503,753, Nov. 9; Serial No. 529,975, published Aug. 3, 1948.
Oils and greases, Lubricating. Haggerty Refining Co. 503,748, Nov. 9; Serial No. 529,376, published Aug. 10, 1948.
Oils, Cutting. Oster Manufacturing Company. 441,243, Nov. 9; Serial No. 496,400, published July 27, 1948.
Oils, Lubricating. Haggerty Refining Co. 503,749, Nov. 9; Serial No. 529,377, published Aug. 3, 1948.
Oils, Lubricating. Mid-West Oil Company. 249,984, renewed Nov. 27, 1948. O. G. Nov. 9.
Oils, Lubricating greases and lubricating. New York Lubricating Oil Company. 253,425, renewed Feb. 26, 1949. O. G. Nov. 9.
Oils, Motor. Industrial Oil Corporation. 252,551, renewed Feb. 12, 1948. O. G. Nov. 9.
Petroleum products. Consolidated Flour Mills Company. 503,762, Nov. 9; Serial No. 533,147, published Aug. 3, 1948.

CLASS 16

Lacquer, Linoleum. American Varnish Company. 427,124, Jan. 28, 1947. Republished Nov. 9.
Varnish, lacquers, brushing lacquers, thinners, etc. Standard Industrial Products, Inc. 371,420, Sept. 26, 1939. Republished Nov. 9.
Wax preparation, Liquid. American Disinfecting Company. 252,967, renewed Feb. 19, 1949. O. G. Nov. 9.

CLASS 17

Cigars. Compañia Industrial Tabacalera, S. A. 441,240, Nov. 9; Serial No. 489,205, published Aug. 10, 1948.
Cigars. A. Sensenbrenner Sons. 503,714, Nov. 9; Serial No. 503,225, published Aug. 10, 1948.
Cigars and smoking tobacco. Medalist Co., Inc. 503,755, Nov. 9; Serial No. 530,663, published Aug. 10, 1948.
Cigars, cigarettes, smoking tobacco, etc. Imperial Tobacco Company of Canada, Limited. 441,264, Nov. 9; Serial No. 511,948, published Aug. 10, 1948.
Tobacco, Smoking and chewing. Penn Tobacco Company. 503,784, Nov. 9; Serial No. 539,754, published June 22. 1948.

CLASS 19

Backs for brake shoes, Reenforcing. American Brake Shoe and Foundry Company. 402,586–7, Aug. 3, 1943. Republished Nov. 9.
Brake shoes. American Brake Shoe & Foundry Company. 204,106, Oct. 6, 1925. Republished Nov. 9.
Brake shoes. American Brake Shoe and Foundry Company. 315,350, July 24, 1934. Republished Nov. 9.
Car wheels. Southern Wheel Company. 343,135, Feb. 9, 1937. Republished Nov. 9.

CLASS 21

Batteries, Storage. Reading Batteries, Inc. 422,702, Aug. 6, 1946. Republished Nov. 9.
Conduit fittings, outlet boxes, and covers. Rattan Manufacturing Co. 247,948, renewed Oct. 9, 1948. O. G. Nov. 9.
Conduit, Flexible metallic. Breeze Corporations, Inc. 246,543, renewed Sept. 11, 1948. O. G. Nov. 9.
Electric clearance lights, marker lights direction lights, etc. Boiser Corporation. 364,182, Jan. 24, 1939. Republished Nov. 9.

Fuses, non-renewable, Electric. Virginia Electric Manufacturing Corporation. 405,194, Jan. 11, 1944. Republished Nov. 9.
Goods made of vulcanized fiber for electrical purposes. Diamond State Fibre Company. 93,267, Sept. 2, 1913. Republished Nov. 9.
Heat treating equipment, Electrical induction. Ohio Crankshaft Company. 387,810, June 3, 1941. Republished Nov. 9.
Insulating compounds. Fibroc Insulation Company. 148,640, Nov. 22, 1921. Republished Nov. 9.
Motors, dynamos, and batteries, etc., Electrical. W. Krug. 219,739, Oct. 26, 1926. Republished Nov. 9.
Radio receiving sets and antennae. Walgreen Co. 338,779, Sept. 15, 1936. Republished Nov. 9.
Spark plugs. United Co-Operatives, Inc. 384,576, Jan. 21, 1941. Republished Nov. 9.
Vacuum cleaners, Electric. Sun Vacuum Stores. 419,215, Feb. 5, 1946. Republished Nov. 9.

CLASS 22

Amusement apparatus, Coin-controlled. Exhibit Supply Company. 503,829, Nov. 9; Serial No. 529,246.
Amusement apparatus, Coin-controlled. Exhibit Supply Company. 503,831, Nov. 9; Serial No. 529,974.
Fish-hooks. W. E. Compton. 65,988, re-renewed Nov. 5, 1947. O. G. Nov. 9.
Fish lures. J. F. Woodhull. 503,818, Nov. 9; Serial No. 515,735.
Golf balls. United States Rubber Company. 246,613, renewed Sept. 11, 1948. O. G. Nov. 9.
Sleds, Coasting. Pratt Corporation. 344,161, Mar. 16, 1937. Republished Nov. 9.

CLASS 23

Accessories, Automobile. Dalton Foundries, Inc. 223,786, Feb. 8, 1927. Republished Nov. 9.
Adding machine paper, address books, arc files, etc. Stationers' Guild of America. 387,699, May 27, 1941. Republished Nov. 9.
Bearings, Bronze. More-Jones Brass & Metal Co. 179,354, Feb. 5, 1924. Republished Nov. 9.
Blades, Razor. Club Razor & Blade Mfg. Corp. 380,100, Aug. 6, 1940. Republished Nov. 9.
Braiding-machines and parts thereof. Wardwell Braiding Machine Company. 134,200, Aug. 17, 1920. Republished Nov. 9.
Card clothing and hand cards for carding. Standard Card Clothing Company. 248,269, renewed Oct. 16, 1948. O. G. Nov. 9.
Casting machines, Centrifugal. W. T. Anderson. 422,657, Aug. 6, 1946. Republished Nov. 9.
Cleaning equipment, Industrial. Oakite Products, Inc. 423,465, Sept. 3, 1946. Republished Nov. 9.
Crankshafts. Ohio Crankshaft Company. 346,939, June 15, 1937. Republished Nov. 0.
Drills, Automatic, ratchet screw drivers, spiral ratchet screw drivers, etc. North Bro's M'f'g Co. 267,875, Mar. 4, 1930. Republished Nov. 9.
Engines, Gas and oil. National Supply Company of California. 329,601, Nov. 5, 1935. Republished Nov. 9.
Engines, Internal combustion. Hercules Motors Corporation. 318,770, Nov. 6, 1934. Republished Nov. 9.
Governors, Constant pressure pump; excess or differential pump governors; boiler gas fuel governors, etc. Fisher Governor Company. 418,084, Dec. 4, 1945. Republished Nov. 9.

LIST OF REISSUE PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 9TH DAY OF NOVEMBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Allied Chemical & Dye Corporation, assignee: *See*—
Tweit, Olav M.

Tweit, Olav M., Mountain Lakes, N. J., assignor to Allied Chemical & Dye Corporation. Wash box. Re. 23,048, Nov. 9.

LIST OF DESIGN PATENTEES

Adams, Charles J., Park Ridge, and H. Z. Benton, Woodstock, Ill. Vacuum tube socket. 151,670, Nov. 9.

Adel Precision Products Corp., assignee: *See*—
Meripol, Ed B.

Angel Bra Corp., assignee: *See*—
Selcow, Jack.

Armus, Charlotte T., New York, N. Y. Ash tray. 151,671, Nov. 9.

Armus, Charlotte T., New York, N. Y. Ash tray. 151,672, Nov. 9.

Arpin, Leonard G., Montclair, N. J. Earring or similar article. 151,673, Nov. 9.

Arpin, Leonard G., Montclair, N. J. Earring or similar article. 151,674, Nov. 9.

Benton, Harold Z.: *See*—
Adams, Charles J., and Benton.

Bird, Edward, London, England. Rocking chair. 151,675, Nov. 9.

Bletzinger, Frederick, Sr., Chicago, Ill. Paper roll holder or similar article. 151,676, Nov. 9.

Bloch Freres, Inc., assignee: *See*—
Bloch, Mathieu.

Bloch, Mathieu, assignor to Bloch Freres, Inc., New York, N. Y. Font of type. 151,677, Nov. 9.

Blouin, Leo W., Middleboro, Mass. Bobby pin and hairpin holder. 151,678, Nov. 9.

Braun, Samuel, Rockville Centre, and M. Crystal, Forest Hills, N. Y. Watch and jewelry display box. 151,679, Nov. 9.

Briggs, Charles B., Horbury, assignor to Slazengers Limited, London, and William Sykes Limited, Horbury, England. Racquet press. 151,680, Nov. 9.

Brill, Edward F., Milwaukee, Wis. Self-service refrigerated display case. 151,681, Nov. 9.

Bristol Steel & Iron Works, Inc., assignee: *See*—
Ferguson, Robert O.

Chautauqua Hardware Corporation, assignee: *See*—
Gane, Robert W.

Chernow, Michael, New York, N. Y. Chain for a bracelet or similar article. 151,682, Nov. 9.

Cities Service Oil Company, assignee: *See*—
White, Lysander T.

Clarke, James R., Oneida, N. Y. Powder blender. 151,683, Nov. 9.

Columbia Protektosite Company, Inc., assignee: *See*—
Lux, Eugene J.

Coro, Inc., assignee: *See*—
Katz, Adolph.

Crystal, Max: *See*—
Braun, Samuel, and Crystal.

Duvalet, Maurice, Congers, assignor to Van Cleef & Arpels, Inc., New York, N. Y. Brooch or similar article. 151,684, Nov. 9.

Eberle, Philip F., and L. E. Sans, San Francisco, Calif. Bootee. 151,685, Nov. 9.

Ekco Products Company, assignee: *See*—
Lueneburg, Walter C.

Ferguson, Robert O., Bristol, Tenn., assignor of one-half to Bristol Steel & Iron Works, Inc., Bristol, Va.-Tenn. Combined syringe bag and tube support. 151,686, Nov. 9.

Fisk, Earl R., Depew, Okla. Combined lamp and smoking stand. 151,687, Nov. 9.

Flock, Arthur E.: *See*—
Pulver, Wilfrid A., and Flock.

Foster, Charles H., New York, N. Y. Airplane control toy. 151,688, Nov. 9.

Gane, Robert W., assignor to Chautauqua Hardware Corporation, Jamestown, N. Y. Drawer pull. 151,689, Nov. 9.

Glenmore Distilleries Company, assignee: *See*—
Kelley, Henry E., Jr.

Goldberg, Harry, assignor to Morris W. Haft & Bros., Inc., New York, N. Y. Jacket. 151,690, Nov. 9.

Gunn, Carl D.: *See*—
Whitman, George L., and Gunn.

Haft, Morris W., & Bros., Inc., assignee: *See*—
Goldberg, Harry.

Haggstrom, Arthur C., assignor to Style Line Products Co., Rockford, Ill. Animal trap. 151,691, Nov. 9.

Heller, Harold S., Cleveland Heights, Ohio. Stapling machine or similar article. 151,692, Nov. 9.

Jacobson, Louis, New York, N. Y. Spectacle frame. 151,693, Nov. 9.

Katz, Adolph, Providence, R. I., assignor to Coro, Inc., New York, N. Y. Brooch or similar article. 151,694, Nov. 9.

Kelley, Henry E., Jr., Kirkwood, Mo., assignor to Glenmore Distilleries Company, Louisville, Ky. Straw holder. 151,695, Nov. 9.

Kewaskum Utensil Company, assignee: *See*—
Oster, Edna M.

Klaschek, Charles, Brooklyn, N. Y., and G. Klashek, London, England. Jewelry charm. 151,696, Nov. 9.

Klashek, George: *See*—
Klaschek, Charles, and George.

Leavin, William H., New York, N. Y. Lipstick case or similar article. 151,697, Nov. 9.

Levoy, Monroe B., New York, N. Y. Spectacle frame. 151,698, Nov. 9.

Lockheed Aircraft Corporation, assignee: *See*—
Pulver, Wilfrid A., and Flock.

Lothrop, George W., Wayne, Mich. Ski sandal. 151,699, Nov. 9.

Lueneburg, Walter C., Evanston, assignor to Ekco Products Company, Chicago, Ill. Handle for kitchen utensils or similar articles. 151,700, Nov. 9.

Lux, Eugene J., New York, N. Y., assignor to Columbia Protektosite Company, Inc., Carlstadt, N. J. Table or similar article. 151,701, Nov. 9.

Macpherson, Mildred, New York, N. Y. Dress. 151,702, Nov. 9.

Meripol, Ed B., Los Angeles, assignor, by mesne assignments, to Adel Precision Products Corp., Burbank, Calif. Garden tractor. 151,703, Nov. 9.

Oster, Edna M., assignor to Kewaskum Utensil Company, Kewaskum, Wis. Utensil handle. 151,704, Nov. 9.

Patterson, Edmund M., New York, N. Y. Textile fabric. 151,705, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,706, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,707, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,708, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,709, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,710, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,711, Nov. 9.

Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 151,712, Nov. 9.

Pulver, Wilfrid A., Sherman Oaks, and A. E. Flock, Van Nuys, assignors to Lockheed Aircraft Corporation, Burbank, Calif. Airplane. 151,713, Nov. 9.

Radio Corporation of America, assignee: *See*—
Rettinger, Michael.

Reid, Rose M., Los Angeles, Calif. Bathing suit. 151,714, Nov. 9.

Rettinger, Michael, Encino, Calif., assignor to Radio Corporation of America. Recording studio building or the like. 151,715, Nov. 9.

Rothe, Walter F., Washington, D. C. Necktie or the like. 151,716, Nov. 9.
Rothe, Walter F., Washington, D. C. Necktie or the like. 151,717, Nov. 9.
Rothe, Walter F., Washington, D. C. Necktie or the like. 151,718, Nov. 9.
Ruger Corporation, assignee: *See*—
Ruger, William B.
Ruger, William B., Wilton, assignor to Ruger Corporation, Southport, Conn. Brace. 151,719, Nov. 9.
Sans, Louis E.: *See*—
Eberle, Philip F., and Sans.
Selcow, Jack, assignor to Angel Bra Corp., New York, N. Y. Brassière. 151,720, Nov. 9.
Slazengers Limited, assignee: *See*—
Briggs, Charles B.
Style Line Products Co., assignee: *See*—
Haggstrom, Arthur C.
Such, Genevieve L., Chicago, Ill. Bolster cover for pillows or similar article. 151,721, Nov. 9.
Sykes, William Limited, assignee: *See*—
Briggs, Charles B.
Trifari, Krussman & Fishel, Inc., assignee: *See*—
Philippe, Alfred.
U. S. Machine Corporation, assignee: *See*—
Winkler, Herman E., and C. J.
Van Cleef & Arpels, Inc., assignee: *See*—
Duvalet, Maurice.
Welsh, Frederick E., Springwater, N. Y. Dispensing device for dog biscuits or the like. 151,722, Nov. 9.
White, Constance R., Beverly Hills, Calif. Toy jack-in-the-box or similar article. 151,723, Nov. 9.
White, Lysander T., assignor to Cities Service Oil Company, New York, N. Y. Service station. 151,724, Nov. 9.
Whitman, George L., Weedsport, and C. D. Gunn, Auburn, N. Y. Pruning saw. 151,725, Nov. 9.
Winkler, Carl J.: *See*—
Winkler, Herman E. and C. J.
Winkler, Herman E. and C. J., assignors to U. S. Machine Corporation, Lebanon, Ind. Space heater. 151,726, Nov. 9.
Ziemann, Harry J., Wauwatosa, Wis. Miter box. 151,727, Nov. 9.

Bell, Harvey W., Yonkers, N. Y. Compressor or pump. 2,453,402, Nov. 9.

Bell Telephone Laboratories, Incorporated, assignee: *See*—
Bryant, Herbert W.
Gordon, Chester S.
Havstad, Harald.
Mason, Warren P.
Norwine, Andrew C.
Potter, James A.
Schelleng, John C.

Belmont Radio Corporation, assignee: *See*—
Royal, Leslie L.

Belsinger Inc., assignee: *See*—
Belsinger, Jack B.

Belsinger, Jack B., assignor to Belsinger Inc., Atlanta, Ga. Easy packing container. 2,453,614, Nov. 9.

Bendix Aviation Corporation, assignee: *See*—
Alexanderson, Howard A.
Buxton, James E.
Gilbert, Samuel.
Gregg, David, and Troeger.
Mock, Frank C.
Wheeler, Harold A.

Bennett, George, Vallejo, Calif. Clamp. 2,453,112, Nov. 9.

Benson, Ralph L., assignor, by mesne assignments, to Gibson Refrigerator Company, Greenville, Mich. Compressor motor and making same. 2,453,297, Nov. 9.

Bergan, Martin D., Westfield, assignor to The Thomas & Betts Co., Elizabeth, N. J. Tinsel wire connector. 2,453,615, Nov. 9.

Bernstein, Seymour, Pearl River, and L. Dorfman, assignors, by mesne assignments, to American Cyanamid Company, New York, N. Y. Dialkyl thioacetals of cholestanone and method. 2,453,566, Nov. 9.

Berry, Thomas H., assignor to Green & Berry, Inc., Modesto, Calif. Cable spooling device for well drilling rigs. 2,453,184, Nov. 9.

Berstell, Leo, Waterbury, Conn. Watch bezel. 2,453,616, Nov. 9.

Bersudsky, Sidney, Sydney, Nova Scotia, Canada. Adjustable sock stretcher. 2,453,183, Nov. 9.

Bertea, Alex, Pasadena, Calif. Electric motor. 2,453,358, Nov. 9.

Bertea, Alex, Altadena, Calif. Electric motor. 2,453,359, Nov. 9.

Best, Albert H.: *See*—
Bain, Joseph P., and Best.

Beyvl, Joseph M.: *See*—
Barnett, Charles A., and Beyvl.

Bilhuber, Paul H., Douglas Manor, assignor to Steinway & Sons, New York, N. Y. Apparatus for edge-gluing strip elements. 2,453,185, Nov. 9.

Binda, Frederick J., assignor to Polaroid Corporation, Cambridge, Mass. Hot-water treatment of vinyl resin light-polarizing sheet. 2,453,186, Nov. 9.

Black, James J., assignor to The Trailmobile Company, Cincinnati, Ohio. Tailgate for highway vehicles. 2,453,617, Nov. 9.

Blain, Albert, Philadelphia, Pa., assignor to Radio Corporation of America. Radio receiver sequence tuner. 2,453,187, Nov. 9.

Bliss, E. W., Company, assignee: *See*—
Crane, Edward V., and Kuhn.

Bloch, Herman S., assignor to Universal Oil Products Company, Chicago, Ill. Synthetic resins and preparation thereof by reacting an alkyl benzene, a phenolic compound, and a dihaloalkane. 2,453,298, Nov. 9.

Bloomberg, William H., West Medford, Mass. Free-opening, nonclosing snap lock device. 2,453,299, Nov. 9.

Blume, William A., Farmington, and R. E. Spokes, Ann Arbor, Mich., assignors to American Brake Shoe Company, New York, N. Y. Making friction elements and bond therefor. 2,453,188, Nov. 9.

Blumenthal, Sol, assignor to P. R. Mallory & Co., Inc., Indianapolis, Ind. Mechanical seal for selenium rectifier cells. 2,453,618, Nov. 9.

Boeckeler, B. Clark: *See*—
Edsall, Lou B., Kilander, Kormendi, and Boeckeler.

Bogardus, Charles E., New Rochelle, N. Y. Windbreaker for parked aircraft. 2,453,403, Nov. 9.

Bogut, Ignatius, South Orange, N. J. Pot suspension device. 2,453,189, Nov. 9.

Bohlman, Walter S., Wilmington, Del., and D. S. Bruce, Lawrence, Kans., assignors, by mesne assignments, to United States of America, as represented by the Secretary of War. Apparatus for making plastic masses. 2,453,404, Nov. 9.

Bolser, Clark M., Cedar Falls, Iowa. Repackable adjustable oil filter cartridge. 2,453,405, Nov. 9.

Bonin, George E., assignor to Simonds Machine Co., Inc., Southbridge, Mass. Lens grinding machine. 2,453,300, Nov. 9.

Booth, Arthur E., Los Angeles, Calif. Meter testing device. 2,453,191, Nov. 9.

Borden Company, The, assignee: *See*—
Shipstead, Helge.

Boscowitz, Herbert H., New York, N. Y. Finger ring with key. 2,453,190, Nov. 9.

Bowen, Phil C., Merriam, Kans. Garment drier head. 2,453,488, Nov. 9.

Bowers, Jack L., Dayton, Ohio, assignor to the United States of America as represented by the Secretary of War. High-frequency variable inductance. 2,453,113, Nov. 9.

Bowles, Vernon O.: *See*—
Reed, Carl S., Schutte, and Bowles.

Brady, Francis E., Jr., Muncie, Ind. Fitting for automobile radiators. 2,453,406, Nov. 9.

Brandt, Kristian H., Red Bank, N. J., assignor to the United States of America as represented by the Secretary of War. Filter condenser and brush holder. 2,453,114, Nov. 9.

Bremer, Agatha K., assignee: *See*—
Kleinkort, Henry P.

Bronander, Wilhelm B., Montclair, N. J. Cooling fin structure for internal-combustion engines. 2,453,567, Nov. 9.

Brouillard, Robert E.: *See*—
Lacey, Harold T.

Brown, Carl A., Aberdeen, Md. Steel tape holder. 2,453,115, Nov. 9.

Brown, Morris E., and N. F. Lehr, assignors to Eastman Kodak Company, Rochester, N. Y. Multiple and individual shutter releases for power-driven motion-picture cameras. 2,453,301, Nov. 9.

Bruce, David S.: *See*—
Bohlman, Walter S., and Bruce.

Brundi, Irwin M., Bridgeport, and E. F. Reihman, Fairfield, Conn., assignors to General Electric Company. Ultra high frequency oscillator. 2,453,489, Nov. 9.

Bryant, Harold W., Kenmore, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Vinyl carboxylate polymerization using a thiourea stopper. 2,453,655, Nov. 9.

Bryant, Herbert W., Chatham, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Moisture impervious vent. 2,453,192, Nov. 9.

Buckendale, Lawrence R., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Vehicle suspension. 2,453,116, Nov. 9.

Buckendale, Lawrence R., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Vehicle suspension. 2,453,117, Nov. 9.

Buckingham, William D., and C. R. Delbert, Southampton, assignor to The Western Union Telegraph Company, New York, N. Y. Concentrated arc discharge device. 2,453,118, Nov. 9.

Bullard Company, The, assignee: *See*—
Bullard, Edward P., III.

Bullard, Edward P., III, Fairfield, Conn., assignor to The Bullard Company. Rack and pinion gear means. 2,453,656, Nov. 9.

Burk, Paul W.: *See*—
Wright, Carleton H., Chadwick, and Burk.

Burks, George E., Peoria, Ill., assignor to Caterpillar Tractor Co., San Leandro, Calif. Bearing mounting for drive sprockets of track type tractors. 2,453,360, Nov. 9.

Burns, Andrew K., Narberth, Pa., assignor to Chrontroller Corporation, Newport, N. H. Time switch. 2,453,193, Nov. 9.

Burns, Jake D., Richmond, Calif. Welding line reel switch. 2,453,407, Nov. 9.

Burrows, Harry: *See*—
Tomlin, George M.

Butler Manufacturing Company, assignee: *See*—
Myers, Harold C.

Butzner, James I.: *See*—
Payne, John W., Simpson, and Butzner.

Buxton, James E., Elmira, N. Y., assignor to Bendix Aviation Corporation. Engine starting gearing. 2,453,657, Nov. 9.

Buzzell, Harold O., Wollaston, assignor to Polaroid Corporation, Cambridge, Mass. Light polarizing headlight lamination. 2,453,194, Nov. 9.

Byrns, Alva C., Los Altos, assignor to Union Oil Company of California, Los Angeles, Calif. 1,3-Diketones. 2,453,619, Nov. 9.

Caldow, Alexander W., Chicago, Ill. Safety for firearms. 2,453,683, Nov. 9.

Callaway, Jack B., Summit, and D. B. Killian, Newark, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Producing a barium lake pigment. 2,453,490, Nov. 9.

Calleia, Cipriano R., Lisbon, Portugal. Apparatus for the manufacture of corkboard by injection of a heated gas. 2,453,568, Nov. 9.

Cameron Can Machinery Corporation, assignee: *See*—
Simpson, Justin.

Cardin, Carl J., Downers Grove, Ill. Fountain pen. 2,453,491, Nov. 9.

Cardox Corporation, assignee: *See*—
Williamson, Hilding V., and Griesemer.

Carlia, Alexander L., Norfolk, Va. Grain trimming device. 2,453,408, Nov. 9.

Carnegie-Illinois Steel Corporation, assignee: *See*—
Hedges, Don F.

Carpenter, Carson R., Charlotte, N. C. Hernia truss. 2,453,195, Nov. 9.

Carter, Ben, Granite City, Ill., assignor of one-half to R. V. Warga, Rolla, Mo. Barrel closing ring. 2,453,492, Nov. 9.

Case, J. I., Company, assignee: *See*—
Marsh, John L.

Caterpillar Tractor Co., assignee: *See*—
Burks, George E.

Cathey, Clarence D., and J. E. Miller, Checotah, Okla. Washing machine. 2,453,620, Nov. 9.

Celanese Corporation of America, assignee: *See*—
Seymour, White, and Barabash.

Cementone Corporation, The, assignee: *See*—
Henderson, Albert.

Chace, Thomas B., Winnetka, assignor to The Dole Valve Company, Chicago, Ill. Fluid control system. 2,453,409, Nov. 9.

Chadwick, George A.: *See*—
Wright, Carleton H., Chadwick, and Burk.

Chefford Master Manufacturing Co., Inc., assignee: *See*—
McCullough, Delbert.

Chemprotin Products, assignee: *See*—
Edsall, Lou B., Kilander, Kormendi, and Boekceler.

Chicago Bridge & Iron Company, assignee: *See*—
Moyer, Frederick D.

Chilo, Paul, Chicago, Ill. Lamp shade holder. 2,453,658, Nov. 9.

Chinn, Orville W., Lexington, Ky. Illuminated compact. 2,453,621, Nov. 9.

Christensen, Norman V., assignor to Union Special Machine Company, Chicago, Ill. Sewing machine. 2,453,119, Nov. 9.

Chrontroller Corporation, assignee: *See*—
Burns, Andrew K.

Chrysler Corporation, assignee: *See*—
Neracher, Carl A., and Dunn.

Ciba Limited, assignee: *See*—
Hoelzle, Kurt, and Kambli.

Ciba Pharmaceutical Products, Incorporated, assignee: *See*—
Hofmann, Klaus.

Cincinnati Milling Machine Co., The, assignee: *See*—
Soden, Harold R.

Clark, Frank M., Pittsfield, Mass., assignor to General Electric Company. Fluorenone dielectric composition. 2,453,494, Nov. 9.

Clark, Frank M., and E. L. Raab, Pittsfield, Mass., assignors to General Electric Company. Halogenated hydrocarbon composition. 2,453,493, Nov. 9.

Clark, Jess H., Miami, Ariz. Fuel control system for Diesel engines. 2,453,196, Nov. 9.

Clark, John A.: *See*—
Soderberg, Carl R., and Clark.

Clark, Winslow B. M.: *See*—
Jones, Harry S., and Clark.

Clay, Paul H., Asheville, assignor of one-third to C. H. Landers, and one-third to E. Sluder, Weaverville, N. C. Disk plow attachment for tractors. 2,453,197, Nov. 9.

Clement, Clyde H., Phoenix, Ariz. Electric line deicer. 2,453,361, Nov. 9.

Cleveland, Jesse L., Two Harbors, Minn. Sanitary cow guard. 2,453,302, Nov. 9.

Cline, Allen B., Rosemead, Calif. Denture repair tool. 2,453,303, Nov. 9.

Cloete, Floris, Detroit, Mich. Hydrokinetic coupling. 2,453,684, Nov. 9.

Coffey, Daniel J., Bronx, N. Y. Combined cigarette holder and ash tray. 2,453,304, Nov. 9.

Collins Radio Company, assignee: *See*—
Moseley, Francis L.

Columbus Dental Manufacturing Company, The, assignee: *See*—
King, James R.

Commercial Controls Corporation, assignee: *See*—
Rast, Frederick Q.

Connor, Harvey R., Seattle, Wash. Noninterlocking bumper guard. 2,453,362, Nov. 9.

Continental Can Company, Inc., assignee: *See*—
Emmons, Clarence L.
Mero, Ralph M.

Controlled Heat & Air Limited, assignee: *See*—
McKeown, Charles G.

Cooper, Kenneth C., Portland, assignor to United Aircraft Corporation, East Hartford, Conn. Starting system for free piston units. 2,453,495, Nov. 9.

Corbett, Mitchell S., Oak Park, Ill. Blade holder. 2,453,198, Nov. 9.

Corson, G. and W. H., Inc., assignee: *See*—
Minnick, Leonard J.

Couch, James F., Glenside, and C. J. Krewson, Erdenheim, Pa., assignors to the United States of America, as represented by the Secretary of Agriculture. Removing fats from rutin extracts. 2,453,305, Nov. 9.

Couch, James F., and C. F. Krewson, Glenside, Pa., assignors to the United States of America as represented by the Secretary of Agriculture. Converting nicotinonitrile into nicotinamide. 2,453,496, Nov. 9.

Crabtree, J. A., & Co., Ltd., assignee: *See*—
Hill, Walter E., and Wintle.

Crall, Irma, administratrix: *See*—
Crall, William R.

Crall, William R., deceased, Pampa, Tex.; I. Crall, administratrix. Antiparaffin sucker rod. 2,453,199, Nov. 9.

Crane, Edward V. and K. Kuhn, assignors to E. W. Bliss Company, Brooklyn, N. Y. Double seamer. 2,453,200, Nov. 9.

Crawford Door Company, assignee: *See*—
Hackathorn, Robert A.

Cross, Harold V., Miles City, Mont. Honda. 2,453,497, Nov. 9.

Crowley, George C., Bridgeport, Conn., assignor to General Electric Company. Electric switch. 2,453,498, Nov. 9.

Cullinan, John F., and L. D. Lytle, Plainfield, N. J., assignors to American Cyanamid Company, New York, N. Y. Acid treatment of anthraquinonethiazole vat dyestuffs. 2,453,410, Nov. 9.

Cunningham, Arthur R., Detroit, Mich. Vehicle construction. 2,453,499, Nov. 9.

Cunningham, Arthur R., assignor to Ray Cunningham and Sons, Inc., Detroit, Mich. Vehicle construction. 2,453,500, Nov. 9.

Cunningham, Ray, and Sons, Inc., assignee: *See*—
Cunningham, Arthur R.

Curtis, David, New York, N. Y. Carbohydrate-boric acid salts of amino aromatic bases. 2,453,108, Nov. 9.

Curtis, Myron S., assignor to The Warner & Swasey Company, Cleveland, Ohio. Locating and locking mechanism for machine-tool turrets. 2,453,120, Nov. 9.

Curtiss-Wright Corporation, assignee: *See*—
Statham, Louis D., Baker, and Swartzel.
Wardle, Meredith C., and Howard.

Cushman & Denison Manufacturing Company, Inc., assignee: *See*—
Cushman, James S.

Cushman, James S., assignor to Cushman & Denison Manufacturing Company, Inc., New York, N. Y. Marking device. 2,453,201, Nov. 9.

Cutler-Hammer, Inc., assignee: *See*—
Krieger, Alvin W.

Cutts, Dorothea L., assignee: *See*—
Cutts, Richard M.

Cutts, Richard M., assignor of one-half to D. L. Cutts, The Plains, Va. Gas porting device for shotguns. 2,453,121, Nov. 9.

Dadant, Henry C., Hamilton, Ill. Bee comb foundation. 2,453,411, Nov. 9.

Dairy Equipment Company, assignee: *See*—
Moksnes, Karl E.

Dairy Specialties, Inc., assignee: *See*—
Jones, John P.

Davidson, Norman R., Princeton, N. J., assignor to Radio Corporation of America. Electron diffraction system and method. 2,453,412, Nov. 9.

Davis, Dwillard J., Detroit, Mich., assignor to Avco Manufacturing Corporation. Apparatus for measuring wall thickness of propeller blades. 2,453,306, Nov. 9.

Davis, Gerhold O.: *See*—
Hansen, Edward, and Davis.

Debacher, Max O., Springfield, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo. Plasticized polyvinyl acetal resin. 2,453,569, Nov. 9.

Debacher, Max O., Springfield, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo. Plasticized polyvinyl acetal resin. 2,453,570, Nov. 9.

De Barbieri, Joseph L., and E. Kishner, Brooklyn, N. Y. Control device. 2,453,571, Nov. 9.

De Frees, Joseph H., assignor to Pennsylvania Furnace and Iron Company, Warren, Pa. Valve structure. 2,453,413, Nov. 9.

Deluxe Products Corporation, The, assignee: *See*—
Flint, Charles R.

Densmore, Nicholas B., Lawrence, Mich. Apron. 2,453,202, Nov. 9.

De Regnauld de Bellescize, Henri J. J. M., Saint-Germain au Mont-d'or, Rhone, France, assignor to E. Gutzwiller & Co., Basel, Switzerland. Secret telegraph signaling. 2,453,659, Nov. 9.

Despotakis, Tony, Hyde Park, Pa., assignor to Standard Railway Equipment Manufacturing Company, Chicago, Ill. Roof for railway freight cars. 2,453,307, Nov. 9.

Detroit Stoker Company, assignee: *See*—
Beers, Royce L.

De Vore, Henry B., Cranbury, N. J., assignor to Radio Corporation of America. System for directing radio waves. 2,453,414, Nov. 9.

Devreotes, Peter: *See*—
McCall, Fred H., and Devreotes.

Dickieson, Robert W., Detroit, assignor to The Gear Grinding Machine Company, Hamtramck, Mich. Trimming mechanism for grinder wheels. 2,453,501, Nov. 9.

Dickinson, Arthur H., Scarsdale, assignor to International Business Machines Corporation, New York, N. Y. Variable frequency relaxation oscillator. 2,453,203, Nov. 9.

Dimick, Henry N., assignor to Hyster Company, Portland, Oreg. Vehicle lighting system. 2,453,415, Nov. 9.

Dimmick, Glenn L., Indianapolis, Ind., assignor to Radio Corporation of America. Sound-to-image transducing system. 2,453,502, Nov. 9.

Dobbs, Richard H., Atlanta, Kans. Earth boring machine. 2,453,204, Nov. 9.

Docksey, Patrick, Sunbury-on-Thames, assignor to Anglo-Iranian Oil Company Limited, London, England. Controlled fractional distillation of petroleum. 2,453,205, Nov. 9.

Dole Valve Company, The, assignee: *See*—
Chace, Thomas B.

Dom, John M., Houston, Tex., assignor to Petrolite Corporation, Ltd., Wilmington, Del. Fluid distribution system. 2,453,416, Nov. 9.

Donat, John F., Euclid, Ohio. Air filter. 2,453,206, Nov. 9.

Dorfman, Louis: *See*—
Bernstein, Seymour, and Dorfman.

Dorman & Smith Limited, assignee: *See*—
Lund, Jack.

Douglas, James K., Shorewood, assignor to The Oilgear Company, Milwaukee, Wis. Vane type hydraulic motor. 2,453,309, Nov. 9.

Dravo Corporation, assignee: *See*—
Pietsch, Herman A.

Duffy, Thomas I., assignor to Anderson-Bolling Mfg. Co., Grand Haven, Mich. Brake for wagons. 2,453,363, Nov. 9.

Dufour, Léon, Geneva, Switzerland. Steering means for vehicles. 2,453,417, Nov. 9.

Dunlop, Richard D., Longmeadow, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo. Polyvinyl butyral composition. 2,453,308, Nov. 9.

Dunn, William D., Linden, N. J. Holder for whetstones. 2,453,207, Nov. 9.

Dunn, William T.: *See*—
Neracher, Carl A., and Dunn.

Dunsheath, Percy, Abinger, and W. C. Barry, Gravesend, assignors to W. T. Henley's Telegraph Works Company Limited, Westcott, Dorking, Surrey, England. Buoyant electric cable. 2,453,418, Nov. 9.

Dunsheath, Percy, Abinger, and W. C. Barry, Gravesend, assignors to W. T. Henley's Telegraph Works Company Limited, London, England. Buoyant electric cable. 2,453,419, Nov. 9.

Dunsheath, Percy, Abinger, and W. C. Barry, Gravesend, assignors to W. T. Henley's Telegraph Works Company Limited, London, England. Buoyant electric cable. 2,453,420, Nov. 9.

Duplessis, René E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Adjustable chair for gunners. 2,453,208, Nov. 9.

Du Pont, E. I., de Nemours & Company, assignee: *See*—
Bryant, Harold W.
Callaway, Jack B., and Killian.
Langkammerer, Carl M.
Millhiser, Frederick R.

Dwight, Herbert V., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Drive for tracklaying vehicles. 2,453,209, Nov. 9.

Dyer, George, Cheyenne, Wyo. Lamp box type direction signal. 2,453,421, Nov. 9.

Eastman Kodak Company, assignee: *See*—
Brown, Morris E., and Lehr.
Glass, Dudley B., Vittum, and Weissberger.
Hasche, Rudolph L., and McMahon.
Hutchison, Miller R., Jr.
James, Thomas H.
Morris, Reginald B.
Orser, William D.
Russell, Harold D.

Eaton, Milton, Shawinigan Falls, Quebec, assignor to The Shawinigan Water & Power Co., Montreal, Quebec, Canada. Automatic means for regulating electric steam generators. 2,453,210, Nov. 9.

Eaton, Milton, Shawinigan Falls, Quebec, assignor to Shawinigan Water & Power Co., Montreal, Quebec, Canada. Electric steam generator control. 2,453,211, Nov. 9.

Edelson, Stuart K.: *See*—
Strickler, John F., Jr., and Edelson.

Edison, Thomas A., Incorporated, assignee: *See*—
Jones, Harry S., and Clark.

Edsall, Lou B., Wyandotte, and A. K. Kilander, Gibralter, assignors, by mesne assignments, of 9,448/10,570 to Chemprotin Products, Trenton, Mich., 561/10,570 to L. Kormendi, New York, N. Y., and 561/10,570 to B. C. Boeckeler, Gross Ile, Mich. Apparatus for separating starch from gluten. 2,453,310, Nov. 9.

Eggenberger, Hans: *See*—
Von Allmen, Samuel, and Eggenberger.

Electric Steel Foundry, assignee: *See*—
Babbitt, Daniel R.

Electrolay Company, Incorporated, The: *See*—
Jacob, Fraser B.

Electronbeam, Ltd., assignee: *See*—
Zieblz, Herbert.

Elliott, Harry D., Wenham, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Tape applying machine for use in the manufacture of shoes. 2,453,212, Nov. 9.

Ellsworth, Wilfred D., Lynbrook, N. Y. Detachable rowboat shelter. 2,453,422, Nov. 9.

Emerson, William S., and V. E. Lucas, Dayton, Ohio, assignors to Monsanto Chemical Company, St. Louis, Mo. Flash distillation of acetophenone from benzoic acid. 2,453,423, Nov. 9.

Emmons, Clarence L., Jersey City, N. J., assignor to Continental Can Company, Inc., New York, N. Y. Attaching tear strip winding keys to receptacles. 2,453,503, Nov. 9.

English Electric Company Limited, The: *See*—
Stearn, George F.

English, Leonard W., London, England. Straining or filtering apparatus for liquids. 2,453,622, Nov. 9.

Ensinger, Willis B., Silver Spring, Md., assignor to United States of America as represented by the Secretary of the Navy. Reflector collimator sight for torpedo ejectors. 2,453,122, Nov. 9.

Enterprise Aluminum Company, The, assignee: *See*—
Harris, Robert D.

Ericks, Walter P.: *See*—
Moore, Leonard P., and Ericks.

Erwood Co., The, assignee: *See*—
Erwood, Joseph.

Erwood, Joseph, assignor to The Erwood Co., Crystal Lake, Ill. Intermittent operating mechanism. 2,453,123, Nov. 9.

Ex-Cello-O Corporation, assignee: *See*—
Karweit, John W.

Fafnir Bearing Company, assignee: *See*—
Reynolds, Harry R.

Farber, Eduard, assignor to Timber Engineering Company, Washington, D. C. Treating lignin residues. 2,453,213, Nov. 9.

Fears, Margo S., Norfolk, Va., assignor to A. H. Grabb, Monticello, Ill. Protecting attachment for hair driers. 2,453,364, Nov. 9.

Fedevich, Joseph, Dover, Ohio. Steerable vehicle undercarriage. 2,453,311, Nov. 9.

Ferguson, Ralph C., Hollydale, Calif. Rodless pump. 2,453,365, Nov. 9.

Ferrier, David J., St. Kilda, Victoria, Australia. Varying the tuning of stringed instruments. 2,453,572, Nov. 9.

Figdor, Hans G., assignor to E. F. Houghton & Co., Philadelphia, Pa. Ethyl cellulose composition. 2,453,214, Nov. 9.

Firing, Osborne, New Dorp, Staten Island, N. Y., assignor to Talon, Inc. Slider for slide fasteners. 2,453,660, Nov. 9.

Fleischer, Frank H., Fort Wayne, Ind., assignor to General Electric Company. Dynamoelectric machine and securing device. 2,453,504, Nov. 9.

Fletcher, James, Akron, and E. C. Huge, Barberton, Ohio, assignors to The Babcock & Wilcox Company, Rockleigh, N. J. Pressure sealing device. 2,453,124, Nov. 9.

Fletcher Works, Incorporated, assignee: *See*—
Bartholomew, Robert J.

Flint, Charles R., La Porte, Ind., assignor to The Deluxe Products Corporation. Vacuum breaker. 2,453,125, Nov. 9.

Forcier, Eudore A., U. S. Navy. Hand beading tool. 2,453,126, Nov. 9.

Fornwald, Lawrence J., Plymouth, Mich. Safety door lock. 2,453,505, Nov. 9.

Foster, Edwin F., Austin, Tex. Counterbalance mechanism. 2,453,424, Nov. 9.

Foundry Equipment Company, The, assignee: *See*—
Barnett, Charles A., and Beyvl.

Fraenkel-Conrat, Heinz L.: *See*—
Olcott, Harold S., and Fraenkel-Conrat.

Frazier, Larry C., Lakewood, Ohio, assignor to National-Standard Company, Niles, Mich. Extrusion apparatus. 2,453,312, Nov. 9.

Frederick, John T., assignor of one-half to C. E. Green, Huntington, W. Va. Load retainer for hand trucks. 2,453,427, Nov. 9.

Freed, Ben J., Washington, D. C. Hot food table heating apparatus. 2,453,425, Nov. 9.

Freed, Samuel, Danbury, Conn. Wheel traction device. 2,453,426, Nov. 9.

Fried. Schenk's Wee. Stadtmuhle Bern, assignee: *See*—
Stalder, Oskar.

Furness, William H., Haddonfield, assignor to American Rayon Company, Inc., Collingswood, N. J. Method and apparatus for liquid treatment of yarn, thread, and the like. 2,453,366, Nov. 9.

Gear Grinding Machine Company, The, assignee: *See*—
Dickleson, Robert W.
Gruenberg, Ivor J.

General Electric Company, assignee: *See*—
Bruntil, Irwin M., and Reihman.
Clark, Frank M.
Clark, Frank M., and Raab.
Crowley, George C.
Fleischer, Frank H.
Hubbard, Albert B.
Hugin, Adolph C.
McMahan, Kenton D., and Bailey.
Rauch, William T.
Reardon, Robert T.
Wright, James G. E.
Youngson, Donald A., and Matthews.

General Motors Corporation: *See*—
Lovell, Wheeler G., Mulligan, and Lichtenwalner.
Rady, William J.

Giblin, Mark A., West Allis, Wis. Self-balancing centrifuge. 2,453,367, Nov. 9.

Gibson Refrigeration Company, assignee: *See*—
Benson, Ralph L.

Gilbert, Alfred G., South Acton, and W. H. Rogers, Jr., Malden, assignors to Reece Folding Machine Company, East Cambridge, Mass. Infolding method and machine. 2,453,623, Nov. 9.

Gilbert, Samuel, Cedar Grove, assignor to Bendix Aviation Corporation, Teterboro, N. J. Engine starter and generator means. 2,453,215, Nov. 9.

Gillette Safety Razor Company, assignee: *See*—
Locke, Edwin A., Jr.

Glass, Dudley B., P. W. Vittum, and A. Weissberger, assignors to Eastman Kodak Company, Rochester, N. Y. Colored couplers. 2,453,661, Nov. 9.

Glass, Paul, assignor to Askania Regulator Company, Chicago, Ill. Electrical control circuit. 2,453,624, Nov. 9.

Gleason Works, assignee: *See*—
Peters, Joseph M.

Glidden Company, The: *See*—
Bain, Joseph P., and Best.

Globe American Corporation, assignee: *See*—
Sherman, Alvin G.

Goodrich, B. F., Company, The, assignee: *See*—
Dwight, Herbert V.

Goodwin, Alfred D., Manteca, Calif. Spray operating mechanism. 2,453,368, Nov. 9.

Gordon Armstrong Company, Inc., The, assignee: *See*—
Perkins, Julian L.

Gordon, Chester S., Boonton, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Manufacturing communication cables. 2,453,313, Nov. 9.

Gordon, Ernest, assignor of one-half to A. E. Roberts, Prestwich, England. Pipe joint. 2,453,428, Nov. 9.

Gorman, Daniel A., Sr., Glenside, Ithaca, N. Y. Surface treatment of metals. 2,453,429, Nov. 9.

Grabb, Alice H., assignee: *See*—
Fears, Margo S.

Grable, Donovan B., Long Beach, and J. M. Jackson, Santa Monica, Calif. Pipe tongs. 2,453,369, Nov. 9.

Graham, Harold M., Kenmore, assignor to Graham Manufacturing Co., Inc., New York, N. Y. Condenser. 2,453,662, Nov. 9.

Graham, Kenneth E.: *See*—
Graham, Von B. and K. E.

Graham Manufacturing Co., Inc., assignee: *See*—
Graham, Harold M.

Graham, Von B., Austin, Tex., and K. E., Bedford, Ind. Shearing machine. 2,453,216, Nov. 9.

Green & Berry, Inc., assignee: *See*—
Berry, Thomas H.

Green, Charles E., assignee: *See*—
Frederick, John T.

Greig, Harold G., Princeton, N. J., assignor to Radio Corporation of America. Morpholine salts of sulfonated azo dye components and their preparation. 2,453,430, Nov. 9.

Gregg, David, Caldwell, and H. Troeger, Ramsey, assignors to Bendix Aviation Corporation, Teterboro, N. J. Scavenging oil system for engines. 2,453,217, Nov. 9.

Grey, David S., Lexington, assignor to Polaroid Corporation, Cambridge, Mass. Image forming optical lens system athermalized for focal point. 2,453,218, Nov. 9.

Griesemer, Raymond H.: *See*—
Williamson, Hilding V., and Griesemer.

Grover, Lyndon V., Los Angeles, Calif. Easel for colored photographic printing. 2,453,431, Nov. 9.

Gruenberg, Ivor J., Pleasant Ridge, assignor to The Gear Grinding Machine Company, Hamtramck, Mich. Sprag. 2,453,506, Nov. 9.

Grum, Stanley J., Michigan City, Ind., assignor to Josam Manufacturing Company, Cleveland, Ohio. Grease interceptor. 2,453,219, Nov. 9.

Guarnaschelli, Stephen, assignor to Packless Metal Products Corporation, New Rochelle, N. Y. Pipe coupling. 2,453,127, Nov. 9.

Guignon, Emile S., Jr., assignee, et al.: *See*—
Haden, Raymond L.

Gustafson, Harry M., assignor to Simmons Slicing Knife Company, Chicago, Ill. Slicing knife. 2,453,220, Nov. 9.

Gutzwiller, E., & Co., assignee: *See*—
De Regnauld de Bellescize, Henri J. J. M.

Hackathorn, Robert A., Grosse Pointe Woods, assignor to Crawford Door Company, Detroit, Mich. Cable clamp. 2,453,432, Nov. 9.

Haden, Raymond L., assignor of one-half to E. S. Guignon, Jr., Kansas City, Mo., and one-half to A. R. Jones, Mission Hills, Kans. Interlocking building units. 2,453,221, Nov. 9.

Haefell, Julius C., assignor to The Austin Motor Company Limited, Birmingham, England. Taking off power from the drive transmission of motor vehicles. 2,453,685, Nov. 9.

Hager, Emil F., Queens Village, N. Y. Grinder machine. 2,453,573, Nov. 9.

Hall, Ronald H.: *See*—
Kaufmann, Charles, and Hall.

Hammerly, Herman J., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Power distribution system of the bus bar duct type. 2,453,314, Nov. 9.

Hammontree, Jack C., Rifle, Colo. Rotary head for sanding machines. 2,453,222, Nov. 9.

Hansen, Edward, Queens Village, and G. O. Davis, Kew Gardens, N. Y., assignors, by mesne assignments, to Standard Broadcasting Company. Heat dissipation for electronic tube apparatus. 2,453,433, Nov. 9.

Harbison, Joseph C., assignor of forty-three and one-third per cent to O. Roberts, Eldorado, Ill. Milling attachmen for lathes. 2,453,315, Nov. 9.

Harder, William D., Chicago, Ill. Tie for concrete wall forms. 2,453,434, Nov. 9.

Harper, Elmer, E., deceased, by E. P. Harper, executrix, Monrovia, Calif. Loose-leaf binder. 2,453,507, Nov. 9.

Harper, Esther P., executrix: *See*—
Harper, Elmer E.

Harris, Robert D., assignor to The Enterprise Aluminum Company, Massillon, Ohio. Buffing machine. 2,453,316, Nov. 9.

Harrison, George T., Tilgham, Md. Preparing and packing menhaden for marketing. 2,453,625, Nov. 9.

Hartford National Bank and Trust Company, assignee, ... trustee: *See*—
Van Overbeek, Andrianus J. W. M.

Hartline, Ralph E., assignor to Stanolind Oil and Gas Company, Tulsa, Okla. Radioactivity logging device. 2,453,318, Nov. 9.

Hasche, Rudolph L., and E. M. McMahon, Kingsport, Tenn., assignors to Eastman Kodak Company, Rochester, N. Y. Copolymer of isopropenyl acetate and vinyl chloride. 2,453,317, Nov. 9.

Hartim Attari, assignee: *See*—
Kenyon, Joseph, and Silberstein.

Hautzenroeder, Richard W., Mansfield, Ohio. Transmission. 2,453,128, Nov. 9.

Havstad, Harald, Northport, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Piezoelectric crystal apparatus. 2,453,435, Nov. 9.

Hedges, Don F., Crown Point, Ind., assignor to Carnegie-Illinois Steel Corporation. Transportation load and preparing the same. 2,453,626, Nov. 9.

Heintz Manufacturing Company, assignee: *See*—
Lambert, Francis M.

Helfenbein, Richard C.: *See*—
Zabel, William C. P., and Helfenbein.

Helmbold, August F. W., Augusta, Ga. Valve cooling means for internal-combustion engines. 2,453,508, Nov. 9.

Henderson, Albert, assignor, by mesne assignments, to The Cemenstone Corporation, Pittsburgh, Pa. Making concrete building units. 2,453,223, Nov. 9.

Henley's, W. T., Telegraph Works Company Limited, assignee: *See*—
Dunsheath, Percy, and Barry.

Hertz, Ben, New York, assignor to International Mutoscope Corporation, Long Island City, N. Y. Flight training apparatus. 2,453,436, Nov. 9.

Hill, Irving, assignor to The Lawrence Paper Company, Lawrence, Kans. Controlled ventilated container. 2,453,574, Nov. 9.

Hill, Walter E., Streetly, and T. D. G. Wintle, assignors to J. A. Crabtree & Co., Ltd., Walsall, England. Bus bar and connecting link for use in electrical wiring systems. 2,453,224, Nov. 9.

Hinson, James, assignor to The Hinson Manufacturing Company, Waterloo, Iowa. Wardrobe suitcase. 2,453,663, Nov. 9.

Hinson Manufacturing Company, The, assignee: *See*—
Hinson, James.

Hinton, Ray D., Oak Park, Ill. Office cabinet having shelf-forming closures. 2,453,129, Nov. 9.

Hittenberger, Herman G., Oakland, Calif. Surgical brace. 2,453,370, Nov. 9.

Hobson, Elmer B., Wichita, Kans. Power actuated rotary scraping tool for meat blocks. 2,453,371, Nov. 9.

Hoelzle, Kurt, and E. Kambil, assignors to Ciba Limited, Basel, Switzerland. Indigoid vat dyestuff. 2,453,225, Nov. 9.

Hoffman, Albert F., East Orange, N. J. Freezing high liquid content fruits and vegetables. 2,453,130, Nov. 9.

Hoffman, Howard T., Cleveland, Ohio, assignor to Bailey Meter Company. Telemetric system. 2,453,686, Nov. 9.

Hofmann, Klaus, Pittsburgh, Pa., assignor to Ciba Pharmaceutical Products, Incorporated, Summit, N. J. 2-substituted-3,4-diamino-furan urethans and derivatives thereof. 2,453,627, Nov. 9.

Hohl, John, Toledo, Ohio, assignor to Owens-Illinois Glass Company. Container and closure therefor. 2,453,664, Nov. 9.

Hokanson, Otto A., Snyder, N. Y., assignor to The Rudolph Wurlitzer Company, Chicago, Ill. Coin selecting device. 2,453,437, Nov. 9.

Holbro, Theodor: *See*—
Kern, Walter, Sutter, Moergell, and Holbro.

Hollyday, Charles E., Jr., Baltimore, assignor to The Glenn L. Martin Company, Middle River, Md. Tube holding device. 2,453,319, Nov. 9.

Hook, Orille F., Pontiac, Mich. Boat hoist. 2,453,628, Nov. 9.

Horth, William S., Cleveland Heights, Ohio. Electric welding apparatus. 2,453,438, Nov. 9.

Houdry Process Corporation, assignee: *See*—
Mills, George A.

Houghton, E. F., & Co., assignee: *See*—
Figdor, Hans G.

House, William C., assignor to Lyon-Raymond Corporation, Greene, N. Y. Tongue actuated brake for hand trucks. 2,453,575, Nov. 9.

Howard, Donald J.: *See*—
Wardle, Meredith C., and Howard.

Hubbard, Albert B., Caldwell, N. J., assignor to General Electric Company. Refrigerating system. 2,453,131, Nov. 9.

Hubbard, Albert B., Caldwell, N. J., assignor to General Electric Company. Refrigeration control system. 2,453,439, Nov. 9.

Huber, Gustav, assignor to Kangol Wear Limited, Cleator, England. Patterning mechanism of flat single bed knitting machines. 2,453,629, Nov. 9.

Huber, J. M., Incorporated: *See*—
Voet, Andries.

Huebner, Ernest W., assignor to Weiger Weed & Company, Detroit, Mich. Welding electrode holder. 2,453,320, Nov. 9.

Huge, Ernest C.: *See*—
Fletcher, James, and Huge.

Hugin, Adolph C., Schenectady, N. Y., assignor to General Electric Company. Dynamoelectric machine. 2,453,509, Nov. 9.

Huribut, Gordon K.: *See*—
Ward, Vincent S., and Huribut.

Hutchison, Miller R., Jr., assignor to Eastman Kodak Company, Rochester, N. Y. Built-in flash synchronizer for shutter blade and cover blind type shutters. 2,453,321, Nov. 9.

Hyde, John B., Great Neck, N. Y. Ground support anchor. 2,453,226, Nov. 9.

Hyster Company, assignee: *See*—
Dimick, Henry N.

Inland Wire Products Company, assignee: *See*—
Pagliarul, Joseph N.

International Business Machines Corporation, assignee: *See*—
Dickinson, Arthur H.
Kavanagh, Joseph A.
Luhn, Hans P.
Malros, Gustav V. A.
Tedder, Joel H.
Thieme, Ott.
Von Reppert, Richard.

International Mutoscope Corporation, assignee: *See*—
Hertz, Ben.

Jackson, Corwill, assignor to Jackson Vibrators, Inc., Ludington, Mich. Screeding and compacting machine for concrete slabs and the like. 2,453,510, Nov. 9.

Jackson, Harold F., Springfield, assignor to The Ohio Steel Foundry Company, Lima, Ohio. Furnace tray basket. 2,453,511, Nov. 9.

Jackson, John M.: *See*—
Grable, Donovan B., and Jackson.

Jackson Vibrators, Inc., assignee: *See*—
Jackson, Corwill.

Jacob, Fraser B., Lynn, Mass., assignor to The Electroloy Company, Incorporated, Bridgeport, Conn. Spot weld tester. 2,453,576, Nov. 9.

Jacobi, Emil R., assignor to Kelsey-Hayes Wheel Company, Detroit, Mich. Vehicle wheel. 2,453,512, Nov. 9.

Jaeckle, Albert E., Laural Park, N. Y. Railway freight car construction. 2,453,322, Nov. 9.

James, Thomas H., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic development by ferrous alkaline solutions. 2,453,323, Nov. 9.

Janes, Irene M., North Arlington, assignor of one-half to G. Martin, East Orange, N. J. Button staple anchor and shield. 2,453,227, Nov. 9.

Janin, Mary K., Port Credit, Ontario, Canada. Lady's undergarment. 2,453,372, Nov. 9.

Jauch, Martin, Irvington, N. J. Carrier for knitting machines. 2,453,513, Nov. 9.

Jefferson Standard Broadcasting Company, assignee: *See*—
Hansen, Edward, and Davis.

Jerome, Ivan, Mineola, N. Y. Flying fuselage. 2,453,514, Nov. 9.

Johnson, Charles E., Belmont, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Relasting machine. 2,453,228, Nov. 9.

Johnson, Ernest F.: *See*—
Newman, Henry J., and Johnson.

Jones, Albert R., assignee: *See*—
Haden, Raymond L.

Jones, Charles C., Miami, Fla. Railroad tie. 2,453,132, Nov. 9.

Jones, Harry S., East Orange, and W. B. M. Clark, assignors to Thomas A. Edison, Incorporated, West Orange, N. J. Motion seal. 2,453,324, Nov. 9.

Jones, John P., Omaha, Nebr., assignor to Dairy Specialties, Inc. Paper bottle tap. 2,453,133, Nov. 9.

Josam Manufacturing Company, assignee: *See*—
Grum, Stanley J.

Joslyn Mfg. and Supply Co., assignee: *See*—
Yonkers, Edward H.

Joslyn Manufacturing and Supply Corporation, assignee: *See*—
Yonkers, Edward H.

Juran, Nathan H., Manhattan Beach, Calif. Projection instrument for rectifying oblique phootgraphs. 2,453,134, Nov. 9.

Kagel, John T., Sr., Jamaica, N. Y. Unhairing machine. 2,453,229, Nov. 9.

Kalitinsky, Andrew, Eagleville, assignor to United Aircraft Corporation, East Hartford, Conn. Restraining mechanism for free-piston units. 2,453,515, Nov. 9.

Kalitinsky, Andrew, Eagleville, assignor to United Aircraft Corporation, East Hartford, Conn. Engine control for free-piston units. 2,453,516, Nov. 9.

Kambil, Eduard: *See*—
Hoelzle, Kurt, and Kambil.

Kangol Wear Limited, assignee: *See*—
Huber, Gustav.

Karstens, Walter F., Arlington Heights, Ill. Nonskid tire chain. 2,453,325, Nov. 9.

Karwelt, John W., Skokie, Ill., assignor, by mesne assignments, to Ex-Cell-O Corporation, Detroit, Mich. Chip breaking drill device. 2,453,135, Nov. 9.

Karwelt, John W., Skokie, Ill., assignor, by mesne assignments, to Ex-Cell-O Corporation, Detroit, Mich. Chip breaking drill chuck. 2,453,136, Nov. 9.

Karwelt, John W., River Grove, Ill., assignor, by mesne assignments, to Ex-Cell-O Corporation, Detroit, Mich. Drilling metal and the like. 2,453,137, Nov. 9.

Katz, Heyman, Asbury Park, N. J. Tow bar clamp. 2,453,230, Nov. 9.

Kaufman, Charles, and R. H. Hall, Shawinigan Falls, Quebec, assignors to Shawinigan Chemicals Limited, Montreal, Quebec, Canada. Carbon black. 2,453,440, Nov. 9.

Kavanagh, Joseph A., assignor to International Business Machines Corporation, New York, N. Y. Electrical switch. 2,453,231, Nov. 9.

Kellogg, M. W., Company, The, assignee: *See*—
Laying, Edwin T., and Suman.

Kelsey-Hayes Wheel Company, assignee: *See*—
Jacobi, Emil R.

Kemeny, Paulo, Sao Paulo, Brazil. Variable-speed transmission mechanism. 2,453,517, Nov. 9.

Kenyon, Joseph, Barnes, London, and V. Silberstein, Kensington, London, assignors of one-third to H. Attari, London, England. Production of gelatine or glue from hides and other collagen or ossein-containing materials. 2,453,630, Nov. 9.

Kern, Walter, Sissach, P. Sutter, Basel, E. Moergeli, Neuewelt, near Basel, and T. Holbro, Basel, Switzerland, assignors to the Swiss firm of Ciba Limited. Anthrimide carbazole vat dyestuffs. 2,453,232, Nov. 9.

Kharasch, Morris S., Chicago, Ill., assignor to The United States of America as represented by the Secretary of War. Deleading gasoline. 2,453,138, Nov. 9.

Kilander, Acton K.: *See*—
Edsall, Lou B., Kilander, Kormendi, and Boeckeler.

Killian, Donald B.: *See*—
Callaway, Jack B., and Killian.

King, James R., Florence, S. C., assignor to The Columbus Dental Manufacturing Company, Columbus, Ohio. Holder for artificial teeth. 2,453,518, Nov. 9.

Kishner, Edward: *See*—
De Barbieri, Joseph L., and Kishner.

Kittrell, Ottis K., Lumberton, N. C. Oil burning tobacco curing stove. 2,453,233, Nov. 9.

Kleinkort, Henry P., assignor to A. K. Bremer, New Washington, Ohio. Tow release mechanism. 2,453,139, Nov. 9.

Koch, Theodoor, Oosterbeek, Netherlands, assignor, by mesne assignments, to American Enka Corporation, Enka, N. C. Preparation of amino-carboxylic-acids from lactams. 2,453,234, Nov. 9.

Kollsman, Paul, New York, N. Y. Compressor. 2,453,373, Nov. 9.

Kollsman, Paul, New York, N. Y. Compressor. 2,453,374, Nov. 9.

Kollsman, Paul, New York, N. Y. Compressor. 2,453,375, Nov. 9.

Kommer, William V., Catawissa, Mo. Combination razor-strop holder and heater. 2,453,519, Nov. 9.

Koppers Company, Incorporated, assignee: *See*—
Shaffer, Chester E.

Kormendi, Laszlo: *See*—
Edsall, Lou B., Kilander, Kormendi, and Boeckeler.

Kowalsky, Enez P., executrix: *See*—
Pagliarul, Joseph N.

Krewson, Charles F.: *See*—
Couch, James F., and Krewson.

Krieger, Alvin W., assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Nonfree-tripping overload circuit breaker. 2,453,235, Nov. 9.

Krispis, Constantin, Athens, Greece. Variable-speed transmission. 2,453,577, Nov. 9.

Kropa, Edward L., Old Greenwich, Conn., assignor to American Cyanamid Company, New York, N. Y. Compound optical element cemented with a polyester of fumaric acid. 2,453,665, Nov. 9.

Kropa, Edward L., Old Greenwich, Conn., assignor to American Cyanamid Company, New York, N. Y. Compound optical element cemented with a polyester of maleic acid. 2,453,666, Nov. 9.

Kubaugh, Benjamin F., assignor to Henry Vogt Machine Co. Inc., Louisville, Ky. Adjustable cutter for tube-ice machines. 2,453,140, Nov. 9.

Kuhn, Karl: *See*—
Crane, Edward V., and Kuhn.

Lacey, Harold T., Plainfield, and R. E. Brouillard, Somerville, N. J., assignors to American Cyanamid Company, New York, N. Y. Preparation of chemiluminescent composition of matter. 2,453,578, Nov. 9.

La Fair, Samuel, Philadelphia, Pa. Ornamental fabric and articles made therefrom. 2,453,441, Nov. 9.

Lagasse, Francis H., San Francisco, Calif. Means for measuring the velocity and volume of fluids. 2,453,376, Nov. 9.

Lambert, Francis M., Narberth, assignor to Heintz Manufacturing Company, Philadelphia, Pa. Apparatus for cooling bottled beverages. 2,453,667, Nov. 9.

Lambert, Sanders R., Kansas City, Mo. Portable building structure. 2,453,326, Nov. 9.

Landers, Charles H., assignee: *See*—
Clay, Paul H.

Lane-Wells Company, assignee: *See*—
Swings, Polydore F.

Lange, Werner, Forest Hills, N. Y. Holding fixture for coating optical elements. 2,453,141, Nov. 9.

Langkammerer, Carl M., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Organic titanium compound and making same. 2,453,520, Nov. 9.

La Plant-Choate Mfg. Co. Inc., assignee: *See*—
Rockwell, Harvey W.

Lawrence Paper Company, The: *See*—
Hill, Irving.

Layng, Edwin T., Jersey City, N. J., and F. T. Suman, Jr., Nyack, N. Y., assignors to The M. W. Kellogg Company, Jersey City, N. J. Hydrocarbon conversion. 2,453,327, Nov. 9.

Lazarus, Alexander, Rosedale, N. Y. Theft-preventing locking device for automobiles and the like. 2,453,236, Nov. 9.

Lee Foundation for Nutritional Research: *See*—
Lee, Royal.

Lee, Leighton, II, assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn. Control apparatus for internal-combustion engines. 2,453,328, Nov. 9.

Lee, Leighton, II, assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn. Control apparatus for internal-combustion engines. 2,453,329, Nov. 9.

Lee, Royal, assignor to Lee Foundation for Nutritional Research, Milwaukee, Wis. Sugar-bearing product and making. 2,453,142, Nov. 9.

Lehr, Norman F.: *See*—
Brown, Morris E., and Lehr.

Lejeune, Léon S. M., Paris, France; vested in the Attorney General of the United States. Tennis ball. 2,453,143, Nov. 9.

Leonard, Ward Electric Company, assignee: *See*—
Steinitz, Stephen.

Leser, Jack M., and N. L. Severeign, Milwaukee, Wis. Combination baby carriage and shopping cart. 2,453,631, Nov. 9.

Le Tourneau, R. G., Inc., assignee: *See*—
Le Tourneau, Robert G.

Le Tourneau, Robert G., Peoria, Ill., assignor to R. G. Le Tourneau, Inc., Stockton, Calif. Multiple-disk friction coupler. 2,453,237, Nov. 9.

Lewis, David G., Sunnyvale, Calif. Folding camera support. 2,453,442, Nov. 9.

Libbey-Owens-Ford Glass Company, assignee: *See*—
Morgan, Willard L.

Lichtenwalner, Hart K.: *See*—
Lovell, Wheeler G., Mulligan, and Lichtenwalner.

Lipe-Rollway Corporation, assignee: *See*—
Root, Robert S.

Locke, Edwin A., Jr., Quincy, assignor, by mesne assignments, to Gillette Safety Razor Company, Boston, Mass. Blade container. 2,453,238, Nov. 9.

Lofstrand, Anders R., Jr., Silver Spring, Md. Crutch. 2,453,632, Nov. 9.

Logan, Evelyn, Washington, D. C. Self-serving table. 2,453,443, Nov. 9.

Logan, Victor R., Brownsville, Ky. Extracting and purifying bitumen. 2,453,633, Nov. 9.

Loonam, Alfred C., New York, N. Y., assignor to Mathieson Chemical Corporation. Magnesium base lithium alloys. 2,453,444, Nov. 9.

Lovell, Wheeler G., M. J. Mulligan, and H. K. Lichtenwalner, assignor to General Motors Corporation, Detroit, Mich. Synthesis of organic compounds. 2,453,144, Nov. 9.

Lozivit, René, Paris, assignor to Societe d'Etudes de Carburation pour l'Automobile et l'Aviation "S. E. C. A. A.," Levallois-Perret, France. Throttle control for the primary and secondary charges of engines. 2,453,377, Nov. 9.

Lubbock, Isaac, Great St. Helens, London, assignor to The Asiatic Petroleum Company, Limited, London, England. Liquid-cooled nozzle arrangement for combustion chambers of jet propulsion apparatus. 2,453,378, Nov. 9.

Lubcke, Martin C., Emmett, Idaho. Antiskid vehicle frame. 2,453,445, Nov. 9.

Lucas, Victor E.: *See*—
Emerson, William S., and Lucas.

Luhn, Hans P., Armonk, assignor to International Business Machines Corporation, New York, N. Y. Record controlled data storing device. 2,453,239, Nov. 9.

Lummus Company, The, assignee: *See*—
Reed, Carl S.
Reed, Carl S., Schutte, and Bowles.

Lund, Jack, assignor to Dorman & Smith Limited, Salford, England. Electric plug and socket connection. 2,453,579, Nov. 9.

Lusk, Albert F., Pontiac, Mich. V-belt drive pulley. 2,453,580, Nov. 9.

Lyon-Raymond Corporation: *See*—
House, William C.

Lytle, Lawrence D.: *See*—
Cullinan, John F., and Lytle.

MacDowell, Louis G., Lakeland, and E. L. Moore and C. D. Atkins, Winter Haven, Fla., assignors to the United States of America as represented by the Secretary of Agriculture. Preparing full-flavored fruit juice concentrates. 2,453,109, Nov. 9.

Mallory, P. R., & Co., Inc., assignee: *See*—
Aust, Robert J.
Blumenthal, Sol.

Malmros, Gustav V. A., Binghamton, assignor to International Business Machines Corporation, New York, N. Y. Acoustical wave filter for pneumatic hand tools. 2,453,240, Nov. 9.

Mann, Julius W., and G. F. Russell, Tacoma, Wash. Composite radio frequency inductance. 2,453,241, Nov. 9.

Manning, Maxwell & Moore, Inc., assignee: *See*—
Moore, George E.

Marisic, Milton M., and T. F. Rutledge, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated. Electrolytic method for the production of porous, catalytic metal. 2,453,668, Nov. 9.

Marks, Alvin M., New York, N. Y. Multiply angle selective polarizer. 2,453,379, Nov. 9.

Marley Company, Inc., The, assignee: *See*—
Mart, Leon T.

Marple, Kenneth E., Oakland, assignor to Shell Development Company, San Francisco, Calif. Glycidyl ethers. 2,453,634, Nov. 9.

Marquis, John F., Haddonfield, N. J., assignor to Radio Corporation of America. Superimposed duplex loudspeaker. 2,453,521, Nov. 9.

Marsam Specialties, Inc., assignee: *See*—
Zirin, Samuel.

Marsh, John L., Des Moines, Iowa, assignor to J. I. Case Company, Racine, Wis. Spreader apron drive. 2,453,242, Nov. 9.

Marshall, Lewis C., East Walpole, Mass. Making split piston rings. 2,453,330, Nov. 9.

Mart, Leon T., Mission Township, Johnson County, assignor to The Marley Company, Inc., Kansas City, Kans. Producing wood pipe. 2,453,522, Nov. 9.

Martin, Frank B., Jr., Pensacola, Fla. Emergency hub adapter. 2,453,635, Nov. 9.

Martin, George, assignee: *See*—
Janes, Irene M.

Martin, Glenn L., Company, assignee: *See*—
Hollyday, Charles E., Jr.
Pajak, Theodore P.
Reilly, Mason J.

Martin, William H., Lakewood, Ohio, assignor, by mesne assignments, to Republic Industries, Inc., New York, N. Y. Connection for enameled tanks. 2,453,331, Nov. 9.

Mason, Warren P., West Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Frequency modulating and harmonic producer apparatus. 2,453,243, Nov. 9.

Mathieson Chemical Corporation, assignee: *See*—
Loonam, Alfred C.
Switzer, John L., and Michalek.

Matson, Ivan M., Los Angeles, Calif. Electrode grip and holder. 2,453,244, Nov. 9.

Matthews, Robert E.: *See*—
Youngson, Donald A., and Matthews.

Matweeff, Paul, Uncasville, Conn. Whip roll stop motion. 2,453,145, Nov. 9.

McBee, Earl T., Lafayette, and P. A. Wiseman, assignors to Purdue Research Foundation, West Lafayette, Ind. Perfluoroadipic acid. 2,453,146, Nov. 9.

McBee, Earl T., Lafayette, and P. A. Wiseman, Muncie, assignors to Purdue Research Foundation, Lafayette, Ind. Esters of perfluoroadipic acid. 2,453,147, Nov. 9.

McCall, Fred H., Neptune, and P. Devreotes, Eatontown, N. J. Shield box and tuning mechanism for electron tubes. 2,453,148, Nov. 9.

McCoy, George E.: *See*—
Battley, Edwin R., and McCoy.

McCullough, Delbert, Fairfield, Ill., assignor to Chefford Master Manufacturing Co., Inc. Bicycle generator regulated by rotor torque variations. 2,453,523, Nov. 9.

McCutchen, Alan J., Washington, D. C. Buoyant attachment for standard tanks. 2,453,149, Nov. 9.

McDonald, Eugene F., Jr., Chicago, Ill. Device for releasing snagged fishing lures or baits. 2,453,245, Nov. 9.

McGeorge, Walter, Kingston Hill, and F. H. Milner, Twickenham, England. Preparation of carbonate salts of calcium and magnesium. 2,453,446, Nov. 9.

McKay, Maurice P., Troutdale, Oreg. Low-tension ignition system for miniature two-cycle gas engines. 2,453,636, Nov. 9.

McKeown, Charles G., Dudley, assignor to Controlled Heat & Air Limited, Smethwick, England. Filter for gaseous mediums. 2,453,447, Nov. 9.

McMahan, Kenton D., Scotia, and N. P. Bailey, Troy, N. Y., assignors to General Electric Company. Centrifugal compressor. 2,453,524, Nov. 9.

McMahon, Edward M.: *See*—
Hasche, Rudolph L., and McMahon.

McNeil Bros. Inc., assignee: *See*—
Aurillo, Joseph M., and Schecter.

McNeill, Albert G., assignor to Bachmann Bros., Inc., Philadelphia, Pa. Medicine administering spoon. 2,453,525, Nov. 9.

McTurk, Morton H., Philadelphia, Pa. Heat exchanger. 2,453,448, Nov. 9.

Mehltretter, Charles L., Peoria, Ill., assignor to the United States of America as represented by the Secretary of Agriculture. Polyesters of dimethylene d-gluconic acid. 2,453,150, Nov. 9.

Meitzler, Donald E., Manchester, assignor to United Aircraft Corporation, East Hartford, Conn. Timing of fuel injection systems. 2,453,526, Nov. 9.

Melcher, Lee W., Oconomowoc, assignor to Waukesha Motor Company, Waukesha, Wis. Dynamoelectric machine with closed air circulating system. 2,453,449, Nov. 9.

Meneses, Hector A., assignor to Able Scientific Glass Apparatus Co., Chicago, Ill. Glass tubing joint. 2,453,669, Nov. 9.

Mero, Ralph M., Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y. Lard spray controlling means. 2,453,527, Nov. 9.

Merryweather, Gerald, Cuyahoga Falls, Ohio. Storm window and screen combination. 2,453,528, Nov. 9.

Merwin, Walter J.: *See*—
Teter, John W., and Merwin.

Metals & Controls Corporation, assignee: *See*—
Smith, Ezra S.

Michalek, John C.: *See*—
Switzer, John L., and Michalek.

Midvale Company, The, assignee: *See*—
Schaefer, Adolph O.

Miller, George A., Jr., Weirsdale, Fla., assignor to the United States of America as represented by the Secretary of War. Projectile. 2,453,151, Nov. 9.

Miller, Jesse E.: *See*—
Cathey, Clarence D., and Miller.

Millett, Merrill A.: *See*—
Stamm, Alfred J., Seborg, and Millett.

Millhiser, Frederick R., Richmond, Va., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Treating yarn. 2,453,332, Nov. 9.

Mills, George A., Ridley Park, Pa., assignor to Houdry Process Corporation, Wilmington, Del. Catalytic conversion of hydrocarbons. 2,453,152, Nov. 9.

Milner, Francis H.: *See*—
McGeorge, Walter, and Milner.

Miner, W. H., Inc., assignee: *See*—
Olander, Roland J.

Minneapolis-Honeywell Regulator Company, assignee: *See*—
Newton, Alwin B.

Minnesota Mining & Manufacturing Company, assignee: *See*—
Pearson, John W.

Minnick, Leonard J., Cheltenham, assignor to G. and W. H. Corson, Inc., Plymouth Meeting, Pa. Hydrated lime product and making the same. 2,453,637, Nov. 9.

Mittlemann, Eugene, Chicago, Ill. High-frequency heating. 2,453,529, Nov. 9.

Mock, Frank C., assignor to Bendix Aviation Corporation, South Bend, Ind. Control for internal-combustion engines. 2,453,651, Nov. 9.

Moergeli, Eduard: *See*—
Kern, Walter, Sutter, Moergeli, and Holbro.

Mokanes, Karl E., Whitewater, assignor to Dairy Equipment Company, Madison, Wis. Milk can truck. 2,453,246, Nov. 9.

Molloy, James F., Oakland, Calif. Pressure controlled self-closing valve. 2,453,450, Nov. 9.

Monsanto Chemical Company, assignee: *See*—
Debacher, Max O.
Dunlop, Richard D.
Emerson, William S., and Lucas.
Robshaw, Walter A.

Moore, Edwin L.: *See*—
MacDowell, Louis G., Moore, and Atkins.

Moore, George E., Muskegon Heights, Mich., assignor to Manning, Maxwell & Moore, Inc. Clutch and brake device. 2,453,581, Nov. 9.

Moore, Homer L., Chamblee, Ga. Food preserving apparatus. 2,453,530, Nov. 9.

Moore, Leonard P., New York, N. Y., and W. P. Ericks, Stamford, Conn., assignors to American Cyanamid Company, New York, N. Y. Reaction of biguanide and ethylene sulfide. 2,453,333, Nov. 9.

Morgan, Frank H., Glendale, Calif. Meat tenderizer. 2,453,334, Nov. 9.

Morgan, Willard L., Columbus, assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Apparatus for making pattern mirrors and other coatings. 2,453,582, Nov. 9.

Morris, Reginald B., Wealdstone, England, assignor to Eastman Kodak Company, Rochester, N. Y. Color blindness chart for detecting anomalous vision, deuteranopes, protanopes, tritanopes and monochromats. 2,453,335, Nov. 9.

Morton Salt Company, assignee: *See*—
Phillips, Edwin R.

Morway, Arnold J., Clark Township, Union County, and J. C. Zimmer, Union, N. J., assignors to Standard Oil Development Company. Lubricating grease. 2,453,153, Nov. 9.

Moseley, Francis L., assignor to Collins Radio Company, Cedar Rapids, Iowa. Voltage regulator system. 2,453,451, Nov. 9.

Moss, Jesse R., assignor to Plasticbilt Corporation, Greenville, S. C. Reinforced plastic bobbin construction. 2,453,247, Nov. 9.

Moyer, Frederick D., Chicago, Ill., assignor to Chicago Bridge & Iron Company. Locking device. 2,453,154, Nov. 9.

Much, Edward J., Wichita, Kans. Combination lawn hose and water nozzle support. 2,453,248, Nov. 9.

Muller Machinery Company, Inc., assignee: *See*—
Muller, Walter.

Muller, Walter, Dunellen, assignor to Muller Machinery Company, Inc., Metuchen, N. J. Tilting bowl concrete mixer. 2,453,583, Nov. 9.

Mulligan, Maurice J.: *See*—
Lovell, Wheeler G., and Mulligan, and Lichtenwalner.

Murphy, Daniel, New Castle, Pa. Seal for centrifugal pumps. 2,453,249, Nov. 9.

Myers, Harold C., assignor to Butler Manufacturing Company, Kansas City, Mo. Internal mandrel. 2,453,531, Nov. 9.

National-Standard Company, assignee: *See*—
Frazier, Larry C.

National Steel Corporation, assignee: *See*—
Wilson, Abram B.

Navy, United States of America as represented by the Secretary of the, assignee: *See*—
Ensinger, Willis B.
Tobias, Cornelius A.

Nehrke, Charles, New York, N. Y. Lipstick container. 2,453,250, Nov. 9.

Nelson, Homer B., and F. J. Walters, U. S. Navy. Floating dock and wharf. 2,453,155, Nov. 9.

Neracher, Carl A., and W. T. Dunn, Detroit, assignors to Chrysler Corporation, Highland Park, Mich. Servomotor. 2,453,156, Nov. 9.

Newman, Henry J., Greenford, and E. F. Johnson, Southend-on-Sea, England. Vehicular amusement apparatus. 2,453,380, Nov. 9.

Newman, William E., Moorestown, N. J., assignor to Radio Corporation of America. Motor-operated push-button tuner. 2,453,251, Nov. 9.

Newman, William E., Chicago, Ill., assignor to Radio Corporation of America. Tuning control mechanism for radio receivers. 2,453,252, Nov. 9.

Newton, Alwin B., Dayton, Ohio, assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Refrigerating control apparatus. 2,453,584, Nov. 9.

New York Air Brake Company, The, assignee: *See*—
Whittingham, David J.

Nielsen, Kenneth, Westby, Wis. Dip stick cleaner. 2,453,452, Nov. 9.

Nietfeld, Albert B., Fort Laramie, Wyo. Circular saw reconditioning rig. 2,453,638, Nov. 9.

Niles-Bement-Pond Company, assignee: *See*—
Lee, Leighton, II.

Norton Company, assignee: *See*—
Silven, Herbert A.

Norton, Lowell E., Princeton Junction, N. J., assignor to Radio Corporation of America. Electrostatic microwave energy measuring apparatus. 2,453,532, Nov. 9.

Norton, Lowell E., Princeton Junction, N. J., assignor to Radio Corporation of America. Electrostatic microwave energy measuring apparatus. 2,453,533, Nov. 9.

Norton, Lowell E., Princeton Junction, N. J., assignor to Radio Corporation of America. Frequency modulation system. 2,453,453, Nov. 9.

Norwine, Andrew C., Short Hills, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Coder for code modulation transmission. 2,453,454, Nov. 9.

Nyhagen, Barney R., New York, N. Y. Cue tip clamp. 2,453,157, Nov. 9.

O'Brien, James E., Cleveland, Ohio. Coaling chute. 2,453,253, Nov. 9.

Odin, Frank W., Chicago, Ill., assignor to Syndicate Glass, Inc., Indianapolis, Ind. Rockable shelf bracket. 2,453,254, Nov. 9.

Ohio Steel Foundry Company, The, assignee: *See*—
Jackson, Harold F.

Oilgear Company, The, assignee: *See*—
Douglas, James K.

Olander, Roland J., assignor to W. H. Miner, Inc., Chicago, Ill. Hand brake. 2,453,255, Nov. 9.

Olcott, Harold S., and Heinz L. Fraenkel-Conrat, Berkeley, Calif., assignors to the United States of America as represented by the Secretary of Agriculture. Isolation of gramicidin. 2,453,534, Nov. 9.

Omelina, Michael P., Cudahy, Wis. Ash tray. 2,453,256, Nov. 9.

Orser, William D., assignor to Eastman Kodak Company, Rochester, N. Y. Periscope lens system. 2,453,336, Nov. 9.

Orton, Kenneth L., St. Paul, Minn. Fish stringer retainer. 2,453,381, Nov. 9.

Osborn Manufacturing Company, The, assignee: *See*—
Peterson, Ruben O.

Ott, Harvey N., Buffalo, N. Y. Rotatable microscope eyepiece mounting and guard means therefor. 2,453,257, Nov. 9.

Owens-Illinois Glass Company, assignee: *See*—
Hohl, John.

Packless Metal Products Corporation, assignee: *See*—
Guarnaschelli, Stephen.

Pagliarul, Joseph N., Milwaukee, Wis.; E. P. Kowalsky (Enez Kowalsky) executrix of J. N. Pagliarul, deceased, assignor to Inland Wire Products Company, Chicago, Ill. Wire stitching feed. 2,453,337, Nov. 9.

Pajak, Theodore P., Baltimore, assignor to The Glenn L. Martin Company, Middle River, Md. Apparatus for inspecting sheet material. 2,453,338, Nov. 9.

Pallas, Charles W., Elyria, Ohio. Mounting attachment for electrical outlet boxes. 2,453,535, Nov. 9.

Payne, John W., T. P. Simpson, and J. I. Butzner, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated. Making a substantially alkali-free hydrogel catalyst. 2,453,585, Nov. 9.

Pearson, John W., assignor to Minnesota Mining & Manufacturing Company, St. Paul, Minn. Pressure-sensitive adhesive sheet. 2,453,258, Nov. 9.

Peck, William H., Royal Oak, Mich. Chisel retainer for pneumatic hammers. 2,453,536, Nov. 9.

Pennsylvania Furnace and Iron Company, assignee: *See*—
De Frees, Joseph H.

Perkins, Donald G., Chestertown, Md., assignors to E. R. Squibb & Sons, New York, N. Y. Sulfa preparation for animal mastitis. 2,453,259, Nov. 9.

Perkins, Julian L., West Springfield, Mass., assignor, by mesne assignments, to The Gordon Armstrong Company, Inc., Cleveland, Ohio. Drive mechanism. 2,453,586, Nov. 9.

Persak, Carl, Wallington, N. J. Vaporizer. 2,453,455, Nov. 9.

Persson, Tage G., Bloomfield, N. J. Hooks. 2,453,670, Nov. 9.

Pestrecov, Konstantin, assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Three element objective lens. 2,453,260, Nov. 9.

Peters, Burnis C., Giddings, Tex. Topography plotting device. 2,453,261, Nov. 9.

Peters, Joseph M., Irondequoit, assignor to Gleason Works, Rochester, N. Y. Chuck. 2,453,262, Nov. 9.

Peterson, Ove, Gentofte near Copenhagen, Denmark. Internal-combustion engine with double-acting crosshead scavenge pump. 2,453,639, Nov. 9.

Peterson, Ruben O., University Heights, assignor to The Osborn Manufacturing Company, Cleveland, Ohio. Sheet brushing apparatus. 2,453,339, Nov. 9.

Petri, Edward W., and F. H. Seeley, Fort Plain, N. Y. Lawn mower. 2,453,587, Nov. 9.

Petrolite Corporation, Ltd., assignee: *See*—
Dom, John M.

Philco Corporation, assignee: *See*—
Rundell, Theodore W.
Tiley, John W.
Tiley, John W., and Sunstein.

Phillips, Edwin R., Evanston, assignor to Morton Salt Company, Chicago, Ill. Tube forming machine. 2,453,537, Nov. 9.

Phillips Petroleum Company, assignee: *See*—
Piety, Raymond G.

Picker X-Ray Corporation Waite Manufacturing Division, Inc., assignee: *See*—
Ball, Jack.

Pietsch, Herman A., Greentree, assignor to Dravo Corporation, Pittsburgh, Pa. Heating and ventilating apparatus. 2,453,382, Nov. 9.

Piety, Raymond G., Tuckahoe, N. Y., assignor to Phillips Petroleum Company. Instrument for measuring water flow in wells. 2,453,456, Nov. 9.

Pigg, Archie N., Ferndale, Mich. Valve actuation for oscillating cylinder expansible chamber motors. 2,453,640, Nov. 9.

Plasticbilt Corporation, assignee: *See*—
Moss, Jesse R.

Plastmeti Corporation, assignee: *See*—
Zabel, William C. P., and Helfenbein.

Platt, John D.: *See*—
Platt, Leland H., L. H., Jr., and J. D.

Platt, Leland H., L. H., Jr., and J. D., Los Angeles, Calif. Produce washing machine. 2,453,457, Nov. 9.

Platt, Leland H., Jr.: *See*—
Platt, Leland H., L. H., Jr., and J. D.

Poe, John H., assignee: *See*—
Sloan, John I.

Polaroid Corporation: *See*—
Bachelder, Albert J., and Wolff.
Binda, Frederick J.
Buzzell, Harold O.
Grey, David S.

Polly, Orville L., Long Beach, assignor to Union Oil Company of California, Los Angeles, Calif. Purification of organic acids. 2,453,588, Nov. 9.

Porreca, Donato J., Philadelphia, Pa. Wringer and wash tub unit. 2,453,340, Nov. 9.

Potter, James A., Long Valley, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Voltage regulation. 2,453,263, Nov. 9.

Poux, Noel J., Meadville, Pa. Hypodermic syringe and ampoule therefor. 2,453,589, Nov. 9.

Poux, Noel J., Meadville, Pa. Hypodermic syringe. 2,453,590, Nov. 9.

Poux, Noel J., Meadville, Pa. Hypodermic syringe. 2,453,591, Nov. 9.

Price, Osborne I., Frederick, Md. Electromagnet. 2,453,158, Nov. 9.

Purdue Research Foundation, assignee: *See*—
McBee, Earl T., and Wiseman.

Putney, David H., assignor to Stratford Development Corporation, Kansas City, Mo. Contacting apparatus for catalytic processes. 2,453,592, Nov. 9.

Putney, David H., assignor to Stratford Development Corporation, Kansas City, Mo. Apparatus for separating entrained solids from gases. 2,453,593, Nov. 9.

Raab, Edward L.: *See*—
Clark, Frank M., and Raab.

Radio Corporation of America, assignee: *See*—
Blain, Albert.
Davidson, Norman R.
De Vore, Henry B.
Dimmick, Glenn L.
Greig, Harold G.
Marquis, John F.
Newman, William E.
Norton, Lowell E.
Young, Charles J.

Rady, William J., Anderson, Ind., assignor to General Motors Corporation, Detroit, Mich. System of generator regulation. 2,453,341, Nov. 9.

Rast, Frederick Q., Chicago, Ill., assignor to Commercial Controls Corporation. Totalizing mechanism. 2,453,342, Nov. 9.

Rathman, Gilbert, Union, N. J. Flexible coupling. 2,453,383, Nov. 9.

Rauch, William T., Voorheesville, N. Y., assignor to General Electric Company. Constant pressure pump. 2,453,538, Nov. 9.

Raylite Electric Corp., assignee: *See*—
Abramson, Abraham.

Reardon, Robert T., Fort Wayne, Ind., assignor to General Electric Company, Dynamoelectric machine core surface treatment. 2,453,539, Nov. 9.

Reece Folding Machine Company, assignee: *See*—
Gilbert, Alfred G., and Rogers, Jr.

Reed, Carl S., assignor to The Lummus Company, New York, N. Y. Producing colloidal fuel. 2,453,641, Nov. 9.

Reed, Carl S., New York, A. H. Schutte, Hastings-on-Hudson, and V. O. Bowles, Dobbs Ferry, assignors to The Lummus Company, New York, N. Y. Catalyst transfer system. 2,453,458, Nov. 9.

Rehberg, Chessie E., Glenside, Pa., assignor to the United States of America as represented by the Secretary of Agriculture. Cellulose ester or ether plasticized with ethyl alpha-carbethoxyethoxyethyl carbonate. 2,453,264, Nov. 9.

Reid, James S., Cleveland Heights, Ohio, assignor to The Standard Products Company, Detroit, Mich. Cartridge belt. 2,453,540, Nov. 9.

Reihman, Earl F.: *See*—
Bruntil, Irwin M., and Reihman.

Reilly, Mason J., Baltimore, assignor to The Glenn L. Martin Company, Middle River, Md. Retainer strip. 2,453,343, Nov. 9.

Reiter, David, Woodside, Long Island, N. Y. Matrix retainer. 2,453,541, Nov. 9.

Renken, Harm L., assignor of one-fourth to K. Stringfield, Pleasant Plains, Ill. Automatic windrower for balers. 2,453,384, Nov. 9.

Republic Aviation Corporation, assignee: *See*—
Westberg, Arthur H., and Aldrich.

Republic Industries, Inc., assignee: *See*—
Martin, William H.

Republic Steel Corporation: *See*—
Whitehouse, Irving P.

Reynolds, Harry R., assignor to The Fafnir Bearing Company, New Britain, Conn. Journal box. 2,453,594, Nov. 9.

Richter, Lewis E., Shumway, Ill. Container. 2,453,159, Nov. 9.

Ringer, Abraham, Eatontown, N. J., assignor to the United States of America as represented by the Secretary of War. Field intensity meter. 2,453,160, Nov. 9.

Roberts, Arthur E., assignee: *See*—
Gordon, Ernest.

Roberts, Obe, assignee: *See*—
Harbison, Joseph C.

Roberts, William B., Junction City, Kans. Expander for loose-leaf note books. 2,453,459, Nov. 9.

Robinson, William K., Ventnor, N. J. Educational device. 2,453,265, Nov. 9.

Robshaw, Walter A., Wrexham, Wales, assignor to Monsanto Chemical Company, St. Louis, Mo. Manufacture of tetraalkyl thiuram monosulfide. 2,453,460, Nov. 9.

Rockwell, Harvey W., assignor to La Plant-Choate Mfg. Co. Inc., Cedar Rapids, Iowa. Piston pump. 2,453,266, Nov. 9.

Rogers, William H., Jr.: *See*—
Gilbert, Alfred G., and Rogers.

Rohlm Manufacturing Company, Inc., assignee: *See*—
Sarver, Emmett F.

Rohm & Haas Company, assignee: *See*—
Rowland, Stanley P.

Roll-On Grill, Inc., assignee: *See*—
Rone, Charles C.

Rone, Charles C., Lakeland, Fla., assignor to Roll-On Grill, Inc. Hamburger grill. 2,453,385, Nov. 9.

Root, John J., New York, N. Y. Remote control system. 2,453,386, Nov. 9.

Root, Robert S., assignor to Lipe-Rollway Corporation, Syracuse, N. Y. Friction clutch operating mechanism. 2,453,344, Nov. 9.

Rosenthal, Adolph H., assignor to Scophony Corporation of America, New York, N. Y. Apparatus for dispensing liquid fuel. 2,453,595, Nov. 9.

Rossmann, Peter F., Morristown, N. J. Electromagnetic switching device. 2,453,267, Nov. 9.

Roubal, Alexander J., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Liner plate for jaw crushers. 2,453,596, Nov. 9.

Row, Stuart B., Roanoke, Va., and E. L. Woolley, Morton, Pa., assignors to American Viscose Corporation, Wilmington, Del. Filtering apparatus. 2,453,345, Nov. 9.

Rowland, Stanley P., assignor to Rohm & Haas Company, Philadelphia, Pa. Cation-exchange resins made by condensing a sulfophthalein and formaldehyde. 2,453,687, Nov. 9.

Roy, Emil, Webster, Mass. Automatic chuck. 2,453,642, Nov. 9.

Royal, Leslie L., assignor to Belmont Radio Corporation, Chicago, Ill. Tuning control apparatus. 2,453,268, Nov. 9.

Rugh, Harry O., assignor to Automatic Electric Laboratories, Inc., Chicago, Ill. Printing telegraph system. 2,453,269, Nov. 9.

Rundell, Theodore W., Abington, assignor to Philco Corporation, Philadelphia, Pa. Article supporting closure for cabinets. 2,453,387, Nov. 9.

Russell, George F.: *See*—
Mann, Julius W., and Russell.

Russell, Harold D., assignor to Eastman Kodak Company, Rochester, N. Y. Stabilizing of processed photographic emulsions to high temperatures and humidities. 2,453,346, Nov. 9.

Russell, Harold D., assignor to Eastman Kodak Company, Rochester, N. Y. Stabilization of photographic prints with thiophenols. 2,453,347, Nov. 9.

Russell, Ray A., Santa Ana, Calif. Umbrella rib clip and pocket. 2,453,270, Nov. 9.

Rutledge, Thomas F.: *See*—
Marisic, Milton, and Rutledge.

Sales, Frederick J., London, England. Rotary alternating pistons pump. 2,453,271, Nov. 9.

Sandoz Limited, assignee: *See*—
Von Allmen, Samuel, and Eggenberger.

Sapin, Bernard, New York, N. Y. Knit fabric with gathers therein. 2,453,542, Nov. 9.

Sargent, Donald E.: *See*—
Sickels, Jackson P., and Sargent.

Sargent, Donald E., Easton, Pa., assignor to American Cyanamid Company, New York, N. Y. Alkamine esters of pyrrole-3,4-dicarboxylic acids. 2,453,671, Nov. 9.

Sargent, Donald E., Easton, Pa., assignor to American Cyanamid Company, New York, N. Y. Alkamine esters of pyrrole-3,4-dicarboxylic acids. 2,453,672, Nov. 9.

Sargent, Donald E., Easton, Pa., assignor to American Cyanamid Company, New York, N. Y. Alkamine esters of pyrrole-3,4-dicarboxylic acids. 2,453,673, Nov. 9.

Sarver, Emmett F., assignor to Rohlm Manufacturing Company, Inc., Erie, Pa. Fitting for pipe or hose connections. 2,453,597, Nov. 9.

Savoie, Mark E., Cleveland, Ohio. Combined magnifier and telephone dialing implement. 2,453,272, Nov. 9.

Schabelitz, Ernest J., Rincon, Calif. Treating bituminous coal. 2,453,543, Nov. 9.

Schabelitz, Ernest J., Rincon, Calif. Preparing and coking bituminous coal. 2,453,544, Nov. 9.

Schaefer, Adolph O., Whitpain Township, Montgomery County, assignor to The Midvale Company, Philadelphia, Pa. Ferrous alloys and rotor forgings for gas turbines. 2,453,598, Nov. 9.

Schecter, Jack H.: *See*—
Aurillo, Joseph M., and Schecter.

Schelleng, John C., Interlaken, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Code modulation communication system. 2,453,461, Nov. 9.

Schlegel, Kurt, New York, N. Y. Dough-preparing device for latticework pie crust. 2,453,599, Nov. 9.

Schleicher, Harold E., West Hartford, assignor to The Arrow-Hart & Hegeman Electric Co., Hartford, Conn. Butt contact mounting for rotary switches. 2,453,161, Nov. 9.

Schmertz, William E., Pittsburgh, Pa. Metal teeming. 2,453,643, Nov. 9.

Scholz, Theodore F., Plainfield, N. J., assignor to American Cyanamid Company, New York, N. Y. Alkamine esters of pyrrole substituted acrylic acids. 2,453,674, Nov. 9.

Schramm, Arthur G., Phoenix, Ariz. Trailer construction. 2,453,388, Nov. 9.

Schutte, August H.: *See*—
Reed, Carl S., Schutte, and Bowles.

Scophony Corporation of America, assignee: *See*—
Rosenthal, Adolph H.

Scott, Ralph C., Brighton, N. Y. Tire antiskid mechanism. 2,453,273, Nov. 9.

Seborg, Raymond M.: *See*—
Stamm, Alfred J., Seborg, and Millett.

Seeley, Frank H.: *See*—
Petri, Edward W., and Seeley.

Sellers, John K., Warren, Ariz. Multiple element rheostat. 2,453,462, Nov. 9.

Serowy, John J., Chicago, Ill. Sealing device. 2,453,274, Nov. 9.

Severeign, Norman L.: *See*—
Leser, Jack M., and Severeign.

Seymour, George W., B. B. White, and E. Barabash, Cumberland, Md., assignors to Celanese Corporation of America. Preparation of mixed saturated-unsaturated esters of cellulose. 2,453,275, Nov. 9.

Shaffer, Chester E., Arlington, N. J., assignor, by mesne assignments, to Koppers Company, Incorporated, Pittsburgh, Pa. Stoker. 2,453,162, Nov. 9.

Shawhigan Chemicals Limited, assignee: *See*—
Kaufmann, Charles, and Hall.

Shawinigan Water & Power Co., assignee: *See*—
Eaton, Milton.

Shelby, Fitz G., Shelby, Miss. Manual pocket square. 2,453,276, Nov. 9.

Shell Development Company, assignee: *See*—
Marple, Kenneth E.

Sheridan, Henry M., Erie, Pa., assignor to Apex Tool & Cutter Company, Shelton, Conn. Toolholder. 2,453,464, Nov. 9.

Sherman, Alvin G., Grosse Pointe Park, Mich., assignor to Globe American Corporation, Kokomo, Ind. Construction of small boats. 2,453,463, Nov. 9.

Shipstead, Helge, Syracuse, assignor to The Borden Company, New York, N. Y. Vacuum treatment of milk powder. 2,453,277, Nov. 9.

Shurcliff, William A., Washington, D. C. X-ray apparatus and procedure. 2,453,163, Nov. 9.

Sickels, Jackson P., Plainfield, N. J., assignor to American Cyanamid Company, New York, N. Y. Alkamine esters of pyrrole-3,4-dicarboxylic acids. 2,453,676, Nov. 9.

Sickels, Jackson P., Plainfield, N. J., assignor to American Cyanamid Company, New York, N. Y. Alkamine esters of pyrrole-3,4-dicarboxylic acids. 2,453,677, Nov. 9.

Sickels, Jackson P., Plainfield, N. J., and D. E. Sargent, Easton, Pa., assignors to American Cyanamid Company, New York, N. Y. Alkamine alkyl esters of pyrrole-3,4-dicarboxylic acids. 2,453,675, Nov. 9.

Silberstein, Victor: *See*—
Kenyon, Joseph, and Silberstein.

Silven, Herbert A., assignor to Norton Company, Worcester, Mass. Cylindrical grinding machine. 2,453,678, Nov. 9.

Simmons Slicing Knife Company, assignee: *See*—
Gustafson, Harry M.

Simonds Machine Co., Inc., assignee: *See*—
Bonin, George E.

Simpson, Justin, Elmhurst, assignor to Cameron Can Machinery Company, Chicago, Ill. Can end feeding mechanism. 2,453,545, Nov. 9.

Simpson, Thomas P.: *See*—
Payne, John W., Simpson, and Butzner.

Sinclair Refining Company, assignee: *See*—
Teter, John W., and Merwin.

Singer Manufacturing Company, The, assignee: *See*—
Sweeny, Charles P.

Sloan, John I., assignor of one-fifth to J. H. Poe, Tulsa, Okla. Apparatus for mixing drilling mud. 2,453,465, Nov. 9.

Slobodzian, Joseph, Phoenixville, Pa. Building construction. 2,453,466, Nov. 9.

Sluder, Eugene, assignee: *See*—
Clay, Paul H.

Smith, Ezra S., assignor to Metals & Controls Corporation, Attleboro, Mass. Circuit breaker. 2,453,546, Nov. 9.

Smith, Thomas F., Pasadena, Calif. Picture hanger. 2,453,467, Nov. 9.

Societe d'Etudes de Carburation pour l'Automobile et l'Aviation "S. E. C. A. A.," assignee: *See*—
Lozivit, René.

Socony-Vacuum Oil Company, Incorporated, assignee: *See*—
Marisic, Milton M., and Rutledge.
Payne, John W., Simpson, and Butxner.

Soden, Harold R., assignor to The Cincinnati Milling Machine Co., Cincinnati, Ohio. Indexing mechanism. 2,453,600, Nov. 9.

Soderberg, Carl R., Weston, Mass., and J. A. Clark, Glastonbury, assignors to United Aircraft Corporation, East Hartford, Conn. Turbine construction. 2,453,547, Nov. 9.

Sperry Corporation, The, assignee: *See*—
Varian, Russell H.

Spiegl, Ellis H. and R. A., Salinas, Calif. Row-crop carryall. 2,453,348, Nov. 9.

Spiegl, Ralph A.: *See*—
Spiegl, Ellis H. and R. A.

Spokes, Ray E.: *See*—
Blume, William A., and Spokes.

Sprong, William J., Alhambra, Calif. Spring steel shoe with rubber sole. 2,453,468, Nov. 9.

Squibb, E. R., & Sons, assignee: *See*—
Perkins, Donald G.

Stalder, Oskar, Thun, Hunibach, assignor to Fried. Schenk's Wwe. Stadtmuhle Bern, Bern, Switzerland. Drilling appliance. 2,453,349, Nov. 9.

Stamm, Alfred J., R. M. Seborg, and M. A. Millett, Madison, Wis. Forming compressed wood structures. 2,453,679, Nov. 9.

Standard Oil Development Company, assignee: *See*—
Morway, Arnold J., and Zimmer.

Standard Products Company, The, assignee: *See*—
Reid, James S.

Standard Railway Equipment Manufacturing Company, assignee: *See*—
Despotakis, Tony.

Standard Vendors, Inc., assignee: *See*—
Auerbach, Maurice J.

Stanolind Oil and Gas Company, assignee: *See*—
Hartline, Ralph E.

Stapan, Elia, Chicago, Ill. Wheeled figure toy. 2,453,469, Nov. 9.

Staples, Henrietta: *See*—
Staples, Robert J., Sr., and H.

Staples, Robert J., Sr., and H., Houston, Tex. Grain drier. 2,453,278, Nov. 9.

Starbuck, Ernest A., Peoria, Ill. Universal joint. 2,453,279, Nov. 9.

Statham Laboratories, Inc., assignee: *See*—
Statham, Louis D.

Statham, Louis D., Beverly Hills, assignor to Statham Laboratories, Inc., Los Angeles, Calif. Accelerometer with electric strain wires. 2,453,548, Nov. 9.

Statham, Louis D., Beverly Hills, assignor to Statham Laboratories, Inc., Los Angeles, Calif. Electric strain gauge. 2,453,549, Nov. 9.

Statham, Louis D., Beverly Hills, assignor to Statham Laboratories, Inc., Los Angeles, Calif. Bar type-high range gauge. 2,453,550, Nov. 9.

Statham, Louis D., Beverly Hills, assignor to Statham Laboratories, Inc., Los Angeles, Calif. Ring type resistance strain gauge dynamometer. 2,453,551, Nov. 9.

Statham, Louis D., and C. J. Baker, Los Angeles, Calif., and K. D. Swartzel, Snyder, N. Y., assignors to Curtiss-Wright Corporation. Electric strain gauge. 2,453,601, Nov. 9.

Stearn, George F., Stafford, assignor to The English Electric Company Limited, London, England. Transformer winding. 2,453,552, Nov. 9.

Stegeman, Raymond F. E., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Hydraulic telescoping lifting jack. 2,453,350, Nov. 9.

Steinitz, Stephan, New York, N. Y., assignor to Ward Leonard Electric Company. Electric controlling apparatus. 2,453,470, Nov. 9.

Steinkraus, Walter C., Chicago, Ill. Hot melt coating composition containing polyethylene, terpene resin, chlorinated diphenyl resin, and paraffin. 2,453,644, Nov. 9.

Steinway & Sons, assignee: *See*—
Bilhuber, Paul H.

Sterling Industries Limited, assignee: *See*—
Thomas, Percival E.

Stewart, Wilson M., Ottawa, Ontario, Canada. Coin controlled vending machine. 2,453,280, Nov. 9.

Stratford Development Corporation, assignee: *See*—
Putney, David H.

Strickler, John F., Jr., Williamsville, and S. K. Edelson, Niagara Falls, assignors to Bell Aircraft Corporation, Wheatfield, Niagara County, N. Y. Engine lubrication system. 2,453,602, Nov. 9.

Stringfield, Kenneth, assignee: *See*—
Renken, Harm L.

Suman, Frank R., Jr.: *See*—
Laying, Edwin T., and Suman, Jr.

Sumner, Columbus C., Elon College, N. C. Method and apparatus for stripping yarn packages. 2,453,603, Nov. 9.

Sunstein, David E.: *See*—
Tiley, John W., and Sunstein.

Sutter, Paul: *See*—
Kern, Walter, Sutter, Moergeli, and Holbro.

Swartzel, Karl D.: *See*—
Statham, Louis D., Baker, and Swartzel.

Sweeny, Charles P., Somerville, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Speed and frequency control apparatus for radio-frequency bonding systems. 2,453,680, Nov. 9.

Swings, Polydore F., Pasadena, assignor to Lane-Wells Company, Los Angeles, Calif. Plural grating spectrograph. 2,453,164, Nov. 9.

Swiss firm of Ciba, Limited, assignee: *See*—
Kearn, Walter, Sutter, Moergeli, and Holbro. . .

Switzer, John L., and J. C. Michalek, Niagara Falls, N. Y., assignors to Mathieson Chemical Corporation. Preserving caustic soda from contamination in metal containers. 2,453,471, Nov. 9.

Syndicate Glass, Inc., assignee: *See*—
Odin, Frank W.

Talon, Inc., assignee: *See*—
Firing, Osborne.

Tansley, Leslie R., Columbus, Ohio. Measuring valve mechanism. 2,453,553, Nov. 9.

Tedder, Joel H., Los Angeles, Calif., assignor to International Business Machines Corporation, New York, N. Y. Relay control system. 2,453,281, Nov. 9.

Temple, Harold F., Elmont, assignor to Victor Metal Products Corporation, Brooklyn, N. Y. Tube perforating machine. 2,453,681, Nov. 9.

Tenenbaum, Adele and M., Jamaica, N. Y. Making prosthetic articles. 2,453,604, Nov. 9.

Tenenbaum, Milton: *See*—
Tenenbaum, Adele and M.

Teter, John W., and W. J. Merwin, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Dehydration of saturated nitriles. 2,453,472, Nov. 9.

Thieman, Catherine H., Beaver Dam, Wis. Stove flue cover. 2,453,473, Nov. 9.

Thieme, Otto, East Orange, N. J., assignor to International Business Machines Corporation, New York, N. Y. Feeding mechanism for accounting machine carriage platens. 2,453,282, Nov. 9.

Thomas & Betts Co., The, assignee: *See*—
Bergan, Martin D.

Thomas, John, Milwaukee, Wis. Overhead door guiding and latching mechanism. 2,453,554, Nov. 9.

Thomas, Leon C., Greensboro, N. C. Indoor golf putting practice apparatus. 2,453,605, Nov. 9.

Thomas, Percival E., Worcester Park, assignor to Sterling Industries Limited, London, England. Self-sealing pipe coupling. 2,453,389, Nov. 9.

Thommen, Hans, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Gas blast circuit breaker. 2,453,555, Nov. 9.

Thornburgh, Ivan D., Leonia, N. J., assignor to American Can Company, New York, N. Y. Preparing tubing for transportation. 2,453,165, Nov. 9.

Thumann, Wesley W., Stuttgart, Ark. Battery terminal clamp. 2,453,474, Nov. 9.

Tiley, John W., assignor to Philco Corporation, Philadelphia, Pa. Microwave power measuring apparatus. 2,453,645, Nov. 9.

Tiley, John W., Philadelphia, and D. E. Sunstein, Elkins Park, Pa., assignors to Philco Corporation, Philadelphia, Pa. Microwave power measuring apparatus. 2,453,283, Nov. 9.

Timber Engineering Company, assignee: *See*—
Farber, Eduard.

Timken-Detroit Axle Company: *See*—
Buckendale, Lawrence R.

Tobias, Cornelius A., Berkeley, Calif., assignor to the United States of America as represented by the Secretary of the Navy. Resuscitation apparatus. 2,453,475, Nov. 9.

Tomlin, George M., Flixton, near Manchester, and H. Burrows, Manchester, England. Toy, display device, and the like. 2,453,646, Nov. 9.

Törnborg, Algot K. G. B., Nassjo, Sweden. Rotary pump or rotary compressor. 2,453,284, Nov. 9.

Towns, Joshua G., Grand Junction, Colo. Holder for rupture buttons and the like. 2,453,166, Nov. 9.

Toy, Arthur D. F., Chicago, Ill., assignor to Victor Chemical Works. Copolymers of dialkenyl arylphosphonates with vinyl acetate. 2,453,167, Nov. 9.

Toy, Arthur D. F., Chicago, Ill., assignor to Victor Chemical Works. Copolymers of alkenyl arylphosphonates with methyl methacrylate. 2,453,168, Nv. 9.

Trailmobile Company, The, assignee: *See*—
Black, James J.

Tremain, Henry E., and L. R. Bacon, assignors to Wyandotte Chemicals Corporation, Wyandotte, Mich. Composition for inhibiting foam. 2,453,351, Nov. 9.

Tremain, Henry E., and L. R. Bacon, assignors to Wyandotte Chemicals Corporation, Wyandotte, Mich. Composition for inhibiting foam. 2,453,352, Nov. 9.

Troeger, Henry: *See*—
Gregg, David, and Troeger.

Troidl, Robert A., Lake George, N. Y. Film spool guide ring. 2,453,476, Nov. 9.

Trumbull Electric Manufacturing Company, The, assignee: *See*—
Hammerly, Herman J.

Union Oil Company of California, assignee: *See*—
Byrns, Alva C.
Polly, Orville L.

Union Special Machine Company: *See*—
Christensen, Norman V.

United Aircraft Corporation, assignee: *See*—
Cooper, Kenneth C.
Kalitinsky, Andrew.
Meitzler, Donald E.
Soderberg, Carl R., and Clark.

United Shoe Machinery Corporation, assignee: *See*—
Duplessis, Rene E.
Elliott, Harry D.
Johnson, Charles E.

United States of America, The, assignee: *See*—
Whitehead, Richard H.

Universal Oil Products Company, assignee: *See*—
Bloch, Herman S.

Van Overbeek, Adrianus J. W. M., Eindhoven, Netherlands, assignor, by mesne assignments, to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. Electric discharge tube with deflection control. 2,453,647, Nov. 9.

Varian, Russell H., Garden City, N. Y., assignor to The Sperry Corporation. Radio ground clearance indicator. 2,453,169, Nov. 9.

Vars, Ethan W., Duncannon, assignor, by mesne assignments, to George Harold Bell & Associates, York, Pa. Adjustable drawbar and adjustable mounting therefor. 2,453,556, Nov. 9.

Victor Chemical Works, assignee: *See*—
Toy, Arthur D. F.

Victor Metal Products Corporation, assignee: *See*—
Temple, Harold F.

Vittum, Paul W.: *See*—
Glass, Dudley B., Vittum, and Weissberger.

Voet, Andries, assignor to J. M. Huber, Incorporated, New York, N. Y. Preparing a dispersion of carbon black. 2,453,557, Nov. 9.

Voet, Andries, assignor to J. M. Huber, Incorporated, New York, N. Y. Printing ink. 2,453,558, Nov. 9.

Vogt, Henry, Machine Co. Inc., assignee: *See*—
Kubaugh, Benjamin F.

Von Allmen, Samuel, and H. Eggenberger, assignors to Sandoz Limited, Basel, Switzerland. Dyestuffs of the anthraquinone series. 2,453,285, Nov. 9.
Von Clemm, Werner, Syosset, N. Y. Bottle container. 2,453,286, Nov. 9.
Von Reppert, Richard, Rochester, assignor to International Business Machines Corporation, New York, N. Y. Power operating mechanism for typewriting machines. 2,453,287, Nov. 9.
Wagner, Henry J., Jackson, Mo. Electrode holder. 2,453,648, Nov. 9.
Walden, Henry W., New York, N. Y. Counterbalanced pivoted closure. 2,453,288, Nov. 9.
Walters, Frank J.: *See*—
Nelson, Homer B., and Walters.
War, United States of America, as represented by the Secretary of, assignee: *See*—
Bohlman, Walter S., and Bruce.
Bowers, Jack L.
Brandt, Kristian H.
Kharasch, Morris S.
Miller, George A., Jr.
Ringer, Abraham.
Ward, Vincent S., and G. K. Hurlbut, assignors, by mesne assignments, to B M C Manufacturing Corporation, Binghamton, N. Y. Automobile trouble light. 2,453,606, Nov. 9.
Wardle, Meredith C., Buffalo, and D. J. Howard, Akron, N. Y., assignors to Curtiss-Wright Corporation. Center of gravity location indicator. 2,453,607, Nov. 9.
Warga, Robert V., assignee: *See*—
Carter, Ben.
Warner & Swasey Company, The: *See*—
Curtis, Myron S.
Warren, William V., assignor, by mesne assignments, to The Wyatt Manufacturing Company, Incorporated, Salina, Kans. Shovel loader attachment for tractors. 2,453,649, Nov. 9.
Waterman, Arthur C., Shreveport, La. Refuse incinerator with dumping grate. 2,453,289, Nov. 9.
Watson, Paul D., Arlington, Va., assignor to The United States of America as represented by the Secretary of Agriculture. Polylactylic acid resins and making them. 2,453,559, Nov. 9.
Waukesha Motor Company, assignee: *See*—
Melcher, Lee W.
Weed, Welger & Company, assignee: *See*—
Huerber, Ernest W.
Weiss, Shirley I., New York, N. Y. Broad band variable tuning coil. 2,453,477, Nov. 9.
Weissberger, Arnold: *See*—
Glass, Dudley B., Vittum, and Weissberger.
Werner, Clarence W., Hansen, Idaho. Stabilizing iron. 2,453,390, Nov. 9.
West, Herbert J., Riverside, Conn., assignor to American Cyanamid Company, New York, N. Y. Cellulose ether compositions. 2,453,608, Nov. 9.
Westberg, Arthur H., Baldwin, and C. S. Aldrich, Babylon, N. Y., assignors to Republic Aviation Corporation. Airfoil operating mechanism. 2,453,560, Nov. 9.
Western Union Telegraph Company, The: *See*—
Buckingham, William D., and Delbert.
Weston, Arthur W., Waukegan, assignor to Abbott Laboratories, North Chicago, Ill. Phenyl- and phenylalkylaminomethylenephenaceturates. 2,453,478, Nov. 9.
Wetzel, Roland M., Philadelphia, Pa. Racing game and puzzle. 2,453,290, Nov. 9.
Wheeler, Harold A., Grand Rapids, Mich., assignor to Bendix Aviation Corporation, Teterboro, N. J. Control device and system. 2,453,170, Nov. 9.
Wheeler, Harold A., Grand Rapids, Mich., assignor to Bendix Aviation Corporation, Teterboro, N. J. Control device. 2,453,171, Nov. 9.
Wheeler, Harold A., Grand Rapids, Mich., assignor to Bendix Aviation Corporation, Teterboro, N. J. Control device and system. 2,453,654, Nov. 9.
White, Blanche B.: *See*—
Seymour, George W., White, and Barabash.
Whitehead, Richard H., New Haven, Conn., assignor, by mesne assignments, to the United States of America. Time fuse. 2,453,479, Nov. 9.
Whitehead, Richard H., New Haven, Conn., assignor, by mesne assignments, to the United States of America. Bore safety device for time fuses. 2,453,682, Nov. 9.
Whitehead, Richard K., Atlanta, Ga. Separator shield. 2,453,353, Nov. 9.
Whitehouse, Irving P., South Euclid, assignor to Republic Steel Corporation, Cleveland, Ohio. Areaway wall. 2,453,609, Nov. 9.
Whittingham, David J., Watertown, N. Y., assignor to The New York Air Brake Company. Tubing connections. 2,453,391, Nov. 9.
Wilford, John B., Glasgow, Mont. Self-rotating kingpin thrust bearing. 2,453,291, Nov. 9.
Wilkie, Harry, Dayton, Ohio. Grid cap. 2,453,172, Nov. 9.
Willard, Jess, Minot, N. Dak. Bowling game board. 2,453,610, Nov. 9.
Williams, Irvin J., Seattle, Wash. One-hand fruit picking device. 2,453,392, Nov. 9.
Williamson, Hilding V., and R. H. Griesemer, assignors to Cardox Corporation, Chicago, Ill. Quickly detachable coupling. 2,453,480, Nov. 9.
Wilson, Abram B., Hollidays Cove, W. Va., assignor to National Steel Corporation. Anode for electrolytic coating. 2,453,481, Nov. 9.
Wilson, Richard W., assignee: *See*—
Wilson, Robert C.
Wilson, Robert C., assignor of one-fourth to R. W. Wilson, Chula Vista, Calif. Combined spoon and lid for containers. 2,453,393, Nov. 9.
Wintle, Thomas D. G.: *See*—
Hill, Walter E., and Wintle.
Wiseman, Park A.: *See*—
McBee, Earl T., and Wiseman.
Wittman, Emil R., Grand Rapids, Mich. Adjustable gunstock. 2,453,394, Nov. 9.
Wolff, Jack, Brooklyn, N. Y. Window air vane device. 2,453,561, Nov. 9.
Wolff, Otto E.: *See*—
Bachelder, Albert J., and Wolff.
Woolley, Edward L.: *See*—
Row, Stuart B., and Woolley.
Woolson, Charles H., Syracuse, N. Y. Universal drill jig. 2,453,482, Nov. 9.
Wright, Carleton H., U. S. Navy, G. A. Chadwick, and F. W. Burk, Washington, D. C. Remote control system. 2,453,173, Nov. 9.
Wright, Howard E., Jr., Silver Spring, Md. Sealing and potting composition consisting of tri (p-tertiary butyl phenyl) phosphate and coumarone-indene resin. 2,453,174, Nov. 9.
Wright, James G. E., Schenectady, N. Y., assignor to General Electric Company. Heat-curable elastic compositions of matter. 2,453,562, Nov. 9.
Wurlitzer, Rudolph, Company, The, assignee: *See*—
Hokanson, Otto A.
Wyandotte Chemicals Corporation, assignee: *See*—
Tremain, Henry E., and Bacon.
Wyatt Manufacturing Company, Incorporated, The, assignee: *See*—
Warren, William V.
Yingling, Frank B., Hamilton, Ohio. Electromechanical railroad locomotive. 2,453,483, Nov. 9.
Yonkers, Edward H., assignor to Joslyn Mfg. and Supply Co., Chicago, Ill. Fuse. 2,453,395, Nov. 9.
Yonkers, Edward H., assignor to Joslyn Mfg. and Supply Co., Chicago, Ill. Fuse. 2,453,396, Nov. 9.
Yonkers, Edward H., Glencoe, assignor to Joslyn Manufacturing and Supply Corporation, Chicago, Ill. Fuse link. 2,453,397, Nov. 9.
Yonkers, Edward H., assignor to Joslyn Mfg. and Supply Co., Chicago, Ill. Fuse. 2,453,688, Nov. 9.
Young, Charles J., Princeton, N. J., assignor to Radio Corporation of America. Electrolytic signal recording. 2,453,484, Nov. 9.
Youngson, Donald A., and R. E. Matthews, Devon, Conn., assignor to General Electric Company. Searchlight control system. 2,453,175, Nov. 9.
Zabel, William C. P., and R. C. Helfenbein, assignors to Plasmetl Corporation, Chicago, Ill. Culinary utensil. 2,453,354, Nov. 9.
Ziebolz, Herbert, assignor to Electronbeam, Ltd., Chicago, Ill. Regulator system. 2,453,563, Nov. 9.
Zimmer, Eric H., Wyckoff, N. J. Antiskid device. 2,453,611, Nov. 9.
Zimmer, John C.: *See*—
Morway, Arnold J., and Zimmer.
Zirin, Samuel, Brooklyn, N. Y., assignor to Marsam Specialties, Inc. Outdoor card game board. 2,453,292, Nov. 9.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF NOVEMBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Wash box. Olay M. Twelt. Re. 23,048, Nov. 9.

LIST OF DESIGN INVENTIONS

Airplane. W. A. Pulver and A. E. Flock. 151,713, Nov. 9.
Ash tray. C. T. Armus. 151,671–2, Nov. 9.
Bathing suit. R. M. Reid. 151,714, Nov. 9.
Blender, Powder. J. R. Clarke. 151,683, Nov. 9.
Bolster cover for pillows or similar article. G. L. Such. 151,721, Nov. 9.
Bootee. P. F. Eberle and L. E. Sans. 151,685, Nov. 9.
Brace. W. B. Ruger. 151,719, Nov. 9.
Brassiere. J. Selcow. 151,720, Nov. 9.
Brooch or similar article. M. Duvalet. 151,684, Nov. 9.
Brooch or similar article. A. Katz. 151,694, Nov. 9.
Case or similar article, Lipstick. W. H. Leavin. 151,697, Nov. 9.
Chain for a bracelet or similar article. M. Chernow. 151,682, Nov. 9.
Chair, Rocking. E. Bird. 151,675, Nov. 9.
Dispensing device for dog biscuits or the like. F. E. Welsh. 151,722, Nov. 9.
Display box, Watch and jewelry. S. Braun. 151,679, Nov. 9.
Display case, Self-service refrigerated. E. F. Brill. 151,681, Nov. 9.
Drawer pull. R. W. Gane. 151,689, Nov. 9.
Dress. M. Macpherson. 151,702, Nov. 9.
Earring or similar article. L. G. Arpin. 151,673–4, Nov. 9.
Font of type. M. Bloch. 151,677, Nov. 9.
Frame, Spectacle. L. Jacobson. 151,693, Nov. 9.
Frame, Spectacle. M. B. Levoy. 151,698, Nov. 9.
Handle for kitchen utensils or similar articles. W. C. Lueneburg. 151,700, Nov. 9.
Handle, Utensil. E. M. Oster. 151,704, Nov. 9.
Heater, Space. H. E. and C. J. Winkler. 151,726, Nov. 9.
Holder, Bobby pin and hairpin. L. W. Blouin. 151,678, Nov. 9.
Holder or similar article, Paper roll. F. Bletzinger, Sr. 151,676, Nov. 9.
Holder, Straw. H. E. Kelley, Jr. 151,695, Nov. 9.
Jacket. H. Goldberg. 151,690, Nov. 9.
Jewelry charm. C. and G. Kiashek. 151,696, Nov. 9.
Lamp and smoking stand, Combined. E. R. Fisk. 151,687, Nov. 9.
Miter box. H. J. Ziemann. 151,727, Nov. 9.
Necklace or similar article. A. Philippe. 151,706–12, Nov. 9.
Necktie or the like. W. F. Rothe. 151,716–18, Nov. 9.
Pruning saw. G. L. Whitman and C. D. Gunn. 151,725, Nov. 9.
Racquet press. C. B. Briggs. 151,680, Nov. 9.
Recording studio building or the like. M. Rettinger. 151,715, Nov. 9.
Service station. L. T. White. 151,724, Nov. 9.
Ski sandal. G. W. Lothrop. 151,699, Nov. 9.
Stapling machine or similar article. H. S. Heller. 151,692, Nov. 9.
Support, Combined syringe bag and tube. R. O. Ferguson. 151,686, Nov. 9.
Table or similar article. E. J. Lux. 151,701, Nov. 9.
Textile fabric. E. M. Patterson. 151,705, Nov. 9.
Toy, Airplane control. C. H. Foster. 151,688, Nov. 9.
Toy jack-in-the-box or similar article. C. R. White. 151,723, Nov. 9.
Tractor, Garden. Ed. B. Meripol. 151,703, Nov. 9.
Trap, Animal. A. C. Haggstrom. 151,691, Nov. 9.
Tube socket, Vacuum. C. J. Adams and H. Z. Benton. 151,670, Nov. 9.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF NOVEMBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Accelerometer with electric strain wires. L. D. Statham. 2,453,548, Nov. 9.
Acid treatment of anthraquinone-thiazole vat dyestuffs. J. F. Cullinan and L. D. Lytle. 2,453,410, Nov. 9.
Adhesive sheet, Pressure-sensitive. J. W. Pearson. 2,453,258, Nov. 9.
Air filter. J. F. Donat. 2,453,206, Nov. 9.
Airfoil operating mechanism. A. H. Westberg and C. S. Aldrich. 2,453,560, Nov. 9.
Alkali-free hydrogel catalyst, Making a substantially. J. W. Payne, T. P. Simpson, and J. I. Butzner. 2,453,585, Nov. 9.
Alkamine alkyl esters of pyrrole-3,4-dicarboxylic acids. J. P. Sickels and D. E. Sargent. 2,453,675, Nov. 9.
Alkamine esters of pyrrole substituted acrylic acids. T. F. Scholz. 2,453,674, Nov. 9.
Alkamine esters of pyrrole-3,4-dicarboxylic acids. D. E. Sargent. 2,453,671–3, Nov. 9.
Alkamine esters of pyrrole-3,4-dicarboxylic acids. J. P. Sickels. 2,453,676–7, Nov. 9.
Alloys and rotor forgings for gas turbines, Ferrous. A. O. Schaefer. 2,453,598, Nov. 9.
Amino-carboxylic-acids from lactams, Preparation of. T. Koch. 2,453,234, Nov. 9.
Amusement apparatus, Vehicular. H. J. Newman and E. F. Johnson. 2,453,380, Nov. 9.
Anchor and shield, Button staple. I. M. Janes. 2,453,227, Nov. 9.
Anchor, Ground support. J. B. Hyde. 2,453,226, Nov. 9.
Anode for electrolytic coating. A. B. Wilson. 2,453,481, Nov. 9.
Anthrimide carbazole vat dyestuffs. W. Kern, P. Sutter, E. Moergell, and T. Holbro. 2,453,232, Nov. 9.
Antiparaffin sucker rod. W. R. Crall. 2,453,199, Nov. 9.
Antiskid device. E. H. Zimmer. 2,453,611, Nov. 9.
Antiskid vehicle frame. M. C. Lubcke. 2,453,445, Nov. 9.
Apparatus for cooling bottled beverages. F. M. Lambert. 2,453,667, Nov. 9.
Apparatus for dispensing liquid fuel. A. H. Rosenthal. 2,453,595, Nov. 9.
Apparatus for drying foundry molds. C. A. Barnett and J. M. Beyrl. 2,453,400, Nov. 9.
Apparatus for edge-gluing strip elements. P. H. Bilhuber. 2,453,185, Nov. 9.
Apparatus for inspecting sheet material. T. P. Pajak. 2,453,338, Nov. 9.
Apparatus for making pattern mirrors and other coatings. W. L. Morgan. 2,453,582, Nov. 9.
Apparatus for making plastic masses. W. S. Bohlman and D. S. Bruce. 2,453,404, Nov. 9.
Apparatus for measuring wall thickness of propeller blades. D. J. Davis. 2,453,306, Nov. 9.
Apparatus for mixing drilling mud. J. I. Sloan. 2,453,465, Nov. 9.
Apparatus for separating entrained solids from gases. D. H. Putney. 2,453,593, Nov. 9.
Apparatus for separating starch from gluten. L. B. Edsall and A. K. Kilander. 2,453,310, Nov. 9.
Apparatus for the manufacture of cork-board by injection of a heated gas. C. R. Calleia. 2,453,568, Nov. 9.
Apron. N. B. Densmore. 2,453,202, Nov. 9.
Apron drive, Spreader. J. L. Marsh. 2,453,242, Nov. 9.
Arc discharge device, Concentrated. W. D. Buckingham and C. R. Deibert. 2,453,118, Nov. 9.
Areaway wall. I. P. Whitehouse. 2,453,609, Nov. 9.
Article supporting closure for cabinets. T. W. Rundell. 2,453,387, Nov. 9.
Ash tray. M. P. Omelina. 2,453,256, Nov. 9.
Attaching tear strip winding keys to receptacles. C. L. Emmons. 2,453,503, Nov. 9.
Attachment for lathes, Radius. A. M. Bell, Jr. 2,453,111, Nov. 9.
Attachment for standard tanks, Buoyant. A. J. McCutchen. 2,453,149, Nov. 9.
Automatic means for regulating electric steam generators. M. Eaton. 2,453,210, Nov. 9.
Automobile trouble light. V. S. Ward and G. K. Huribut. 2,453,606, Nov. 9.
Baby carriage and shopping cart, Combination. J. M. Leser and N. L. Severeign. 2,453,631, Nov. 9.
Barium lake pigment, Producing a. J. B. Callaway and D. B. Killian. 2,453,490, Nov. 9.
Bar type-high range gauge. L. D. Statham. 2,453,550, Nov. 9.
Barrel closing ring. B. Carter. 2,453,492, Nov. 9.
Basket, Furnace tray. H. F. Jackson. 2,453,511, Nov. 9.
Battery terminal clamp. W. W. Thumann. 2,453,474, Nov. 9.

Bearing: *See*—
Self-rotating kingpin thrust bearing.
Bearing mounting for drive sprockets of track type tractors. G. E. Burks. 2,453,360, Nov. 9.
Bee comb foundation. H. C. Dadant. 2,453,411, Nov. 9.
Belt, Cartridge. J. S. Reid. 2,453,540, Nov. 9.
Bicycle generator regulated by rotor torque variations. D. McCullough. 2,453,523, Nov. 9.
Binder, Loose-leaf. E. E. Harper. 2,453,507, Nov. 9.
Blade container. E. A. Locke, Jr. 2,453,238, Nov. 9.
Blade holder. M. S. Corbett. 2,453,198, Nov. 9.
Board: *See*—
Bowling game board.
Outdoor card game board.
Bobbin construction, Reinforced plastic. J. R. Moss. 2,453,247, Nov. 9.
Boring machine, Earth. R. H. Dobbs. 2,453,204, Nov. 9.
Bottle container. W. Von Clemm. 2,453,286, Nov. 9.
Bottle tap, Paper. J. P. Jones. 2,453,133, Nov. 9.
Bowling game board, J. Willard. 2,453,610, Nov. 9.
Box: *See*—
Journal box.
Bracket: *See*—
Rockable shelf bracket.
Brake: *See*—
Hand brake.
Brake for hand trucks, Tongue actuated. W. C. House. 2,453,575, Nov. 9.
Brake for wagons. T. I. Duffy. 2,453,363, Nov. 9.
Brassière. M. R. Bates. 2,453,296, Nov. 9.
Bubble ornamental device and method. A. Abramson. 2,453,178, Nov. 9.
Buffing machine. R. D. Harris. 2,453,316, Nov. 9.
Building construction. J. Slobodzian. 2,453,466, Nov. 9.
Building structure, Portable. S. R. Lambert. 2,453,326, Nov. 9.
Building units, Interlocking. R. L. Haden. 2,453,221, Nov. 9.
Building units, Making concrete. A. Henderson. 2,453,223, Nov. 9.
Buoyant electric cable. P. Dunsheath and W. C. Barry. 2,453,418–19–20, Nov. 9.
Bus bar and connecting link for use in electrical wiring systems. W. E. Hill and T. D. G. Wintle. 2,453,224, Nov. 9.
Cabinet having shelf-forming closures, Office. R. D. Hinton. 2,453,129, Nov. 9.
Cable: *See*—
Buoyant electric cable.
Cable clamp. R. A. Hackathorn. 2,453,432, Nov. 9.
Cable spooling device for well drilling rigs. T. H. Berry. 2,453,184, Nov. 9.
Cap: *See*—
Grid cap.
Carbohydrate-boric acid salts of amino aromatic bases. D. Curtis. 2,453,108, Nov. 9.
Carbon black. C. Kaufmann and R. H. Hall. 2,453,440, Nov. 9.
Carbonate salts of calcium and magnesium, Preparation of. W. McGeorge and F. H. Milner. 2,453,446, Nov. 9.
Carrier for knitting machines. M. Jauch. 2,453,513, Nov. 9.
Catalyst transfer system. C. S. Reed, A. H. Schutte, and V. O. Bowles. 2,453,458, Nov. 9.
Catalytic conversion of hydrocarbons. G. A. Mills. 2,453,152, Nov. 9.
Cellulose ester or ether plasticized with ethyl alpha-carbethoxyethoxyethyl carbonate. C. E. Rehberg. 2,453,264, Nov. 9.
Cellulose ether compositions. H. J. West. 2,453,608, Nov. 9.
Center of gravity location indicator. M. C. Wardle and D. J. Howard. 2,453,607, Nov. 9.
Centrifuge, Self-balancing. M. A. Giblin. 2,453,367, Nov. 9.
Chain: *See*—
Nonskid tire chain.
Chair for gunners, Adjustable. R. E. Duplessis. 2,453,208, Nov. 9.
Chemiluminescent composition of matter, Preparation of. H. T. Lacey and R. E. Brouillard. 2,453,578, Nov. 9.
Chuck. J. M. Peters. 2,453,262, Nov. 9.
Chuck, Automatic. E. Roy. 2,453,642, Nov. 9.
Chute, Coaling. J. E. O'Brien. 2,453,253, Nov. 9.
Cigarette holder and ash tray, Combined. D. J. Coffey. 2,453,304, Nov. 9.

Circuit: *See*—
Electrical control circuit.
Circuit breaker. E. S. Smith. 2,453,546, Nov. 9.
Circuit breaker, Gas blast. H. Thommen. 2,453,555, Nov. 9.
Circuit breaker, Nonfree-tripping overload. A. W. Krieger. 2,453,235, Nov. 9.
Clamp: *See*—
Battery terminal clamp.
Cable clamp.
Cue tip clamp.
Tow bar clamp.
Clamp. G. Bennett. 2,453,112, Nov. 9.
Cleaner: *See*—
Dip stick cleaner.
Closure, Counterbalanced pivoted. H. W. Walden. 2,453,288, Nov. 9.
Clutch and brake device. G. E. Moore. 2,453,581, Nov. 9.
Coating composition containing polyethylene, terpene resin, chlorinated diphenyl resin, and paraffin, Hot melt. W. C. Steinkraus. 2,453,644, Nov. 9.
Coder for code modulation transmission. A. C. Norwine. 2,453,454, Nov. 9.
Coin-controlled device. M. J. Auerbach. 2,453,398, Nov. 9.
Coin selecting device. O. A. Hokanson. 2,453,437, Nov. 9.
Collimator sight for torpedo ejectors, Reflector. W. B. Ensinger. 2,453,122, Nov. 9.
Color blindness chart for detecting anomalous vision, deuteranopes, protanopes, tritanopes and monochromats. R. B. Morris. 2,453,335, Nov. 9.
Communication cables, Manufacturing. C. S. Gordon. 2,453,313, Nov. 9.
Communication system, Code modulation. J. C. Schelleng. 2,453,461, Nov. 9.
Composition for inhibiting foam. H. E. Tremain and L. R. Bacon. 2,453,351–2, Nov. 9.
Compositions of matter, Heat-curable elastic. J. G. E. Wright. 2,453,562, Nov. 9.
Compressor. P. Kollsman. 2,453,373–5, Nov. 9.
Compressor, Centrifugal. K. D. McMahan and N. P. Bailey. 2,453,524, Nov. 9.
Compressor motor and making same. R. L. Benson. 2,453,297, Nov. 9.
Compressor or pump. H. W. Bell. 2,453,402, Nov. 9.
Condenser. H. M. Graham. 2,453,662, Nov. 9.
Condenser, Filter, and brush holder. K. H. Brandt. 2,453,114, Nov. 9.
Connection for enameled tanks. W. H. Martin. 2,453,331, Nov. 9.
Connector: *See*—
Tinsel wire connector.
Constant pressure pump. W. T. Rauch. 2,453,538, Nov. 9.
Construction of small boats. A. G. Sherman. 2,453,463, Nov. 9.
Contacting apparatus for catalytic processes. D. H. Putney. 2,453,592, Nov. 9.
Container: *See*—
Blade container.
Bottle container.
Controlled ventilated container.
Easy packing container.
Lipstick container.
Container. L. E. Richter. 2,453,159, Nov. 9.
Container and closure therefor. J. Hohl. 2,453,664, Nov. 9.
Control apparatus for internal-combustion engines. L. Lee, II. 2,453,328–9, Nov. 9.
Control apparatus for radio-frequency bonding systems, Speed and frequency. C. P. Sweeny. 2,453,680, Nov. 9.
Control apparatus, Refrigerating. A. B. Newton. 2,453,584, Nov. 9.
Control apparatus, Tuning. L. L. Royal. 2,453,268, Nov. 9.
Control device. J. L. De Barbieri and E. Kishner. 2,453,571, Nov. 9.
Control device. H. A. Wheeler. 2,453,171, Nov. 9.
Control device and system. H. A. Wheeler. 2,453,170, Nov. 9.
Control device and system. H. A. Wheeler. 2,453,654, Nov. 9.
Control for internal-combustion engines. F. C. Mock. 2,453,651, Nov. 9.
Control mechanism for radio receivers, Tuning. W. E. Newman. 2,453,252, Nov. 9.
Control system, Refrigeration. A. B. Hubbard. 2,453,439, Nov. 9.
Control system, Relay. J. H. Tedder. 2,453,281, Nov. 9.
Control system, Searchlight. D. A. Youngson and R. E. Matthews. 2,453,175, Nov. 9.
Controlled fractional distillation of petroleum. P. Docksey. 2,453,205, Nov. 9.
Controlled ventilated container. I. Hill. 2,453,574, Nov. 9.
Controlling apparatus, Electric. S. Steinitz. 2,453,470, Nov. 9.
Copolymer of isopropenyl acetate and vinyl chloride. R. L. Hasche and E. M. McMahon. 2,453,317, Nov. 9.
Copolymers of alkenyl arylphosphonates with methyl methacrylate. A. D. F. Toy. 2,453,168, Nov. 9.
Copolymers of dialkenyl arylphosphonates with vinyl acetate. A. D. F. Toy. 2,453,167, Nov. 9.
Counterbalance mechanism. E. E. Foster. 2,453,424, Nov. 9.
Coupler, Multiple-disk friction. R. G. Le Tourneau. 2,453,237, Nov. 9.
Couplers, Colored. D. B. Glass, P. W. Vittum, and A. Weissberger. 2,453,661, Nov. 9.
Coupling: *See*—
Flexible coupling.
Hydrokinetic coupling.
Pipe coupling.
Quickly detachable coupling.
Self-sealing pipe coupling.
Cover: *See*—
Stove flue cover.
Crutch. A. R. Lofstrand, Jr. 2,453,632, Nov. 9.
Cue tip clamp. B. R. Nybagen. 2,453,157, Nov. 9.
Cutter for tube-ice machines, Adjustable. B. F. Kubaugh. 2,453,140, Nov. 9.
Data storing device, Record controlled. H. P. Luhn. 2,453,239, Nov. 9.
Dehydration of saturated nitriles. J. W. Teter and W. J. Merwin. 2,453,472, Nov. 9.
Deleading gasoline. M. S. Kharasch. 2,453,138, Nov. 9.
Denture repair tool. A. B. Cline. 2,453,303, Nov. 9.
Device for releasing snagged fishing lures or baits. E. F. McDonald, Jr. 2,453,245, Nov. 9.
Device producing ornamental bubble effects and method. A. Abramson. 2,453,176–7, Nov. 9.
Dialkyl thioacetals of cholestanone and method. S. Bernstein and L. Dorfman. 2,453,566, Nov. 9.
Dip stick cleaner. K. Nielsen. 2,453,452, Nov. 9.
Discharge tube with deflection control, Electric. A. J. W. M. van Overbeek. 2,453,647, Nov. 9.
Disk plow attachment for tractors. P. H. Clay. 2,453,197, Nov. 9.
Disk record holder. E. J. and H. F. Baker. 2,453,399, Nov. 9.
Dispersion of carbon black, Preparing a. A. Voet. 2,453,557, Nov. 9.
Door guiding and latching mechanism, Overhead. J. Thomas. 2,453,554, Nov. 9.
Dough-preparing device for latticework pie crust. K. Schlegel. 2,453,599, Nov. 9.
Drawbar and adjustable mounting therefor, Adjustable. E. W. Vars. 2,453,556, Nov. 9.
Drier: *See*—
Grain drier.
Hair drier.
Drier head, Garment. P. C. Bowen. 2,453,488, Nov. 9.
Drill chuck, Chip breaking. J. W. Karweit. 2,453,136, Nov. 9.
Drill device, Chip breaking. J. W. Karweit. 2,453,135, Nov. 9.
Drill jig, Universal. C. H. Woolson. 2,453,482, Nov. 9.
Drilling appliance. O. Stalder. 2,453,349, Nov. 9.
Drilling metal and the like. J. W. Karweit. 2,453,137, Nov. 9.
Drive for track-laying vehicles. H. V. Dwight. 2,453,209, Nov. 9.
Drive mechanism. J. L. Perkins. 2,453,586, Nov. 9.
Dyestuffs of the anthraquinone series. S. von Allmen and H. Eggenberger. 2,453,285, Nov. 9.
Dynamoelectric machine. A. C. Hugin. 2,453,509, Nov. 9.
Dynamoelectric machine and securing device. F. H. Fleischer. 2,453,504, Nov. 9.
Dynamoelectric machine with closed air circulating system. L. W. Melcher. 2,453,449, Nov. 9.
Ear decoration. G. M. Axtell. 2,453,485, Nov. 9.
Easel attachment for ladders, Painter's. J. L. Arnold. 2,453,355, Nov. 9.
Easel for colored photographic printing. L. V. Grover. 2,453,431, Nov. 9.
Easy packing container. J. R. Belsinger. 2,453,614, Nov. 9.
Educational device. W. K. Robinson. 2,453,265, Nov. 9.
Electric motor. A. Bertea. 2,453,358–9, Nov. 9.
Electric strain gauge. L. D. Statham. 2,453,549, Nov. 9.
Electric strain gauge. L. D. Statham, C. J. Baker, and K. D. Swartzel. 2,453,601, Nov. 9.
Electric switch. G. C. Crowley. 2,453,498, Nov. 9.
Electrical control circuit. P. Glass. 2,453,624, Nov. 9.
Electrical switch. J. A. Kavanagh. 2,453,231, Nov. 9.
Electrode holder. H. J. Wagner. 2,453,648, Nov. 9.
Electrolytic method for the production of porous, catalytic metal. M. M. Marisic and T. F. Rutledge. 2,453,668, Nov. 9.
Electromagnet. O. I. Price. 2,453,158, Nov. 9.
Electron diffraction system and method. N. R. Davidson. 2,453,412, Nov. 9.
Engine control. H. A. Alexanderson. 2,453,650, Nov. 9.
Engine control for free-piston units. A. Kalitinsky. 2,453,516, Nov. 9.
Engine starter and generator means. S. Gilbert. 2,453,215, Nov. 9.
Engine starting gearing. J. E. Buxton. 2,453,657, Nov. 9.
Esters of cellulose, Preparation of mixed saturated-unsaturated. G. W. Seymour, B. B. White, and E. Barabash. 2,453,275, Nov. 9.
Esters of perfluoroadipic acid. E. T. McBee and P. A. Wiseman. 2,453,147, Nov. 9.
Ethyl cellulose composition. H. G. Figdor. 2,453,214, Nov. 9.
Expander for loose-leaf note books. W. B. Roberts. 2,453,459, Nov. 9.
Extracting and purifying bitumen. V. R. Logan. 2,453,633, Nov. 9.
Extrusion apparatus. L. C. Frazier. 2,453,312, Nov. 9.
Eyepiece mounting and guard means therefor. Rotatable microscope. H. N. Ott. 2,453,257, Nov. 9.

Fabric and articles made therefrom, Ornamental. S. La Fair. 2,453,441, Nov. 9.
Feeding mechanism, Can end. J. Simpson. 2,453,545, Nov. 9.
Feeding mechanism for accounting machine carriage platens. O. Thieme. 2,453,282, Nov. 9.
Field intensity meter. A. Ringer. 2,453,160, Nov. 9.
Film spool guide ring. R. A. Troidl. 2,453,476, Nov. 9.
Filter: *See*—
Air filter. Sanitary filter.
Filter for gaseous mediums. C. G. McKeown. 2,453,447, Nov. 9.
Filtering apparatus. S. B. Row and E. L. Woolley. 2,453,345, Nov. 9.
Fin structure for internal-combustion engines, Cooling. W. B. Bronander. 2,453,567, Nov. 9.
Finger ring with key. H. H. Boscowitz. 2,453,190, Nov. 9.
Fish stringer retainer. K. L. Orton. 2,453,381, Nov. 9.
Fitting for automobile radiators. F. E. Brady, Jr. 2,453,406, Nov. 9.
Fitting for pipe or hose connections. E. F. Sarver. 2,453,597, Nov. 9.
Flash distillation of acetophenone from benzoic acid. W. S. Emerson and V. E. Lucas. 2,453,423, Nov. 9.
Flexible coupling. G. Rathman. 2,453,383, Nov. 9.
Flight training apparatus. B. Hertz. 2,453,436, Nov. 9.
Floating dock and wharf. H. B. Nelson and F. J. Walters. 2,453,155, Nov. 9.
Fluid control system. T. B. Chace. 2,453,409, Nov. 9.
Fluid distribution system. J. M. Dom. 2,453,416, Nov. 9.
Fluorenone dielectric composition. F. M. Clark. 2,453,494, Nov. 9.
Flying fuselage. I. Jerome. 2,453,514, Nov. 9.
Folding camera support. D. G. Lewis. 2,453,442, Nov. 9.
Food preserving apparatus. H. L. Moore. 2,453,530, Nov. 9.
Forming compressed wood structures. A. J. Stamm, R. M. Seborg, and M. A. Millett. 2,453,679, Nov. 9.
Frame: *See*—
Antiskid vehicle frame.
Freezing high liquid content fruits and vegetables. A. F. Hoffman. 2,453,130, Nov. 9.
Frequency modulating and harmonic producer apparatus. W. P. Mason. 2,453,243, Nov. 9.
Frequency modulation system. L. E. Norton. 2,453,453, Nov. 9.
Friction clutch operating mechanism. R. S. Root. 2,453,344, Nov. 9.
Friction elements and bond therefor, Making. W. A. Blume and R. E. Spokes. 2,453,188, Nov. 9.
Fruit juice concentrates, Preparing full-flavored. L. G. MacDowell, E. L. Moore, and C. D. Atkins. 2,453,109, Nov. 9.
Fruit picking device, One-hand. I. J. Williams. 2,453,392, Nov. 9.
Fuel control system for Diesel engines. J. H. Clark. 2,453,196, Nov. 9.
Fuse. E. H. Yonkers. 2,453,395–6, Nov. 9.
Fuse. E. H. Yonkers. 2,453,688, Nov. 9.
Fuse link. E. H. Yonkers. 2,453,397, Nov. 9.
Gas porting device for shotguns. R. M. Cutts. 2,453,121, Nov. 9.
Gauge: *See*—
Bar type-high range gauge. Electric strain gauge.
Gauge dynamometer, Ring type resistance strain. L. D. Statham. 2,453,551, Nov. 9.
Gelatin or glue from hides and other collagen or ossein-containing material, Production of. J. Kenyon and V. Silberstein. 2,453,630, Nov. 9.
Generator control, Electric steam. M. Eaton. 2,453,211, Nov. 9.
Glass tubing joint. H. A. Meneses. 2,453,669, Nov. 9.
Glycidyl ethers. K. E. Marple. 2,453,634, Nov. 9.
Golf putting practice apparatus, Indoor. L. C. Thomas. 2,453,605, Nov. 9.
Grain drier. R. J., Sr., and H. Staples. 2,453,278, Nov. 9.
Grain trimming device. A. L. Carlia. 2,453,408, Nov. 9.
Grease interceptor. S. J. Grum. 2,453,219, Nov. 9.
Grease, Lubricating. A. J. Morway and J. C. Zimmer. 2,453,153, Nov. 9.
Grid cap. H. Wilkie. 2,453,172, Nov. 9.
Grill, Hamburger. C. C. Rone. 2,453,385, Nov. 9.
Grinder machine. E. F. Hager. 2,453,573, Nov. 9.
Grinding machine, Cylindrical. H. A. Silven. 2,453,678, Nov. 9.
Grip and holder, Electrode. I. M. Matson. 2,453,244, Nov. 9.
Guard, Noninterlocking bumper. H. R. Conner. 2,453,362, Nov. 9.
Guard, Sanitary cow. J. L. Cleveland. 2,453,302, Nov. 9.
Gunstock, Adjustable. E. R. Wittman. 2,453,394, Nov. 9.
Hair drier. R. R. Austin. 2,453,179, Nov. 9.
Hand beading tool. E. A. Forcier. 2,453,126, Nov. 9.
Hand brake. R. J. Olander. 2,453,255, Nov. 9.
Hanger: *See*—
Picture hanger.
Hatching device. G. Baer. 2,453,356, Nov. 9.
Head for sanding machines, Rotary. J. C. Hammontree. 2,453,222, Nov. 9.
Heat dissipation for electronic tube apparatus. E. Hansen and G. O. Davis. 2,453,433, Nov. 9.
Heat exchanger. M. H. McTurk. 2,453,448, Nov. 9.
Heating and ventilating apparatus. H. A. Pietsch. 2,453,382, Nov. 9.
Heating apparatus, Hot food table. B. J. Freed. 2,453,425, Nov. 9.
Hernia truss. C. R. Carpenter. 2,453,195, Nov. 9.
High-frequency heating. E. Mittlemann. 2,453,529, Nov. 9.
High-frequency variable inductance. J. L. Bowers. 2,453,113, Nov. 9.
Hoist, Boat. O. F. Hook. 2,453,628, Nov. 9.
Holder: *See*—
Blade holder. Lamp shade holder.
Disk record holder. Steel tape holder.
Electrode holder. Welding electrode holder.
Holder for artificial teeth. J. R. King. 2,453,518, Nov. 9.
Holder for rupture buttons and the like. J. G. Towns. 2,453,166, Nov. 9.
Holder for whetstones. W. D. Dunn. 2,453,207, Nov. 9.
Holding fixture for coating optical elements. W. Lange. 2,453,141, Nov. 9.
Honda. H. V. Cross. 2,453,497, Nov. 9.
Hook. T. G. Persson. 2,453,670, Nov. 9.
Horizontal liquid current separator. J. M. Aurilio and J. H. Schecter. 2,453,293, Nov. 9.
Hot-water treatment of vinyl resin light-polarizing sheet. F. J. Binda. 2,453,186, Nov. 9.
Hub adapter, Emergency. F. B. Martin, Jr. 2,453,635, Nov. 9.
Hydraulic telescoping lifting jack. R. F. E. Stegeman. 2,453,350, Nov. 9.
Hydrocarbon composition, Halogenated. F. M. Clark and E. L. Raab. 2,453,493, Nov. 9.
Hydrocarbon conversion. E. T. Layng and F. T. Suman, Jr. 2,453,327, Nov. 9.
Hydrokinetic coupling. F. Cloete. 2,453,684, Nov. 9.
Ice container for refrigerator cars. E. R. Battley and G. E. McCoy. 2,453,295, Nov. 9.
Ignition system for miniature two-cycle gas engines, Low-tension. M. P. McKay. 2,453,636, Nov. 9.
Illuminated compact. O. W. Chinn. 2,453,621, Nov. 9.
Image forming optical lens system athermalized for focal point. D. S. Grey. 2,453,218, Nov. 9.
Indexing mechanism. H. R. Soden. 2,453,600, Nov. 9.
Indicator: *See*—
Center of gravity location. Radio ground clearance indicator.
Indigoid vat dyestuff. K. Hoelzle and E. Kambli. 2,453,225, Nov. 9.
Infolding method and machine. A. G. Gilbert and W. H. Rogers, Jr. 2,453,623, Nov. 9.
Instrument for measuring water flow in wells. R. G. Piety. 2,453,456, Nov. 9.
Internal-combustion engine with double-acting crosshead scavenge pump. O. Petersen. 2,453,639, Nov. 9.
Iron: *See*—
Stabilizing iron.

Ureylenethiophane carboxylic acids and esters and methods of preparing same. B. R. Baker. 2,453,564, Nov. 9.
Utensil, Culinary. W. C. P. Zabel and R. C. Helfenbein. 2,453,354, Nov. 9.
V-belt drive pulley. A. F. Lusk. 2,453,580, Nov. 9.
Vacuum breaker. C. R. Flint. 2,453,125, Nov. 9.
Vacuum treatment of milk powder. H. Shipstead. 2,453,277, Nov. 9.
Valve: *See*—
  Pressure controlled self-closing valve.
Valve actuation for oscillating cylinder expansible chamber motors. A. N. Pigg. 2,453,640, Nov. 9.
Valve cooling means for internal-combustion engines. A. F. W. Helmbold. 2,453,508, Nov. 9.
Valve structure. J. H. De Frees. 2,453,413, Nov. 9.
Vane type hydraulic motor. J. K. Douglas. 2,453,309, Nov. 9.
Vaporizer. C. Persak. 2,453,455, Nov. 9.
Vehicle construction. A. R. Cunningham. 2,453,499–500. Nov. 9.
Vehicle lighting system. H. N. Dimick. 2,453,415, Nov. 9.
Vehicle suspension. L. R. Buckendale. 2,453,116–17, Nov. 9.
Vehicle undercarriage, Steerable. J. Fedevich. 2,453,311, Nov. 9.
Vehicle wheel. E. R. Jacobi. 2,453,512, Nov. 9.
Vending machine, Coin controlled. W. M. Stewart. 2,453,280, Nov. 9.
Vibrator power supply. R. J. Aust. 2,453,612, Nov. 9.
Vinyl carboxylate polymerization using a thiourea stopper. H. W. Bryant. 2,453,655, Nov. 9.
Voltage regulation. J. A. Potter. 2,453,263, Nov. 9.
Voltage regulator system. F. L. Moseley. 2,453,451, Nov. 9.
Washing machine. C. D. Cathey and J. E. Miller. 2,453,620, Nov. 9.
Washing machine, Produce. L. H., L. H., Jr., and J. D. Platt. 2,453,457, Nov. 9.
Watch bezel. L. Berstell. 2,453,616, Nov. 9.
Wave filter for pneumatic hand tools, Acoustical. G. V. A. Malmros. 2,453,240, Nov. 9.
Welding apparatus, Electric. W. S. Horth. 2,453,438, Nov. 9.
Welding electrode holder. E. W. Huebner. 2,453,320, Nov. 9.
Welding line reel switch. J. D. Burns. 2,453,407, Nov. 9.
Wheel: *See*—
  Vehicle wheel.
Wheel traction device. S. Freed. 2,453,426, Nov. 9.
Windbreaker for parked aircraft. C. E. Bogardus. 2,453,403, Nov. 9.
Windor air vane device. J. Wolff. 2,453,561, Nov. 9.
Windrower for balers, Automatic. H. L. Renken. 2,453,384, Nov. 9.
Wire stitching feed. J. N. Pagliarul. 2,453,337, Nov. 9.
Wood pipe, Producing. L. T. Mart. 2,453,522, Nov. 9.
Wringer and wash tubs unit. D. J. Porreca. 2,453,340, Nov. 9.
X-ray apparatus and procedure. W. A. Shurcliff. 2,453,163, Nov. 9.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 9, 1948

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

2— 42: 2,453,296
51: 2,453,202
6— 10: 2,453,411
8—149.1: 2,453,332
151.1: 2,453,366

NOTICES

Notice of Tentative Recordation of Trade Name

[T. D. 52068]

Tentative recordation of trade name under section 42, Trade-Mark Act of July 5, 1946, and section 11.16, Customs Regulations of 1943

TREASURY DEPARTMENT

OFFICE OF THE COMMISSIONER OF CUSTOMS

Washington, D. C., Oct. 18, 1948

To Collectors of Customs and Others Concerned:

An application has been filed in the Treasury Department for the recordation of the following-described trade name under the provisions of section 42, Trade-Mark Act of July 5, 1946, and section 11.16, Customs Regulations of 1943:

"STERLING POLISH COMPANY," owned by Sterling Polish Company, Ltd., a corporation of Denmark, Stolpegaardavej 113, Copenhagen, Denmark, which is used in connection with the manufacture and sale of cleansing material and polish for precious metal, the merchandise being manufactured in Copenhagen, Denmark.

The recordation of the foregoing trade name shall become final at the expiration of 30 days after November 2, 1948. Any person who desires to file an opposition to the recordation of this trade name shall file it with the Commissioner of Customs prior to the expiration of such 30-day period.

Until the expiration of the above-mentioned 30-day period any articles of foreign manufacture bearing names or marks which copy or simulate the above-mentioned trade name shall be detained, but not seized, and thereafter shall receive the treatment provided for in section 11.17, Customs Regulations of 1943, unless notice of the cancellation of the recordation is sooner received.

(Signed) FRANK DOW,
Acting Commissioner of Customs.

Adjudicated Patents

(D. C. Calif.) Flosdorf, Westin, and Stokes patent. No. 2,345,548, for biological apparatus container and method, claims 4 and 5 *Held* valid and infringed. *Lyophile-Cryochem Corp.* v. *Cutter Laboratories*, 78 F. Supp. 905; 79 USPQ 1.

(D. C. Calif.) Barr patent, No. 2,353,986, for preservation, *Held* invalid. *Id.*

(D. C. Calif.) Reichel, Reissue Patent No. 20,969, for lyophilic biologically active substances and process of producing the same, claims 6 and 11 to 13 *Held* valid and infringed. *Id.*

Disclaimers

2,406,494.—*Donald K. Ferris*, Dayton, Ohio. DOMESTIC APPLIANCE. Patent dated Aug. 27, 1946. Disclaimer filed Sept. 29, 1948, by the inventor; the assignee, *General Motors Corporation*, consenting and affirming.

Hereby enters this disclaimer to claim 4 of said patent.

2,410,536.—*Anton Vonnegut*, Indianapolis, Ind. EXPANSIBLE WHEEL. Patent dated Nov. 5, 1946. Disclaimer filed Oct. 11, 1948, by the assignee, *Vonnegut Moulder Corporation.*

Hereby enters this disclaimer to that part of claim 2 in said specification which is in the following words, to wit:

"A series of truncated rim forming sections" other than wherein said rim forming sections are wedge-shaped with their major defining faces extending at an angle to each other, and

"Means for slidably supporting said sections upon said mounting" other than wherein said sections slide upon said mounting, and said means is of a rigid character and not flexible or yielding.

2,272,965.—*John C. Crowley*, Cleveland Heights, Ohio. VULCANIZER CLAMP. Patent dated Feb. 10, 1942. Disclaimer filed Oct. 16, 1948, by the assignee, *The Dill Manufacturing Company.*

Hereby enters this disclaimer to claim 1 of said patent.

Cancellation Notices

Refrigeration Corporation of Maryland, its assigns or legal representatives, take notice:

A petition for cancellation having been filed in this Office by Refrigeration Engineering, Inc., 7250 E. Slauson Ave., Los Angeles, Calif., to effect the cancellation of trade-mark registration of Refrigeration Corporation of Maryland, Garrison Blvd. at Western Maryland R. R., Baltimore, Md., No. 283,095, dated July 14, 1931, and the notice of such proceeding sent by registered mail to the said Refrigeration Corporation of Maryland at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Refrigeration Corporation of Maryland, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order, the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JOE E. DANIELS,
Oct. 7, 1948. *Assistant Commissioner of Patents.*

Robert H. Sommers, his assigns or legal representatives, take notice:

A petition for cancellation having been filed in this Office by Nopco Chemical Company, First and Essex Sts., Harrison, N. J., to effect the cancellation of trade-mark registration of Robert H. Sommers, 600 Diversey Blvd., Rienzi Hotel, Chicago, Ill., No. 262,738, dated October 22, 1929, and the notice of such proceeding sent by registered mail to the said Robert H. Sommers at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Robert H. Sommers, his assigns or legal representatives shall enter an appearance therein within thirty days from the first publication of this order, the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JOE E. DANIELS,
Oct. 7, 1948. *Assistant Commissioner of Patents.*

Vol. 616 • No. 2 Tuesday, November 9, 1948 Price $16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $19.50; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 25 cents each; copies of TRADE-MARKS and DESIGNS at 10 cents each. Address orders to the Commissioner of Patents, Washington 25, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or TRADE-MARKS will be sent without cost on request to the Commissioner of Patents, Washington 25, D. C.

REGISTER OF PATENTS AVAILABLE FOR LICENSING OR SALE

(The "Groups" appearing after the patent abstracts are based on the Standard Industrial Classification Manual, Vol. I, Manufacturing Industries, Executive Office of the President, Bureau of the Budget)

E. I. du Pont de Nemours and Company has placed more than 4,000 of its patents on the Register of Patents as available for license on reasonable terms. The index to these patents was published in the Official Gazette, November 2, 1948. Abstracts of the patents are being published in the Official Gazette beginning November 9, 1948. The following patents (Reg. Nos. 11,191 through 11,416) are in Schedule 1, Group 28.

Detailed information concerning specific abstracts should be addressed to Patent Division, E. I. du Pont de Nemours and Company, Wilmington 98, Del.

SCHEDULE 1

Patents Relating to Ammonia Synthesis, Apparatus for High Pressure Exothermic Reactions, Ammonia Cracking, Catalysts

Pat. 1,893,492. Process and Apparatus for Catalytic Gaseous Reactions. Jan. 10, 1933. Initiating a catalytic exothermic gaseous reaction by means of a priming catalyst adapted to catalyze an exothermic reaction of the gases at a relatively low temperature.

Pat. 1,909,442. Process for Catalytic Synthesis. May 16, 1933. Successively contacting a mixture of gaseous reactants with hot catalyst, adding make-up gas to the hot gases, contacting the resultant gaseous mixture with a purifier material, removing reaction products from the gases and contacting the latter with a catalyst for the desired gaseous reaction.

Pat. 1,915,120. Apparatus for Decomposing Ammonia. June 20, 1933. Apparatus for cracking ammonia comprising a tubular casing and a plurality of concentric tubes fixed thereto to form annular chambers containing ammonia cracking catalysts and surrounding an inner electrically heated chamber.

Pat. 1,962,301. Process for Carrying Out Exothermic Catalytic Chemical Reactions. June 12, 1934. Process for effecting catalytic gaseous reactions by passing a stream of gases around and in heat exchange relation to a catalyst, and thereafter passing separate portions of the said stream independently into contact with the catalyst while controlling the reaction by regulating the relative size of the said portions of the gaseous stream.

Pat. 1,988,781. Process for Preparing a Mixture of Nitrogen and Hydrogen. Jan. 22, 1935. Cracking ammonia to nitrogen and hydrogen while utilizing the heat evolved to vaporize subsequent portions of liquid anhydrous ammonia.

Pat. 2,017,428. Protection of Metal Surfaces. Oct. 15, 1935. Protecting metallic surfaces subject to attack by hot gaseous ammonia by covering the said surfaces with an ammonia decomposing catalyst.

Pat. 1,912,877. Gas Purification. June 6, 1933. Removing carbon dioxide from a gaseous mixture containing the same by contacting the mixture at a temperature of about 100° to 310° C. with manganese oxide.

Pat. 1,923,656. Heat Recovery System. Aug. 22, 1933. Recovery of heat from gases containing water vapors by compressing the gas in two stages, the first stage prior to humidification and the second stage between humidification and dehumidification.

Pat. 1,938,202. Hydrogen Production. Dec. 5, 1933. Subjecting a mixture of steam and methane to the combined action of a methane conversion catalyst and lime at a temperature below about 550° C.

Pat. 1,959,151. Method of Effecting Chemical Reactions at Elevated Temperatures. May 15, 1934. Effecting reaction between steam and a hydrocarbon by supplying heat to the mixture by continuously burning fuel gas in heat exchange relation to, but out of direct contact with the steam and hydrocarbon, and thereafter removing residual heat from the combustion products by heat exchange with water, thereby generating steam and using the said steam in the steam-hydrocarbon reaction.

Pat. 1,959,189. Process for the Preparation of Catalysts. May 15, 1934. Preparation of hydrogen by reacting a hydrocarbon with steam in the presence of a nickel catalyst which has been prepared from a precipitated nickel salt.

Pat. 1,959,313. Process for the Preparation of Catalysts. May 15, 1934. Preparation of catalysts for the reaction between steam and carbon monoxide to produce hydrogen by precipitating compounds of the metals from solution, washing the precipitate, dissolving the washed precipitate, reprecipitating the compounds, washing the resulting precipitate, and thereafter preparing a catalyst in the usual manner.

Pat. 1,960,886. Process for the Preparation of Hydrogen. May 29, 1934. Manufacture of hydrogen by subjecting methane and steam together with the vapors resulting from the methane conversion reaction at a high velocity successively at a temperature of 550° for methane conversion, thence to a carbon monoxide conversion stage, and finally to a carbon dioxide adsorption stage, whereby the methane conversion reaction is substantially continuously displaced.

Pat. 1,960,912. Process for the Preparation of Hydrogen. May 29, 1934. The process of preparing hydrogen from a hydrocarbon and steam which comprises increasing the temperature of the gases after they have undergone partial conversion by adding oxygen thereto and supplying heat to the gases undergoing conversion by heat exchange thereof with the thus heated gases.

Pat. 1,968,063. Process for the Preparation of Hydrogen. July 31, 1934. Producing a methane-steam conversion catalyst by reducing a metal compound in the presence of a reducing gas under a pressure greater than atmospheric.

Pat. 1,984,463. Separation of Gaseous Mixture. Dec. 18, 1934. Separating hydrogen from coal gas by passing coal gas in heat exchange relation with cold, liquefied constituents thereof other than hydrogen, allowing the cooled gas to expand and to thus produce work, and thereafter passing the expanded gas into contact with liquid nitrogen under pressure.

Pat. 1,988,759. Heat Recovery System. Jan. 22, 1935. In a carbon monoxide-steam conversion process employing humidification, dehumidification and elevated pressure, the step which comprises circulating through the humidification and dehumidification stages about 800 to 1900 pounds of water per 1,000 cubic feet of dry gas leaving the converter.

Pat. 2,051,363. Process for the Preparation of Hydrogen. Aug. 18, 1936. Preparation of hydrogen by subjecting a carbon gas in the presence of an oxygen-containing gas to combustion, the gases prior to combustion serving as insulators for the combustion chamber, the oxygen containing gas prior to combustion being in proximity to and substantially surrounding the combustion reaction and the hydrocarbon containing gas substantially surrounding both the combustion reaction and the oxygen containing gas.

Pat. 2,064,867. Process of Producing Hydrogen. Dec. 22, 1936. Producing hydrogen by reaction between steam and a hydrocarbon in the presence of a catalyst of the iron group, said catalyst having been primarily reduced by a gaseous mixture of hydrogen and carbon monoxide obtained by catalytic decomposition of methanol.

Pat. 2,075,976. Prevention of Corrosion. Apr. 6, 1937. Removing carbon dioxide, sulfur compounds and other impurities from gaseous mixtures by scrubbing with water containing hydrolyzed casein as an inhibitor for reducing corrosion of ferrous metal parts.

Pat. 2,119,565. Process of Producing Hydrogen. June 7, 1938. Manufacture of hydrogen by passing steam and a hydrocarbon at a temperature below 700° C. over a catalyst combined with a promoter therefor.

Pat. 2,119,566. Process of Producing Hydrogen. June 7, 1938. Manufacture of hydrogen by passing steam and a hydrocarbon over a catalyst containing nickel and an oxide of boron or yttrium at a temperature below 700° C.

Patents Relating to Alcohol Synthesis

Pat. 1,908,484. Process for the Preparation of Catalysts. May 9, 1933. Preparing a methanol catalyst by mixing a solution of hexavalent chromium compound with a soluble hydroxide and a salt of a heavy metal whose hydroxide is oxidizable by the hexavalent chromium.

Pat. 1,939,708. Catalysts for the Production of Methanol and Other Carbon Compounds. Dec. 19, 1933. A fused mixture of copper oxide, manganese oxide and an oxide of one of the elements of the group magnesium, aluminum and silicon, as a methanol catalyst.

Pat. 1,942,021. Apparatus for Carrying Out Exothermic Chemical Reactions. Jan. 2, 1934. An apparatus for effecting catalytic gaseous reactions comprising a catalyst container having the exterior wall helically grooved, said container being removably fitted within a shell so as to form a helical gas passage communicating at one end of the catalyst container with a gas inlet and at the other end with the interior of the catalyst chamber.

Pat. 1,979,303. Processing Alcohols. Nov. 6, 1934. Removal of color from HTP alcohols by means of an alkali metal as a decolorizing agent.

Pat. 1,984,884. Process for Producing Oxygenated Organic Compounds. Dec. 18, 1934. Hydrogenation of oxides of carbon in a 3-component system, catalyst being difficultly reducible acidic and basic metal oxides at least partly chemically combined.

Pat. 2,051,774. Conversion Process and Apparatus for Catalytic Chemical Reactions. Aug. 18, 1936. A converter comprising a shell containing heating and reaction chambers, a structural member within the shell removably mountable therefrom, an extended wall providing one wall of the heating and reaction chambers within the converter positioned on the structural member, the wall enclosing a space which permits interconnection by passages of the heating and reaction chambers in substantially all possible ways without interfering with the positions of the heating and reaction chambers.

Pat. 2,061,470. Production of Methanol and Other Carbon Compounds and Catalytic Agents for Use Therein. Nov. 17, 1936. Methanol catalyst comprising the reaction product of a fused mixture containing 1 to 5% of an oxide of an element of the group consisting of chromium, vanadium, zirconium, aluminum, magnesium, titanium, thorium, silicon and cerium and from 97 to 95% of copper oxide, and manganese oxide.

Pat. 2,076,607. Process for Color Removal. Apr. 13, 1937. Removal of color and aldehyde from the substantially alcohol-free ketone-aldehyde-hydrocarbon containing mixture boiling at about 75° to 230° C. obtained by hydrogenation of oxides of carbon by treating the mixture with metallic lithium.

Patents Relating to Fertilizers

Pat. 1,909,606. Mineral Conversion. May 16, 1933. Reacting polyhalite with ammonia, carbon dioxide and water to produce potassium and ammonium sulfates and calcium and magnesium carbonates.

Pat. 1,948,454. Fertilizer Manufacture. Feb. 20, 1934. Producing a fertilizer by treating a superphosphate with anhydrous ammonia to the extent of substantially 4% nitrogen incorporation and thereafter treating the mixture with aqua ammonia.

Pat. 2,102,830. Fertilizer Manufacture. Dec. 21, 1937. Liquid nitrifying agent containing formamide, ammonia, urea, and a relatively small quantity of water.

Pat. 2,102,831. Fertilizer Manufacture. Dec. 21, 1937. Nitrifying liquid containing formamide, ammonia, a relatively small quantity of water soluble salt from the group consisting of alkali metal, alkaline earth metal and ammonium salts.

Pat. 2,237,826. Fertilizer Composition. Apr. 8, 1941. A fertilizer nitrifying agent comprising sulfamic acid or its salts, ammonia and a relatively small quantity of water.

Pat. 2,238,651. Inhibition of Corrosion. Apr. 15, 1941. Inhibiting the corrosive effect of ammonium nitrate compositions by means of a small quantity of thiourea.

Pat. 2,255,027. Fertilizer Manufacture. Sept. 2, 1941. A fertilizer composition comprising the product obtained by mixing an acidic fertilizer with a solution prepared by mixing formaldehyde, a urea, ammonium nitrate, water and ammonia.

Pat. 2,279,200. Fertilizer Manufacture. Apr. 7, 1942. The process of ammoniating fertilizer materials which comprises incorporating hexamethylenetetramine with acidic fertilizer materials in the presence of urea.

Pat. 2,305,078. Cooling of Comminuted Material. Dec. 15, 1942. Cooling granulated fertilizer materials by passing such materials through a rotating cylindrical shell in contact with a stream of air, the dimensions and capacity of the shell being represented by the formula

$$\frac{A\sqrt{L}}{W} = K$$

Patents Relating to Urea Synthesis

Pat. 2,346,425. Stabilization of Organic Compounds. Apr. 11, 1944. Urea stabilized with caffeine.

Pat. 2,369,110. Process for Pelleting Urea. Feb. 6, 1945. Pelleting the composition comprising crystalline urea and starch.

Patents Relating to Urea-Formaldehyde Urea Wood Treatment

Pat. 2,232,609. Dimethylolurea-Ester Resinous Reaction Products. Feb. 18, 1941. A resinous product obtained by reaction between dimethylolurea and a glycolic acid ester.

Pat. 2,302,594. Treatment of Wood. Nov. 17, 1942. In the seasoning of wood the step which comprises coating the outer surface with a saturated urea solution, the wood being at a temperature at least 5° below that of the urea solution.

Pat. 2,346,286. Wood Seasoning Process. Apr. 11, 1944. Chemically seasoning wood by treatment with a jellified aqueous solution of urea.

Pat. 2,395,311. Treatment of Wood. Feb. 19, 1946. Inhibiting color change of wood during seasoning thereof with urea by contacting said wood with a composition consisting of urea, sodium bisulfite, water and boric acid.

Pat. 2,398,649. Treatment of Wood. Apr. 16, 1946. Impregnating wood with a methylol urea at a pH of 7 to 9.

Patents Relating to Equipment, Gas Analysis Apparatus

Pat. 1,893,490. Gas Analysis. Jan. 10, 1933. Automatically determining carbon monoxide in a gaseous stream containing hydrogen and carbon monoxide by comparing the thermal conductivity of a portion of the gas stream with that of a contemporaneously taken portion after replacing the carbon monoxide in the latter with hydrogen by subjecting it to catalysis with steam and removing the excess steam and carbon dioxide therefrom.

Pat. 1,908,202. Determination of Carbon Monoxide in a Gas Mixture. May 9, 1933. Determining the amount of carbon monoxide in a gas containing the same by passing the gas together with hydrogen over a methanation catalyst and measuring the amount of heat evolved.

Pat. 2,133,249. High Pressure Heat Exchanger. Oct. 11, 1938. Heat exchange device comprising a plurality of annular rows of tube segments integral with a header block, said header block containing gas passages, the height of the tube segments varied from the innermost to the outermost segment.

Pat. 2,232,622. H_2S Recorder. Feb. 18, 1941. Apparatus for measuring the hydrogen sulfide content of gases by measuring the amount of light reflected from a strip impregnated with a substance which is color sensitive to hydrogen sulfide.

Pat. 2,258,445. Apparatus for Vaporization. Oct. 7, 1941. Vaporization apparatus containing a rotatable, vertical shaft bearing concentrically mounted vanes, the uppermost vane supporting a distributing cup divided into as many compartments as there are vanes, each compartment being connected by means of a conduit to the upper surface of one of the said vanes.

Pat. 2,369,883. Means for Packing Reciprocable Elements. Feb. 20, 1945. Reciprocable element sealed by means of a tapered annular passageway containing a lubricant in the form of an oil wedge.

Patents Relating to Hydroxyacetic Acid Process

Pat. 2,290,128. Esters of Glycolic Acid. July 14, 1942. Alcoholysis of an alkyl glycolate with a polyhydric alcohol.

Patents Relating to Hydrogenation

Pat. 1,895,515. Catalytic Hydrogenation Process. Jan. 31, 1933. Making alcohols by hydrogenating ketones with a hydrogenating-dehydrating catalyst containing a basic metal compound.

Pat. 1,963,997. Hydrogenation of Aliphatic Polyhydric Alcohols. June 26, 1934. Hydrogenating aliphatic polyhydric alcohols to glycols using a hydrogenating-dehydrogenating catalyst.

Pat. 1,963,998. Catalytic Process for the Production of Butanol. June 26, 1934. Hydrogenating aldol to 1,3-butylene glycol and then to butanol.

Pat. 1,963,999. Process for Producing Polyhydroxy Alcohols. June 26, 1934. Catalytic hydrogenation of sugars to polyhydric alcohols using neutral non-alcoholic sugar solutions and reduced hydrogenating catalysts.

Pat. 1,964,000. Catalytic Hydrogenation Process. June 26, 1934. Hydrogenating carboxylic compounds with reduced nickel, copper, etc. chromites.

Pat. 1,964,001. Catalytic Process for the Preparation of Organic Compounds. June 26, 1934. Hydrogenating an oxygen-containing compound in a 3-component reaction system using as catalyst a plurality of hydrogenating metal chromites.

Pat. 1,967,222. Granulation of Finely Divided Materials. July 24, 1934. Making granular catalyst material such as Zn chromite by intimate mixing of finely divided material with volatile liquid non-solvent until granules form, and drying.

Pat. 1,998,470. Purification Process. Apr. 23, 1935. Purified nickel catalyst obtained by washing impure Ni compound with an NH_4 salt having an anion in common with the nickel compound.

Pat. 2,004,135. Production of Polyhydric Alcohols. June 11, 1935. Preparation of lower polyhydric alcohols by catalytic hydrogenation of a higher polyhydric alcohol in presence of a hydrogenation catalyst and a weakly alkaline compound.

Pat. 2,027,182. Hydrogenation of Aliphatic Alcohols and Esters. Jan. 7, 1936. Hydrogenating a mixture of higher saturated and unsaturated alcohols and their esters, derived from catalytic dehydrogenation of primary alcohols.

Pat. 2,034,077. Catalyst and Method for Preparing Same. Mar. 17, 1936. A hydrogenation-dehydrogenation catalyst prepared by depositing oxides of at least 2-nonferrous metals on an inert supporting material.

Pat. 2,040,944. Process for Producing Polyhydroxy Alcohols. May 19, 1936. Catalytic hydrogenation of monohydric aliphatic alcohol esters of non-aromatic polybasic acids to polyhydric alcohols.

Pat. 2,041,840. Process for Hydrogenating Sulphur Compounds. May 26, 1936. Hydrogenation of sulfur compounds such as mercaptans, CS_2, thio-aldehydes, etc., with chromium oxide catalyst.

Pat. 2,043,688. Hydrogenation of Oxygenated Organic Compounds. June 9, 1936. Removal of color and odor from organic compounds containing at least two ester groups by dispersing a hydrogenating catalyst into the ester and subsequently reducing the same.

Pat. 2,046,257. Chemical Process. June 30, 1936. Two-stage catalytic hydrogenation of rubber, neoprene, butadiene, or isoprene, in the presence of an aromatic hydrocarbon.

Pat. 2,060,880. Process of Producing Ethylene Glycol. Nov. 17, 1936. Hydrogenation of dialkyl oxalates to ethylene glycol.

Pat. 2,066,153. Catalytic Composition and Process for Preparing Same. Dec. 29, 1936. Catalyst comprising an intimately associated mixture of hydrogenating metal chromites.

Pat. 2,066,533. Hydrogenation Process for Producing Hydroxy Acids and Lactones. Jan. 5, 1937. Producing hydroxy acids and lactones by controlled catalytic hydrogenation of polycarboxylic acids or their esters.

Pat. 2,067,291. Polyamines and Process for Making the Same. Jan. 12, 1937. Catalytic hydrogenation of aryl-glycine nitriles to polyamines such as di- and tri-(beta-phenylaminoethyl) amine.

Pat. 2,072,142. Synthetic Resins. Mar. 2, 1937. Hydrogenation of aldehyde-polynuclear phenol resins.

Pat. 2,072,143. Synthetic Resins and Compositions Containing the Same. Mar. 2, 1937. Hydrogenation of aldehyde-polynuclear phenol resins; product obtained thereby.

Pat. 2,073,799. Process for the Production of Hydroxy Acids and the Product Thereof. Mar. 16, 1937. Hydrogenation of polymeric anhydrides to polymeric esters of hydroxyacids, and hydrolysis of latter to hydroxyacids.

Pat. 2,087,691. Process of Catalytically Hydrogenating Phenols. July 20, 1937. Nuclear hydrogenation of phenols with copper and related catalysts.

Pat. 2,088,425. Process for Dehydrogenating Hydrogenated Polycyclic Phenols. July 27, 1937. Catalytic liquid phase dehydrogenation of hydrogenated polycyclic phenols to ketones.

Pat. 2,094,127. Mixed Higher Alcohols. Sept. 28, 1937. The mixture of alcohols obtained by catalytic hydrogenation of cottonseed oil.

Pat. 2,094,611. Process for Producing Alcohols from Hydroxy Carboxylic Compounds. Oct. 5, 1937. Alcohols such as octadecanediol and their preparation by catalytic hydrogenation of hydroxycarboxylic acids, esters, or anhydrides, e. g., castor oil.

Pat. 2,100,468. Catalytic Hydrogenation of Alkyl Substituted Phenols. Nov. 30, 1937. Catalytic hydrogenation of mononuclear monohydric phenols having an alkyl side chain of at least 7 carbons.

Pat. 2,105,540. Catalytic Hydrogenation Process for the Production of Aldehydes. Jan. 18, 1938. Catalytic hydrogenation of aliphatic monocarboxylic acids to aldehydes.

Pat. 2,105,664. Catalytic Hydrogenation of Hydroaromatic Carboxylic Acids and Their Esters. Jan. 18, 1938. Catalytic hydrogenation of homocyclic hydroaromatic carboxyl compounds to alcohols.

Pat. 2,114,717. Process for Hydrogenation of Naphthenic Acid Derivatives. Apr. 19, 1938. Preparation of naphthenyl alcohols by catalytic hydrogenation of naphthenic acid esters and anhydrides.

Pat. 2,116,552. Catalytic Hydrogenation of Carboxylic Acids, Their Esters and Anhydrides. May 10, 1938. Catalytic hydrogenation of carboxylic acids, esters, and anhydrides in the presence of a hydrogenating-dehydrogenating catalyst comprising mixed chromites.

Pat. 2,118,934. Hydrogenation of Phenol-Ketone Condensation Products. May 31, 1938. Catalytic hydrogenation of phenol-ketone condensation products in solution under selected conditions.

Pat. 2,121,580. Hydrogenation of Oiticica Oil and Product Therefrom. June 21, 1938. Catalytic hydrogenation of oiticica oil.

Pat. 2,187,745. Process for Hydrogenating Amides and Imides to Amines. Jan. 23, 1940. Hydrogenation of amides and imides to amines.

Pat. 2,205,184. Purification of Aldehyde-Ketone Mixtures. June 18, 1940. Hydrogenation of the aldehyde in aldehyde-ketone mixtures in the presence of a hydrogenation catalyst at 40° to 125° C.

Pat. 2,209,055. Process for Cleaving Monosaccharides and Preparation of Lower Polyhydric Alcohols Therefrom. July 23, 1940. Preparation of lower polyhydric alcohols by cleaving a monosaccharide with a tertiary amine and catalytically hydrogenating.

Pat. 2,217,651. Hydrogenation of Ethers of Hydroxy Aldehydes. Oct. 8, 1940. Hydrogenation of a glyceric aldehyde monoalkyl ether to a glycerol ether.

Pat. 2,233,999. Process for the Production of 2,3,4,5-Tetrahydrothiophene-1, 1-Dioxide. Mar. 4, 1941. Hydrogenation of butadiene/SO_2 sulfone.

Pat. 2,247,756. Process for the Manufacture of Alcohols and Ketones. July 1, 1941. Hydrogenation and decarbonylation of primary-secondary glycols, e. g., octadecanediol to heptadecanol-7.

Pat. 2,275,152. Process for Hydrogenating Aliphatic Carboxylic Acid Anhydrides. Mar. 3, 1942. Hydrogenation of aliphatic anhydrides to alcohols with chromite catalysts.

Pat. 2,278,549. Hydrogenation of Acyl-Substituted Compounds. Apr. 7, 1942. Hydrogenating in the liquid phase a compound containing an acyl group adjacent to an ester group.

Pat. 2,334,761. Preparation of Straight Chain Hydroxy Compounds Having at Least Six Carbon Atoms. Nov. 23, 1943. Preparation of polyhydric alcohols by hydrogenation of aldol condensation products.

Pat. 2,357,479. Hydrogenation of Alkoxy-Substituted Esters and Products. Sept. 5, 1944. Preparation of glycerol beta-(methoxymethyl)ether by hydrogenation of an alpha-(methoxymethyl)ether of methyl glycerate.

Patents Relating to Reaction of CO With Water or Alcohols, Acid and Ester Syntheses, BF_3 Processes

Pat. 1,895,238. Process for the Preparation of Formic Acid. Jan. 24, 1933. Producing formic acid from carbon monoxide and steam in the presence of a boron-phosphate catalyst.

Pat. 1,915,308. Process of Esterification. June 27, 1933. Continuous preparation of esters ex olefin hydrocarbon and a concentrated lower aliphatic carboxylic acid in contact with a catalyst such as concentrated H_2SO_4.

Pat. 1,924,762. Preparation of Carboxylic Acids. Aug. 29, 1933. Preparation of carboxylic acids from steam, carbon monoxide and olefins in the presence of a volatile inorganic acid.

Pat. 1,924,763. Preparation of Carboxylic Acids. Aug. 29, 1933. Preparation of carboxylic acids by reaction between steam, carbon monoxide and olefins in the presence of a volatile halide.

Pat. 1,924,764. Process of Preparing Aliphatic Carboxylic Acids from Olefinic Hydrocarbons, Carbon Monoxide and Steam. Aug. 29, 1933. Preparation of carboxylic acids from steam, carbon monoxide and olefins in the presence of boron phosphate.

Pat. 1,924,765. Preparation of Carboxylic Acids from Olefinic Hydrocarbons, Carbon Monoxide and Steam. Aug. 29, 1933. Preparation of carboxylic acids from steam, carbon monoxide and olefins in the presence of an ammonium halide and active carbon.

Pat. 1,924,767. Process for the Production of Carboxylic Acids. Aug. 29, 1933. Preparation of carboxylic acids from olefins, steam and carbon monoxide in the presence of a hydrogen halide and a metal halide.

Pat. 1,924,768. Process for the Production of Carboxylic Acids. Aug. 29, 1933. Preparation of carboxylic acids from olefins, steam and carbon monoxide in the presence of a non-volatile compound containing at least two chemically combined elements, the oxides of which are acidic.

Pat. 1,924,769. Process for the Production of Carboxylic Acids. Aug. 29, 1933. Producing formic acid from carbon monoxide and steam in the presence of a halide of an element selected from the group consisting of alkali and alkaline earth metals.

Pat. 1,940,674. Preparation of Organic Acids. Dec. 26, 1933. Synthesis of aliphatic organic acids from alcohols and carbon monoxide in the presence of an acid catalyst promoted with an oxide of a Group IV-A element.

Pat. 1,940,987. Process for the Preparation of Organic Acids. Dec. 26, 1933. Synthesis of organic acids from carbon monoxide and alcohols by circulating the reaction mixture over a heated catalyst suitable for the synthesis, removing the organic acid formed and recirculating the separated by-products over the catalyst.

Pat. 1,940,988. Process for the Preparation of Organic Acids. Dec. 26, 1933. Subjecting carbon monoxide and an alcohol to the action of a heated catalyst, adding alcohol to the resulting mixture, and subjecting it without additional carbon monoxide to further reaction in contact with the catalyst.

Pat. 1,940,989. Preparation of Organic Acids. Dec. 26, 1933. Synthesis of organic acids by heating a catalyst adapted for the said synthesis to reaction temperature in an atmosphere of a circulating gaseous medium incapable of forming the said organic acid, and thereafter continuously adding to the said medium a mixture of gases for the reaction, passing the resulting gaseous mixture over the catalyst and separating the organic acid thus formed while recirculating the uncombined gases over the catalyst.

Pat. 1,946,254. Preparation of Carboxylic Acids. Feb. 6, 1934. Reaction between an alcohol and carbon monoxide in the presence of a volatile inorganic acid catalyst formed in situ.

Pat. 1,946,255. Preparation of Carboxylic Acids. Feb. 6, 1934. Reacting an aliphatic alcohol with carbon monoxide in the presence of a volatile halide catalyst.

Pat. 1,946,256. Preparation of Carboxylic Acids. Feb. 6, 1934. Reacting an aliphatic alcohol with carbon monoxide in the presence of a volatile halide and activated carbon.

Pat. 1,946,257. Preparation of Organic Acids. Feb. 6, 1934. Synthesis of organic acids by contacting monohydroxyaliphatic alcohols and carbon monoxide with a halide of an element selected from the elements of Group II of the Periodic Table and manganese.

Pat. 1,946,258. Preparation of Organic Acids. Feb. 6, 1934. Preparation of organic acids by contacting an alcohol or ether with carbon monoxide in the presence of a complex inorganic oxide containing a metal of Group VI-A of the Periodic Table.

Pat. 1,946,259. Process for the Preparation of Aliphatic Organic Acids. Feb. 6, 1934. Preparation of organic acids by contacting an alcohol or ether with carbon monoxide in the presence of a hydrogen halide and a halide of a Group II metal or a manganese halide.

Pat. 1,949,825. Process for the Production of Carboxylic Acids. Mar. 6, 1934. Preparation of formic acid from carbon monoxide and steam in the presence of an acid containing at least two chemically combined nonvolatile acid forming elements.

Pat. 1,957,939. Process for the Production of Carboxylic Acids. May 8, 1934. Reacting a gaseous mixture of an olefinic hydrocarbon, steam and carbon monoxide in the presence of a metal halide catalyst.

Pat. 1,979,449. Preparation of Organic Acids. Nov. 6, 1934. Preparation of organic acids by contacting an alcohol or ether with an activated charcoal catalyst in the presence of carbon monoxide at a temperature above approximately 300° C.

Pat. 1,979,450. Preparation of Organic Acids. Nov. 6, 1934. Preparation of organic acids by contacting an alcohol or ether with an activated charcoal catalyst promoted with an acidic catalyst in the presence of carbon monoxide.

Pat. 1,979,518. Preparation of Organic Acids. Nov. 6, 1934. Preparation of organic acids by contacting an alcohol with an activated charcoal catalyst promoted with an oxide of sub-group A of the fourth, fifth and sixth groups of the Periodic Table in the presence of carbon monoxide.

Pat. 1,979,519. Preparation of Organic Acids. Nov. 6, 1934. Preparation of organic acids by contacting an alcohol with an activated charcoal catalyst promoted with an acidic oxide selected from the group consisting of sub-groups B of the fourth, fifth and sixth groups of the Periodic Table in the presence of carbon monoxide.

Pat. 1,979,717. Preparation of Organic Esters. Nov. 6, 1934. Preparation of esters by reaction between olefins, alcohols and carbon monoxide.

Pat. 1,981,801. Process for the Production of Carboxylic Acids. Nov. 20, 1934. Reaction between an olefin, steam and carbon monoxide in the presence of a catalyst containing an acid metal salt of an acidic oxide.

Pat. 1,991,732. Process for the Production of Formic Acid. Feb. 19, 1935. Producing formic acid by passing carbon monoxide and steam over a zinc chloride catalyst in the presence of hydrogen chloride.

Pat. 1,993,552. Preparation of Esters of Polybasic Acids. Mar. 5, 1935. Reacting a lower alkyl ester of a polybasic organic acid with an HTP alcohol to produce a mixture of esters.

Pat. 1,993,555. Production of Aliphatic Carboxylic Acids. Mar. 5, 1935. Producing carboxylic acids by reacting a halogenated hydrocarbon with steam and carbon monoxide.

Pat. 1,994,955. Acid Synthesis Process. Mar. 19, 1935. Reacting an alcohol with carbon monoxide in an oxygen-free reaction zone.

Pat. 1,995,930. Process for Making Trimethyl Acetic Acid. Mar. 26, 1935. Preparation of trimethyl acetic acid by reaction between isobutanol and carbon monoxide.

Pat. 1,999,976. Process for the Preparation of Higher Alkyl Esters of the Carboxylic Acids. Apr. 30, 1935. Preparation of higher alkyl esters from lower alkyl esters by halogenating the lower alkyl ester, condensing the resulting halogenated ester with an olefin, and dehalogenating the resulting halogenated higher alkyl ester.

Pat. 2,000,053. Process for the Production of Carboxylic Acid. May 7, 1935. Reacting an olefin with steam and carbon monoxide in the presence of a metal compound which forms a salt with the resulting carboxylic acid.

Pat. 2,001,659. Preparation of Formic Acid. May 14, 1935. Preparation of formic acid from carbon monoxide and steam in the presence of a volatile inorganic acid which is continuously formed in situ.

Pat. 2,007,968. Process of Esterification. July 16, 1935. Preparation of esters by reacting a ketone with certain alcohols in presence of strong acid catalyst.

Pat. 2,008,348. Process for the Production of Carboxylic Acids. July 16, 1935. Reacting an olefin with carbon monoxide and steam in the presence of a solid acidic oxide catalyst.

Pat. 2,010,402. Preparation of Carboxylic Acids. Aug. 6, 1935. Preparation of oxygenated organic compounds by reacting an alcohol with carbon monoxide in the presence of an ammonium halide and active carbon.

Pat. 2,013,338. Process for the Production of Carboxylic Acids. Sept. 3, 1935. Producing a carboxylic acid by a reaction between an olefin and formic acid under a pressure of 25 to 900 atmospheres.

Pat. 2,015,065. Process for the Synthesis of Organic Compounds. Sept. 24, 1935. Preparation of carboxylic acids from olefins, steam and carbon monoxide in the presence of an inert gas.

Pat. 2,015,077. Esters of Higher Aliphatic Alcohols. Sept. 24, 1935. Mixture of neutral esters of polycarboxylic acids and the mixed branched-chain alcohols from catalytic hydrogenation of carbon oxides.

Pat. 2,015,078. Coating Composition. Sept. 24, 1935. Compositions comprising cellulose derivatives and carboxylic acid esters of primary branched-chain alcohols from catalytic hydrogenation of carbon oxides.

Pat. 2,015,088. Polybasic Acid Ester of Higher Alcohols. Sept. 24, 1935. Mixed polycarboxylic acid esters, in which at least one ester group contains radicals of primary branched-chain alcohols from catalytic hydrogenation of carbon oxides.

Pat. 2,019,754. Preparation of Organic Acids. Nov. 5, 1935. Preparation of carboxylic acids by reacting an alcohol ether or ester with carbon monoxide in the presence of an oxide catalyst which is also a gas adsorbent.

Pat. 2,020,689. Process for the Preparation of Aliphatic Carboxylic Acids. Nov. 12, 1935. Preparation of carboxylic acids from steam, carbon monoxide and olefins in the presence of carbon tetrachloride and active carbon.

Pat. 2,021,127. Preparation of Organic Acids. Nov. 19, 1935. Preparation of organic acids from alcohols and carbon monoxide in the presence of a catalyst containing a simple acid consisting of the elements, hydrogen, oxygen and a Group VI-A metal.

Pat. 2,023,003. Process for the Production of Formic Acid. Dec. 3, 1935. Preparation of formic acid from carbon monoxide and steam in the presence of an acid salt of the acidic oxides of phosphorus, arsenic, tungsten, molybdenum, uranium, chromium, vanadium, boron, silicon or zirconium.

Pat. 2,025,676. Process for the Preparation of Organic Acids. Dec. 24, 1935. Preparation of oxygenated organic compounds by reacting an alcohol with carbon monoxide in the presence of a halogenated carboxylic acid or an acyl halide.

Pat. 2,025,677. Process for the Preparation of Organic Acids. Dec. 24, 1935. Preparation of carboxylic acids from steam, carbon monoxide and olefins in the presence of a halogenated monocarboxylic acid.

Pat. 2,039,722. Process for the Preparation of Organic Acids. May 5, 1936. Preparation of organic oxygenated compounds by contacting an alcohol with carbon monoxide in the presence of carbon tetrachloride and activated charcoal.

Pat. 2,054,807. Carboxylic Acids and Method for Their Preparation. Sept. 22, 1936. Preparation of oxygenated organic compounds by reacting an alcohol with carbon monoxide in the presence of water vapor and a boron phosphate catalyst supported on activated charcoal.

Pat. 2,068,265. Preparation of Carboxylic Acids. Jan. 19, 1937. Preparation of carboxylic acids by reaction between alcohols and carbon monoxide in the presence of chromium vanadate.

Pat. 2,079,216. Improved Acid Synthesis Process. May 4, 1937. Preparation of monocarboxylic acids by reaction between carbon monoxide, water and olefins, in the absence of oxygen in a copper-lined reaction vessel.

Pat. 2,084,284. Ether Acid Halides and Process of Making Them. June 15, 1937. Reaction between halogenated aliphatic ethers and carbon monoxide in the presence of a Friedel-Crafts type catalyst; diacid chloride of diglycolic acid as a composition of matter.

Pat. 2,089,903. Improved Acid Synthesis Process. Aug. 10, 1937. Preparation of monocarboxylic acids by reaction between carbon monoxide, water and olefins in an apparatus lined with tantalum.

Pat. 2,093,695. Process for the Preparation of Carboxylic Acid Esters. Sept. 21, 1937. Producing esters from aliphatic acids and olefins under pressure in the presence of activated charcoal as a catalyst.

Pat. 2,135,447. Ester Synthesis Process. Nov. 1, 1938. Preparation of esters by reacting ethers with carbon monoxide in the presence of active carbon and a volatile halide.

Pat. 2,135,448. Organic Acid Synthesis. Nov. 1, 1938. Preparation of acetic acid by reacting methanol with boron trifluoride to form an addition compound containing about two mols of methanol per mol of boron trifluoride and subsequently reacting the resulting product with carbon monoxide.

Pat. 2,135,449. Process of Preparing Aliphatic Esters. Nov. 1, 1938. Preparation of a carboxylic acid ester by reacting an alkyl ether with carbon monoxide in the presence of boron trifluoride and water.

Pat. 2,135,450. Preparation and Recovery of Aliphatic Esters. Nov. 1, 1938. Condensing an aliphatic ether with carbon monoxide in the presence of a halide of an element selected from the group consisting of the amphoteric elements and the elements which on hydrolysis form weak bases.

Pat. 2,135,451. Organic Acid Synthesis. Nov. 1, 1938. Preparation of organic acids and their esters by reacting an alcohol with carbon monoxide in the presence of boron fluoride at a temperature below 350° C.

Pat. 2,135,452. Synthesis of Aliphatic Organic Acids and Esters. Nov. 1, 1938. Preparation of acetic acid from methanol and carbon monoxide in the presence of boron fluoride at a temperature between 200° and 400° C.

Pat. 2,135,453. Preparation of Oxygenated Organic Compounds. Nov. 1, 1938. Preparation of oxygenated organic compounds by heating an alcohol with carbon monoxide at a temperature below 350° C. in the presence of 0.25 to 2.0 mols of an aqueous halide of an element selected from the group consisting of amphoteric elements and the elements which form weak bases.

Pat. 2,135,454. Catalyst Preparation. Nov. 1, 1938. Preparation of $BF_3.2H_2O$ or $BF_3.3H_2O$ by reaction between anhydrous hydrofluoric acid and a compound selected from the group consisting of boric acid, boric anhydride, and a borate.

Pat. 2,135,455. Alcohols from Olefines. Nov. 1, 1938. Hydration of olefines in the presence of a boron halide.

Pat. 2,135,456. Separation of Constituents from an Organic Complex. Nov. 1, 1938. Recovery of acetic acid from its solution with boron fluoride and water by distillation while continuously adding steam to the mixture.

Pat. 2,135,457. Separation of the Constituents in Organic Complexes. Nov. 1, 1938. Separation of propionic acid from its complex with boron fluoride by adding acetic acid thereto to displace the propionic acid.

Pat. 2,135,458. Separation of Constituents from Organic Complexes. Nov. 1, 1938. Separating an organic compound from its complex with a boron halide by adding an alkaline earth metal halide which forms a complex with boron halide and thereafter separating the boron halide from the said complex.

Pat. 2,135,459. Preparation of Organic Acids from Olefines and Carbon Monoxide. Nov. 1, 1938. Preparation of carboxylic acids by reaction between carbon monoxide, olefines and water in the presence of boron fluoride, the amount of water being not appreciably more than 5 mols per mol of boron fluoride.

Pat. 2,135,460. Preparation of Boron Fluoride. Nov. 1, 1938. Preparation of boron fluoride by reacting a metal halide with hydrated boron fluoride, removing the resulting complex of metal halide and boron fluoride and driving off the boron fluoride therefrom at elevated temperatures.

Pat. 2,151,382. Diolefin Polymerization Process. Mar. 21, 1939. Polymerization of monoolefin-diolefin mixtures with aqueous boron fluoride.

Pat. 2,158,031. Condensation Reaction. May 9, 1939. Condensation of carbon monoxide with an olefin, alcohol or ether in the presence of boron trifluoride associated with from 1 to 5 mols of water per mol of boron trifluoride.

Pat. 2,160,575. Recovery Process. May 30, 1939. Separation of acetic acid from its complex with boron fluoride by distilling alternately at two different pressure levels.

Pat. 2,160,576. Preparation of Anhydrous Boron Fluoride. May 30, 1939. Preparation of boron trifluoride by distilling hydrated boron trifluoride alternately at differing pressure levels.

Pat. 2,162,451. Ester Interchange with Organic Acids. June 13, 1939. Preparation of alkyl acetates and formic acid from alkyl formates and acetic acid in the presence of a catalyst and an agent which forms an azeotrope with formic acid.

Pat. 2,162,459. Synthesis of Organic Acids Higher than Acetic Acid. June 13, 1939. Vapor phase reaction between carbon monoxide and alcohols in the presence of a volatile catalyst containing boron and fluorine.

Pat. 2,217,650. Preparation of Organic Acids. Oct. 8, 1940. Preparation of organic acids and esters by reacting carbon monoxide with an alcohol in the presence of a catalyst which is a complex of an inorganic acid and boron fluoride.

Pat. 2,258,525. Olefin Reactions with Boron Fluoride Catalyst. Aug. 26, 1941. Production of esters by reaction between a lower aliphatic acid and an olefin in the presence of boron trifluoride associated with from 1 to 5 mols of water per mol of boron trifluoride.

Pat. 2,265,946. Preparation of Aliphatic Organic Esters. Dec. 9, 1941. Reacting an acyl-oxy or alkoxy-acetic acid with an olefin containing not more than 3 carbon atoms to form an ester.

Pat. 2,265,947. Preparation of Formyl-Substituted Esters. Dec. 9, 1941. Preparing an alkyl formyl (alkoxymethoxy) acetate by reacting an alkyl (alkoxy-methoxy) acetate with an alkyl formate.

Pat. 2,273,785. Organic Acids from Ketones. Feb. 17, 1942. Preparation of organic acids by reaction between aliphatic ketones, carbon monoxide and water in the presence of hydrated boron fluoride.

Pat. 2,298,138. Inorganic Substituted Acetic Acid. Oct. 6, 1942. Preparation of halogen-substituted acetic acids by heating formaldehyde with a halogen acid and carbon monoxide in the substantial absence of water.

Pat. 2,302,618. Preparation of Organic Esters. Nov. 17, 1942. Preparation of methyl methoxyacetate by reacting dimethyl ether with methyl hydroxyacetate.

Pat. 2,316,605. Preparation of Organic Esters. Apr. 13, 1943. Preparation of 1,1-di(carbomethoxymethoxy)-2-methyl propane by reacting methyl hydroxyacetate with 1,1-dimethoxyisobutane in the presence of an acidic catalyst.

Pat. 2,341,420. Formic Acid Esters. Feb. 8, 1944. Preparation of formates by passing carbon monoxide into a monoether of a polyhydric alcohol in the presence of a metal alkoxide catalyst.

Pat. 2,350,360. Esters of Substituted Acetic Acids. June 6, 1944. Preparation of alkoxyacetic esters of polyhydric alcohols.

Pat. 2,350,964. Esters. June 6, 1944. Alcoholysis of methyl hydroxyacetate with glycerol to obtain glycerol monoglycolate.

Pat. 2,373,483. Preparation of Organic Esters. Apr. 10, 1945. Preparation of alkyl alkoxyacetates by reaction between alkyl ethers, formaldehyde and carbon monoxide in the presence of an acidic catalyst.

Pat. 2,373,583. Conversion of Methyl Formate to Formic Acid. Apr. 10, 1945. Preparation of formic acid by acidolysis of methyl formate with an organic dicarboxylic acid in the presence of an inorganic acid catalyst.

Pat. 2,378,009. Production of Esters. June 12, 1945. Preparation of ethyl alpha-methyl-alpha-ethylbutyrate by reaction between ethylene and carbon monoxide in the presence of a strong acid catalyst.

Pat. 2,388,164. Esters. Oct. 30, 1945. A glycerol ether ester of the class consisting of mono and dimethoxy-acetates of glycerol beta-methyl ether.

Pat. 2,391,219. Preparation of Acids. Dec. 18, 1945. Converting methyl acetate to acetic acid by heating a mixture of methyl acetate and water under a pressure between 200 and 500 pounds per square inch while separating the methanol by distillation under a similar pressure.

Pat. 2,405,936. Formic Acid Esters. Aug. 20, 1946. Preparation of ethylene glycol diformate by reacting ethylene glycol with carbon monoxide in the presence of an alkali metal alkoxide catalyst at elevated temperatures and pressures.

Patents Relating to Acetals, 1,3-Dioxolanes

Pat. 2,250,487. Reaction of Formals with Glycolic Acid and Resulting Product. July 29, 1941. Preparation of formals by reaction between a methylene glycol-diether and glycolic acid or an alkyl glycolate.

Pat. 2,273,786. Preparation of Acids and Acetals from Esters and Aldehydes. Feb. 17, 1942. Reacting an organic ester with an aldehyde and water to obtain the corresponding acid and acetal.

Pat. 2,289,548. Condensation Reaction. July 14, 1942. Preparation of formals by reacting formalin with propylene in the presence of hydrated boron fluoride.

Pat. 2,307,934. Preparation of Aldehydes. Jan. 12, 1943. Preparation of methoxymethoxyacetaldehyde by vapor phase oxidation of methoxymethoxyethanol in the presence of an oxidation catalyst.

Pat. 2,316,606. Polycarboxylic Acids. Apr. 13, 1943. Preparation of sodium ethanol amine formal by reaction between chloracetic acid and ethanol amine formal in an alkaline solution.

Pat. 2,357,594. Esters. Sept. 5, 1944. Alcoholysis of an ester of an alkoxymethoxy acetic acid with a polyhydric alcohol ether.

Pat. 2,370,779. Preparation of 2-Methyl-4-Keto-1,3-Dioxolane. Mar. 6, 1945. Preparation of 2-methyl-4-keto-1,3-dioxolane.

Pat. 2,377,878. Dioxolane-Acid Halide Reaction and Product. June 12, 1945. Reaction between 1,3-dioxolane or 4-methyl-1,3-dioxolane and acetyl chloride to form a chloroester.

Pat. 2,382,874. Modified Acetals. Aug. 14, 1945. Preparation of di(methoxymethoxy) ethane by reaction between 1,3-dioxolane and methylal in the presence of an acidic catalyst.

Patents Relating to Antifreeze, Hydraulic Fluids, Automotive Chemicals, Denaturants

Pat. 1,900,014. Antifreeze Composition. Mar. 7, 1933. Substantially non-volatile antifreeze ex water, sorbitol, and a glycol.

Pat. 1,911,195. Noncorrosive Antifreeze Liquid. May 30, 1933. Methanol antifreeze containing borax as a corrosion inhibitor.

Pat. 1,915,148. Antifreeze Noncorrosive Solution. June 20, 1933. Alcoholic antifreeze containing an inhibitor selected from the group consisting of alkaline earth tartrates, alkali tartrates and mixed alkali tartrates.

Pat. 1,945,543. Hydraulic Fluid. Feb. 6, 1934. A brake fluid comprising castor oil and a mixture of high boiling oxygenated liquid products obtained by catalytic hydrogenation of carbon monoxide.

Pat. 1,956,266. Antifreeze Noncorrosive Solution. Apr. 24, 1934. Alcoholic antifreeze containing a small amount of an alkyl or aryl antimonyl tartrate.

Pat. 2,056,163. Denatured Alcohol. Oct. 6, 1936. HTP alcohols as denaturants for ethanol.

Pat. 2,085,779. Denatured Alcohol. July 6, 1937. Denatured ethyl alcohol containing a mixture of aldehydes, esters and ketones obtained by dehydrogenation of HTP alcohols.

Pat. 2,090,263. Hydraulic Fluid. Aug. 17, 1937. A hydraulic fluid comprising a solution of isobutanol and a glycol.

Pat. 2,102,638. Hydraulic Fluid. Dec. 21, 1937. A hydraulic fluid comprising an aliphatic monohydric alcohol, a blown oil, and a soap.

Pat. 2,102,825. Hydraulic Fluids. Dec. 21, 1937. A hydraulic fluid comprising an organic solvent diluent and a ricinoleyl compound.

Pat. 2,192,119. Denaturant. Feb. 27, 1940. Ethyl ethynyl carbinol and related compounds as denaturants for ethyl alcohol.

Pat. 2,192,120. Denaturant. Feb. 27, 1940. Acetyl methyl carbinol and related compounds as denaturants for alcohols.

Pat. 2,192,136. Denaturant. Feb. 27, 1940. A mixture of branch chain ketones and hydrocarbons boiling at about 80° to 130° C. obtainable by catalytic dehydrogenation and dehydration of secondary alcohols as a denaturant for ethyl alcohol.

Pat. 2,192,137. Denatured Materials. Feb. 27, 1940. Unsaturated tertiary alcohols as denaturants for ethyl alcohol.

Pat. 2,196,152. Denaturant. Apr. 2, 1940. Cyclopentanone and related compounds as denaturants for ethyl alcohol

Pat. 2,205,183. Hydraulic Fluid. June 18, 1940. A hydraulic fluid containing a liquid N-substituted amide and an organic lubricant.

Pat. 2,209,900. Denaturant. July 30, 1940. Cyclic ethers having from 3 to 8 carbon atoms per molecule as denaturants for ethyl alcohol or ethyl acetate.

Pat. 2,232,581. Hydraulic Fluid. Feb. 18, 1941. A hydraulic fluid comprising a polyhydric alcohol, a polyhydric alcohol ricinoleate, a monohydric alcohol and an alkali or alkaline earth metal nitrite.

Pat. 2,249,800. Hydraulic Fluid. July 22, 1941. A hydraulic fluid comprising a glyceryl mono- or diester of a vegetable or animal oil acid, or a glycol ester of the said acid, together with a monohydric alcohol and a polyhydric alcohol.

Pat. 2,256,368. Denatured Material. Sept. 16, 1941. Nitromethane, nitroethane, or nitropropane, as denaturants for ethyl alcohol.

Pat. 2,258,414. Denaturant. Oct. 7, 1941. Denatured alcohol containing methyl vinyl ketone as a denaturant.

Pat. 2,305,228. Hydraulic Fluid. Dec. 15, 1942. A hydraulic fluid comprising 2-hydroxymethyl-1,3-dioxolane and a vegetable oil.

Pat. 2,316,497. Hydraulically Actuated System. Apr. 13, 1943. Overcoming water accumulation in a hydraulically actuated system by passing air over a drying agent before it enters the master cylinder or by substantially preventing the breathing of air through the fluid reservoir vent.

Pat. 2,331,032. Denaturants. Oct. 5, 1943. A denatured alcohol containing as a denaturant a mixture of aldehydes prepared by oxidizing a mixture of higher alcohols obtained in the high pressure synthesis of methanol from hydrogen and oxides of carbon.

Pat. 2,346,295. Corrosion Inhibition. Apr. 11, 1944. An alcoholic antifreeze containing sodium methyl carbonate as a corrosion inhibitor.

Pat. 2,373,570. Noncorrosive Liquids. Apr. 10, 1945. Alcoholic antifreeze containing borax and mercaptobenzothiazole.

Pat. 2,382,931. Hydraulic Fluids. Aug. 14, 1945. A hydraulic fluid comprising methoxymethoxy ethanol, castor oil, and a mono-, di- or trihydric alcohol.

Pat. 2,388,155. Inhibition of Corrosion. Oct. 30, 1945. An antifreeze composition consisting of ethylene glycol, water, ethanol and borax.

General Aniline & Film Corporation has placed more than 3,000 patents on the Register of Patents as being available for licensing. The patents are grouped in five sections. The following patents (Reg. Nos. 11,417 through 11,954) are a continuation of Section 1, relating to Dyestuffs and Intermediates, Group 28—22—82—89. Inquiries concerning these patents should be addressed to the Patent Department, General Aniline & Film Corporation, 247 Park Avenue, New York 17, N. Y.

SECTION 1—Continued

Pat. 2,032,033. Acid Triphenylmethane Dyestuffs and a Process of Preparing Them. Feb. 25, 1936.

Pat. 2,032,463. Fibers Dyed with Water-Insoluble Azo-Dyestuffs. Mar. 3, 1936.

Pat. 2,032,505. Chrysenemonosulphonic Acid. Mar. 3, 1936.

Pat. 2,032,539. Products of the Anthrapyrimidine Series. Mar. 3, 1936.

Pat. 2,032,627. Water-Insoluble Azodyestuffs. Mar. 3, 1936.

Pat. 2,032,635. Black Sulphur Dyestuffs. Mar. 3, 1936.

Pat. 2,032,772. Producing Hydroxy Compounds of the Anthrapyrimidine Series. Mar. 3, 1936.

Pat. 2,033,219. Treating Cellulose Esters. Mar. 10, 1936.

Pat. 2,033,316. Acid Dyestuffs of Anthraquinone Series. Mar. 10, 1936.

Pat. 2,033,341. Complex Chromium Compounds of Ortho-Hydroxyazo Dyestuffs and Their Production. Mar. 10, 1936.

Pat. 2,034,054. Waterinsoluble Azodyestuffs. Mar. 17, 1936.

Pat. 2,034,247. Azo Dyestuffs. Mar. 17, 1936.

Pat. 2,034,303. Azo Dyestuffs and Their Production. Mar. 17, 1936.

Pat. 2,034,304. Azo Dyestuffs and Their Production. Mar. 17, 1936.

Pat. 2,034,305. Azo Dyestuffs and Their Production. Mar. 17, 1936.

Pat. 2,034,668. Azo Dyestuffs. Mar. 17, 1936.

Pat. 2,035,751. Production of Quinaldines. Mar. 31, 1936.

Pat. 2,036,703. Process of Dyeing Wool. Apr. 7, 1936.

Pat. 2,036,705. Pyridino Compounds. Apr. 7, 1936.

Pat. 2,038,081. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. Apr. 21, 1936.

Pat. 2,038,859. Chromiferous Azodyestuffs. Apr. 28, 1936.

Pat. 2,039,023. Process of Producing New Dyestuffs of the Anthraquinone Series. Apr. 28, 1936.

Pat. 2,039,524. Agents Rendering Textile Materials Fast to Creasing. May 5, 1936.

Pat. 2,039,571. Dyestuffs of the Triarylmethane Series. May 5, 1936.

Pat. 2,039,809. Pyridino Vat Dyestuffs, and Process of Preparing Them. May 5, 1936.

Pat. 2,040,061. Quaternary Ammonium Compounds. May 5, 1936.

Pat. 2,040,368. Azo-Dyestuffs Containing Chromium and Process of Preparing Them. May 12, 1936.

Pat. 2,040,380. Brominated Vat Dyestuffs of the Benzanthronylaminoanthraquinone Series. May 12, 1936.

Pat. 2,040,397. Arylamides of 5.6.7.8-Tetrahydro-2-Hydroxynaphthalene-3-Carboxylic Acid. May 12, 1936.

Pat. 2,040,587. 6-Nitro-2.3-Hydroxynaphthoic Acid. May 12, 1936.

Pat. 2,040,626. Aminobutane-Disulphonic Acids and Alkyl-Substitution Products Thereof and a Process of Preparing Them. May 12, 1936.

Pat. 2,040,796. Process of Dyeing Animal Fibers with Metal Complex Compounds of Organic Acid Dyestuffs. May 12, 1936.

Pat. 2,040,857. Acylamino Derivatives of the Anthrapyrimidine Series. May 19, 1936.

Pat. 2,040,858. Production of Anthrapyrimidines. May 19, 1936.

Pat. 2,040,859. Compounds of the Anthrapyrimidine Series. May 19, 1936.

Pat. 2,040,860. Production of Anthrapyrimidines. May 19, 1936.

Pat. 2,040,861. Anthrapyrimidines and Their Production. May 19, 1936.

Pat. 2,040,862. Compounds of the Anthrapyrimidine Series. May 19, 1936.

Pat. 2,041,512. Tetrahalogeno - Ortho - Aminophenols. May 19, 1936.

Pat. 2,041,513. Tetrahalogeno - Ortho - Aminophenols. May 19, 1936.

Pat. 2,041,550. Vat Dyestuffs of the Anthraquinone Series. May 19, 1936.

Pat. 2,042,194. Stripping Dyeings Prepared with Vat Dyestuffs. May 26, 1936.

Pat. 2,042,600. Isothiocyanate Sulphonic Acids. June 2, 1936.

Pat. 2,042,630. Manufacture of 6-Bromo-2.4-Dinitraniline. June 2, 1936.

Pat. 2,042,658. Nitro-Derivatives of 2-Hydroxynaphthalene-1-Sulphonic Acid-3-Carboxylic Acid and Process of Preparing Them. June 2, 1936.

Pat. 2,042,683. Vat Dyestuffs of the Anthraquinone Series and Process of Making Same. June 2, 1936.

Pat. 2,042,757. Process of Preparing Acid Wool Dyestuffs of the Anthraquinone Series and the Dyestuffs Thus Obtainable. June 2, 1936.

Pat. 2,043,081. Methine Dyestuffs Derived from P-Amino-Benzaldehyde Compounds. June 2, 1936.

Pat. 2,043,199. Azo Dyestuffs and Their Production. June 2, 1936.

Pat. 2,043,329. Wetting Agents for Mercerising Solutions. June 9, 1936.

Pat. 2,044,329. Azo Dyes and Their Production. June 16, 1936.

Pat. 2,044,404. Process of Preparing Dyestuffs of the N.N-Dihydro-1.2.2'.1'-Anthraquinone Azine Series and New Intermediate Products Obtainable Thereby. June 16, 1936.

Pat. 2,044,790. Dyestuff Preparation. June 23, 1936.

Pat. 2,044,796. Stable Reduction Compounds of the Thioindigoide Series and Process of Preparing Them. June 23, 1936.

Pat. 2,044,868. Sulphur Dyestuffs. June 23, 1936.

Pat. 2,044,891. Substantive Azodyestuffs and Process of Making Same. June 23, 1936.

Pat. 2,044,963. Water-Soluble Basic Triphenylmethane Dyestuffs and a Process of Preparing Them. June 23, 1936.

Pat. 2,045,090. Cupriferous Polyazo Dyes and Their Production. June 23, 1936.

Pat. 2,045,475. Stable Reduction Compounds of the 4.7.4'.7'-Tetra-Alkyl-5.5'- Dihalogen - Thioindigos and a Process of Preparing Them. June 23, 1936.

Pat. 2,045,476. Printing Preparations and a Process of Printing with Said Preparations. June 23, 1936.

Pat. 2,045,477. Leuco Vat Dyestuff Paste for Printing Cloth. June 23, 1936.

Pat. 2,045,553. Stable Reduction Products of Dyestuffs of the Indigo Series, and a Process of Producing Same. June 23, 1936.

Pat. 2,045,817. Condensation Products of the Anthraquinone Series. June 30, 1936.

Pat. 2,046,249. Aminopyrene-Sulphonic Acids and a Process of Preparing Them. June 30, 1936.

Pat. 2,046,254. Vat Dyestuffs Derived from Acenanthrenequinone and Process of Preparing Them. June 30, 1936.

Pat. 2,046,425. Process of Producing Azo Dyestuffs on the Fiber. July 7, 1936.

Pat. 2,046,835. Acid Dyestuffs of the Anthraquinone Series. July 7, 1936.

Pat. 2,047,066. Softening Agent. July 7, 1936.

Pat. 2,047,069. Amides. July 7, 1936.

Pat. 2,047,513. Arylamides of an Asymmetrical Ortho-Xylenol-Carboxylic Acid and Process of Making Same. July 14, 1936.

Pat. 2,047,514. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. July 14, 1936.

Pat. 2,047,515. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. July 14, 1936.

Pat. 2,047,910. Mordant-Dyeing Monoazo Dye and Its Production. July 14, 1936.

Pat. 2,049,007. Water-Insoluble Azo-Dyestuffs and Fiber Dyed Therewith. July 28, 1936.

Pat. 2,049,674. Azodyestuffs and Intermediate Products Therefor. Aug. 4, 1936.

Pat. 2,050,657. Process of Preparing 1.4.5.8-Naphthalene-Tetra-Carboxylic Acid. Aug. 11, 1936.

Pat. 2,050,660. N-Substitution Products of 1.4-Diaminoanthraquinones. Aug. 11, 1936.

Pat. 2,050,661. N-Substitution Products of 1.4-Diaminoanthraquinones. Aug. 11, 1936.

Pat. 2,050,662. N-Substitution Products of 1.4-Diaminoanthraquinones. Aug. 11, 1936.

Pat. 2,050,704. Process of Producing N-Substitution Products of 1.4-Diaminoanthraquinones. Aug. 11, 1936.

Pat. 2,050,811. Primary Disazo Compounds. Aug. 11, 1936.

Pat. 2,050,958. 3-Hydroxydiphenyleneoxide-2-Carboxylic Acid. Aug. 11, 1936.

Pat. 2,051,004. Process of Producing N-Substitution Products of 1.4-Diaminoanthraquinones. Aug. 11, 1936.

Pat. 2,051,005. Process of Producing N-Substitution Products of 1.4-Diaminoanthraquinones. Aug. 11, 1936.

Pat. 2,051,123. Production of Mixtures of Secondary and Tertiary Aromatic Amines and Process of Preparing Them. Aug. 18, 1936.

Pat. 2,051,133. Azodyestuffs Containing Copper in a Complex Form. Aug. 18, 1936.

Pat. 2,051,148. Watersoluble Diazoamino Compounds. Aug. 18, 1936.

Pat. 2,052,216. 4-Hydroxy-Pyrene and Process of Preparing It. Aug. 25, 1936.

Pat. 2,052,833. Process of Preparing Metalliferous Hydroxyquinoline Azo Dyestuffs. Sept. 1, 1936.

Pat. 2,053,041. Dyestuff Mixture. Sept. 1, 1936.

Pat. 2,053,394. Azo Dyestuffs and Their Production. Sept. 8, 1936.

Pat. 2,053,745. Process of Preparing a Solid Tetrazo Salt. Sept. 8, 1936.

Pat. 2,054,056. Azo Dyestuffs. Sept. 8, 1936.

Pat. 2,054,057. Azo Dyestuffs Containing Chromium. Sept. 8, 1936.

Pat. 2,054,334. Vat Dyestuffs of the Perylene Series. Sept. 15, 1936.

Pat. 2,054,397. Azodyestuffs and Intermediate Products Therefor. Sept. 15, 1936.

Pat. 2,054,489. Azodyestuffs Containing Chromium. Sept. 15, 1936.

Pat. 2,054,490. Chromium Complex Compounds. Sept. 15, 1936.

Pat. 2,054,829. Water Insoluble Azo Dyestuffs Derived from Dihydrobenzocarbazoles. Sept. 22, 1936.

Pat. 2,055,050. Azo-Dyes. Sept. 22, 1936.

Pat. 2,055,074. Monoazo Dyestuffs. Sept. 22, 1936.

Pat. 2,055,377. Mono-Azodyestuffs. Sept. 22, 1936.

Pat. 2,055,741. Azodyestuffs. Sept. 29, 1936.

Pat. 2,055,746. Sulphur Dye Preparations. Sept. 29, 1936.

Pat. 2,055,792. Hydroxyphenylaminoanthracenes. Sept. 29, 1936.

Pat. 2,055,798. Ketones of the Anthracene Series. Sept. 29, 1936.

Pat. 2,055,933. Production of Compounds of Esters of Strong Acids with Anthrapyrimidines. Sept. 29, 1936.

Pat. 2,056,539. Azo-Dyestuffs and Process of Making Same. Oct. 6, 1936.

Pat. 2,056,548. Anthrapyrimidone Sulphonic Acids and Process of Preparing the Same. Oct. 6, 1936.

Pat. 2,056,899. Substituted Amino-Trifluoro-Methyl-Benzenes. Oct. 6, 1936.

Pat. 2,057,455. Green Azodyestuffs. Oct. 13, 1936.

Pat. 2,057,948. Process of Preparing Indole Compounds. Oct. 20, 1936.

Pat. 2,058,222. Water-Insoluble Azo-Dyestuffs. Oct. 20, 1936.

Pat. 2,059,094. Azo Dyestuffs and Their Production. Oct. 27, 1936.

Pat. 2,059,466. Aromatic Imino Compounds and Process of Making Them. Nov. 3, 1936.

Pat. 2,059,476. Dyestuff of the Anthraquinone Series. Nov. 3, 1936.

Pat. 2,059,512. Monoazodyestuffs. Nov. 3, 1936.

Pat. 2,059,800. 4-Amino-Dinitro-Diphenylamines and Process of Preparing Them. Nov. 3, 1936.

Pat. 2,060,381. Metalliferous Hydroxyazo Dyes and Their Production. Nov. 10, 1936.

Pat. 2,060,563. Azo Dyestuffs Containing Chromium and Process of Preparing Them. Nov. 10, 1936.

Pat. 2,061,104. Azo Dyestuffs. Nov. 17, 1936.

Pat. 2,061,126. Water-Insoluble Azo Dyestuffs and Fiber Dyed Therewith. Nov. 17, 1936.

Pat. 2,061,159. Azodyestuffs and Their Production. Nov. 17, 1936.

Pat. 2,061,551. Disazodyestuffs. Nov. 24, 1936.

Pat. 2,061,860. Method of Dyeing and Printing Vegetable and Artificial Fibers. Nov. 24, 1936.

Pat. 2,062,458. Manufacture of Py-3-Hydroxytetrahydroxynaphthoquinolines. Dec. 1, 1936.

Pat. 2,062,547. Copper and Chromium Containing Acid Monoazo Dyestuffs. Dec. 1, 1936.

Pat. 2,062,614. Benzophenanthrenarylides. Dec. 1, 1936.

Pat. 2,062,842. Sulphation Products of Aliphatic Carbinols and a Process of Preparing Them. Dec. 1, 1936.

Pat. 2,063,147. Vat or Sulphur Dyestuff Preparation. Dec. 8, 1936.

Pat. 2,063,272. Rotproof Materials from Cellulose Fibers. Dec. 8, 1936.

Pat. 2,063,568. Dyestuffs of the Pyrene Series and Process of Preparing Them. Dec. 8, 1936.

Pat. 2,064,258. Triphenylmethane Dyestuffs. Dec. 15, 1936.

Pat. 2,065,026. Polynuclear Condensation Products Containing Keto Groups and Process of Producing Same. Dec. 22, 1936.

Pat. 2,065,680. Mono-Azodyestuffs. Dec. 29, 1936.

Pat. 2,065,900. Dihydroxystilbene-Dicarboxylic Acid and a Process of Preparing It. Dec. 29, 1936.

Pat. 2,066,707. Acid Wool Dyestuffs of the Anthraquinone Series. Jan. 5, 1937.

Pat. 2,066,915. Dioxazine Dyestuffs and a Process of Preparing Them. Jan. 5, 1937.

Pat. 2,066,985. Water-Insoluble Azodyestuffs. Jan. 5, 1937.

Pat. 2,066,986. Water-Insoluble Azodyestuffs. Jan. 5, 1937.

Pat. 2,067,127. Condensation Products of the Azabenzanthrone Series and Process of Making the Same. Jan. 5, 1937.

Pat. 2,067,132. Solid Diazo Salts. Jan. 5, 1937.

Pat. 2,067,138. Nuclear Substituted Acenaphthalic Acids and 1.4.5.8-Naphthalenetetracarboxylic Acids and Process of Preparing Them. Jan. 5, 1937.

Pat. 2,067,149. Azodyestuffs Insoluble in Water. Jan. 5, 1937.

Pat. 2,067,468. Acid Wool Dyestuffs of the Anthraquinone Series. Jan. 12, 1937.

Pat. 2,067,469. Acid Wool Dyestuffs of the Anthraquinone Series. Jan. 12, 1937.

Pat. 2,067,725. Azo Dyes for Acetate Silk and Their Production. Jan. 12, 1937.

Pat. 2,067,726. Water Insoluble Monoazo Dyes. Jan. 12, 1937.

Pat. 2,068,056. Acid Safranine Dyestuffs. Jan. 19, 1937.

Pat. 2,068,172. Mono-Azodyestuffs. Jan. 19, 1937.

Pat. 2,068,197. Production of Beta-Brazin-5.11-Dione. Jan. 19, 1937.

Pat. 2,068,800. Indol Sulphonic Acids. Jan. 26, 1937.

Pat. 2,068,989. Sulphonic Acids of Anthrapyrimidines. Jan. 26, 1937.

Pat. 2,069,039. Arylamino-Hydroxybenzenes. Jan. 26, 1937.

Pat. 2,069,158. Disazo-Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Jan. 26, 1937.

Pat. 2,069,159. Substituted Aminochrysenes. Jan. 26, 1937.

Pat. 2,069,473. Nitrogenous Condensation Products. Feb. 2, 1937.

Pat. 2,069,475. Dyestuffs of the Gallocyanine Series. Feb. 2, 1937.

Pat. 2,069,662. Production of 2.3-Dihydroindoles. Feb. 2, 1937.

Pat. 2,069,663. Vat Dyestuffs of the Anthraquinone Series and a Process of Preparing Them. Feb. 2, 1937.

Pat. 2,069,670. Thiazine Dyestuff and Process of Preparing It. Feb. 2, 1937.

Pat. 2,069,740. Monoazo Dyestuffs. Feb. 9, 1937.

Pat. 2,069,743. Azo Dyestuffs and Their Production. Feb. 9, 1937.

Pat. 2,070,104. Azodyestuffs Insoluble in Water. Feb. 9, 1937.

Pat. 2,070,119. Azo-Dyestuffs Insoluble in Water. Feb. 9, 1937.

Pat. 2,070,127. Process of Preparing Compounds of the Thiourea Series. Feb. 9, 1937.

Pat. 2,070,275. Colored Salts of Organic Ammonia Derivatives and Acid Derivatives of Nitrated Anilines. Feb. 9, 1937.

Pat. 2,070,739. Vat Dyestuff Preparation in Powder Form Especially Suitable for Printing. Feb. 16, 1937.

Pat. 2,071,130. Dyestuffs of the Pyrone Series. Feb. 16, 1937.

Pat. 2,071,372. Dyestuffs of the Fluorindine Series and a Process of Preparing Them. Feb. 23, 1937.

Pat. 2,071,468. Manufacture of Perylene. Feb. 23, 1937.

Pat. 2,071,702. Hydroxycarbazole Carboxylic Acid Arylamides. Feb. 23, 1937.

Pat. 2,072,062. Process of Dyeing Cellulose, Cotton or the Like. Feb. 23, 1937.

Pat. 2,072,288. Water Insoluble Azodyestuffs. Mar. 2, 1937.

Pat. 2,072,401. Phenyl-Pyridinium Sulphonic Acid Dyestuffs and a Process of Preparing Them. Mar. 2, 1937.

Pat. 2,072,539. Acid Triphenylmethane Dyestuffs. Mar. 2, 1937.

Pat. 2,073,000. Trisazodyestuffs. Mar. 9, 1937.

Pat. 2,073,022. Process for Effecting Carbazole Ring Formation of Compounds of the Anthraquinone Series. Mar. 9, 1937.

Pat. 2,073,086. Dyestuffs of the Xanthone Type and Process for Producing the Same. Mar. 9, 1937.

Pat. 2,073,098. Separation of Vat Dyestuff Isomers of the Naphthoylene Diarylimidazole Series. Mar. 9, 1937.

Pat. 2,073,116. Vat Dyestuff Preparations. Mar. 9, 1937.

Pat. 2,073,470. Mono Azo Dyestuffs. Mar. 9, 1937.

Pat. 2,074,645. Pyrene Compounds. Mar. 23, 1937.

Pat. 2,075,076. Monoazodyestuffs. Mar. 30, 1937.

Pat. 2,075,347. Tertiary Amines of the Benzene Series and a Process of Making the Same. Mar. 30, 1937.

Pat. 2,075,393. Hydroxyphenylaminoaryles of the Pyrene and Chrysene Series and Process of Producing Same. Mar. 30, 1937.

Pat. 2,075,455. Compounds of the Dibenzanthrone Series. Mar. 30, 1937.

Pat. 2,075,456. Compounds of the Dibenzanthrone Series. Mar. 30, 1937.

Pat. 2,076,143. Sulphur Dyes. Apr. 6, 1937.

Pat. 2,076,144. Vat Dyes. Apr. 6, 1937.

Pat. 2,076,872. Indigoid Vat Dyestuffs. Apr. 13, 1937.

Pat. 2,076,921. Azo Dyestuffs. Apr. 13, 1937.

Pat. 2,077,062. Azo-Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Apr. 13, 1937.

Pat. 2,077,063. Polymethine Dyestuffs and a Process of Preparing Them. Apr. 13, 1937.

Pat. 2,077,064. Condensation Products of the Acridine Series. Apr. 13, 1937.

Pat. 2,077,528. Azo Dyestuffs. Apr. 20, 1937.

Pat. 2,077,529. Sulphone Compounds. Apr. 20, 1937.

Pat. 2,077,539. Acid Wool Dyestuffs of the Anthraquinone Series. Apr. 20, 1937.

Pat. 2,077,863. Dyestuffs of the Oxazine Series and a Process of Preparing Them. Apr. 20, 1937.

Pat. 2,077,887. Dyestuffs of the Dioxazine Series Soluble in Water and a Process of Preparing Them. Apr. 20, 1937.

Pat. 2,077,893. Vat Dyestuffs of the Dibenzanthrone Series. Apr. 20, 1937.

Pat. 2,077,903. Process of Preparing 3-Aminoquinolines. Apr. 20, 1937.

Pat. 2,078,538. 4.5-Alkylsubstituted 2-Aminodiarylketones and Process of Preparing Them. Apr. 27, 1937.

Pat. 2,078,625. 5-Hydroxy-Hydrindene-Ortho-Carboxylic Acid. Apr. 27, 1937.

Pat. 2,078,996. New Dyestuffs of the Anthraquinone Series. May 4, 1937.

Pat. 2,079,463. Vat Dyestuffs of the Anthraquinone-Azine Series. May 4, 1937.

Pat. 2,079,499. Monoazo Dyestuffs. May 4, 1937.

Pat. 2,079,927. Thiazole Compounds. May 11, 1937.

Pat. 2,079,940. Pyridino Acylamino Anthraquinones. May 11, 1937.

Pat. 2,080,057. Aromatic Condensation Products. May 11, 1937.

Pat. 2,080,543. Treatment of Dyeings Prepared on Cellulose Materials by Means of Substantive Dyestuffs. May 18, 1937.

Pat. 2,080,704. Nitro-Dyestuffs and a Process of Preparing Them. May 18, 1937.

Pat. 2,081,017. Vat-Dyestuffs Preparations. May 18, 1937.

Pat. 2,081,244. Monoazo Dyes for Coloring Cellulose Esters. May 25, 1937.

Pat. 2,081,359. Anthraquinone Dyestuffs Capable of Being Chromed. May 25, 1937.

Pat. 2,081,718. Production of Aminoalkyl Sulphones. May 25, 1937.

Pat. 2,082,192. Acid Wool Dyestuffs of the Anthraquinone Series. June 1, 1937.

Pat. 2,082,275. Substituted Betaines. June 1, 1937.

Pat. 2,082,344. High Molecular Dyestuffs of the Dioxazine Series. June 1, 1937.

Pat. 2,082,358. 2-Methyl-3-Hyuroxyquinoline-4-Carboxylic Acids and a Process of Preparing Them. June 1, 1937.

Pat. 2,082,495. Azo Dyestuffs. June 1, 1937.

Pat. 2,083,018. Quinone Azo-Dyestuffs Soluble in Water and a Process of Preparing Them. June 8, 1937.

Pat. 2,083,019. Polyazo-Dyestuffs Soluble in Water and Process of Preparing Them. June 8, 1937.

Pat. 2,083,216. Monoazo Dyes. June 8, 1937.

Pat. 2,083,619. Method for the Preparation of Azo Dyes. June 15, 1937.

Pat. 2,083,888. Production of Dyestuffs of the Triarylmethane Series. June 15, 1937.

Pat. 2,083,890. Diamino Compounds and Process of Making Same. June 15, 1937.

Pat. 2,083,891. Sulphur Dyestuffs Derived from Indophenols. June 15, 1937.

Pat. 2,084,555. Colored Rubber Products and a Process of Producing Them. June 22, 1937.

Pat. 2,085,315. Ortho-Aminoazo Compound. June 29, 1937.

Pat. 2,085,809. Process for Dyeing Pelts, Hairs and Feathers. July 6, 1937.

Pat. 2,086,029. Nitro-Compound of Substituted Benzotrifluorides and Process of Preparing Them. July 6, 1937.

Pat. 2,086,031. Disazo Dyestuffs. July 6, 1937.

Pat. 2,086,337. Process for the Manufacture of Mixed Quinone Dyestuffs. July 6, 1937.

Pat. 2,086,690. Sulphonation Products of Acylated Amines and Process of Making Same. July 13, 1937.

Pat. 2,086,691. Process for Producing Amino Compounds of the Quinoline Series. July 13, 1937.

Pat. 2,086,704. Compounds of the Azabenzanthrone Series. July 13, 1937.

Pat. 2,086,822. Process for Producing Aromatic Asymmetrical Thiourea Derivatives. July 13, 1937.

Pat. 2,086,843. Anthraquinone Acridone Carbazoles. July 13, 1937.

Pat. 2,086,871. Dyestuffs of the Dioxazine Series. July 13, 1937.

Pat. 2,086,880. Polyazodyestuffs. July 13, 1937.

Pat. 2,087,133. Dyestuffs of the Naphthalene-1.4.5.8-Tetracarboxylic Acid Diimide Series. July 13, 1937.

Pat. 2,087,284. Process of Reserving Animal Fibers in Mixed Fabrics. July 20, 1937.

Pat. 2,087,425. Monoazodyestuffs. July 20, 1937.

Pat. 2,087,438. Dyestuffs of the Anthraquinone Series. July 20, 1937.

Pat. 2,087,565. Quaternary Ammonium Compounds and a Process of Preparing Them. July 20, 1937.

Pat. 2,087,715. Aromatic Acid Amides Containing the Trichloromethyl Group and a Process of Preparing Them. July 20, 1937.

Pat. 2,088,328. Monoazo Dyes and Process for Manufacturing the Same. July 27, 1937.

Pat. 2,088,353. Complex Metal Compounds of Azo Dyestuffs and Process for Their Production. July 27, 1937.

Pat. 2,088,907. Polyazo Dyestuffs. Aug. 3, 1937.

Pat. 2,088,911. Azo Dyestuffs and a Process of Making Them. Aug. 3, 1937.

Pat. 2,088,912. 2.4-Dimethyl-3-or-5-Nitrobenzylchloride and Process for Manufacturing the Same. Aug. 3, 1937.

Pat. 2,089,435. Vat Dyestuffs of the Anthraquinone Series. Aug. 10, 1937.

Pat. 2,089,569. Addition Products of Glycide to Organic Compounds. Aug. 10, 1937.

Pat. 2,089,633. Polymethine Dyestuffs. Aug. 10, 1937.

Pat. 2,089,920. Process for Developing Fabrics Printed with Vat Dyestuffs. Aug. 10, 1937.

Pat. 2,089,971. Condensation Products of 2.3-Hydroxynaphthoic Acid. Aug. 17, 1937.

Pat. 2,090,023. Anthraquinone Dyestuffs. Aug. 17, 1937.

Pat. 2,090,173. Diphenyl Derivatives and a Process of Preparing Them. Aug. 17, 1937.

Pat. 2,090,603. Condensation Products of 2.3-Hydroxynaphthoic Acid. Aug. 17, 1937.

Pat. 2,092,399. Dyestuffs of the Dioxazine Series and Process of Preparing Them. Sept. 7, 1937.

Pat. 2,092,517. Condensation Products of the Azabenzanthrone Series. Sept. 7, 1937.

Pat. 2,093,113. Amino-Chrysene-Sulphonic Acids and a Process of Preparing Them. Sept. 14, 1937.

Pat. 2,093,115. Aromatic Amines which Contain the Trifluoromethyl Group and a Process of Preparing Them. Sept. 14, 1937.

Pat. 2,093,214. 2-Acylacetylaminothiazole Compounds. Sept. 14, 1937.

Pat. 2,093,511. Azo Dyestuffs. Sept. 21, 1937.

Pat. 2,093,590. 2-Aminoquinizarin and Substitution Products Thereof and a Process of Preparing Them Sept. 21, 1937.

Pat. 2,094,224. Pyrene 3.5.8.10-Tetra-Sulphonic Acid and Derivatives Thereof. Sept. 28, 1937.

Pat. 2,094,227. Monobromopyrene and a Process of Preparing It. Sept. 28, 1937.

Pat. 2,094,414. Azo Dyestuffs. Sept. 28, 1937.

Pat. 2,094,463. Vat Dyestuffs of the Pyridonoanthraquinone Series. Sept. 28, 1937.

Pat. 2,094,832. Complex Metal Azo Compounds. Oct. 5, 1937.

Pat. 2,094,845. Dis- and Tris-Azo Dyestuffs and Process of Making Same. Oct. 5, 1937.

Pat. 2,094,952. Coloring Pelts, Furs, Hairs, Feathers and Products Manufactured from These Materials. Oct. 5, 1937.

Pat. 2,095,070. Dyeing Skins or Pelts. Oct. 5, 1937.

Pat. 2,095,468. Monoazodyestuffs. Oct. 12, 1937.

Pat. 2,095,484. Azodyestuffs. Oct. 12, 1937.

Pat. 2,096,295. Dyestuffs Capable of Being Chromed. Oct. 19, 1937.

Pat. 2,096,533. Basic Nitrogenous Condensation Products and Process of Making Same. Oct. 19, 1937.

Pat. 2,096,534. Quaternary Ammonium Compounds and Process of Making Same. Oct. 19, 1937.

Pat. 2,096,688. Vat Dyestuffs of the Anthraquinone Series and Process of Making Same. Oct. 19, 1937.

Pat. 2,096,896. Azodyestuffs. Oct. 26, 1937.

Pat. 2,097,112. Anthraquinone-Benzacridone Vat Dyestuffs. Oct. 26, 1937.

Pat. 2,097,421. Disazo-Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Oct. 26, 1937.

Pat. 2,097,734. Pigment Azo Dyestuffs. Nov. 2, 1937.

Pat. 2,097,864. Process of Preparing Amino-Carboxylic Acids and Products Obtainable Thereby. Nov. 2, 1937.

Pat. 2,098,097. Condensation Products of 1.2.3.4-Butylene-Dioxides and a Process of Making Same. Nov. 2, 1937.

Pat. 2,098,551. Reaction Products of an Ester-Like Wax and a Base. Nov. 9, 1937.

Pat. 2,098,590. Vat Dyestuffs of the Anthraquinone Series. Nov. 9, 1937.

Pat. 2,098,599. Yellow Substantive Dyestuff for Cotton. Nov. 9, 1937.

Pat. 2,098,643. Water-Soluble Azo-Dyestuffs. Nov. 9, 1937.

Pat. 2,098,782. Azo Dyestuffs. Nov. 9, 1937.

Pat. 2,098,927. 3-Amino-Quinaldine Derivatives and a Process of Preparing Them. Nov. 9, 1937.

Pat. 2,098,967. Azo Dyestuffs. Nov. 16, 1937.

Pat. 2,099,168. Azo Dyestuffs. Nov. 16, 1937.

Pat. 2,099,272. Water-Insoluble Azodyestuffs and Fiber Dyed Therewith. Nov. 16, 1937.

Pat. 2,099,525. Production of Water-Soluble Azo Dyestuffs. Nov. 16, 1937.

Pat. 2,099,689. Water-Insoluble Metal Salts of Phthalocyanine-Sulphonic Acids. Nov. 23, 1937.

Pat. 2,099,690. Water-Insoluble Salts of Phthalocyanine-Sulphonic Acids. Nov. 23, 1937.

Pat. 2,100,798. Condensation Products of Carbenium Compounds and Process of Preparing the Same. Nov. 30, 1937.

Pat. 2,101,321. Hydroxy Compounds of the Dibenzanthrone Series Dec. 7, 1937.

Pat. 2,101,524. Quaternary Ammonium Compounds and Process of Preparing Them. Dec. 7, 1937.

Pat. 2,101,696. Process for Producing Two-Color Effects on Skins or Furs. Dec. 7, 1937.

Pat. 2,102,115. Monoazodyestuffs. Dec. 14, 1937.

Pat. 2,102,593. Azo Dyestuffs. Dec. 21, 1937.

Pat. 2,103,778. Azodyestuffs. Dec. 28, 1937.

Pat. 2,103,846. Triphenylmethane Dyestuffs. Dec. 28, 1937.

Pat. 2,104,092. Quaternary Ammonium Compounds. Jan. 4, 1938.

Pat. 2,104,286. Phosphorous Acid Esters of Hydroxyalkylamino Anthraquinones. Jan. 4, 1938.

Pat. 2,104,505. Dyeings on Cellulosic Fibers. Jan. 4, 1938.

Pat. 2,104,595. Manufacture of Substantive Dyestuffs. Jan. 4, 1938.

Pat. 2,104,891. Vat Dyestuffs of the Acylaminoanthraquinone Series Containing a Thiazolic Radical and Process of Making Same. Jan. 11, 1938.

Pat. 2,105,840. Vat Dyestuffs of the Pyrazinoanthraquinone Series. Jan. 18, 1938.

Pat. 2,105,919. Water Insoluble Ortho-Disazo Dyestuffs and Fiber Dyed Therewith. Jan. 18, 1938.

Pat. 2,105,955. Basic Azo-Dyestuffs and Their Production. Jan. 18, 1938.

Pat. 2,106,539. Stable Diazo Salt Preparations and Process of Preparing Them. Jan. 25, 1938.

Pat. 2,106,876. Azo Dyestuffs. Feb. 1, 1938.

Pat. 2,107,000. Acid Wool Dyestuffs of the Anthraquinone Series. Feb. 1, 1938.

Pat. 2,107,910. 2.6-Dimethylnaphthalene-1-Sulphonic Acid and a Process of Preparing It. Feb. 8, 1938.

Pat. 2,107,911. Process of Preparing 1-Methyl-Naphthalene-7-Sulphonic Acid and 1-Methyl-7-Hydroxynaphthalene. Feb. 8, 1938.

Pat. 2,107,941. Fast Brown Leather Dyestuffs and a Process of Preparing Them. Feb. 8, 1938.

Pat. 2,108,126. Azo-Dyestuffs of the Anthraquinone Series. Feb. 15, 1938.

Pat. 2,108,142. Acid Wool Dyestuffs. Feb. 15, 1938.

Pat. 2,108,144. Vat Dyestuffs Containing Nitrogen and Process of Making Same. Feb. 15, 1938.

Pat. 2,108,413. Condensation Products of the Anthraquinone Series. Feb. 15, 1938.

Pat. 2,108,606. Trifluoromethyl-Phenylsulphides, Oxidation Products Thereof and Process of Preparing the Same. Feb. 15, 1938.

Pat. 2,108,879. 4-Hydroxynaphthostyrile Compounds. Feb. 22, 1938.

Pat. 2,108,994. Dyestuff Printing Paste. Feb. 22, 1938.

Pat. 2,109,024. Production of Azo Dyestuffs. Feb. 22, 1938.

Pat. 2,109,116. Derivatives of the Anthrapyrimidine Series. Feb. 22, 1938.

Pat. 2,109,182. Monoazo Compounds and Their Production. Feb. 22, 1938.

Pat. 2,109,183. Process for the Manufacture of Azo Dyestuffs. Feb. 22, 1938.

Pat. 2,109,401. Aminoalkyl-Sulphonic Acids and Process of Preparing Them. Feb. 22, 1938.

Pat. 2,109,518. Process for Producing Compounds of the Phenanthrene Series. Mar. 1, 1938.

Pat. 2,109,552. Azo Dyestuffs and Their Metalliferous Derivatives. Mar. 1, 1938.

Pat. 2,109,833. New Compounds of the Benzofluoranthene Series. Mar. 1, 1938.

Pat. 2,110,394. Leather Dyed with Mono- or Disazo Dyestuffs. Mar. 8, 1938.

Pat. 2,110,629. Nitro-Derivatives of 2-Hydroxynaphthalene-3-Carboxylic Acid and a Process for Preparing Them. Mar. 8, 1938.

Pat. 2,110,694. Water-Insoluble Azo Dyestuffs. Mar. 8, 1938.

Pat. 2,110,712. Sulphonium Bases. Mar. 8, 1938.

Pat. 2,111,011. Vat Dyestuffs of the Anthraquinone Series. Mar. 15, 1938.

Pat. 2,111,029. Production of Complex Metal Compounds of Azo Dyestuffs. Mar. 15, 1938.

Pat. 2,111,260. Water-Soluble Addition Compounds, Containing Sulphur, of Alkyl or Aralkyl Halides and Processes of Preparing Them. Mar. 15, 1938.

Pat. 2,111,270. Metalliferous Azo Dyestuffs and a Process for Producing Same. Mar. 15, 1938.

Pat. 2,111,559. Azo Dyestuffs Containing a Heavy Metal in a Complex Form. Mar. 22, 1938. Re. 22,046, Mar. 10, 1942.

Pat. 2,111,890. Mono-Azodyestuffs Insoluble in Water. Mar. 22, 1938.

Pat. 2,112,403. Azo Dyestuffs. Mar. 29, 1938.

Pat. 2,113,146. Manufacture of Arylaminonaphthalene Derivatives. Apr. 5, 1938.

Pat. 2,113,151. Monoazo-Dyestuffs. Apr. 5, 1938.

Pat. 2,115,311. Dyestuffs of the Oxazine Series and a Process of Preparing Them. Apr. 26, 1938.

Pat. 2,115,317. Improvements in the Dyeing of Textiles. Apr. 26, 1938.

Pat. 2,115,445. Production of Compounds of the Azabenzanthrone Series. Apr. 26, 1938.

Pat. 2,115,446. Vat Dyestuffs of the Anthraquinoneazine Series. Apr. 26, 1938.

Pat. 2,115,508. Dyestuff Sulphonic Acids of the Dioxazine Series and a Process of Preparing Them. Apr. 26, 1938.

Pat. 2,116,196. Acylated Phthalocyanines. May 3, 1938.

Pat. 2,116,206. Polyazo Dyestuffs. May 3, 1938.

Pat. 2,116,583. Wetting Agents Useful for Alkaline Mercerizing Solution. May 10, 1938.

Pat. 2,116,913. Heavy Metal Azomethine Diarylene Dihydroxylates. May 10, 1938.

Pat. 2,117,431. Esters of Leucoacylamino-Anthrapyrimidines. May 17, 1938.

Pat. 2,117,614. Production of Fast Dyeings. May 17, 1938.

Pat. 2,117,623. Vat-Dyestuff Preparations for Printing Textiles. May 17, 1938.

Pat. 2,117,720. Ketone-Nitrile Condensation Products. May 17, 1938.

Pat. 2,117,730. High-Molecular Organic Compounds. May 17, 1938.

Pat. 2,117,731. Azodyestuffs. May 17, 1938.

Pat. 2,117,733. Azo Dyestuffs. May 17, 1938.

Pat. 2,117,745. Azo Dyes. May 17, 1938.

Pat. 2,117,813. Anthraquinone Derivatives. May 17, 1938.

Pat. 2,118,192. Mixtures of Dyestuffs. May 24, 1938.

Pat. 2,118,661. Azo Dyes and Process for Manufacturing the Same. May 24, 1938.

Pat. 2,118,986. Solid Diazo Salts. May 31, 1938.

Pat. 2,119,123. Condensation Products of the Diphenylamine Series. May 31, 1938.

Pat. 2,119,882. Aminotrifluoromethyl-Aryl-Sulphonic Acids and Process of Preparing Them. June 7, 1938.

Pat. 2,119,891. Nitrosamines. June 7, 1938.

Pat. 2,120,432. O-Hydroxyazo Dyestuffs. June 14, 1938.

Pat. 2,120,560. Azo Dyestuffs and Their Production. June 14, 1938.

Pat. 2,120,573. Acid Wool Dyestuffs. June 14, 1938.

Pat. 2,121,320. Quinophthalonemonosulphonic Acids and Process of Preparing Them. June 21, 1938.

Pat. 2,121,330. Benzene Derivatives Containing Halogenated Methyl Groups and Process of Preparing Them. June 21, 1938.

Pat. 2,121,331. Substitution Products of Diphenylene Oxide and Process of Preparing Them. June 21, 1938.

Pat. 2,121,337. Dyeing Mixed Fibers. June 21, 1938.

Pat. 2,122,127. Ortho-Hydroxyazo Dyes and Process for Manufacturing the Same. June 28, 1938.

Pat. 2,122,137. Alkyloxy and Aryloxy Phthalocyanines. June 28, 1938.

Pat. 2,122,601. Vat Dyestuffs of the Anthraquinone Series. July 5, 1938.

Pat. 2,122,798. Acid Dyestuffs of the Anthraquinone Series Capable of Being Chromed. July 5, 1938.

Pat. 2,123,154. Dyeing of Textiles. July 5, 1938.

Pat. 2,123,245. Naphthene-Hydrocarbon-Amino-Anthrapyrimidines. July 12, 1938.

Pat. 2,123,246. Abietinyl-Amino-Anthrapyrimidines. July 12, 1938.

Pat. 2,123,251. Vat Dyestuffs of the Pyrazine Series. July 12, 1938.

Pat. 2,123,375. Anthraquinonyl Amides of Aromatic Dicarboxylic Acids. July 12, 1938.

Pat. 2,123,748. Metalliferous Nitro-Azo-Dyestuffs July 12, 1938.

Pat. 2,123,749. Polyamino-1.9-Anthrapyrimidines and a Process of Producing Them. July 12, 1938.

Pat. 2,123,834. Oxazole Dyestuffs of the Anthraquinone Series and a Process of Preparing Them. July 12, 1938.

Pat. 2,124,237. Process for Producing Condensation Products of the Anthraquinone Series. July 19, 1938.

Pat. 2,124,238. Process for Producing Pyrimidino-Anthraquinone Derivatives and Products Thereof. July 19, 1938.

Pat. 2,124,299. Phthalocyanine Dyestuff. July 19, 1938.

Pat. 2,124,336. Arylides of Hydroxy-Ortho-Carboxy-Benzoacridones. July 19, 1938.

Pat. 2,124,594. Diazoamino Compounds. July 26, 1938.

Pat. 2,124,863. Methyl-Aminonaphthalene-Sulphonic Acids and Process of Preparing Them. July 26, 1938.

Pat. 2,124,881. Azo Dyes and Process for Manufacturing the Same. July 26, 1938.

Pat. 2,124,891. Compounds of the 3.4.8.9-Dibenzopyrene-5.10-Quinone Series. July 26, 1938.

Pat. 2,124,899. Process for Preparing Azo Dyestuffs on the Fiber. July 26, 1938.

Pat. 2,125,087. Azo Dyestuff Preparations. July 26, 1938.

Pat. 2,125,625. Azo Dyestuffs. Aug. 2, 1938.

Pat. 2,126,360. Polycyclic Compounds from Chrysene and a Process of Preparing Them. Aug. 9, 1938.

Pat. 2,126,468. Azo Dyestuffs. Aug. 9, 1938.

Pat. 2,126,477. Azo Dyestuffs and a Process of Producing Same. Aug. 9, 1938.

Pat. 2,126,841. Azo Dyestuffs and Their Production. Aug. 16, 1938.

Pat. 2,126,964. Printing Animal Fibers. Aug. 16, 1938.

Pat. 2,127,096. Polycyclic Aromatic Aldehydes and Carboxylic Acids and a Process of Preparing Them. Aug. 16, 1938.

Pat. 2,127,470. Production of Metallo Polyazo Dyes. Aug. 16, 1938.

Pat. 2,127,471. Azo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Aug. 16, 1938.

Pat. 2,127,678. Cupriferous Azo Dyestuffs. Aug. 23, 1938.

Pat. 2,127,697. Water-Insoluble Azo Dyestuffs. Aug. 23, 1938.

Pat. 2,127,986. Azo Dyestuffs. Aug. 23, 1938.

Pat. 2,128,153. Polyazo Dyestuffs. Aug. 23, 1938.

Pat. 2,128,255. Azo Dyestuffs. Aug. 30, 1938.

Pat. 2,128,256. Azo Dyestuffs. Aug. 30, 1938.

Pat. 2,128,508. Azo Dyestuffs. Aug. 30, 1938.

Pat. 2,128,514. Vat Dyestuffs and a Process of Preparing Them. Aug. 30, 1938.

Pat. 2,128,537. Disazo Dyestuffs. Aug. 30, 1938.

Pat. 2,128,684. Chrysene Carboxylic Acids and a Process of Preparing Them. Aug. 30, 1938.

Pat. 2,129,136. Solid Diazonium Salt. Sept. 6, 1938.

Pat. 2,129,141. Amino-Anthraquinone Compounds. Sept. 6, 1938.

Pat. 2,129,964. Azo Dyestuffs. Sept. 13. 1938.

Pat. 2,130,016. Dyestuffs of the Dioxazine Series and a Process of Preparing Them. Sept. 13, 1938.

Pat. 2,130,505. Polyamino Carboxylic Acids and Process of Making Same. Sept. 20, 1938.

Pat. 2,131,142. Addition Products of Glycide. Sept. 27, 1938.

Pat. 2,131,176. Vat Dyestuffs of the Benzanthronylaminoanthraquinone Series. Sept. 27, 1938.

Pat. 2,131,480. Vat Dyestuffs of the Anthraquinone Series. Sept. 27, 1938.

Pat. 2,131,712. Organic Dyestuffs and Process for Producing Them. Sept. 27, 1938.

Pat. 2,131,731. Diphenyl Derivative. Oct. 4, 1938.

Pat. 2,131,866. Water Insoluble Azo Dyestuffs. Oct. 4, 1938.

Pat. 2,132,190. Vat Dyestuff. Oct. 4, 1938.

Pat. 2,132,191. Compound of the Pyrazoloanthraquinone Series. Oct. 4, 1938.

Pat. 2,132,193. Production of Partially Hydrogenated Hydroxy Compounds. Oct. 4, 1938.

Pat. 2,133,100. Producing Azanthracene Derivatives. Oct. 11, 1938.

Pat. 2,133,125. Agent for Sizing Textile Fibers and a Process of Applying It. Oct. 11, 1938.

Pat. 2,133,340. Acylamino Phthalocyanine. Oct. 18, 1938.

Pat. 2,133,350. Sulphur Dyes of 3.4.5.6-Dibenzocarbazole. Oct. 18, 1938.

Pat. 2,133,374. Ortho-Hydroxyazo Dyes and Process of Producing the Same. Oct. 18, 1938.

Pat. 2,133,389. 1'-Chloro-1-Methyl-5-Nitronaphthalene and Process for Manufacturing the Same. Oct. 18, 1938.

Pat. 2,133,439. Monoazo Dyestuffs. Oct. 18, 1938.

Pat. 2,133,671. Azo Dyestuffs. Oct. 18, 1938.

Pat. 2,133,780. Chromable Dyestuffs of the Triarylmethane Series and Process of Preparing Them. Oct. 18, 1938.

Pat. 2,134,038. Monoazo Dyestuffs. Oct. 25, 1938.

Pat. 2,134,505. Dyestuff-Sulphonic Acids of the Dioxazine Series and Process of Preparing Them. Oct. 25, 1938.

Pat. 2,134,728. Azo Dyestuffs. Nov. 1, 1938.

Pat. 2,135,008. Water-Insoluble Azo Dyestuffs. Nov. 1, 1938.

Pat. 2,135,258. Leuco Esters of the Anthraquinone Series. Nov. 1, 1938.

Pat. 2,135,259. Esters of High Molecular Weight. Nov. 1, 1938.

Pat. 2,135,433. Azo Dyestuffs. Nov. 1, 1938.

Pat. 2,135,469. Monoazo Dyestuffs. Nov. 1, 1938.

Pat. 2,135,633. Dyeing Process. Nov. 8, 1938.

Pat. 2,136,300. Azo Dyestuffs. Nov. 8, 1938.

Pat. 2,136,507. Dyestuffs of the Safranine Series. Nov. 15, 1938.

Pat. 2,136,757. After-Treatment of Dyeings on Cellulosic Fibers. Nov. 15, 1938.

Pat. 2,137,287. Diamides of Organic Dicarboxylic Acids and Process of Producing Same. Nov. 22, 1938.

Pat. 2,137,295. Nitrogenous Condensation Products and Process of Producing Same. Nov. 22, 1938.

Pat. 2,123,113. Onium-Methyl Benzenes, Useful for Improving the Fastness of Dyeings. Nov. 29, 1938.

Pat. 2,138,381. Compounds of the Anthrapyridine and Anthrapyrimidine Series. Nov. 29, 1938.

Pat. 2,138,457. Process for Improving the Fastness of Dyeings. Nov. 29, 1938.

Pat. 2,138,458. Process for Improving the Fastness of Substantive Dyeings. Nov. 29, 1938.

Pat. 2,138,553. Dyeings on Cellulose Esters. Nov. 29, 1938.

Pat. 2,138,759. Dyestuffs of the Anthracene Series and a Process of Preparing Them. Nov. 29, 1938.

Pat. 2,143,717. Vat Dyestuffs of the Anthraquinone Series. Jan. 10, 1939.

Pat. 2,143,830. Vat Dyestuffs Derived from 1.4.5.8-Naphthalene-Tetra-Carboxylic Acid and a Process of Preparing Them. Jan. 10, 1939.

Pat. 2,144,365. Vat Dyestuffs. Jan. 17, 1939.

Pat. 2,144,704. Intermediate for Water-Insoluble Azo Dyestuffs. Jan. 24, 1939.

Pat. 2,145,051. Halogenated Peri-Naphthindenones. Jan. 24, 1939.

Pat. 2,146,646. Vat Dyestuff Printing. Feb. 7, 1939.

Pat. 2,147,401. Water-Soluble Salts of Amidines and Derivatives Thereof. Feb. 14, 1939.

Pat. 2,147,569. Vat Dyestuffs of the Anthraquinone Series. Feb. 14, 1939.

Pat. 2,147,570. Vat Dyestuffs of the Anthraquinone Series. Feb. 14, 1939.

Pat. 2,147,834. Azo Dyestuffs. Feb. 21, 1939.

Pat. 2,148,920. Process for Producing Compounds of the Azole Series. Feb. 28, 1939.

Pat. 2,149,051. Water-Insoluble Azo Dyestuffs. Feb. 28, 1939.

Pat. 2,149,064. Anthraquinone Derivatives and Process of Preparing the Same. Feb. 28, 1939.

Pat. 2,149,073. Azo Dyestuffs. Feb. 28, 1939.

Pat. 2,149,211. Colored Rubber Products and a Process of Producing Them. Feb. 28, 1939.

Pat. 2,149,212. Colored Rubber Products and a Process of Producing Them. Feb. 28, 1939.

Pat. 2,149,236. Azodyestuffs Insoluble in Water and Fiber Dyed Therewith. Feb. 28, 1939.

Pat. 2,149,494. Water-Insoluble Azo Dyestuffs. Mar. 7, 1939.

Pat. 2,150,001. Manufacture of Di-(γ-Chloro-Hydroxypropyl) Arylamines. Mar. 7, 1939.

Pat. 2,150,772. Dyes. Mar. 14, 1939.

Pat. 2,150,787. Mono-Azo Acid Wool Dyestuff. Mar. 14, 1939.

Pat. 2,150,793. Dyestuffs of the Anthraquinone Series. Mar. 14, 1939.

Pat. 2,150,968. Production of Conversion Products from Cellulose or Cellulosic Materials. Mar. 21, 1939.

Pat. 2,151,513. Sulphur Dyes. Mar. 21, 1939.

Pat. 2,151,518. Azo Dyestuff. Mar. 21, 1939.

Pat. 2,151,531. Copper Complex Compounds of Polyazo Dyestuffs. Mar. 21, 1939.

Pat. 2,151,543. Acid Wool Dyestuff. Mar. 21, 1939.

Pat. 2,151,857. Water Insoluble Azo Dyestuffs. Mar. 28, 1939.

Pat. 2,152,007. Azo Dyestuffs and Their Production. Mar. 28, 1939.

Pat. 2,152,480. Compounds of the Anthraquinone Series. Mar. 28, 1939.

Pat. 2,152,519. Dianthrapyridones. Mar. 28, 1939.

Pat. 2,152,613. Acid Indolephenylmethane Dyestuffs. Mar. 28, 1939.

Pat. 2,152,652. Metalliferous Azo Dyes. Apr. 4, 1939.

Pat. 2,153,018. Disazo Dyestuffs Insoluble in Water and Fiber Dyed Therewith. Apr. 4, 1939.

Pat. 2,153,059. Chromable Dyestuffs of the Triarylmethane Series and Process of Preparing Them. Apr. 4, 1939.

Pat. 2,153,531. Metalliferous Azo Dyes. Apr. 4, 1939.

Pat. 2,153,539. Water-Insoluble Azo Dyestuffs and Fiber Dyed Therewith. Apr. 11, 1939.

Pat. 2,153,994. Dehydrobinaphthylenediimines. Apr. 11, 1939.

Pat. 2,154,176. Carbazole Derivatives. Apr. 11, 1939.

Pat. 2,154,186. Water-Soluble Azo Dyestuffs. Apr. 11, 1939.

Pat. 2,154,837. Monoazo Dyestuffs Insoluble in Water. Apr. 18, 1939.

Pat. 2,154,838. Monoazo Dyestuffs Soluble in Water. Apr. 18, 1939.

Pat. 2,154,889. Compounds of the Pyrimidines Series. Apr. 18, 1939.

Pat. 2,154,912. Production of Dyestuffs of the Phthalocyanine Series. Apr. 18, 1939.

Pat. 2,154,926. Dyestuffs of the Triarylmethane Series. Apr. 18, 1939.

TRADE-MARKS

OFFICIAL GAZETTE, NOVEMBER 9, 1948

[VOL. 616. No. 2]

ACT OF 1905

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication. As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Marks published for opposition under the act of 1946 follow the 1905 publications.

CLASS 1

RAW OR PARTLY PREPARED MATERIALS

Ser. No. 511,647. ROSS-GOULD CO., St. Louis, Mo. Filed Oct. 28, 1946.

ROSSALOY

FOR COMMINUTED METALLIC MINERALS FOR USE IN POWDERED METALLURGY.
Claims use since Oct. 19, 1945.

CLASS 2

RECEPTACLES

Ser. No. 506,232. DANIEL EISENBERG, Plainfield, N. J. Filed July 25, 1946.

"KLOSET KADDY"

No claim is made to the word "Kloset" apart from the mark.
FOR COLLAPSIBLE COMBINATION SHOE AND CANE AND UMBRELLA HOLDER MADE OF CLOTH, ADAPTED TO BE SUSPENDED IN A CLOSET OR FROM A DOOR OR WALL.
Claims use since July 16, 1946.

CLASS 5

ADHESIVES

Ser. No. 481,279. THE FIRESTONE TIRE AND RUBBER COMPANY, doing business as Firestone Industrial Products Company, Akron, Ohio. Filed Mar. 24, 1945.

LOX

FOR ADHESIVE CEMENT TO BE USED IN ADHERING RUBBER, SYNTHETIC RUBBER, FABRIC, WOOD, METAL, LEATHER, MOLDED SYNTHETIC PLASTIC MATERIAL, AND UPHOLSTERY.
Claims use since Nov. 1, 1944.

Ser. No. 491,096. INDUSTRIAL TAPE CORPORATION, New Brunswick, N. J. Filed Nov. 5, 1945.

TEXCEL

Applicant is the owner of registration No. 385,834.
FOR PRESSURE-SENSITIVE ADHESIVE TAPES MADE PRINCIPALLY OF CELLULOSE AND PAPER BACKINGS.
Claims use since Mar. 3, 1939.

Ser. No. 505,804. CIBA LIMITED, Basel, Switzerland. Filed July 18, 1946.

ARALDITE

FOR SYNTHETIC RESINOUS ADHESIVES FOR BONDING METALS, GLASS, CERAMICS, AND/OR PLASTICS.
Claims use since May 15, 1946.

Ser. No. 513,916. THE VITRON CORPORATION, Wilmington, Del. Filed Dec. 7, 1946.

Vitron

FOR CEMENTS THAT CONTAIN GLASS FIBERS AND HAVE ADHESIVE PROPERTIES.
Claims use since Oct. 30, 1946.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Ser. No. 508,540. MICHIGAN CHEMICAL CORPORATION, St. Louis, Mich. Filed Sept. 5, 1946.

PESTMASTER

FOR INSECTICIDE IN POWDER FORM USED FOR THE CONTROL OF INSECTS.
Claims use since July 15, 1945.

Ser. No. 509,286. JAMES HOWARD HEAL, doing business as Treatment Service and Engineering Company, San Francisco, Calif. Filed Sept. 18, 1946.

FLAXTREAT

No claim is made to the word "Flax" apart from the mark.

FOR GROUND FLAX SEED MIXED WITH OTHER CHEMICALS USED IN TREATING EVAPORATED WATER IN MAKING FRESH WATER FROM BRINE.

Claims use since Aug. 13, 1946.

Ser. No. 519,516. NATHAN B. COOPER, doing business as Cooper Drug Company, Detroit, Mich. Filed Mar. 25, 1947.

ASPIR-PLUS

FOR MEDICINAL TABLETS CONTAINING ACETPHENETIDIN, ASPIRIN, AND CAFFEIN.

Claims use since Mar. 16, 1943.

Ser. No. 523,267. RICHARD HUDNUT, New York, N. Y. Filed May 29, 1947.

DU BARRY ROSE

Applicant is owner of registrations Nos. 37,959, 56,855, 87,889, 88,881, 232,402, 307,276, and 414,195, all for the word "Du Barry." The word "Rose" is disclaimed.

FOR FACE POWDER, ROUGE AND LIPSTICK.

Claims use since Feb. 20, 1947.

CLASS 14

METALS AND METAL CASTINGS AND FORGINGS

Ser. No. 517,116. THE CARPENTER STEEL COMPANY, Reading, Pa. Filed Feb. 7, 1947.

CARPENTER
STAINLESS STEEL No. 4-HMo

The words "Carpenter Stainless Steel" are disclaimed apart from the mark.

FOR STEEL IN THE FORM OF WIRE, STRIPS, BARS, BILLETS AND SHAPES.

Claims use since Jan. 4, 1947.

CLASS 19

VEHICLES

Ser. No. 486,013. U. S. AUTOMATIC CORPORATION, Amherst, Ohio. Filed July 19, 1945.

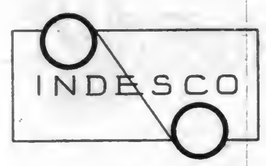
No claim is made to the word "Automatic" apart from the mark shown. The border of the shield of the mark is lined for the color red, as is also the cross band and the word "Automatic," the panel between the top of the shield and the cross band being lined for the color blue, and the word "Automatic" appearing on a white backgound.

FOR SCREW MACHINE PRODUCTS—NAMELY, THE FOLLOWING GOODS FOR MOTOR VEHICLES: END CONNECTIONS FOR BRAKE CONTROL RODS, DRIVER'S DOOR HINGES, AND SPRING ADJUSTING KNOBS; ALSO, AXLES FOR FARM VEHICLES, AXLE HOUSINGS, DETACHABLE COUPLING BODIES, SEAT SUPPORT AND BATTERY HOLD-DOWN BOLTS, FLOAT ROD BUTTONS, PLUNGER BUTTONS FOR USE IN VEHICLES SUCH AS TRACTORS AND JEEPS, DRIVE CAPS, TRAILER CONNECTIONS, CONNECTORS, CHECK CUPS, DRILLED, STIPPED, AND TAPERED DOWELS, TRAILING AXLE KNUCKLE DISKS, HANGERS, BRAKE SHOE HANGERS, HUBS, BAR LATCHES, BREATHER NIPPLES, AIR FILTER NUTS, RUDDER STUFFING BOX PACKING NUTS, STEERING BAND ADJUSTING NUTS, TIE ROD NUTS, STEERING BRAKE DRUM GEAR NUTS, BELL CRANK PINS, BRAKE ANCHOR PINS, CLEVIS PINS, COMPENSATING CHAIN PINS, COUPLING PINS, DRAG LINK PINS, EJECTOR PINS, EYE BOLT PINS, FLOAT LEVER PINS, DRIVER'S DOOR HOLD-OPEN PINS, FRONT WHEEL STEERING KNUCKLE PINS, HAND BRAKE BELL CRANK PIVOT PINS, INNER THRUST WASHER DRIVE PINS, DRIVER'S DOOR OPERATING LEVER LINK PINS, SPRING SHACKLE PINS, SIDE GUARD LOCK HINGE PINS, STEERING ROD PINS, STEERING LEVER LATCH GUIDE PINS, THROTTLE CONTROL HAND LEVER PINS, TRANSMISSION CRANK OIL PINS, TRIGGER SLIDE PINS, TRUNNION PINS, YOKE PINS, RADIATOR INLET PIPES, STEP HANGER BOLTING PLATES, PRELOADING COLLAPSING RODS, LOST MOTION SLEEVES, STEERING CRANK PIN SLEEVES, DRIVER'S DOOR HOLD-OPEN PIN STOPS, RADIATOR TOP TANK STUDS, AND WHEEL STUDS.

Claims use since June 24, 1942.

Ser. No. 496,960. IRVING HERMAN AND ANNA HERMAN, doing business as Glostex Products, Chicago, Ill., assignor to Glostex Products, Inc., Chicago, Ill., a corporation of Illinois. Filed Feb. 20, 1946.

GLOSTEX



FOR AUTOMOBILE SEAT COVERS.

Claims use since Feb. 15, 1946.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Ser. No. 506,666. INDUSTRIAL ELECTRONICS SERVICE CO., Brooklyn, N. Y. Filed Aug. 1, 1946.

The schematic drawing of the tape and reels shown is disclaimed except in connection with the remainder of the mark as shown.

FOR MAGNETIC WIRE RECORDERS, WIRE WINDING REELS THEREFOR, AUDIO AMPLIFIERS, RADIO RECEIVERS, ELECTRIC MOTOR CLUTCHES, RADIO TRANSMITTERS, MAGNETIC TAPE RECORDERS, RADIO TUNING DIALS, CONDENSERS, AND COILS AND ELECTRONIC CONTROL TUBES.

Claims use since Nov. 15, 1945.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 500,902. SAXON TOY CORPORATION, Brooklyn, N. Y. Filed Apr. 25, 1946.

STRIKE-LITE

The word "Lite" is disclaimed apart from the mark as shown.

FOR ELECTRICALLY ACTUATED BOARD-TYPE BASEBALL GAME UTILIZING STEEL BALLS AND A DIAL INDICATOR.

Claims use since Mar. 1, 1946.

Ser. No. 500,904. SAXON TOY CORPORATION, Brooklyn, N. Y. Filed Apr. 25, 1946.

TRAVEL-LITE

The word "Lite" is disclaimed apart from the mark as shown.

FOR AN ELECTRICALLY ACTUATED BOARD-TYPE GEOGRAPHIC GAME UTILIZING ARROW INDICATORS, PLASTIC TOY PLANES, AND A MAP OF THE UNITED STATES.

Claims use since Mar. 1, 1946.

Ser. No. 501,336. "PENDULA" PRODUCTS COMPANY, East Woodbury, N. J. Filed May 2, 1946.

"Pendula"

FOR JUVENILE AMUSEMENT DEVICES—NAMELY, LAWN, NURSERY, AND PLAYROOM SWINGS IN WHICH ARCUATE MOTION TAKES PLACE ABOUT ONE OR MORE FIXED AXES, AND ARCUATE SWINGS AND GLIDERS WHERE THE ARCUATE MOVEMENT TAKES PLACE GENERALLY PARALLEL TO ONE OR MORE ARCUATE TRACKS OR SUPPORTING SURFACES.

Claims use since Apr. 15, 1946.

Ser. No. 501,337. "PENDULA" PRODUCTS COMPANY, East Woodbury, N. J. Filed May 2, 1946.

"Modeleisure"

FOR JUVENILE AMUSEMENT DEVICES—NAMELY, LAWN, NURSERY, AND PLAYROOM SWINGS IN WHICH ARCUATE MOTION TAKES PLACE ABOUT ONE OR MORE FIXED AXES, AND ARCUATE SWINGS AND GLIDERS WHERE THE ARCUATE MOVEMENT TAKES PLACE GENERALLY PARALLEL TO ONE OR MORE ARCUATE TRACKS OR SUPPORTING SURFACES.

Claims use since Apr. 15, 1946.

Ser. No. 505,482. JOHN COMFORT, Nahant, Mass. Filed July 12, 1946.

The word "Play" is disclaimed apart from the mark.

FOR A GAME OF SKILL EMPLOYING A GAME BOARD HAVING A PLURALITY OF POCKETS FOR RECEIVING BALLS USED BY THE PLAYERS IN THE PLAYING THEREOF.

Claims use since June 3, 1946.

Ser. No. 507,256. HANNA W. JOHNSON, Des Moines, Iowa. Filed Aug. 12, 1946.

Kno-Yo-Notes

FOR CARD GAME.

Claims use since June 26, 1946.

Ser. No. 508,038. JOSEPH J. GILGAN, JR., doing business as Bubble Bait Company, Los Angeles, Calif. Filed Aug. 26, 1946.

BUBBLE BAIT 'EM

The word "Bait" is disclaimed apart from the mark.
FOR ARTIFICIAL FISH BAIT AND LURES.
Claims use since Aug. 1, 1946.

Ser. No. 509,103. ROYAL SOCIETY, INC., New York, N. Y. Filed Sept. 14, 1946.

Royal Society

FOR TOY KITS COMPRISING TEXTILE MATERIAL CUT-OUTS AND NOTIONS FOR ASSEMBLY INTO TOY ANIMALS.
Claims use since Aug. 30, 1946.

Ser. No. 511,193. RAYMOND M. WINNICK, doing business as Toddler Toys, Bridgeport, Conn. Filed Oct. 19, 1946.

TRAYPLAY

FOR EDUCATIONAL TOY COMPRISING A DEVICE TO BE ATTACHED TO AND EXTENDING OVER THE TRAY OF A HIGHCHAIR OR THE LIKE AND HAVING MOUNTED THEREON A PLURALITY OF BEADS AND BLOCKS OF IRREGULAR SHAPE WITH SUITABLE TOYS SUCH AS BEADED DOLLS OR OTHER ATTENTION-ATTRACTING AND AMUSING DEVICES BEING SUSPENDED THEREFROM.
Claims use since May 12, 1946.
